

Bricks

A LEGO® BRICK MODEL OF

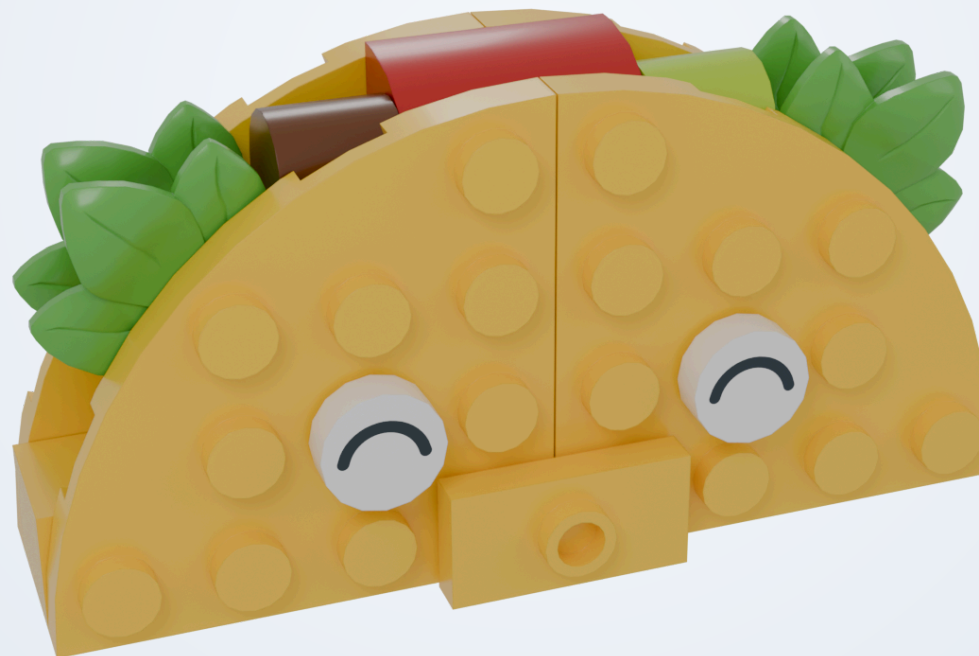

Taco

A happy little taco in 23 pieces.

23 pieces · 12 steps · 1 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance), but nobody has built it with real bricks yet.

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 52 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 6.4×2.1 cm and 3.2 cm tall, about 19 g (estimated).

Build the standalone taco from LEGO Classic 11039 with all 12 steps on pages 34-40 of the official instructions. The finished model stands on its straight folded edge, as shown on page 41.

You will need

- The 23 pieces in 7 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- For a hands-on build, lay the taco flat while stacking the shell and filling, then stand it upright on the folded edge.
- The coral brick and the white round plates are hidden inside the finished taco but are included in the parts list and build steps.

The 7 colours

 Yellow: 6	 Lime: 2
 White: 6	 Coral: 1
 Bright Green: 4	 Reddish Brown: 1
 Red: 3	

How to read the steps

Parts and step number

7

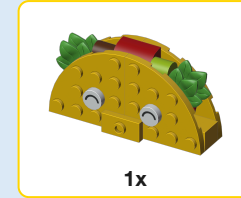

2x

The parts for the step and how many of each, then the step number. All parts are drawn at one scale.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

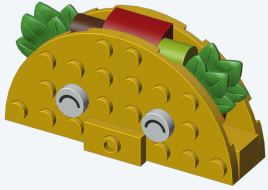

When a step adds parts underneath, the picture shows the model from below. A small label says so.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

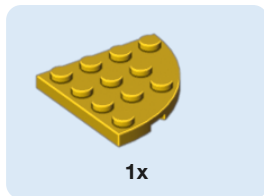

The model is built in 1 sections. Each is finished before it is used.

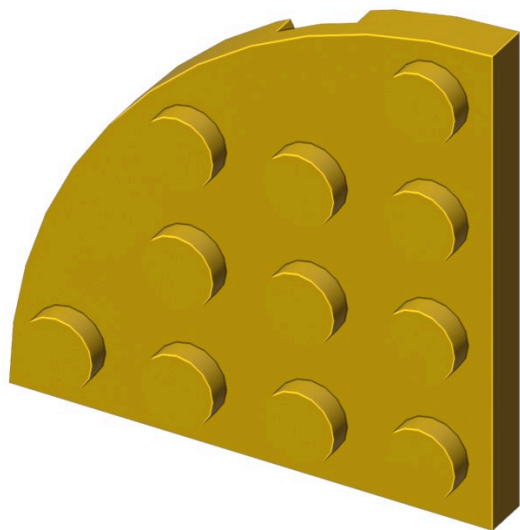

1. Taco
steps 1–12

TACO

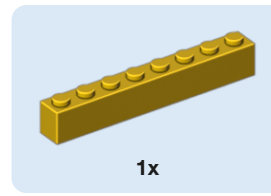

1

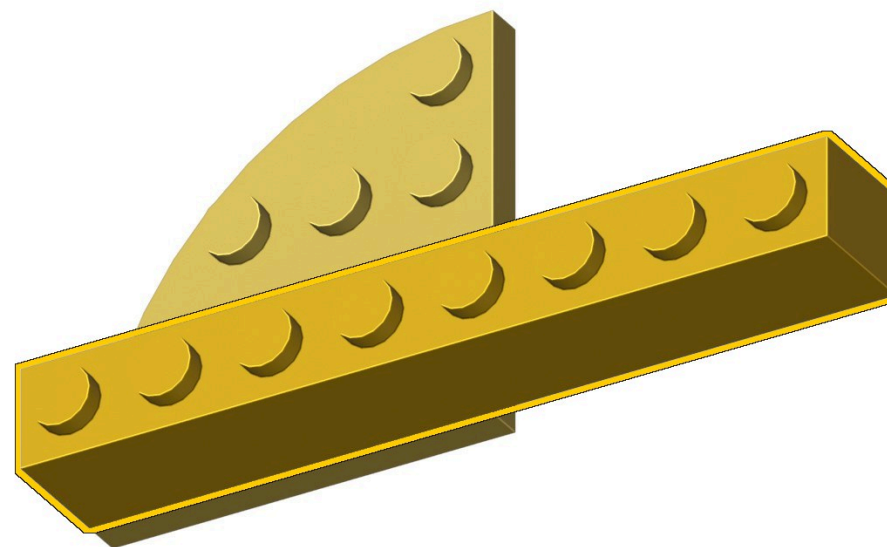

1 · The first curved shell corner

2

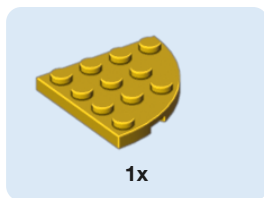

2 · The eight-stud folded edge

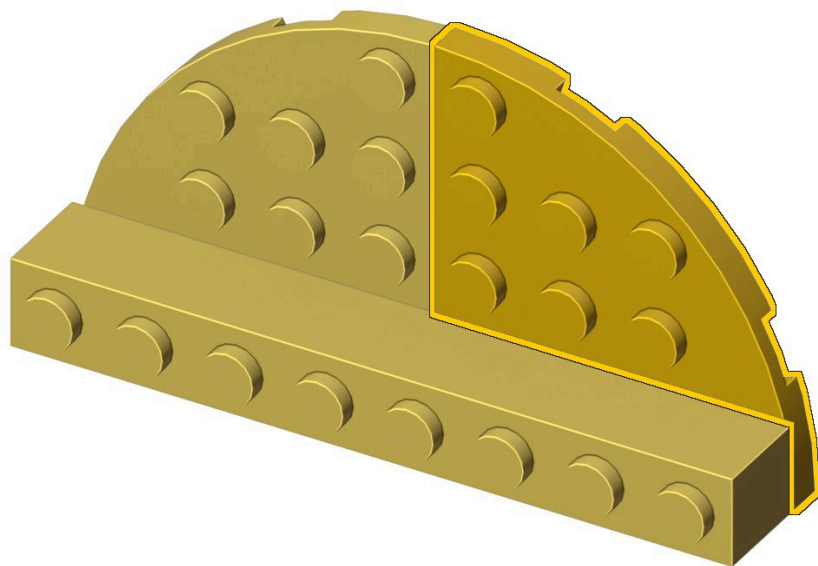

Taco

seen from below

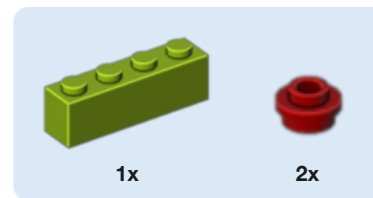

3

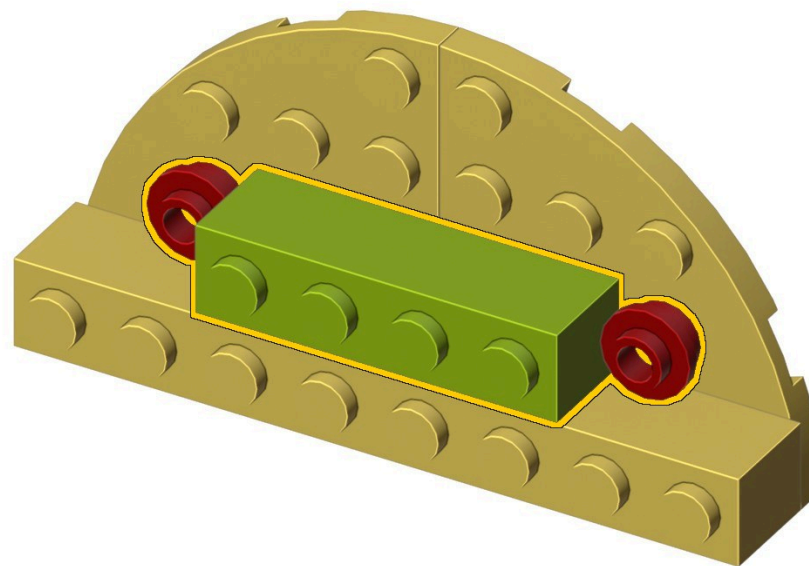

3 · Complete the back shell

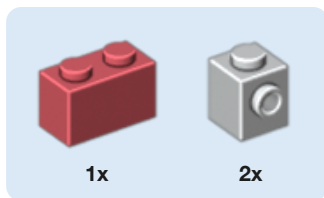

4

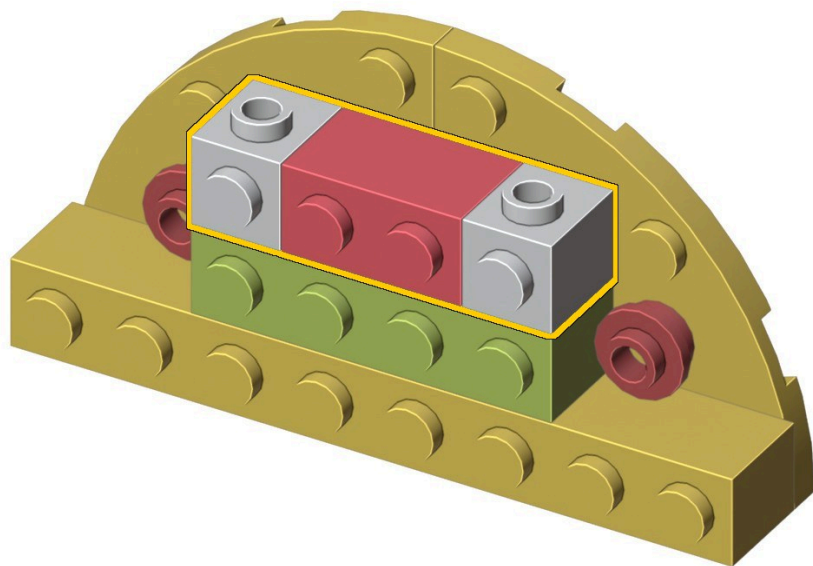

4 · Lettuce filling and two red round plates

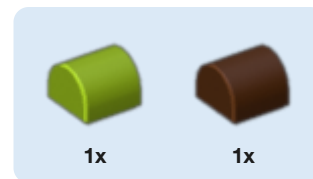

5

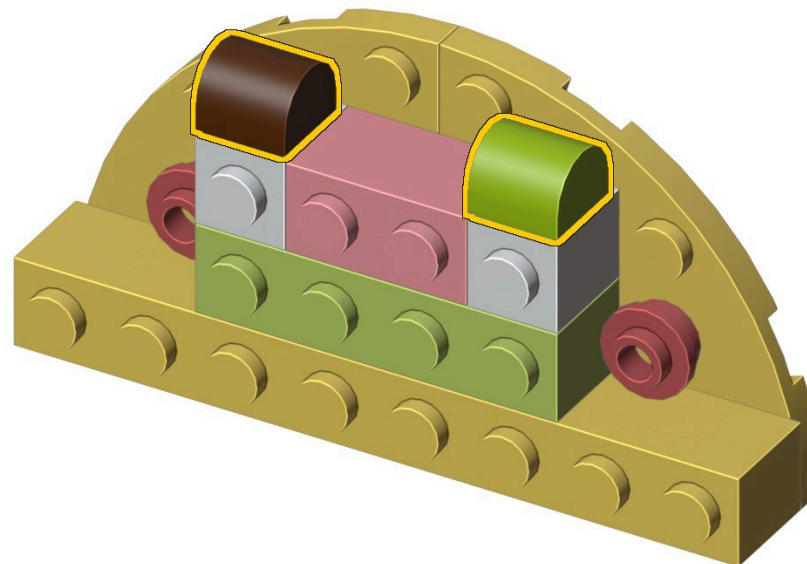

5 · The hidden coral brick and two white side-stud bricks

6

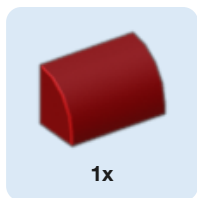

6 · Curved green and brown fillings

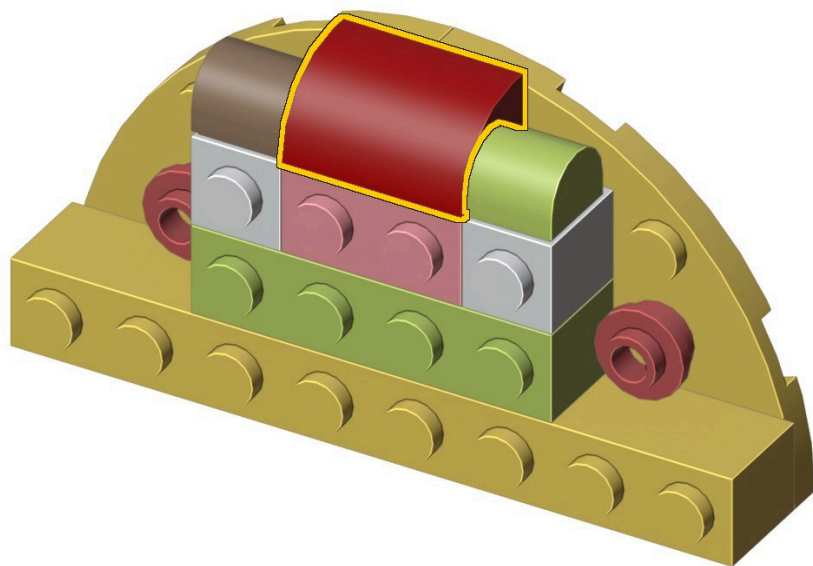

Taco

7

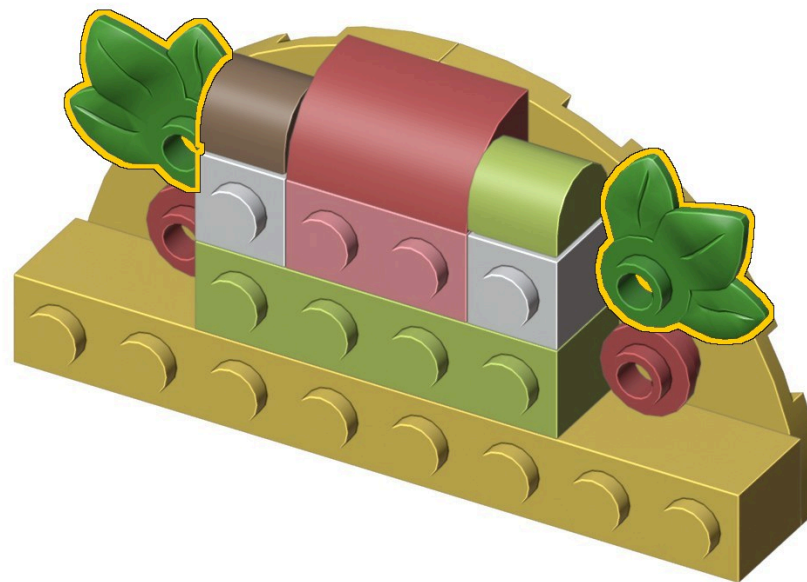

7 · A curved tomato slice

8

8 · Two lettuce leaves at the edges

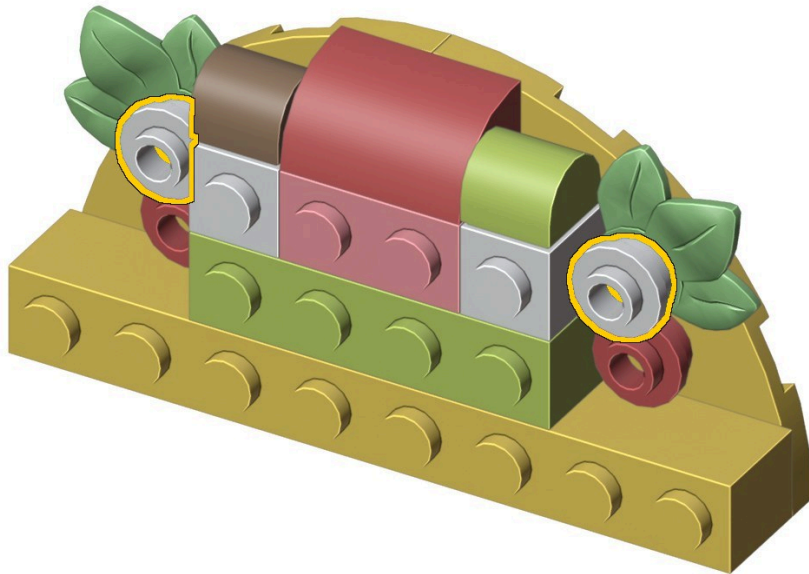

Taco

9

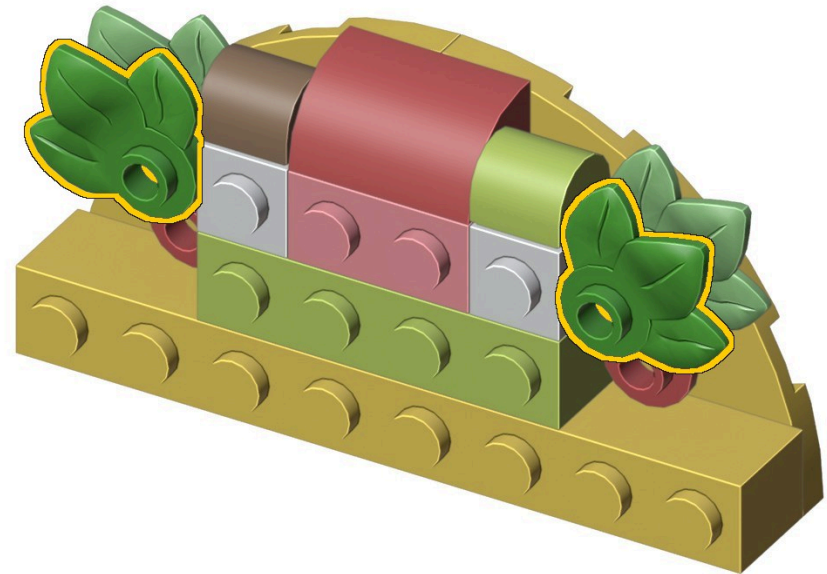

9 · White round plates between the leaves

10

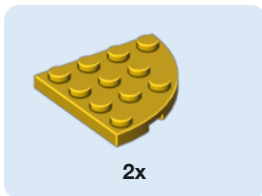

10 · A second pair of lettuce leaves

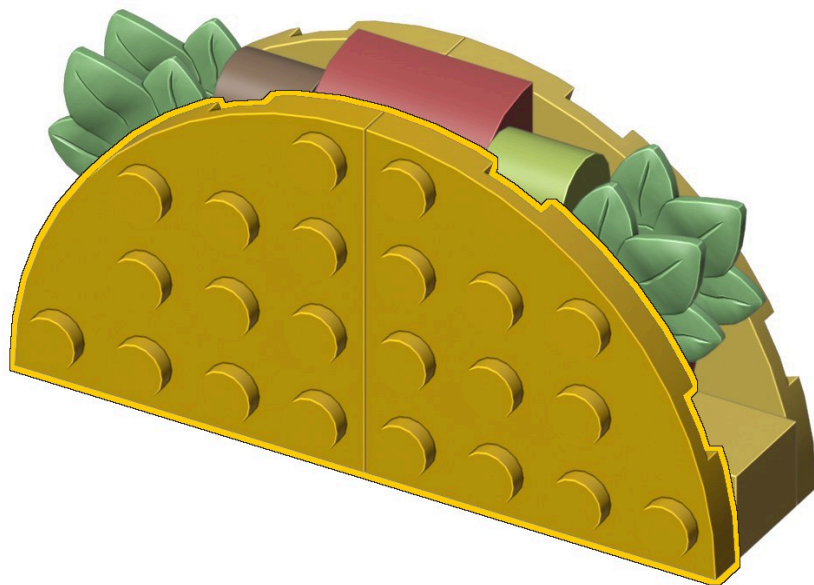

Taco

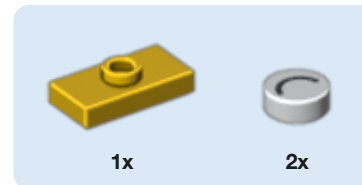

11

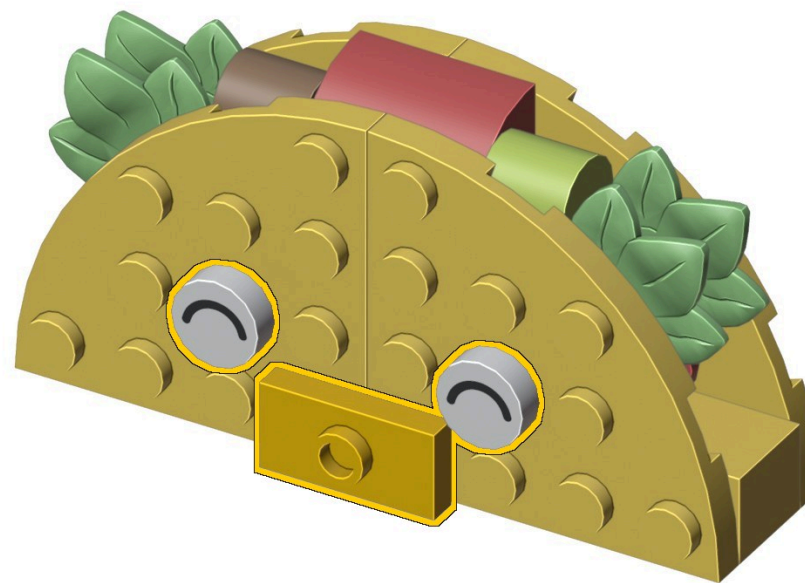

11 · Close the front shell

12

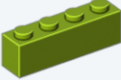

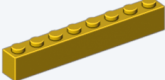

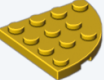

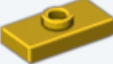

12 · The nose and happy closed eyes

Parts inventory

23 pieces in 13 part/colour lines. Bold: the LEGO element ID (what LEGO Pick a Brick sells); below: the colour and the BrickLink part number.

About this model

Build the standalone taco from LEGO Classic 11039 with all 12 steps on pages 34-40 of the official instructions. The finished model stands on its straight folded edge, as shown on page 41.

Checked on a computer

PASS	real elements	13 part/colour combinations: 0 not real, 0 rare
PASS	connections	52 connections (52 stud); 1 separate piece(s)
PASS	collisions	0 overlapping pair(s) among 23 parts
PASS	buildability	22 insertions tried across 1 submodel(s); 0 problem(s)
PASS	stability	about 19 g; centre of mass inside the base (121% margin); tips at 34.0 deg
PASS	mechanism	no moving parts defined
PASS	electrics	no electrics in this model
PASS	technique	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer:
