

Bricks

A LEGO® BRICK MODEL OF

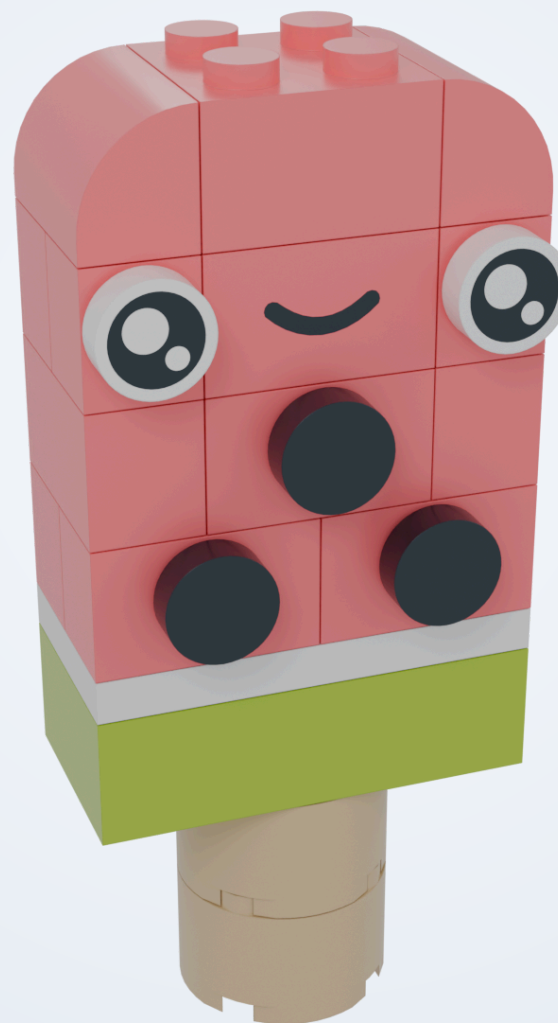

Watermelon Ice Lolly

A smiling watermelon ice lolly in 23 pieces.

23 pieces · 13 steps · 3 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance), but nobody has built it with real bricks yet.

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 57 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 3.5×1.9 cm and 7.2 cm tall, about 20 g (estimated).

A standalone transcription of the watermelon ice lolly from LEGO Classic Creative Food Friends (11039), official instruction PDF 6555451, pages 14–19. Follow all eleven numbered steps, including the seed and stick subassemblies.

You will need

- The 23 pieces in 5 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The printed smile and two-highlight eyes are the exact official prints.
- The handle is attached underneath in the last step, as shown in LEGO's instructions.

The 5 colours

 Coral: 14
 White: 3
 Black: 3

 Tan: 2
 Lime: 1

How to read the steps

Parts and step number

7

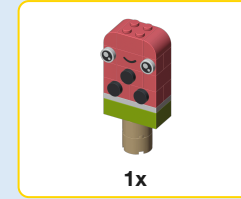

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

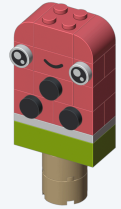

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

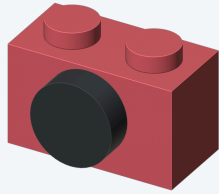

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

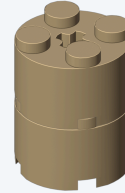

The model is built in 3 sections. Each is finished before it is used.

1. Watermelon Ice Lolly
steps 1–2, 4–11, 13

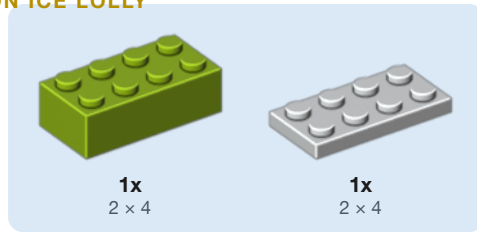

2. A watermelon seed ×3
step 3

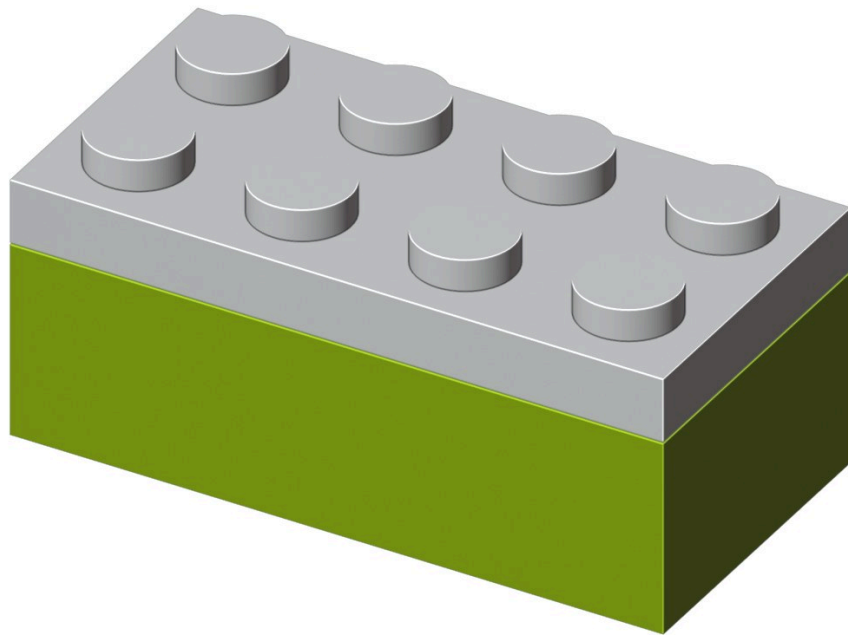

3. The lolly stick
step 12

WATERMELON ICE LOLLY

1

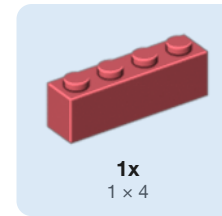

1 · The rind: white plate on the lime brick

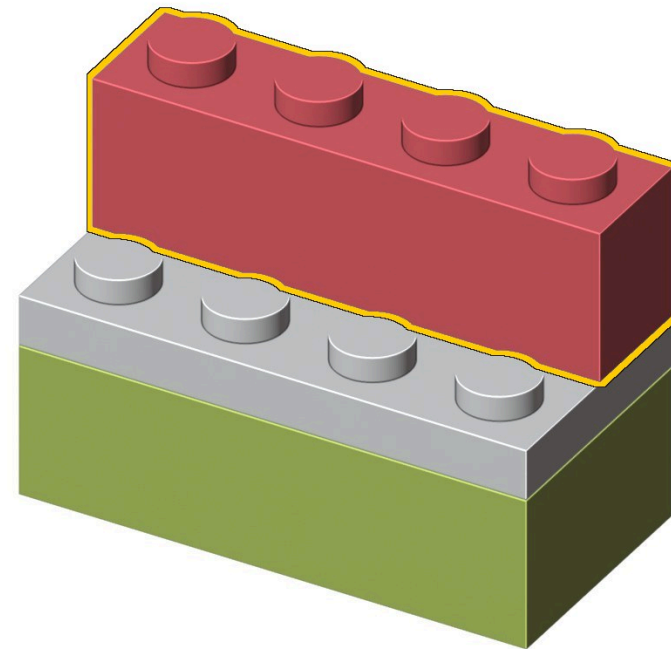

2

Watermelon Ice Lolly

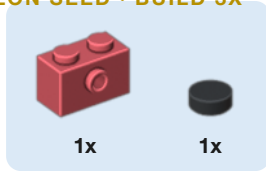

2 · The back of the first coral row

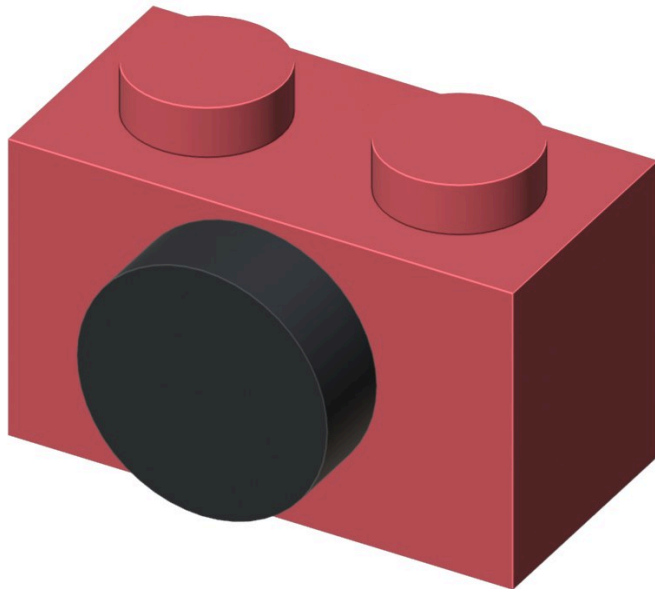

A WATERMELON SEED · BUILD 3X

3

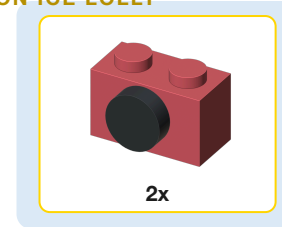

Press the black round tile onto the coral side stud

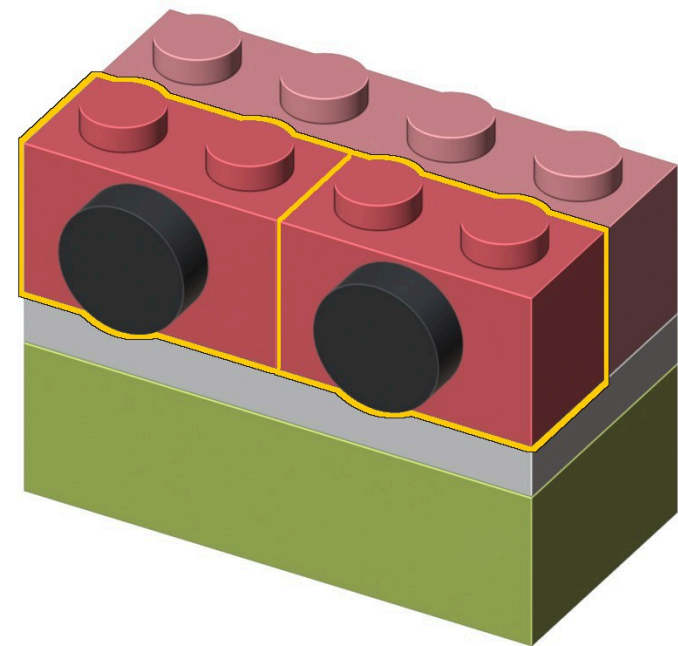

WATERMELON ICE LOLLY

4

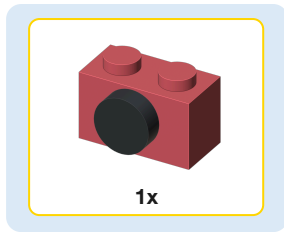

3 · Build two seeds and place them across the front

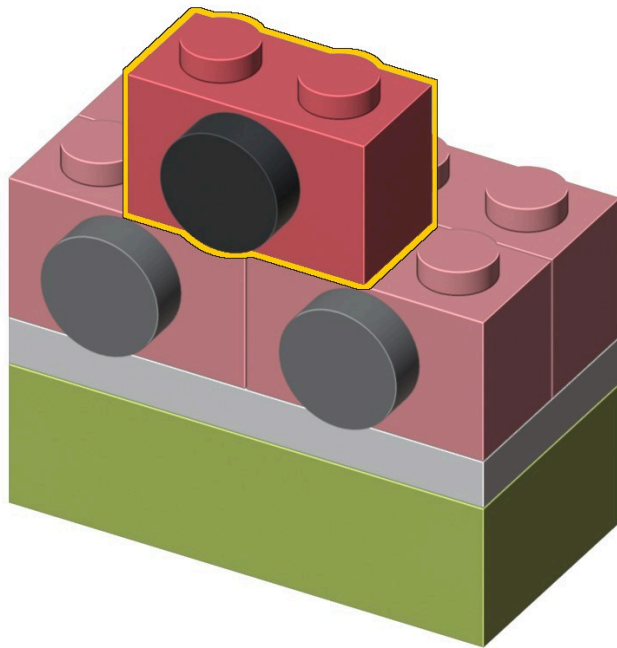

Watermelon Ice Lolly

5

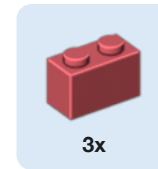

4 · Build the third seed and centre it above the first two

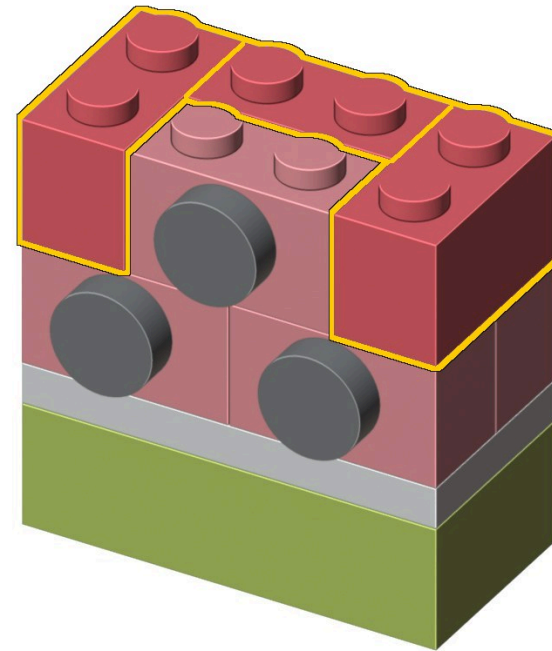

6

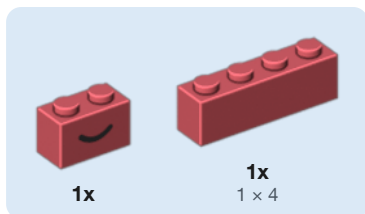

Watermelon Ice Lolly

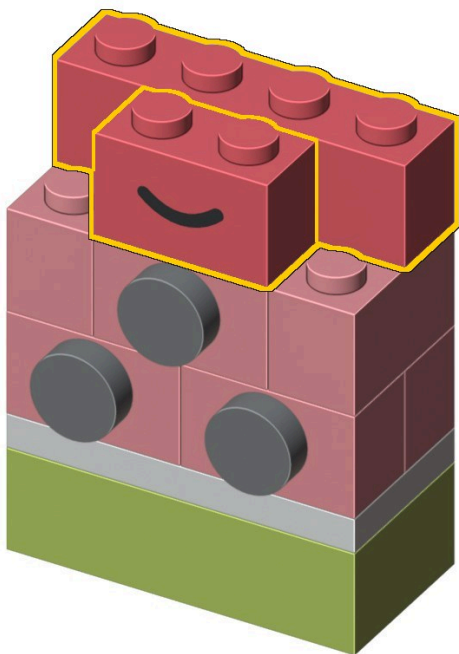

5 · Complete the second coral row with three bricks

7

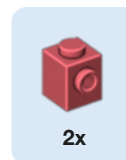

6 · Add the smiling brick and the long brick behind it

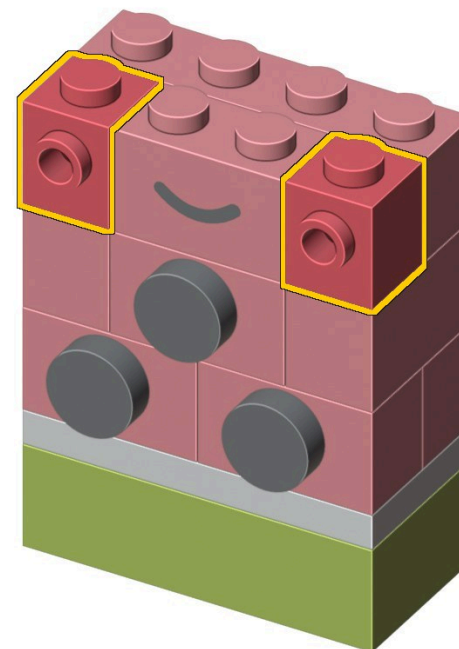

8

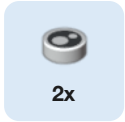

Watermelon Ice Lolly

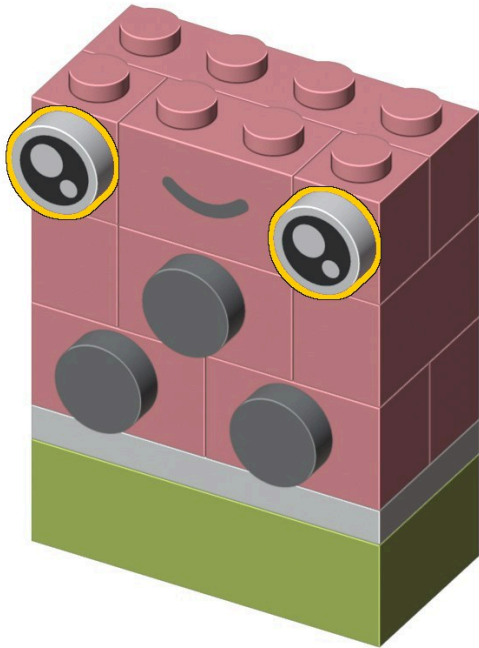

7 · Add the two bricks with studs facing forward

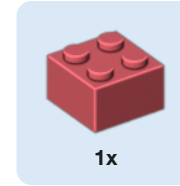

9

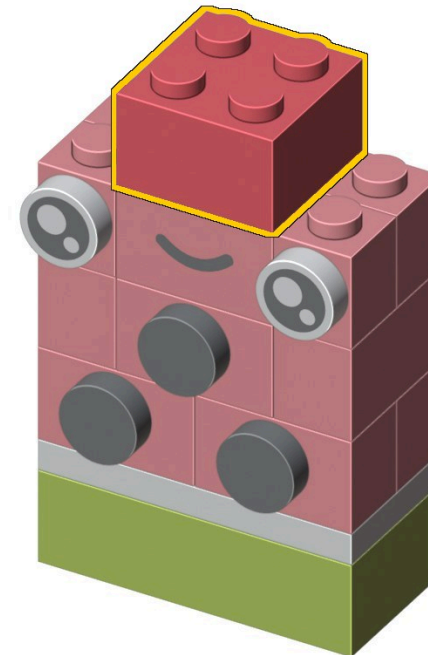

8 · Press the printed eyes onto the front studs

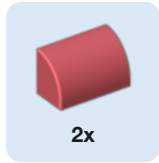

10

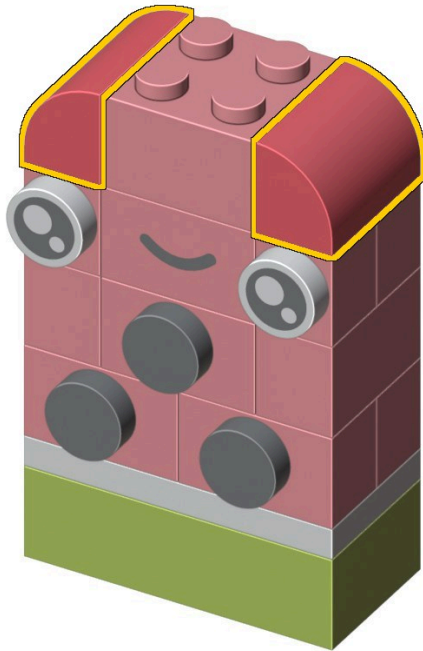

9 · Centre the square brick on top

11

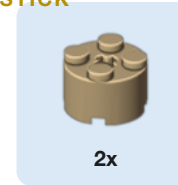

10 · Round off the two top corners

THE LOLLY STICK

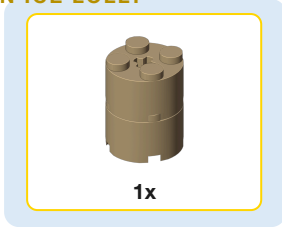

12

Stack the two tan round bricks

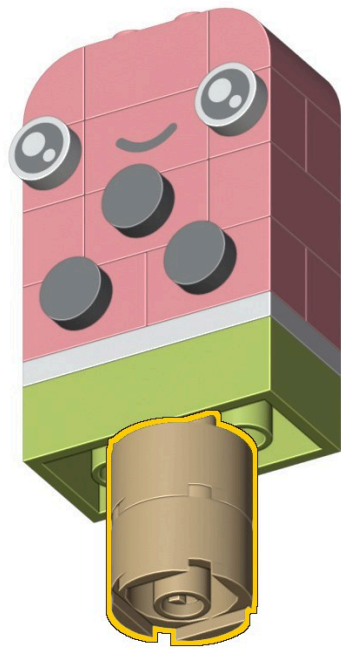

The lolly stick

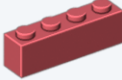

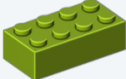

seen from below

11 · Stack the tan round bricks and attach the stick underneath

Parts inventory

23 pieces in 12 part/colour lines. Bold: the LEGO element ID (what LEGO Pick a Brick sells); below: the colour and the BrickLink part number.

About this model

A standalone transcription of the watermelon ice lolly from LEGO Classic Creative Food Friends (11039), official instruction PDF 6555451, pages 14–19. Follow all eleven numbered steps, including the seed and stick subassemblies.

Checked on a computer

WARN	real elements	12 part/colour combinations: 0 not real, 1 rare
PASS	connections	57 connections (57 stud); 1 separate piece(s)
PASS	collisions	0 overlapping pair(s) among 23 parts
PASS	buildability	20 insertions tried across 3 submodel(s); 0 problem(s)
PASS	stability	about 20 g; centre of mass inside the base (97% margin); tips at 10.2 deg
PASS	mechanism	no moving parts defined
PASS	electrics	no electrics in this model
PASS	technique	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer:
