

Bricks

A LEGO® BRICK MODEL OF

Hamburger

A life-size cheeseburger in six layers. Build each one, then stack them up: every layer clicks onto the next.

590 pieces · 96 steps · 8 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance, mechanism), but nobody has built it with real bricks yet.

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 1942 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated; the mechanism was swept through its whole range. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 12.5 × 12.5 cm and 9.6 cm tall, about 533 g (estimated).

A cheeseburger as big as the real thing, about 12.5 cm (5 inches) across and nearly 10 cm tall. You build it the way it is put together: the bottom bun, the patty, the cheese, the lettuce, the tomato and the sesame top bun, each one on its own. Every layer under the top bun has the same 4 × 4 square of studs in the middle of its top, and every layer above the bottom bun has open anti-studs under its middle, so the fillings click on in any order and pull apart again. The buns and the patty are octagons 14 studs across; their four corners are small walls turned to the diagonals, each held by a single stud and wedged between its neighbours. The top bun is a dome: its edge turns over in a quarter-round brick, then leans in through a slope and a ring of curved slopes to a crown of curved slopes with rounded corners. Its sesame seeds are small white tiles in three shapes, closest together on the crown and fewer toward the edge.

You will need

- The 590 pieces in 9 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The four turned corners of the buns and the patty each sit on one stud over smooth tiles. Press them down gently and line them up with their neighbours before you add anything on top. The top bun has four more, smaller ones in the ring of curved slopes round its crown.
- A curved slope stands on two levels: its low end on one plate, its high end on a plate one higher. In the top bun's ring and crown, put the upper plate on first and press the slope down at both ends.
- The two sesame seeds on the crown's jumper plates each sit on a single stud, so they turn freely. Turn them different ways: seeds on a real bun never line up.
- The cheese's four tips hang on clips, so you can swing them up or down. They hang best over the patty, which dips under each tip; on other layers they rest a little higher.
- To take the burger apart, lift each layer straight up, starting with the top bun. Hold a layer by its middle when you pull it off.

The 9 colours

 Medium Nougat: 272	 Red: 25
 Bright Light Orange: 83	 White: 18
 Reddish Brown: 78	 Dark Brown: 16
 Bright Green: 46	 Coral: 8
 Tan: 44	

How to read the steps

Parts and step number

7

2x

The parts for the step and how many of each, then the step number. All parts are drawn at one scale.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

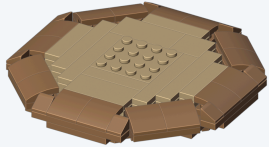

When a step adds parts underneath, the picture shows the model from below. A small label says so.

Insert direction

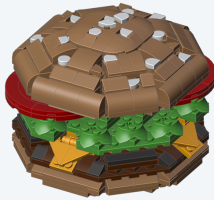

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

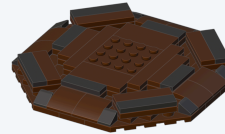

The model is built in 8 sections. Each is finished before it is used.

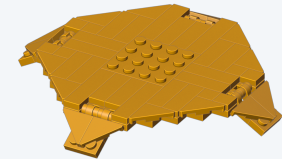

1. Bottom bun
steps 1–16

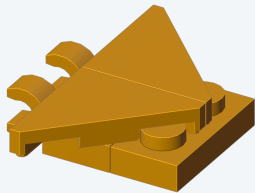

2. Hamburger
steps 17, 33, 45, 54, 60, 96

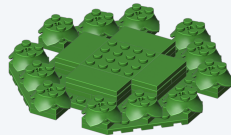

3. Patty
steps 18–32

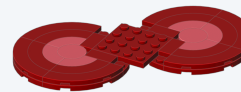

4. Cheese
steps 34–42, 44

5. Cheese tip ×4
step 43

6. Lettuce
steps 46–53

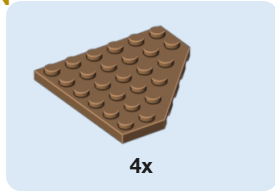

7. Tomato
steps 55–59

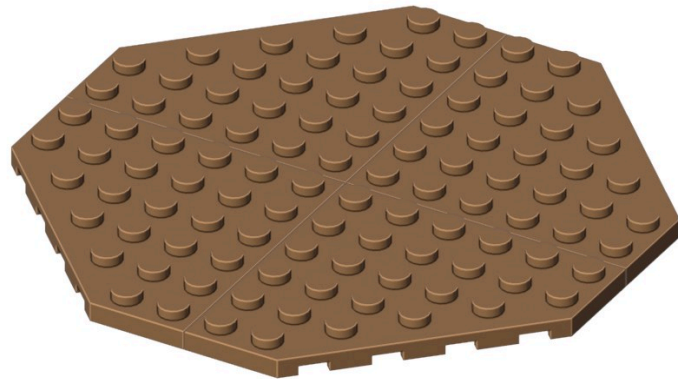

8. Top bun
steps 61–95

BOTTOM BUN

1

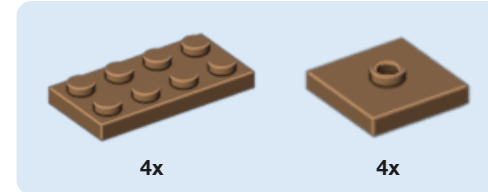

The base: four wedge plates make a 12-stud octagon

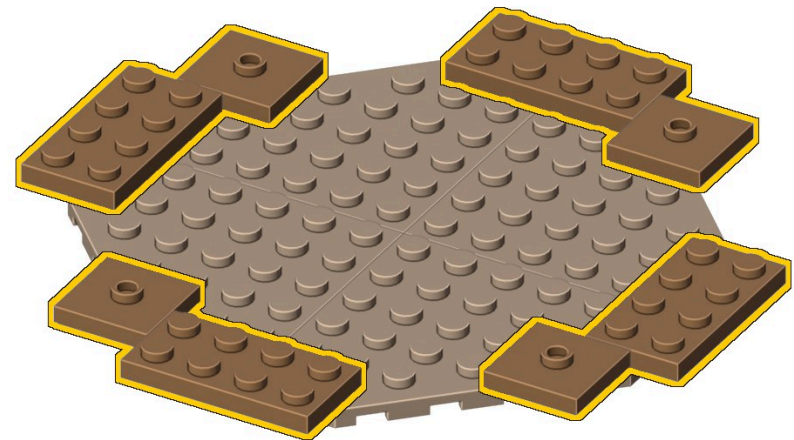

2

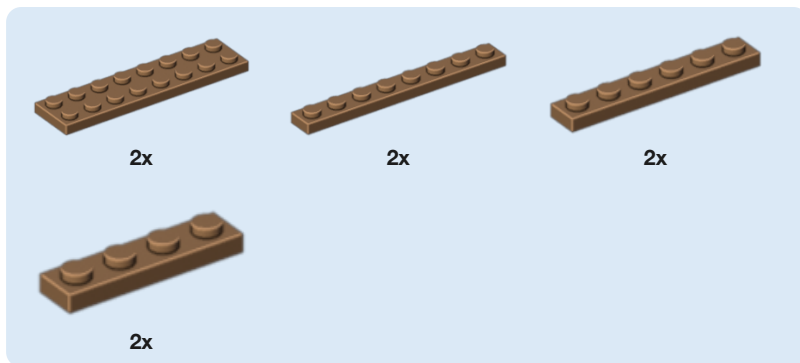

Bottom bun

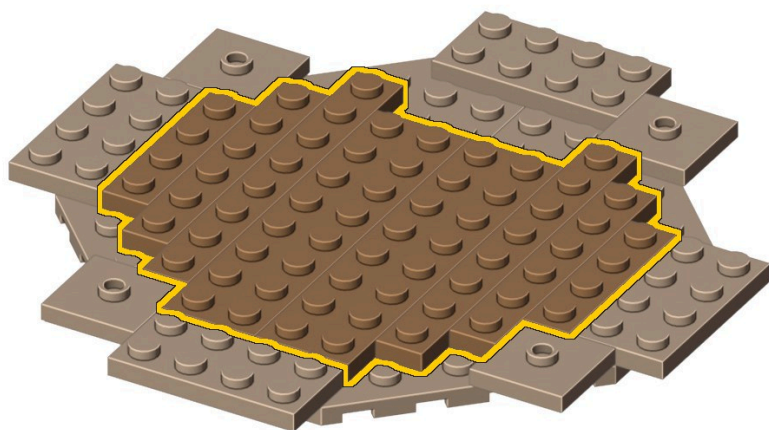

A floor: plates, with smooth tiles and a pin under each corner (1/4)

3

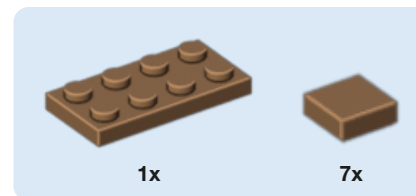

A floor: plates, with smooth tiles and a pin under each corner (2/4)

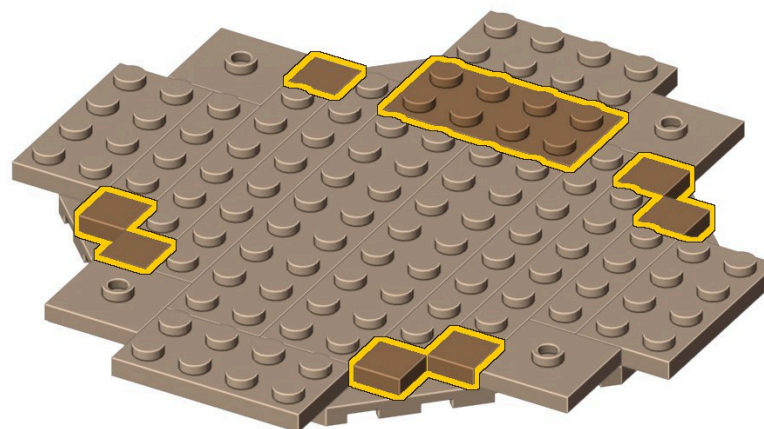

4

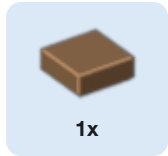

Bottom bun

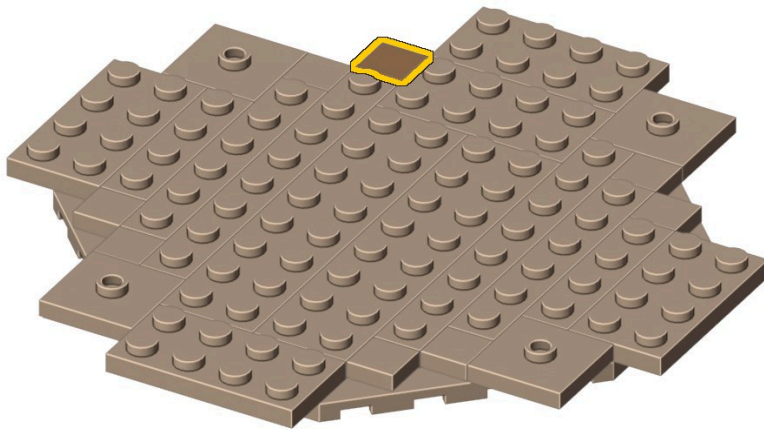

A floor: plates, with smooth tiles and a pin under each corner (3/4)

HAMBURGER

96

Click on the top bun

Hamburger

It works!

Stack it any way

Every layer under the top bun has the same 4 x 4 studs in the middle of its top, and every layer above the bottom bun has open anti-studs under its middle, so the fillings go on in any order. At least sixteen studs hold every joint, so the whole burger can be picked up by its top bun.

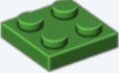

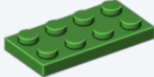

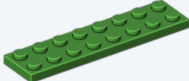

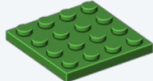

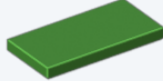

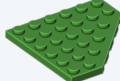

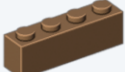

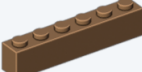

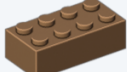

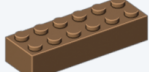

Take it apart

Lift the layers off one by one: sesame bun, tomato, lettuce, cheese, patty and bottom bun.

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
