

Bricks

A LEGO® BRICK MODEL OF

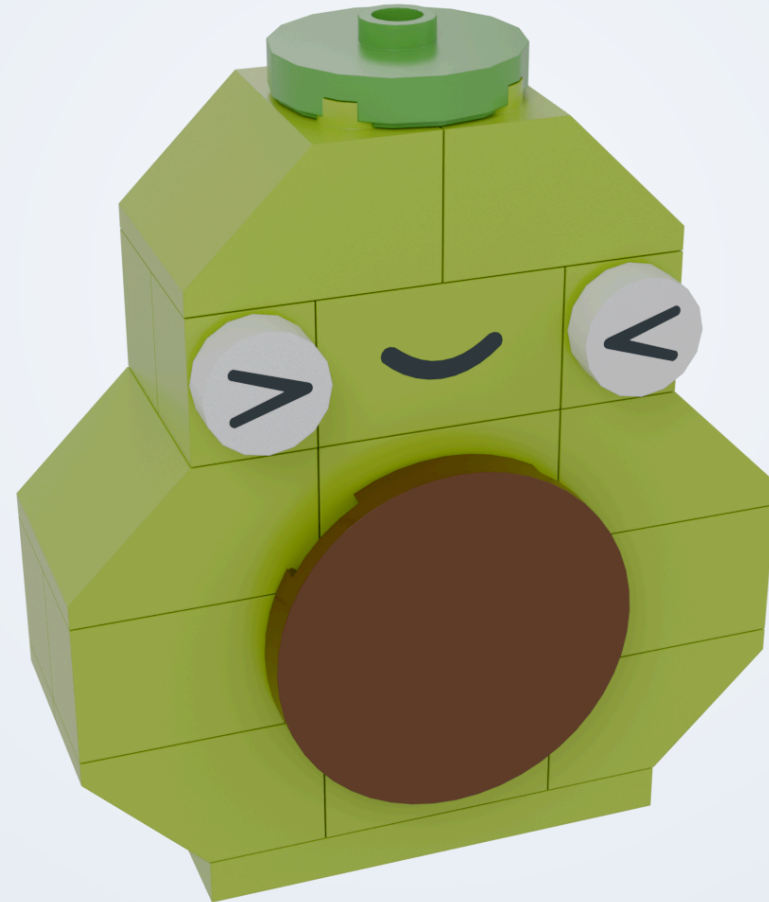

Avocado

A smiling avocado in 23 pieces.

23 pieces · 17 steps · 3 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance), but nobody has built it with real bricks yet.

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 55 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 4.8×1.9 cm and 5.6 cm tall, about 22 g (estimated).

Build the standalone avocado from LEGO Classic 11039, following all 15 numbered steps on pages 22-31 of the official LEGO instructions. The two cheeks are built separately before they join the body.

You will need

- The 23 pieces in 4 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The cheek subassemblies correspond to the callouts in official steps 6 and 7.
- Use the exact smile brick and squeezed-shut eye prints shown in the parts list.

The 4 colours

 Lime: 19

 White: 2

 Reddish Brown: 1

 Bright Green: 1

How to read the steps

Parts and step number

7

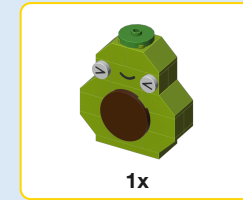

2x

The parts for the step and how many of each, then the step number. All parts are drawn at one scale.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

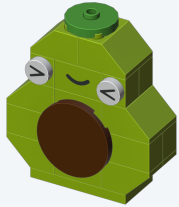

When a step adds parts underneath, the picture shows the model from below. A small label says so.

Insert direction

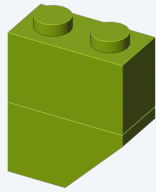

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

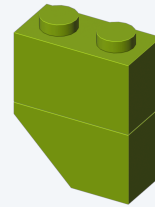

The model is built in 3 sections. Each is finished before it is used.

1. Avocado
steps 1–5, 7, 9–17

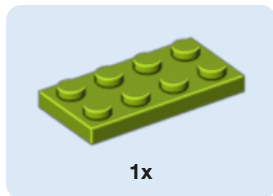

2. Step 6: build the right cheek
step 6

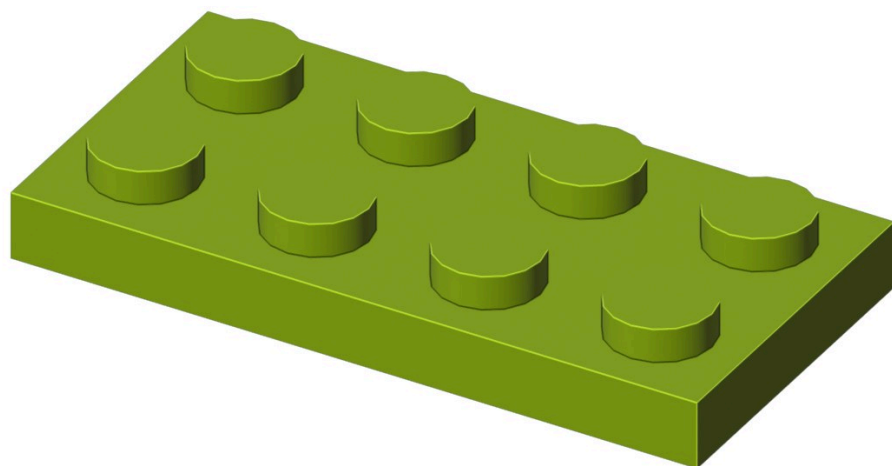

3. Step 7: build the left cheek
step 8

AVOCADO

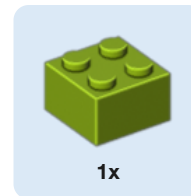

1

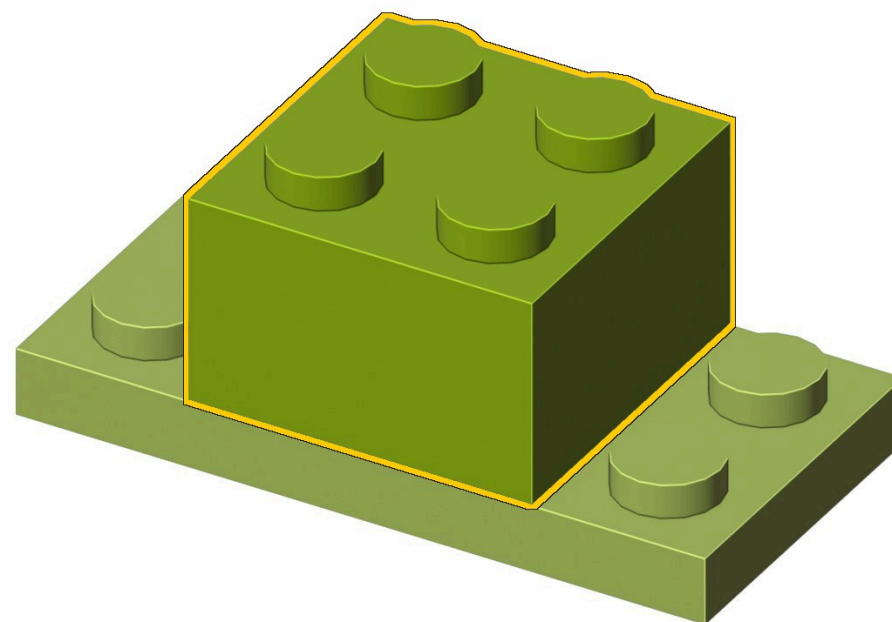

1 · The lime base

2

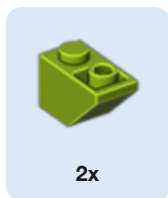

2 · The centre of the avocado

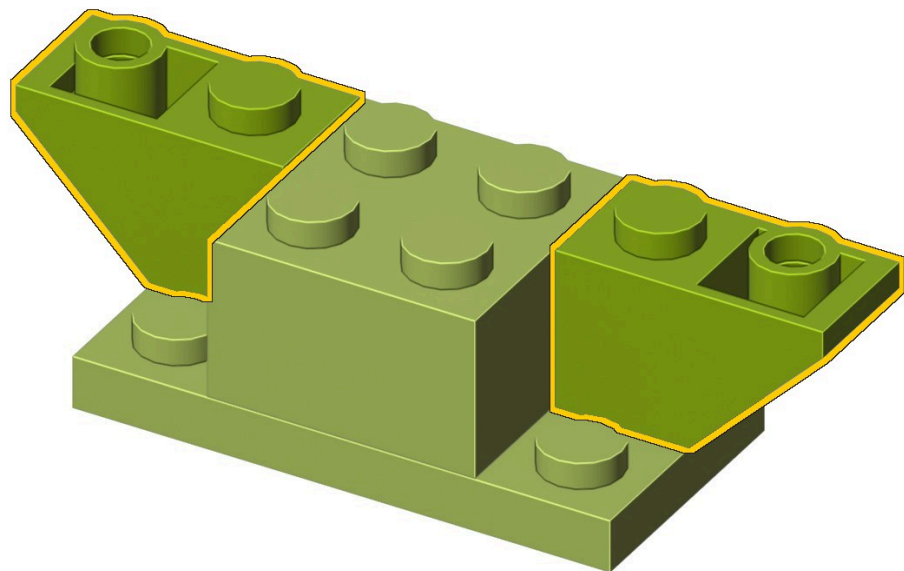

Avocado

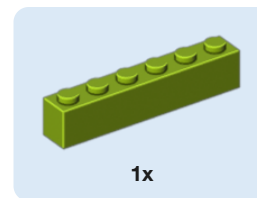

3

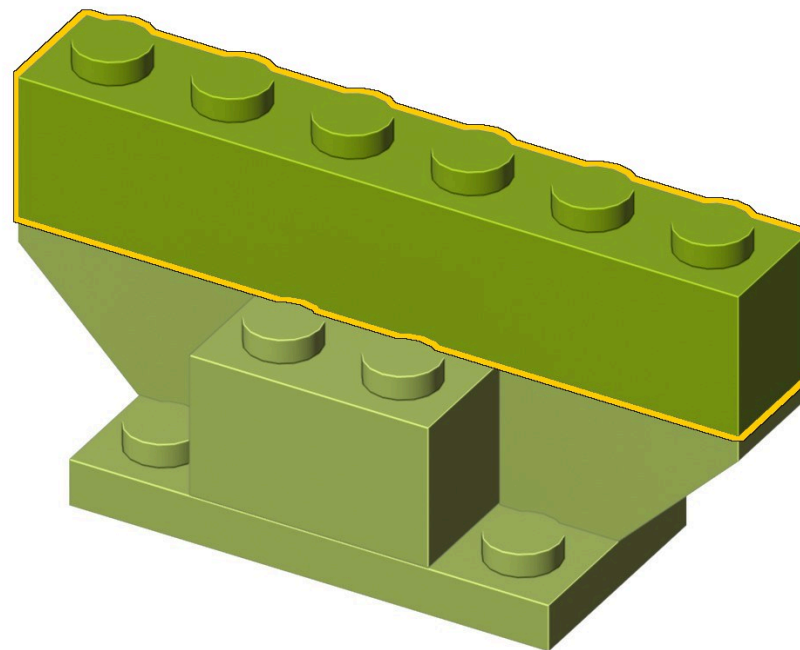

3 · The two back corners slope inward

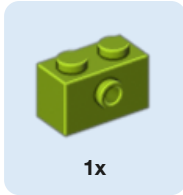

4

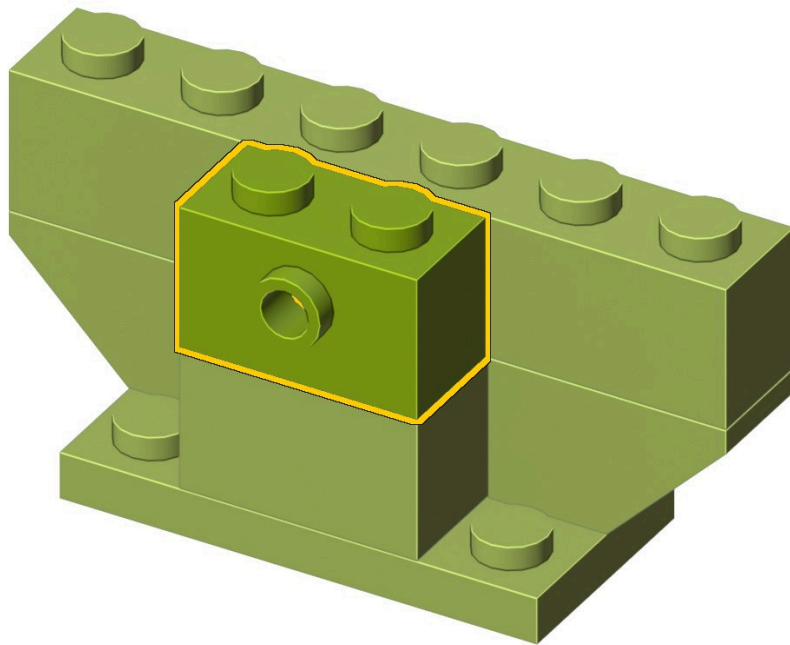

4 · Join the back with a six-stud brick

5

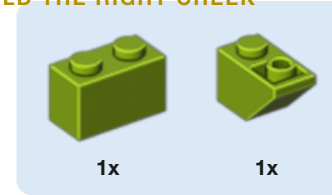

5 · The stud for the stone

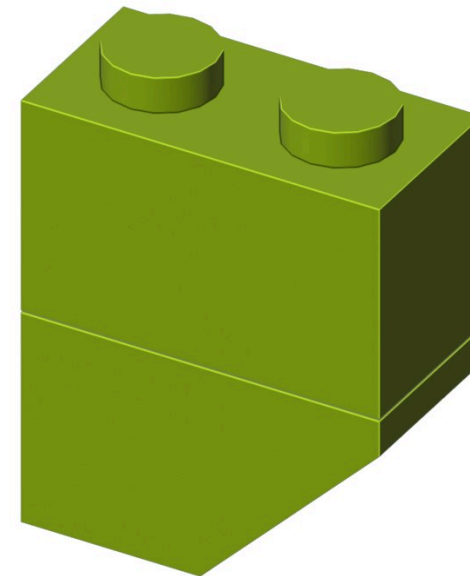

STEP 6: BUILD THE RIGHT CHEEK

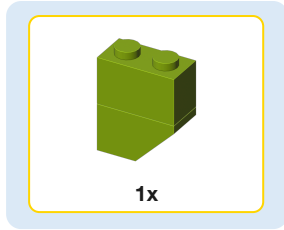

6

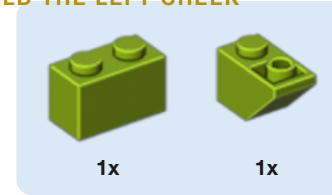

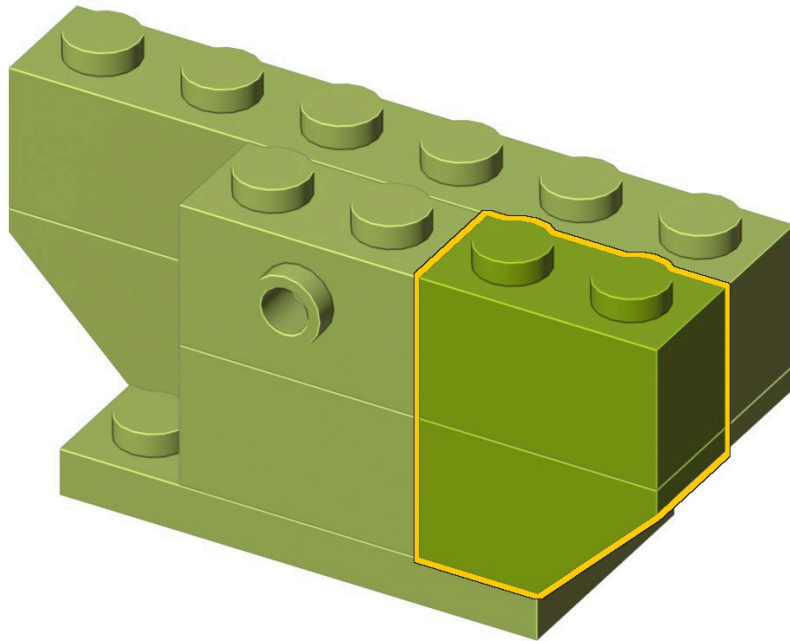

Stack the brick on the inverted slope

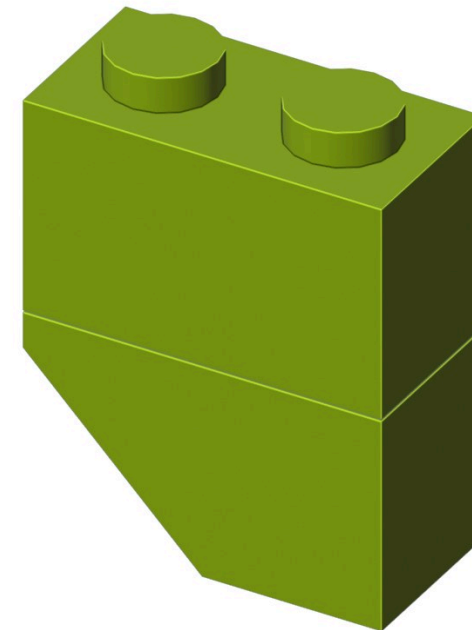

Step 6: build the right cheek

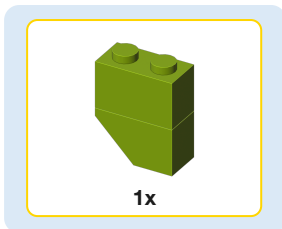

6 · Attach the right cheek

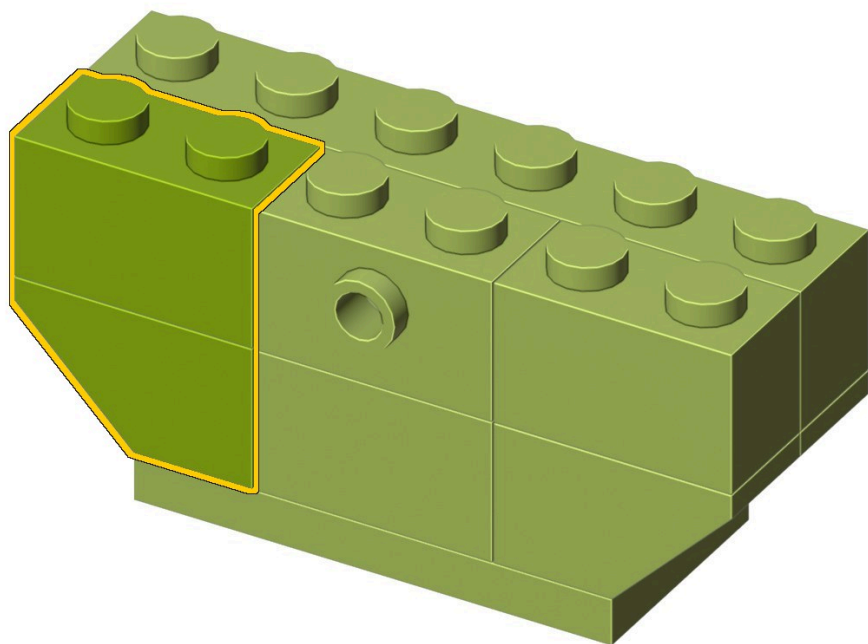

Stack the brick on the inverted slope

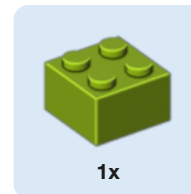

9

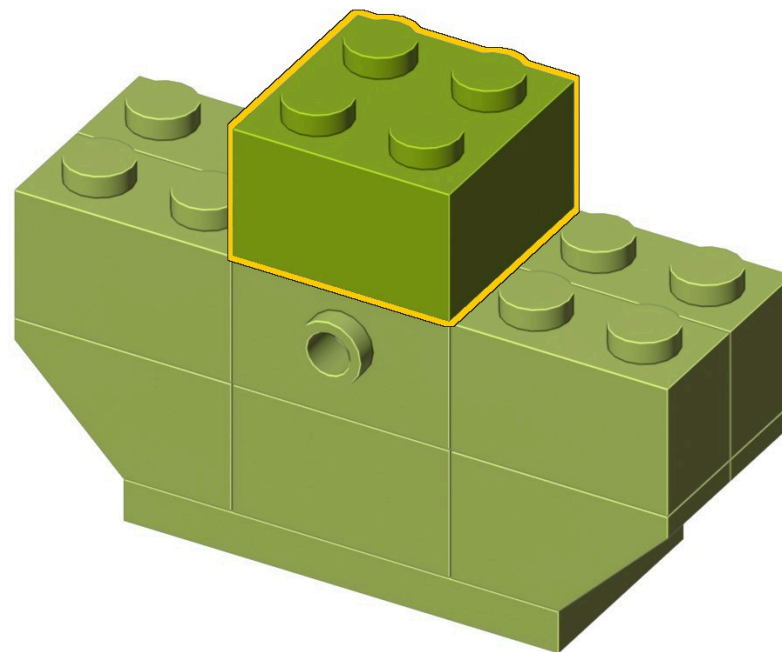

7 · Attach the left cheek

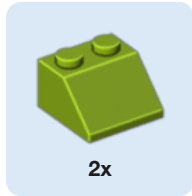

10

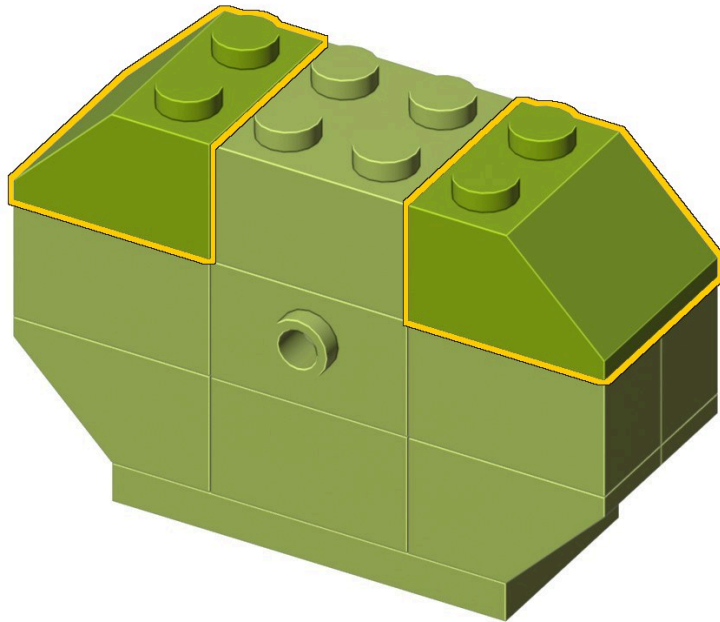

8 · A square brick above the stone

11

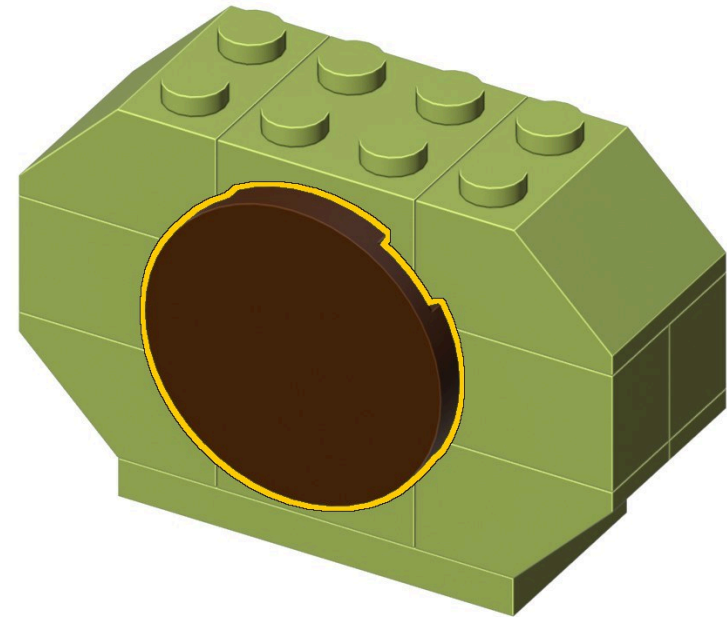

9 · Round off both shoulders

12

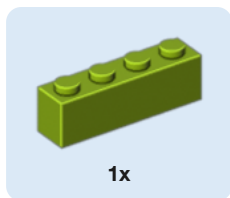

10 · The round brown stone

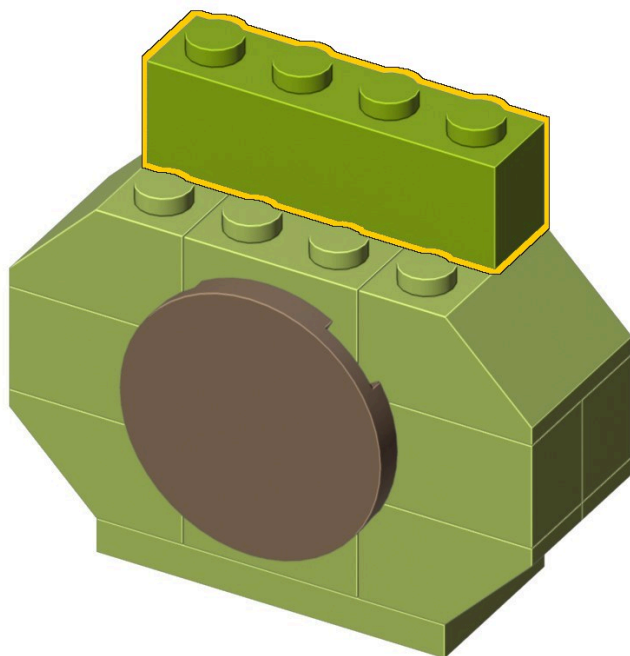

Avocado

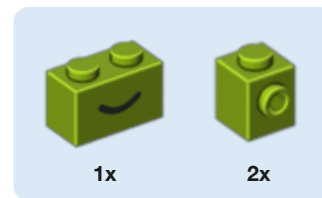

13

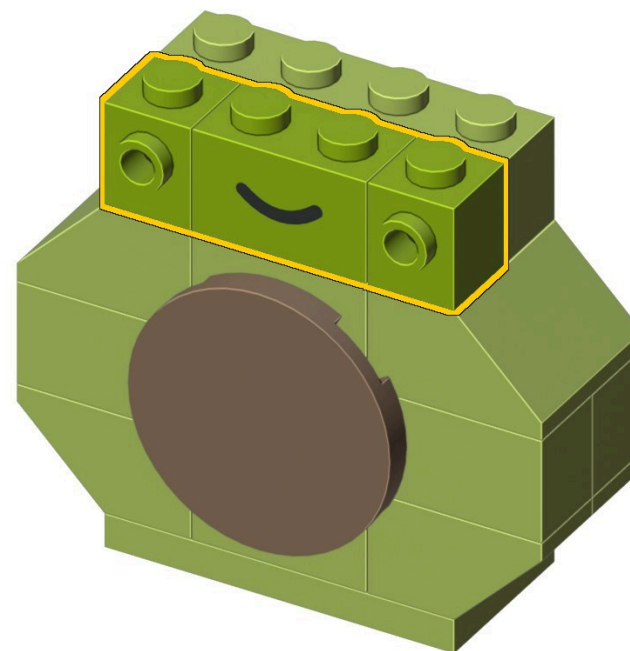

11 · Build the back of the head

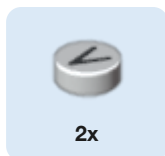

14

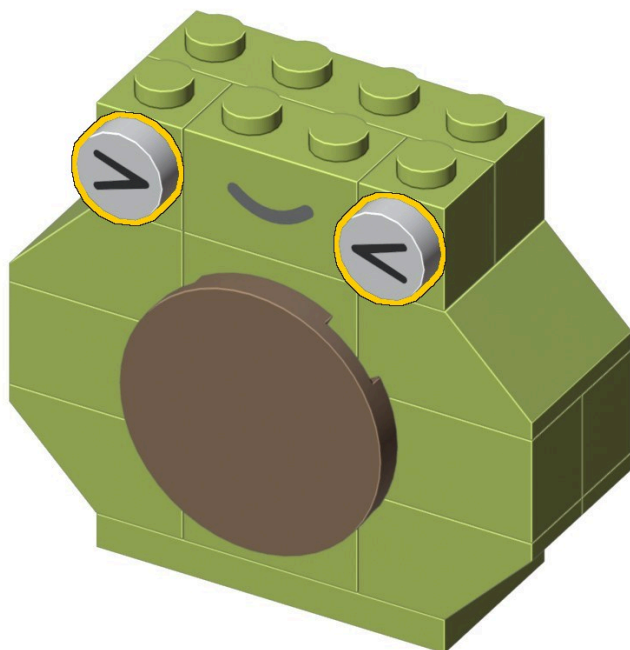

12 · A smile between the eye studs

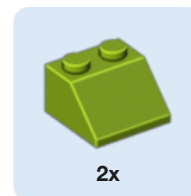

15

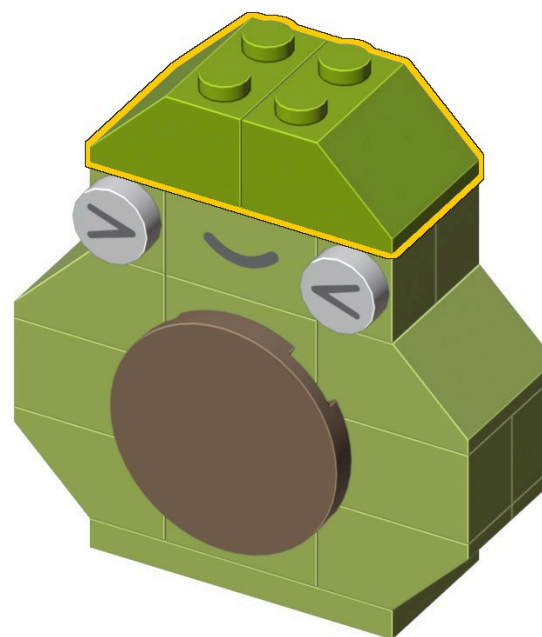

13 · Two squeezed-shut eyes

16

14 · The tapered top

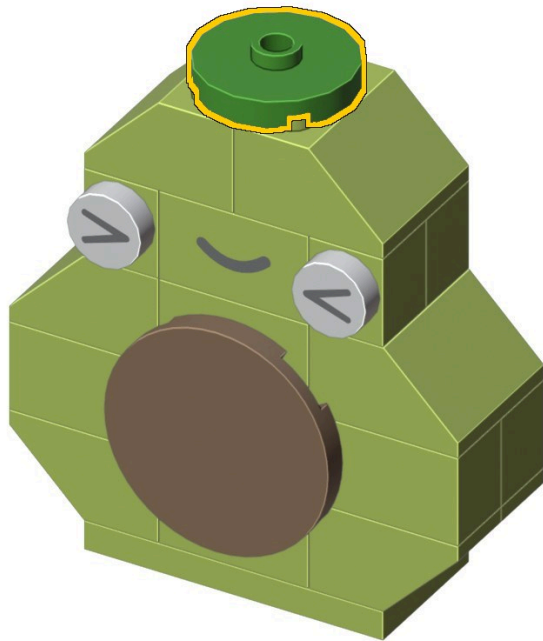

Avocado

17

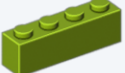

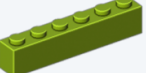

15 · Finish with the green stem cap

Avocado

Parts inventory

23 pieces in 13 part/colour lines. Bold: the LEGO element ID (what LEGO Pick a Brick sells); below: the colour and the BrickLink part number.

About this model

Build the standalone avocado from LEGO Classic 11039, following all 15 numbered steps on pages 22-31 of the official LEGO instructions. The two cheeks are built separately before they join the body.

Checked on a computer

PASS	real elements	13 part/colour combinations: 0 not real, 0 rare
PASS	connections	55 connections (55 stud); 1 separate piece(s)
PASS	collisions	0 overlapping pair(s) among 23 parts
PASS	buildability	22 insertions tried across 3 submodel(s); 0 problem(s)
PASS	stability	about 22 g; centre of mass inside the base (92% margin); tips at 17.0 deg
PASS	mechanism	no moving parts defined
PASS	electrics	no electrics in this model
PASS	technique	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer:
