Built with real bricks. This model has been built from these instructions, and it works. Every part is a real LEGO element, and the model was also checked on a

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Built with real bricks

These steps have been followed with real bricks from start to finish, and the finished model works. They were also checked on a computer: every part/colour is a real LEGO element, all 201 connections between parts were matched in 3D, no two parts overlap and every part can be pushed into place in its step. Take your time and support the model while you work.

The finished model

About 9.3 × 6.4 cm and 10.4 cm tall, about 70 g (estimated).

The Caldwell County Courthouse in Lockhart, Texas, small enough to build in a few minutes: the stone walls with their red band, the corner pavilions with their slate roofs, and the clock tower in the middle, a clock on each of its four sides.

You will need

- The 64 pieces in 9 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 9 colours

- Tan: 23
- Dark Red: 17
- Black: 15
- White: 6
- Dark Brown: 3
- Yellow: 3
- Green: 1
- Light Bluish Gray: 1
- Reddish Brown: 1

How to read the steps

Parts and step number

7

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 2 sections. Each is finished before it is used.

About this model

The Caldwell County Courthouse in Lockhart, Texas, small enough to build in a few minutes: the stone walls with their red band, the corner pavilions with their slate roofs, and the clock tower in the middle, a clock on each of its four sides.

Checked on a computer

PASS	**real elements**	23 part/colour combinations: 0 not real, 0 rare; 3 minifig component(s)
PASS	**connections**	201 connections (179 stud, 7 pin, 6 kit, 5 axle, 4 bar); 2 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 70 parts
PASS	**buildability**	62 insertions tried across 4 submodel(s); 0 problem(s)
PASS	**stability**	about 70 g; centre of mass inside the base (122% margin); tips at 47.7 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Built with real bricks

The computer checks catch most mistakes a designer can make; a real build is the last word, and this model has been built from these instructions. If you build it too, we would love to hear how it went.
