Bricks

A LEGO® BRICK MODEL OF

Nautilus

Captain Nemo's submarine from Walt Disney's 20,000 Leagues Under the Sea (1954) at minifigure scale, 106 cm long, over a breaking sea. Open the salon's side to find Nemo at his organ; the salon lights up, the propeller spins and the rudder swings.

7126 pieces · 5 minifigures · 1492 steps · 106 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance, mechanism), but nobody has built it with real bricks yet.

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Nautilus and related names belong to their owners. Made with brickkit · 2026-10-14

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 27819 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated; the mechanism was swept through its whole range. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 106.3 × 27.2 cm and 35.8 cm tall, about 7.9 kg (estimated).

The scale comes from the salon windows: each is LEGO's biggest clear bubble, a 6 x 6 half sphere, so the Nautilus is about 1:52 and its salon fits the crew. The hull starts from its side keels, two plates thick at the waterline, wedge plates making the taper; a core two studs wide stands on them up to the deck and hangs under them down to the keel. Along the midbody each side is four big tiled panels on clip-and-bar hinges, set at the hull's own angles so that seen head-on it is a lens; toward the bow and stern the hull is shells of plates built flat and pushed onto the core's side studs, each row capped with a chain of curved slopes, and inverted tiles smooth the belly. On the port side the salon's panels are one piece hinged at the deck's edge: lift it like a gull wing and Nemo's salon is there, with his pipe organ, the library, the aquarium, the table and the crew. Each window is the bubble in a brass ring in a raised boss with eight yellow lights round it. On top: the wheelhouse like an alligator's head with its bubble eyes and searchlight, the toothed crest arching from its peak down to the deck, the shark's dorsal fin, the raised after deck and a hatch, where Conseil and the diver stand. Underneath: the saw keel along the bow and two keel fins on the

You will need

- The 7126 pieces in 30 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- 1x LEGO Power Functions LED light unit (8870): its two lamps hang under the salon's ceiling, one by each window.
- 1x LEGO Power Functions extension wire (8871, 50 cm): from the light unit's plug down the front post to the battery box.
- 6 AAA batteries for the Power Functions AAA battery box (set 88000, listed in the parts as 64228), which lies inside the sea base.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The lamps' leads run out along the salon's ceiling, down the hull's side past the salon floor, forward along the bottom of the hull to the shaft in the core over the front post, and down it. Lay them in before you close the salon and clip the lower panels on, and leave a little slack.
- Plug the light unit onto the extension wire, run the wire down the front post's clear tube and through the base to the battery box; set the Nautilus on its posts last.
- The salon's gull wing clips onto the bars on the side keels along its lower edge: lift that edge and swing it up over the deck to open the salon. The other side panels stay on.
- The propeller sits on a smooth pin: spin it with a finger. The rudder is clipped to its post and swings on it.
- Power Functions was discontinued in 2018: the light unit, the extension wire and the battery box are easy to find used on BrickLink.

The 30 colours

- Reddish Brown: 3732
- Black: 619
- Trans-Light Blue: 12
- Light Bluish Gray: 10

How to read the steps

Parts and step number

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

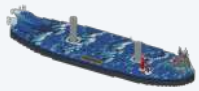
Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 106 sections. Each is finished before it is used.

1. Sea base
steps 1–164



2. Display stand
steps 165–426, 432, 438

3. Post 1
steps 427–431

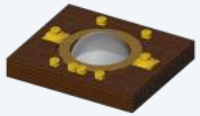
4. Post 2
steps 433–437

5. Nautilus
steps 439, 1492

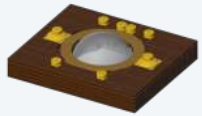
6. Side keels, forward
steps 440–448

7. Side keels, aft
steps 449–460

8. Hull
steps 461–465, 485, 505–601, 622 … 1471–1480, 1491



9. Salon window, port
steps 466–484



10. Salon window, stbd
steps 486–504

11. Hull side, upper, port, wall_fwd
steps 602–621

12. Hull side, upper, port, wall_aft
steps 623–642

13. Hull side, upper, stbd, wall_fwd
steps 644–663

14. Hull side, upper, stbd, wall_aft
steps 665–684

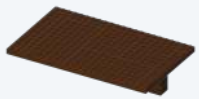
15. Hull side, lower, port, wall_fwd
steps 686–705

16. Hull side, lower, port, wall_aft
steps 707–726

17. Hull side, lower, stbd, wall_fwd
steps 728–747

18. Hull side, lower, stbd, wall_aft
steps 749–768

19. The keel strip
steps 770–777

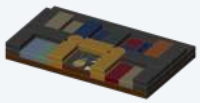


20. The salon's floor
steps 779–786

21. Captain Nemo's salon
steps 788–799, 816, 827, 838 … 865, 881

22. Salon: the library
steps 800–805, 813, 815

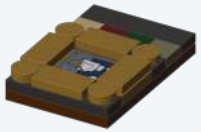
Build overview (continued)



23. Salon: the library's bookcase, built flat
steps 806–812

24. Salon: the library's cornice, built flat
step 814

25. Salon: the bookcase with the ship painting
steps 817–821, 826



26. Salon: the bookcase, built flat
steps 822–825

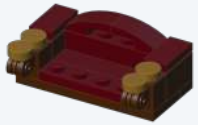
27. Salon: Nemo's pipe organ
steps 828–837

28. Salon: a standard lamp ×2
step 839

29. Salon: a standard lamp ×2
step 842

30. Salon: the round table
steps 845–846

31. Salon: a red velvet chair ×2
step 848



32. Salon: the settee
steps 851–853

33. Salon: the chart table
steps 855–856

34. Salon: the telescope
steps 858–859

35. Salon: the aquarium
steps 861–864

36. Salon: the cabinet of curiosities
steps 866–867

37. Captain Nemo
steps 868–871

38. Aronnax
steps 872–876

39. Ned Land
steps 877–880

40. The deck strip
steps 884–894

NAUTILUS
1492

1x

Set the Nautilus on its posts: thread the lights' lead down the front post first

It works!

The salon opens

The port side of the salon is one big panel hinged on bars along the deck's edge: it swings up like a gull wing on Captain Nemo's salon, the organ, the library and the crew.

Lights in the salon

Two Power Functions lamps under the salon's ceiling light the room, and it glows through both bubbles; the battery box in the sea switches them on and off.

About this model

The scale comes from the salon windows: each is LEGO's biggest clear bubble, a 6 x 6 half sphere, so the Nautilus is about 1:52 and its salon fits the crew. The hull starts from its side keels, two plates thick at the waterline, wedge plates making the taper; a core two studs wide stands on them up to the deck and hangs under them down to the keel. Along the midbody each side is four big tiled panels on clip-and-bar hinges, set at the hull's own angles so that seen head-on it is a lens; toward the bow and stern the hull is shells of plates built flat and pushed onto the core's side studs, each row capped with a chain of curved slopes, and inverted tiles smooth the belly. On the port side the salon's panels are one piece hinged at the deck's edge: lift it like a gull wing and Nemo's salon is there, with his pipe organ, the library, the aquarium, the table and the crew. Each window is the bubble in a brass ring in a raised boss with eight yellow lights round it. On top: the wheelhouse like an alligator's head with its bubble eyes and searchlight, the toothed crest arching from its peak down to the deck, the shark's dorsal fin, the raised after deck and a hatch, where Conseil and the diver stand. Underneath: the saw keel along the bow and two keel fins on the stand's clear posts. At the stern the fish tail's two swept lobes, the propeller turning in a brass guard ring and the rudder clipped to its post.

Checked on a computer

WARN	**real elements**	407 part/colour combinations: 0 not real, 7 rare; 15 minifig component(s), 2 drawn as stand-ins; 1 with an approximate 3D model
PASS	**connections**	27819 connections (27318 stud, 217 clip, 131 pin, 98 bar, 28 kit, 17 press, 6 axle, 4 hinge); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 7154 parts
PASS	**buildability**	6623 insertions tried across 115 submodel(s); 0 problem(s)
PASS	**stability**	about 7873 g; centre of mass inside the base (99% margin); tips at 41.5 deg
PASS	**mechanism**	24 poses swept for 3 moving group(s); 0 gear pair(s); 0 problem(s)
PASS	**electrics**	2 light(s), 2 cable run(s); longest lead needs 78 of 90 cm; 0 problem(s)
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
