

Bricks

A LEGO® BRICK MODEL OF

Nautilus Crew

Captain Nemo, Ned Land, Professor Aronnax, Conseil and a Nautilus diver on the deck of the Nautilus, in front of a salon window ringed with yellow lights.

106 pieces · 5 minifigures · 47 steps · 7 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance), but nobody has built it with real bricks yet.

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 524 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 12.8 × 6.4 cm and 9.3 cm tall, about 139 g (estimated).

Four minifigures of the main characters of Jules Verne's 20,000 Leagues Under the Sea, dressed as in Walt Disney's 1954 film, and one of Captain Nemo's divers in a brass deep-sea helmet, on a slice of the Nautilus's deck. Each figure is built from what LEGO sells: a printed head, a torso with its arms and hands, hips with legs, headwear and something to hold. The deck is riveted iron plating in reddish brown with a dark walkway, a round hatch and a mooring bollard, and a gold-trimmed edge with a blank black nameplate. Behind the crew a bulkhead carries one of the Nautilus's salon windows: a gold round frame, clear glass and a ring of eight yellow lights.

You will need

- The 106 pieces in 13 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

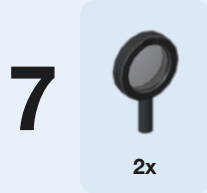

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The figures' torsos come with their arms and hands already fitted, and their hips with the legs: you never take a figure apart to build it.
- Ned Land's harpoon, Nemo's spyglass, Aronnax's magnifying glass, Conseil's bottle and the diver's speargun clip into the figures' hands. Turn the arms and heads as you like: the pictures show one way to pose them.
- The diver's brass helmet (10165c01, from the 2012 Collectible Minifigures Series 8 Diver) has no model in the LDraw library: the pictures show brickkit's approximation of it. Its suit's print isn't modelled either, so the pictures show the torso and legs plain.
- The nameplate is a plain black 2 x 4 tile: add a printed tile or a sticker with the name if you like.

The 13 colours

 Reddish Brown: 58	 Medium Nougat: 5
 Yellow: 15	 Dark Brown: 3
 Black: 12	 Trans-Clear: 3
 Pearl Gold: 11	 White: 3
 Trans-Yellow: 8	 Dark Blue: 3
 Light Bluish Gray: 7	 Flat Silver: 1
 Dark Bluish Gray: 5	

How to read the steps

Parts and step number

The parts for the step and how many of each, then the step number. All parts are drawn at one scale.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

When a step adds parts underneath, the picture shows the model from below. A small label says so.

Insert direction

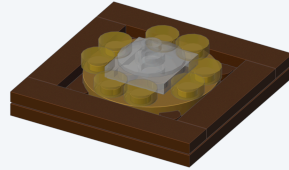

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 7 sections. Each is finished before it is used.

1. Nautilus Crew
steps 1–12, 17, 23, 29, 35, 41, 47

2. Salon window
steps 13–16

3. Conseil
steps 18–22

4. Professor Aronnax
steps 24–28

5. Captain Nemo
steps 30–34

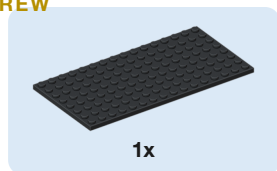

6. Nautilus diver
steps 36–40

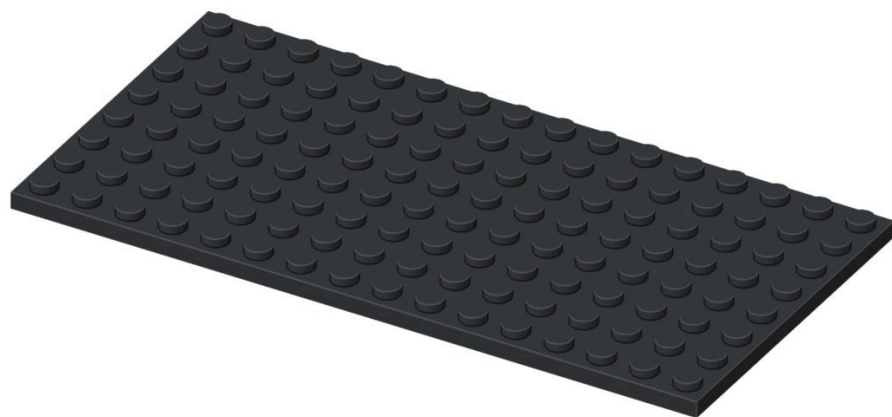

7. Ned Land
steps 42–46

Real printed figures

Every head, torso and pair of legs is a real LEGO part with its print, listed by its BrickLink and Rebrickable number: no custom prints or stickers. Ned Land's striped shirt, Ned Land's double-breasted captain's coat with its gold anchor and Aronnax's three-piece suit are all real LEGO torsos.

About this model

Four minifigures of the main characters of Jules Verne's 20,000 Leagues Under the Sea, dressed as in Walt Disney's 1954 film, and one of Captain Nemo's divers in a brass deep-sea helmet, on a slice of the Nautilus's deck. Each figure is built from what LEGO sells: a printed head, a torso with its arms and hands, hips with legs, headwear and something to hold. The deck is riveted iron plating in reddish brown with a dark walkway, a round hatch and a mooring bollard, and a gold-trimmed edge with a blank black nameplate. Behind the crew a bulkhead carries one of the Nautilus's salon windows: a gold round frame, clear glass and a ring of eight yellow lights.

Checked on a computer

WARN	real elements	51 part/colour combinations: 0 not real, 5 rare; 15 minifig component(s), 2 drawn as stand-ins; 1 with an approximate 3D model
PASS	connections	524 connections (438 stud, 35 pin, 28 kit, 18 bar, 5 clip); 1 separate piece(s)
PASS	collisions	0 overlapping pair(s) among 134 parts
PASS	buildability	105 insertions tried across 16 submodel(s); 0 problem(s)
PASS	stability	about 139 g; centre of mass inside the base (76% margin); tips at 40.6 deg
PASS	mechanism	no moving parts defined
PASS	electrics	no electrics in this model
PASS	technique	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
