

Bricks

A LEGO® BRICK MODEL OF

Pumpkin

A jack-o'-lantern with square eyes and a toothy grin, built sideways in 51 pieces.

Designed by BrixBuild

51 pieces · 24 steps · 6 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance), but nobody has built it with real bricks yet.

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by BrixBuild (<https://rebrickable.com/mocs/MOC-163756/>). These steps were worked out from it here; they are not the designer's own instructions.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 132 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 5.4×5.3 cm and 6.8 cm tall, about 44 g (estimated).

A grey core of two halves, built upside down and the right way up, gets its orange rind from the side: the mouth and eyes panels on the front and a side panel on the back, left and right. The side panels tie the halves together. Finish with the green stem and its leaf.

You will need

- The 51 pieces in 5 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 5 colours

 Orange: 28
 Light Bluish Gray: 16
 Black: 3

 Green: 3
 Bright Green: 1

How to read the steps

Parts and step number

7

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

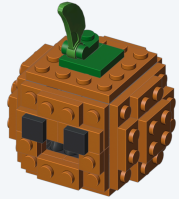

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

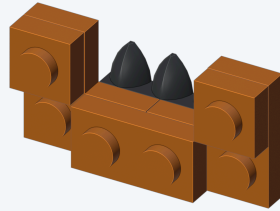

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

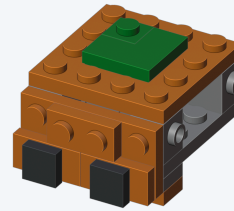

The model is built in 6 sections. Each is finished before it is used.

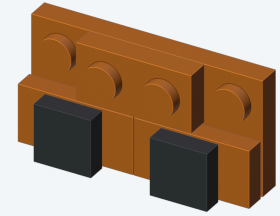

1. Pumpkin
steps 1–4, 8, 21–22, 24

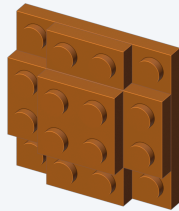

2. Mouth panel
steps 5–7

3. Head half
steps 9–13, 17

4. Eyes panel
steps 14–16

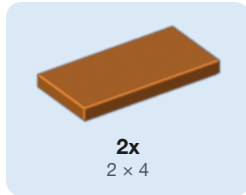

5. Side panel x3
steps 18–20

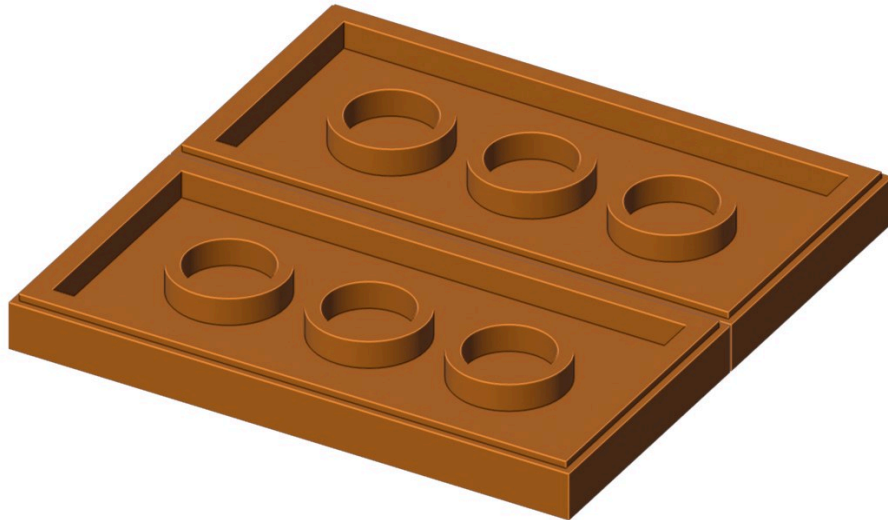

6. Stem
step 23

PUMPKIN

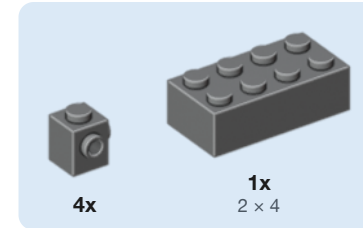

1

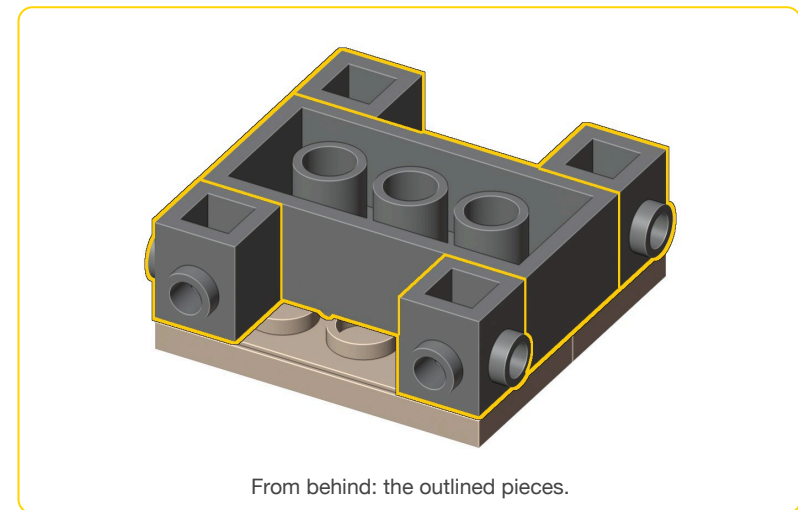

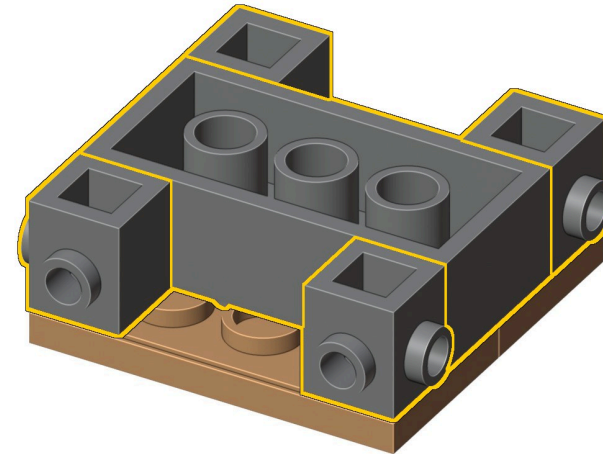

Two 2 x 4 tiles side by side, smooth side down

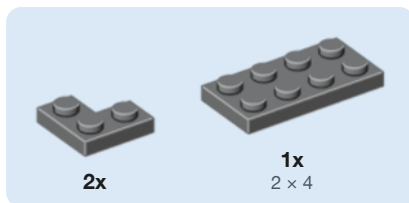

2

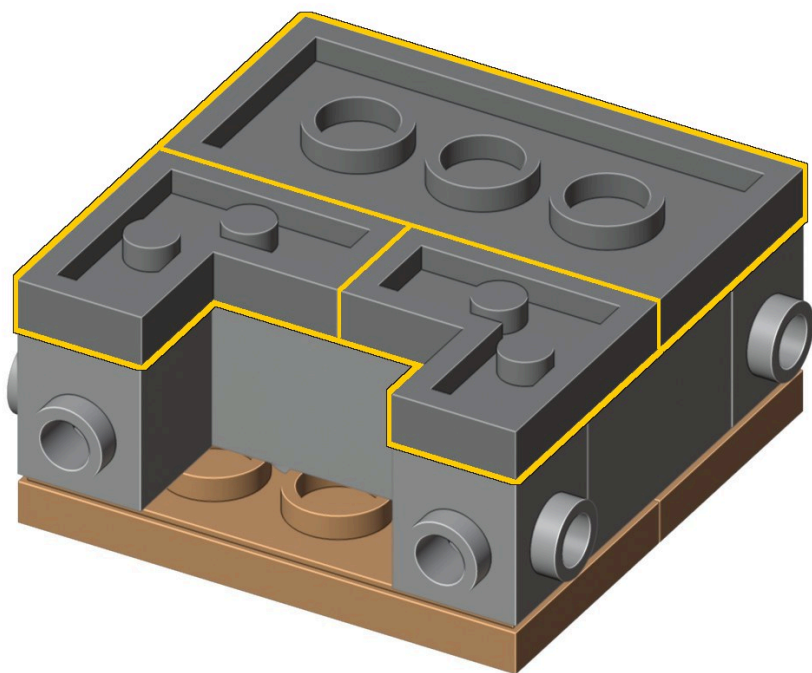

Four bricks with studs on two sides in the corners, studs out, and a 2 x 4 brick

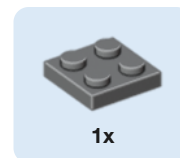

3

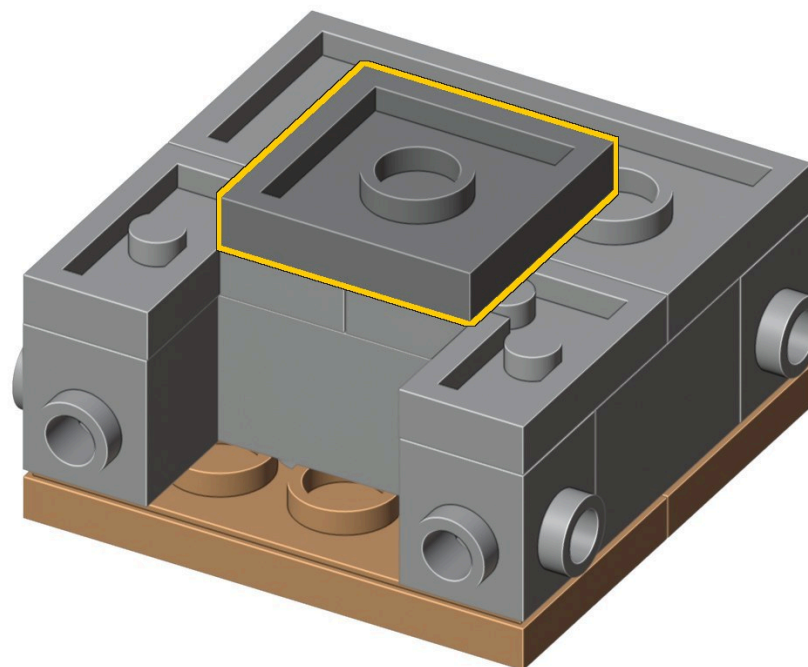

A 2 x 4 plate along the back, and two corner plates leaving the front open

4

A 2 x 2 plate in the middle

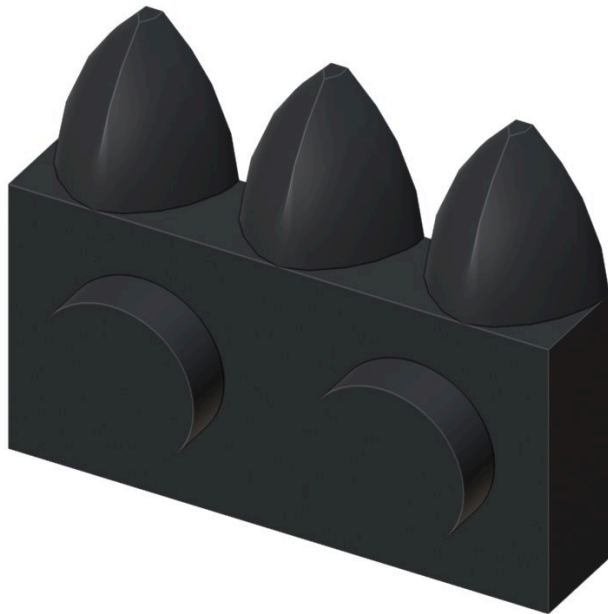

Pumpkin

MOUTH PANEL

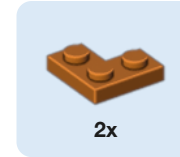

5

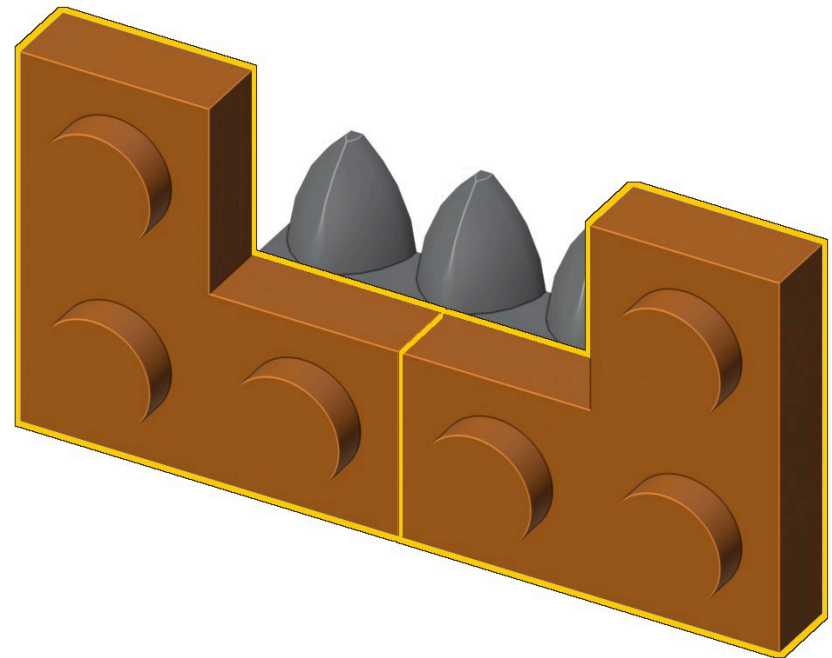

The three teeth: a 1 x 2 plate, its studs out, the teeth up

6

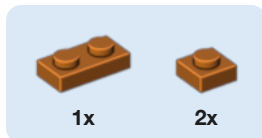

Two corner plates on the teeth plate's studs, round the open mouth

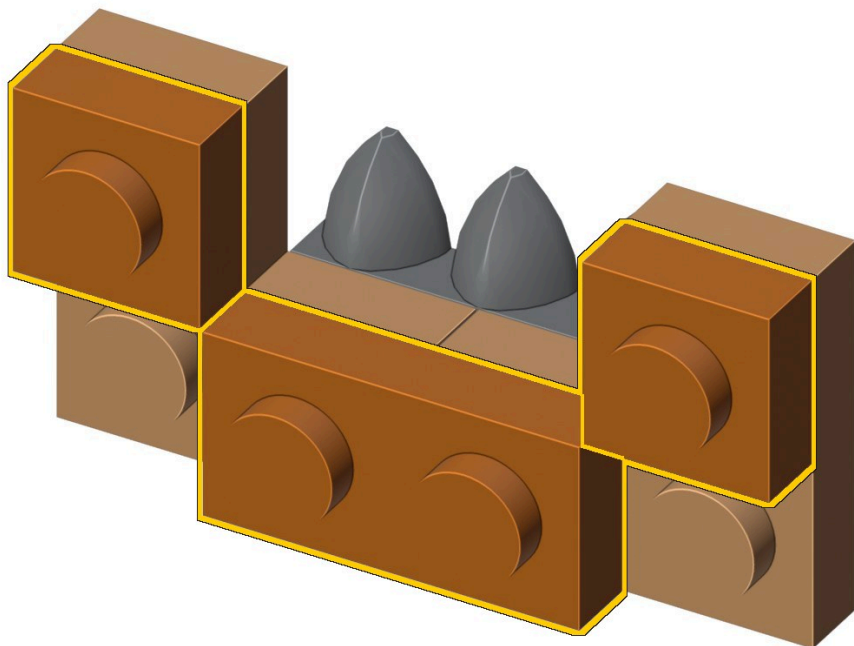

Mouth panel

7

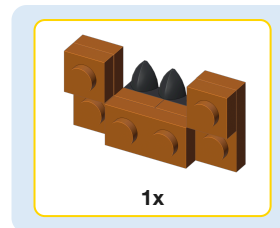

A plate on each upper corner and a 1 x 2 plate along the bottom

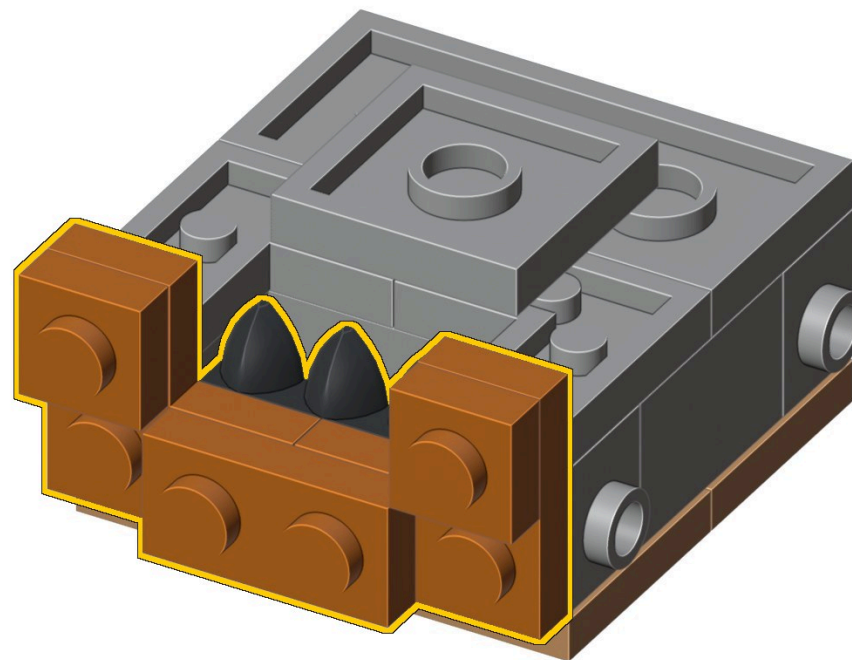

PUMPKIN

8

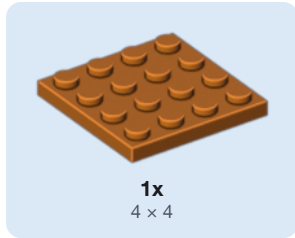

The mouth panel goes on the front of the base

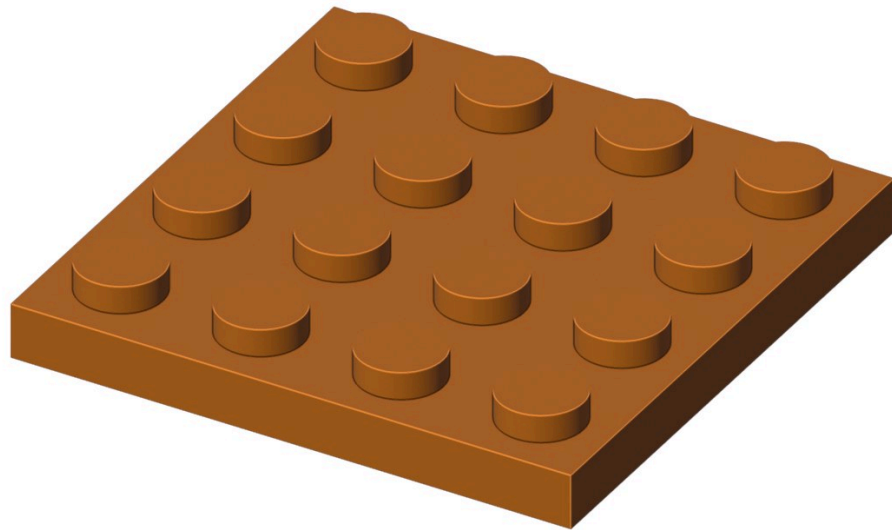

Pumpkin

HEAD HALF

9

The top: a 4 x 4 plate (it is built upside down, studs down)

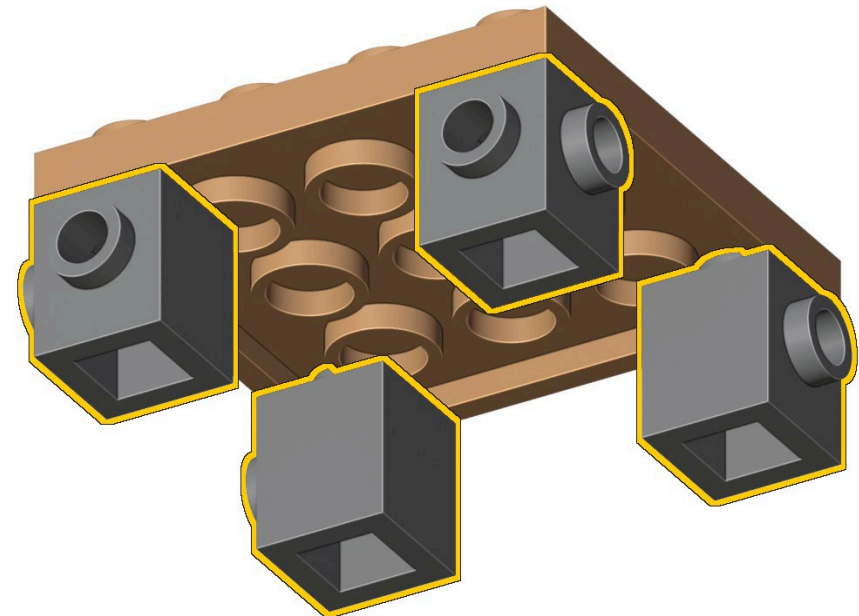

10

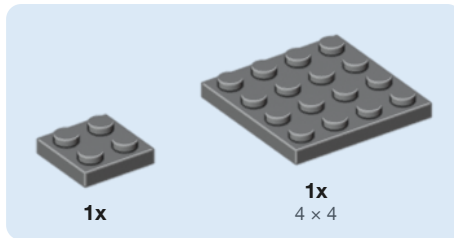

Four bricks with studs on two sides, one in each corner, studs out

Head half

seen from below

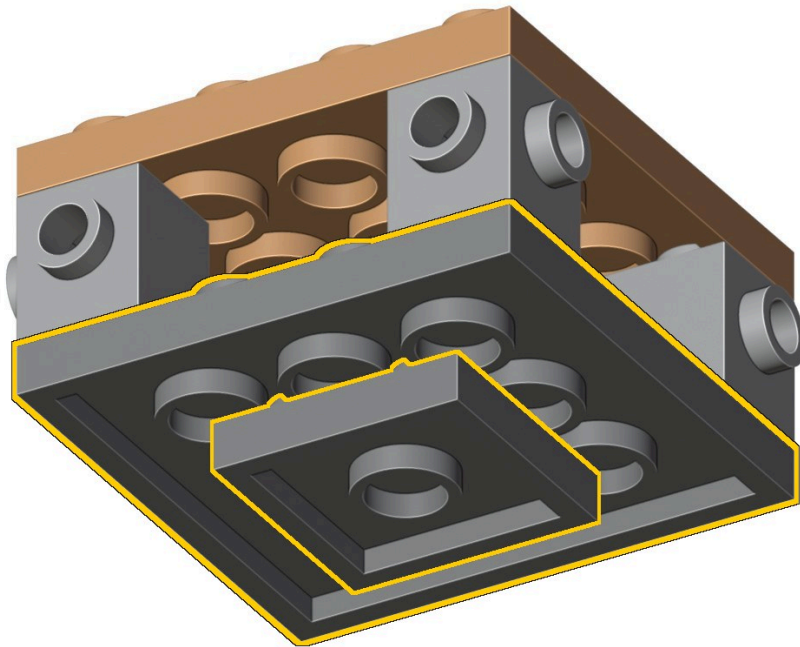

11

seen from below

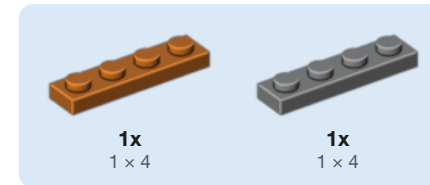

A grey 4 x 4 plate across them and a 2 x 2 plate under its middle

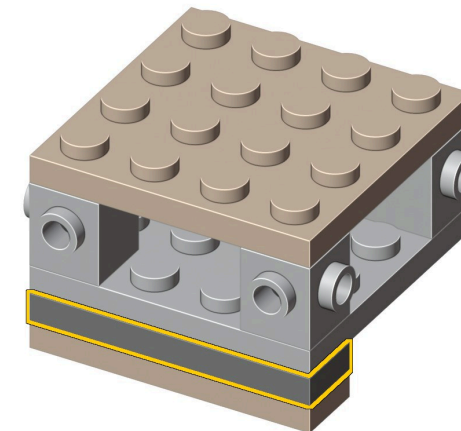

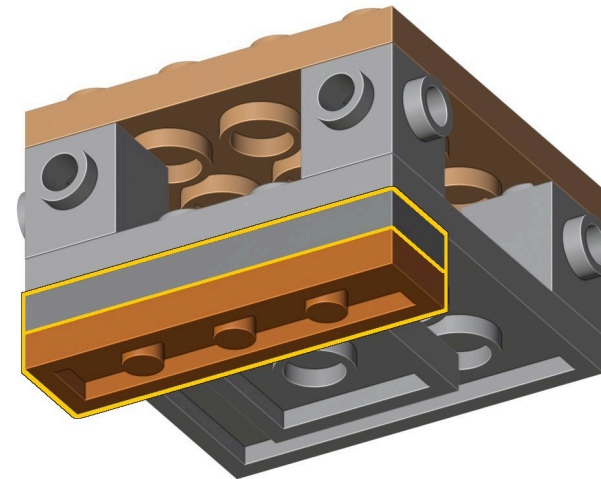

12

Head half

seen from below

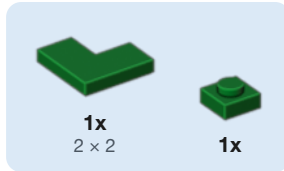

Two 1 x 4 plates, grey then orange, under the front edge

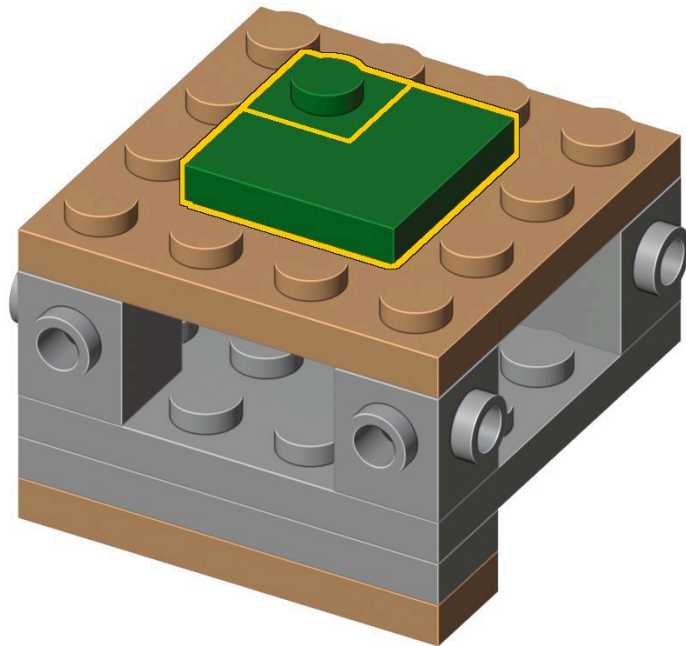

From above: the outlined piece.

13

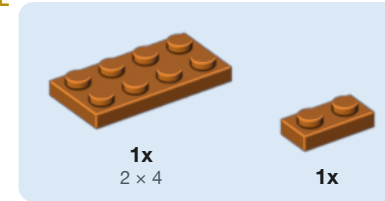

The green stem base: a corner tile and a 1 x 1 plate

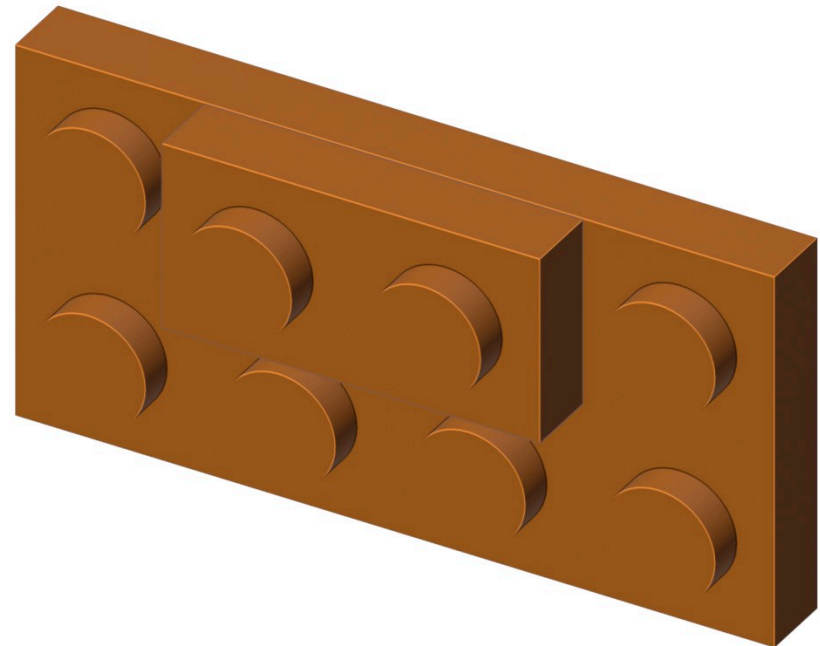

EYES PANEL

14

A 2 x 4 plate with a 1 x 2 plate on its top middle

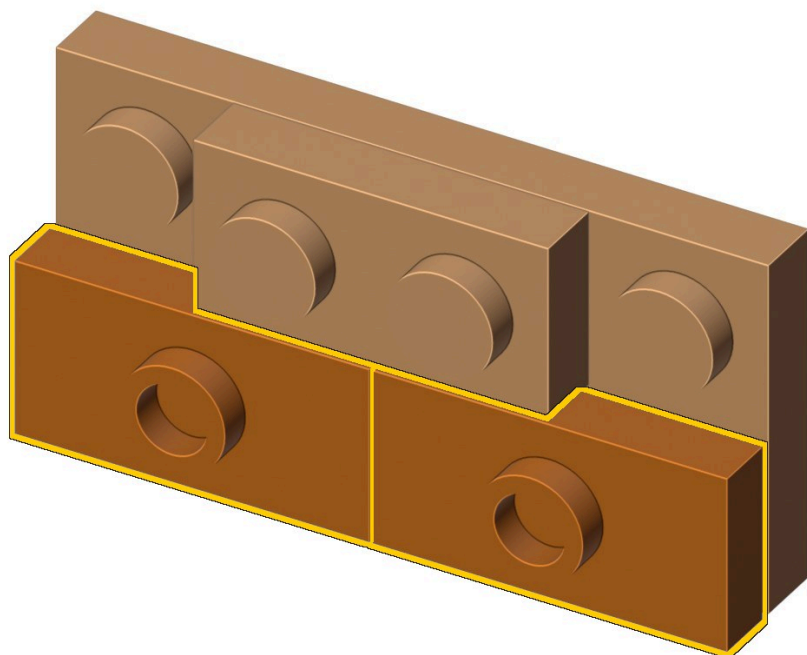

Eyes panel

15

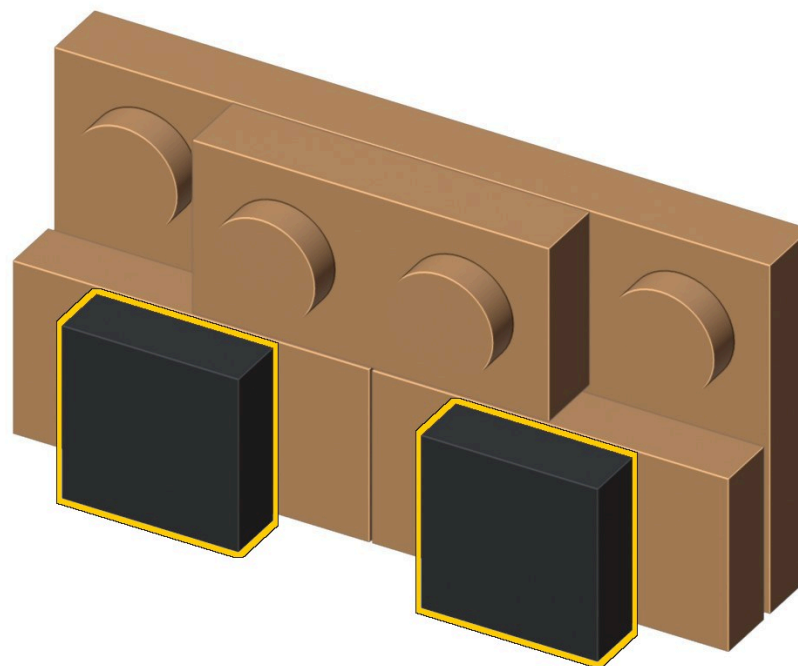

Two 1 x 2 plates with a stud in the middle, along the bottom row

16

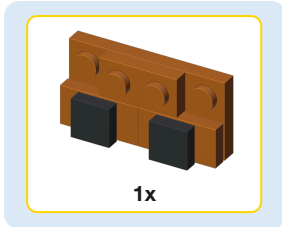

A black tile on each stud: the eyes

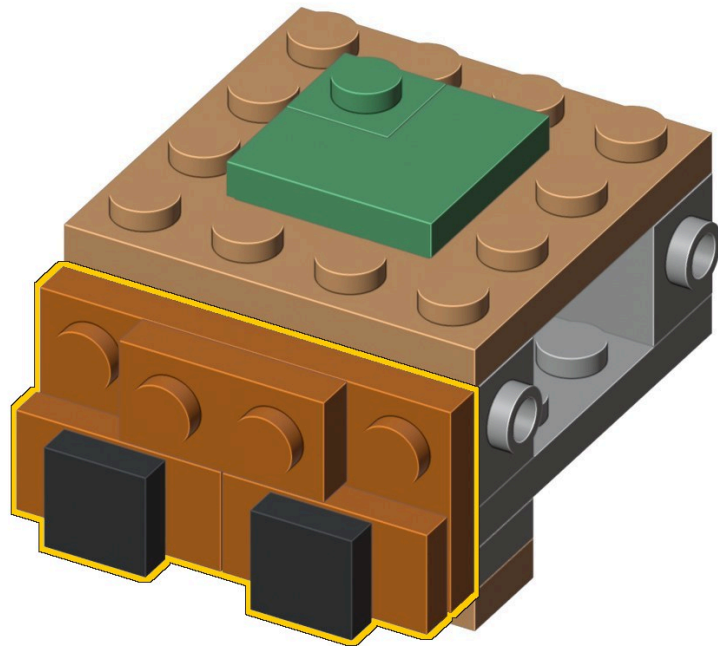

Eyes panel

HEAD HALF

17

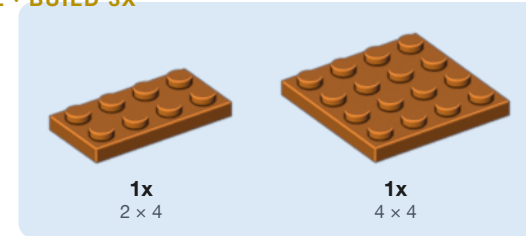

The eyes panel goes on the front of the head

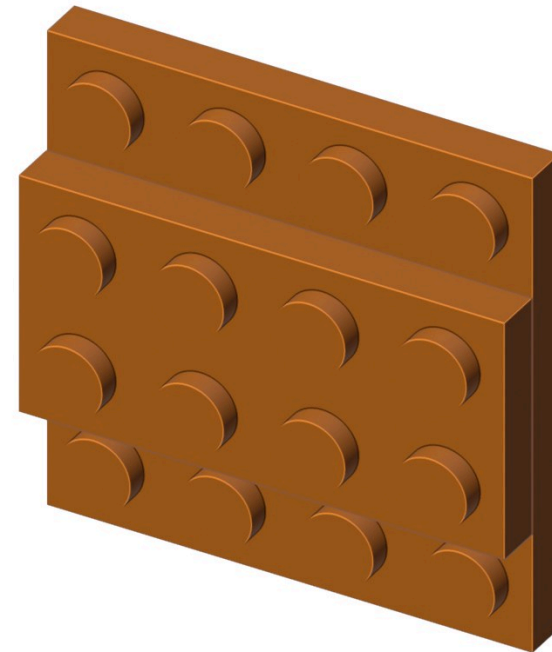

SIDE PANEL · BUILD 3X

18

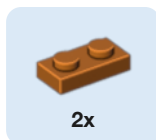

A 4 x 4 plate with a 2 x 4 plate across its middle rows

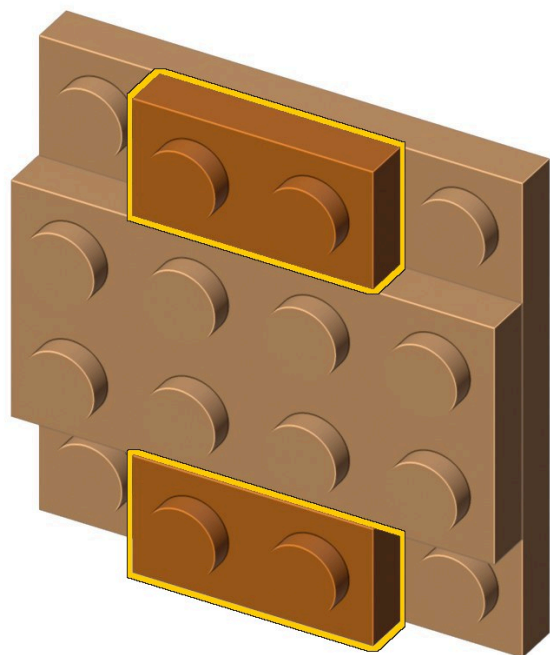

Side panel

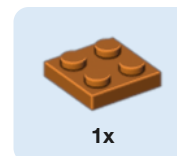

19

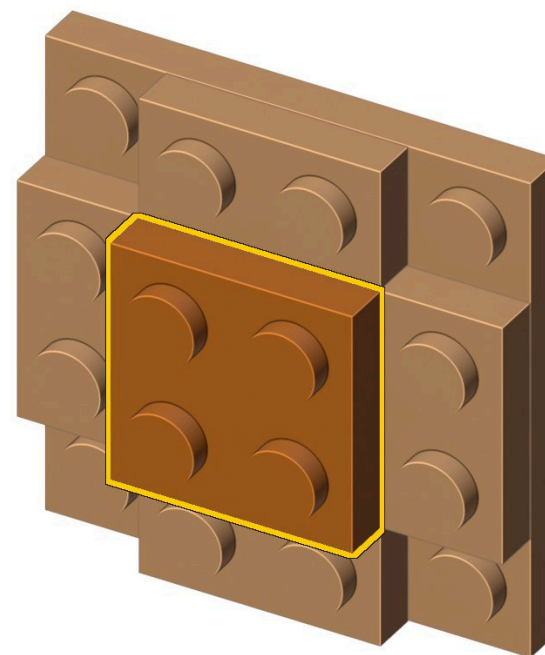

A 1 x 2 plate on the top row and another on the bottom row

20

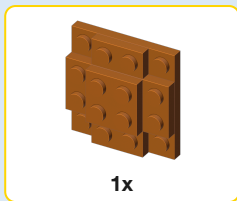

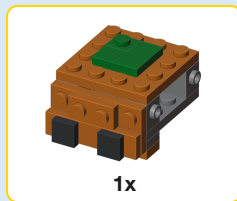

A 2 x 2 plate in the middle

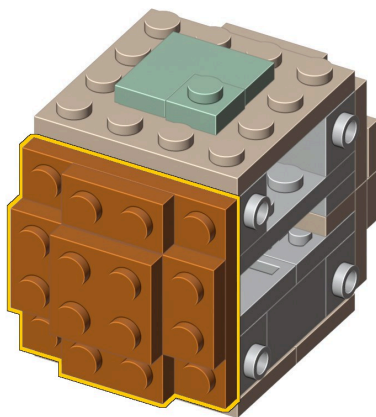

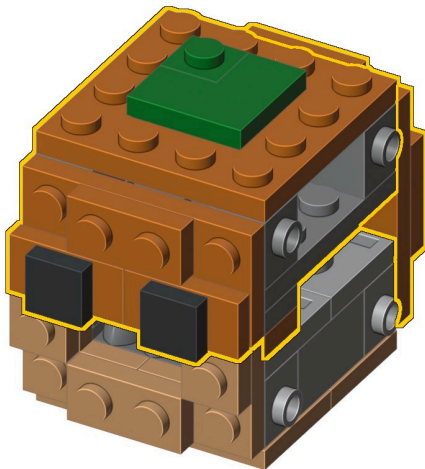

Side panel

PUMPKIN 21

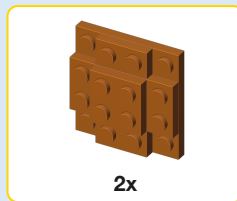

The head half sits on the base, and a side panel across the back ties them

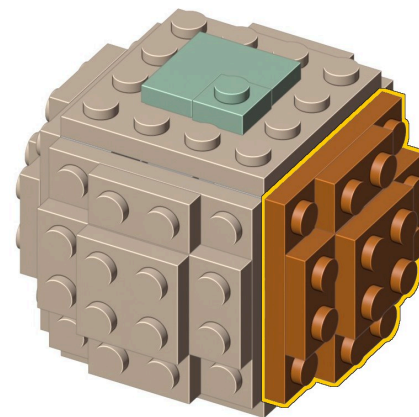

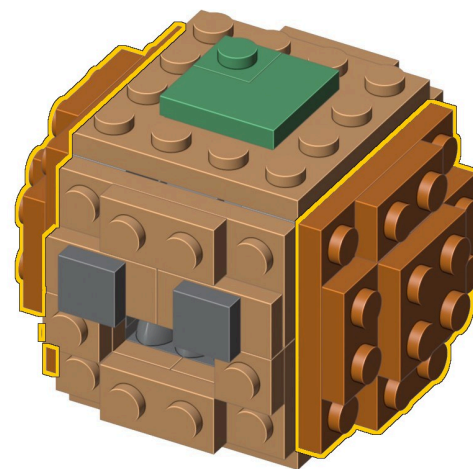

From behind: the outlined piece.

22

Pumpkin

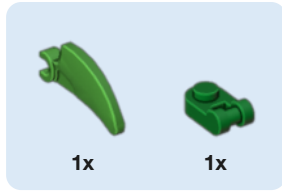

A side panel on each side

From behind: the outlined piece.

STEM 23

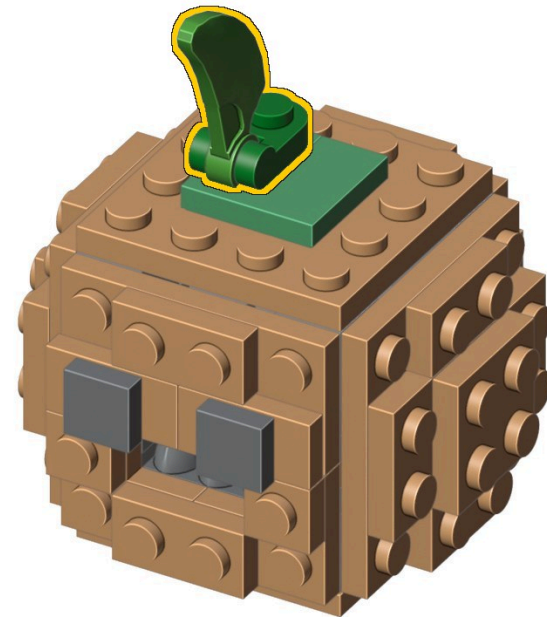

A leaf clipped on the handle of a round plate

PUMPKIN 24

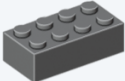

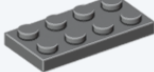

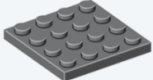

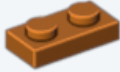

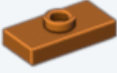

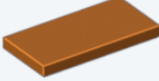

The stem on the green plate

Pumpkin

Parts inventory

51 pieces in 22 part/colour lines. Bold: the LEGO element ID (what LEGO Pick a Brick sells); below: the colour and the BrickLink part number.

About this model

A grey core of two halves, built upside down and the right way up, gets its orange rind from the side: the mouth and eyes panels on the front and a side panel on the back, left and right. The side panels tie the halves together. Finish with the green stem and its leaf.

Checked on a computer

PASS	real elements	22 part/colour combinations: 0 not real, 0 rare
PASS	connections	132 connections (131 stud, 1 clip); 1 separate piece(s)
PASS	collisions	0 overlapping pair(s) among 51 parts
PASS	buildability	41 insertions tried across 6 submodel(s); 0 problem(s)
PASS	stability	about 44 g; centre of mass inside the base (99% margin); tips at 39.1 deg
PASS	mechanism	no moving parts defined
PASS	electrics	no electrics in this model
PASS	technique	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer:
