Bricks

A LEGO® BRICK MODEL OF

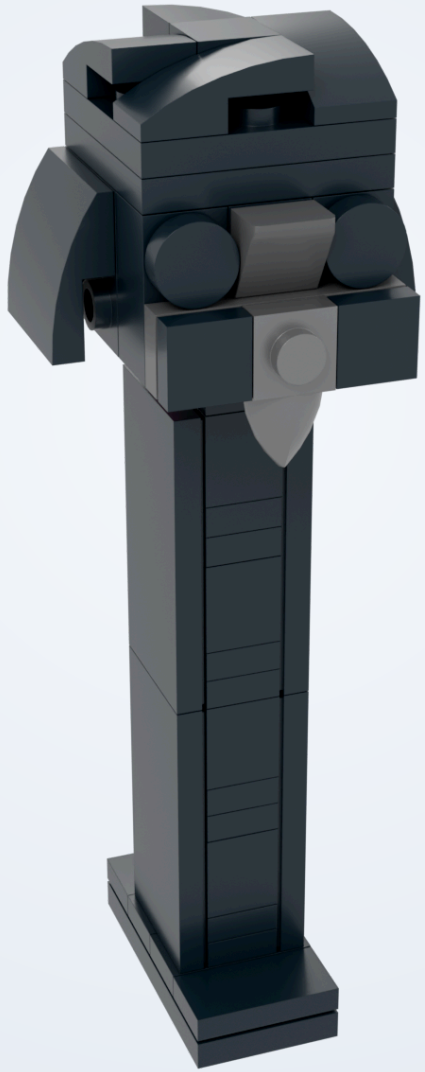

Darth Vader PEZ

A black helmet on a black stem, with a head that tips back like the real thing, in 53 pieces.

53 pieces · 18 steps · 3 sections

Unofficial fan-made building instructions

Not physically build-tested. Every part is a real LEGO element and the model was checked on a computer (connections, collisions, every step, balance, mechanism), but nobody has built it with real bricks yet.

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Darth Vader PEZ and related names belong to their owners. Made with brickkit · 2026-10-12

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 91 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated; the mechanism was swept through its whole range. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 3.7 × 3.8 cm and 10.6 cm tall, about 30 g (estimated).

Start with the foot and the stem: four rounds of two plates and two bricks, four big tiles for the smooth sides, then the hinge plate and the sweet on top. The head is built by itself: the mask on three tall bricks, a flared cheek for each side, then the brim and the dome. Its own hinge plate goes on the back last, and the head clicks onto the stem.

You will need

- The 53 pieces in 4 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The head tips back on its hinge in clicks, up to three of them, and the sweet shows. Push it back gently from the front, and tip it forward again until it rests on the sweet.
- It is tall on a small foot, like a real one, so a knock from the side tips it over. Stand it somewhere it will not be knocked.

The 4 colours

- Black: 49
- Dark Bluish Gray: 2
- Dark Pink: 1
- Flat Silver: 1

How to read the steps

Parts and step number

7

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

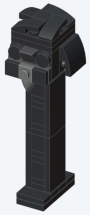

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

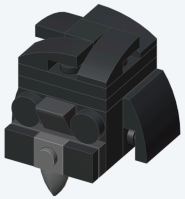

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

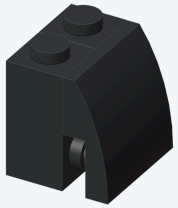

The model is built in 3 sections. Each is finished before it is used.

1. Darth Vader PEZ
steps 1–8, 18

2. Head
steps 9–11, 13–17

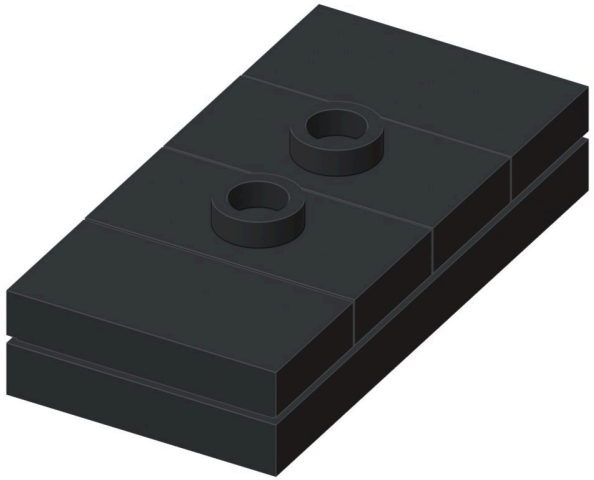

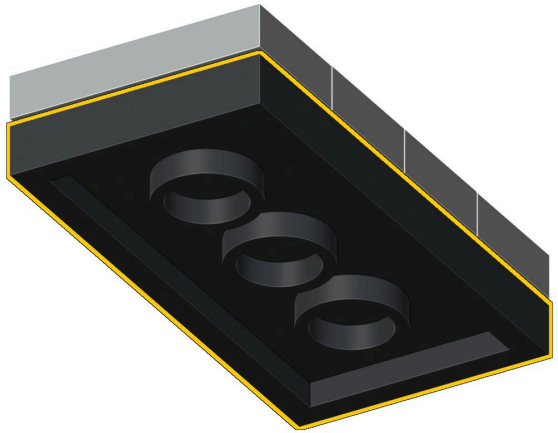

3. Cheek ×2
step 12

1

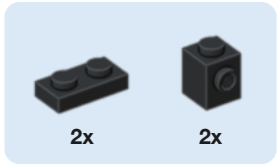

The foot: a 2 x 4 plate, long from front to back. On its middle two plates with one stud each, side by side across it, and a 1 x 2 tile at each end

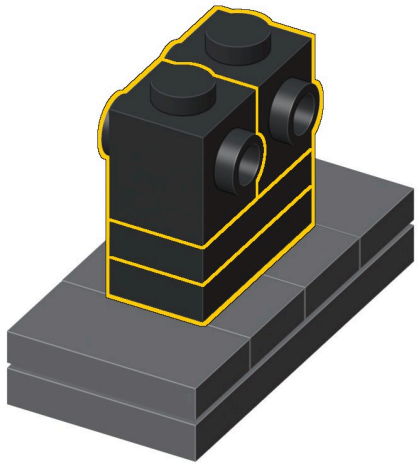

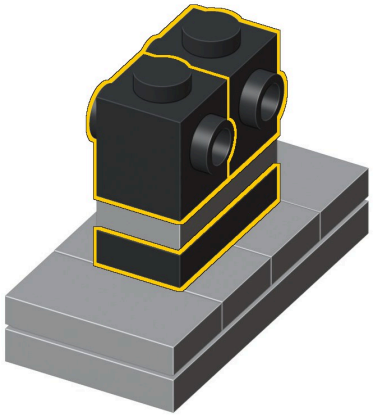

From below: the outlined piece clicks in here.

2

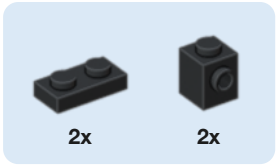

The stem stands on the foot's two studs, one stud wide and two deep. Two 1 x 2 plates, then two bricks with a stud on each side, studs to the left and the right

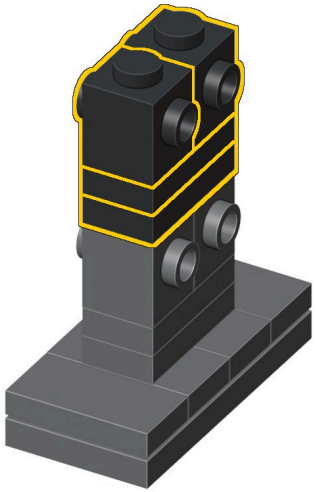

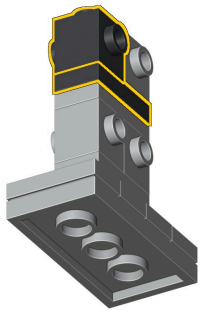

From behind: the outlined pieces.

3

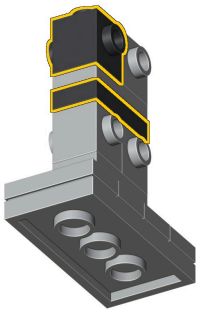

Two more plates and two more of those bricks

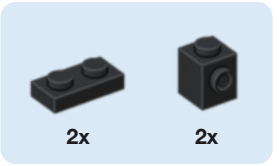

From below: the outlined pieces click in here.

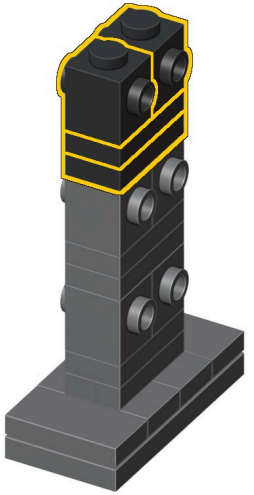

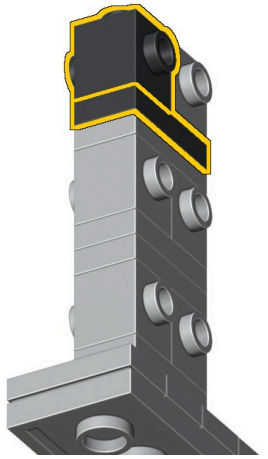

From behind and below: the outlined pieces.

4

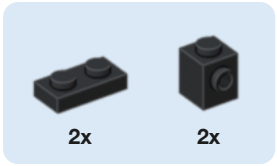

The same again

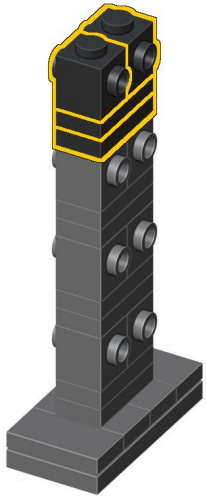

From behind and below: the outlined pieces.

5

2x 2x

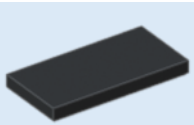

And once more: the stem's full height

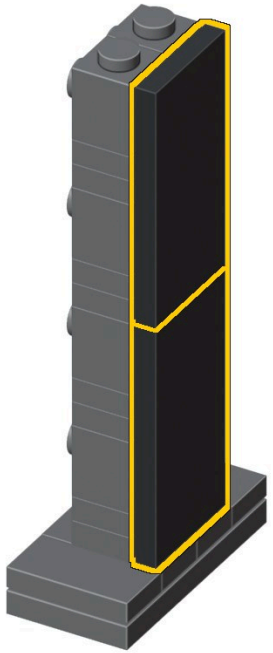

From behind and below: the outlined pieces.

6

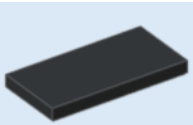

2x
2 × 4

Press two 2 x 4 tiles onto the studs of one side, one above the other: the stem's smooth side

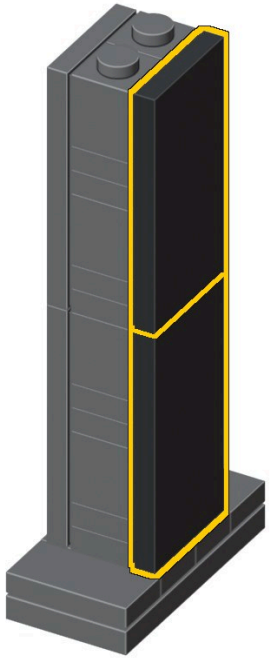

7

2x
2 × 4

And two on the other side

8

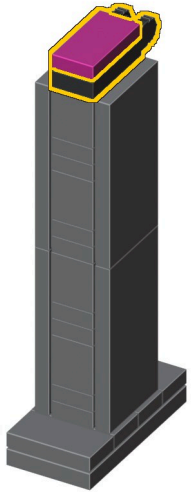

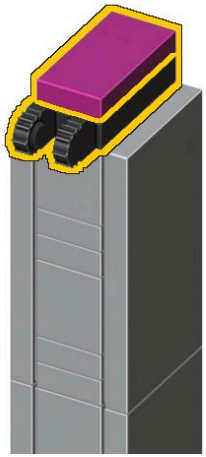

1x
1 × 2

1x

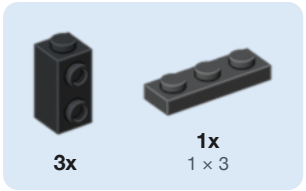

On top: the hinge plate with two fingers, fingers past the back of the stem, and on it a 1 x 2 tile: the sweet

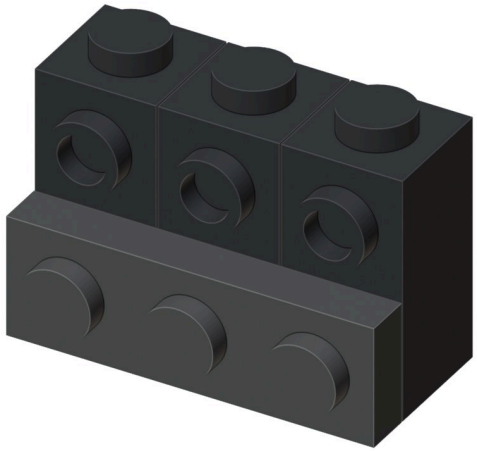

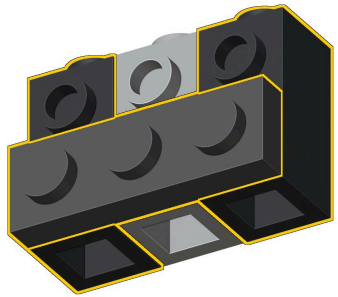

From behind: the outlined pieces.

HEAD
9

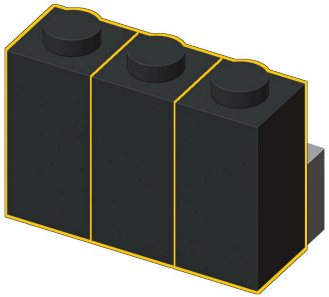

The mask: three tall bricks side by side, studs forward, joined by a dark grey 1 x 3 plate across their lower studs

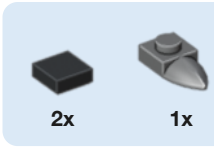

From below: the outlined pieces click in here.

From behind: the outlined pieces.

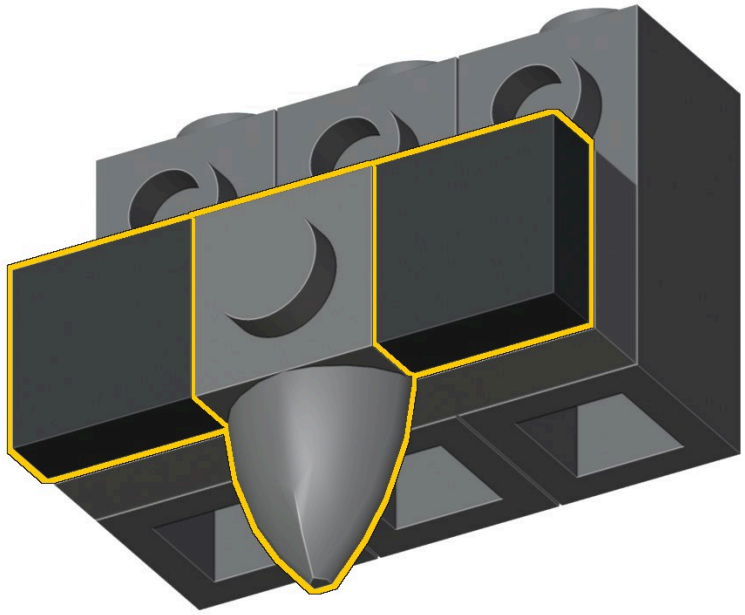

10

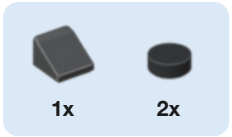

Head

seen from below

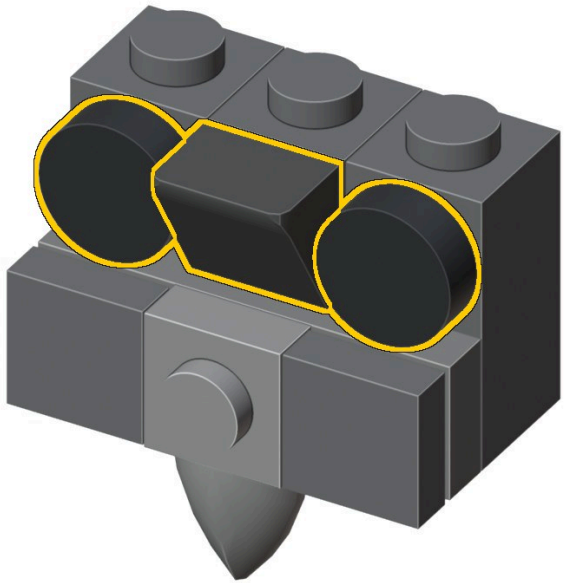

On that plate: the silver plate with a tooth in the middle, tooth down, and a black tile either side

11

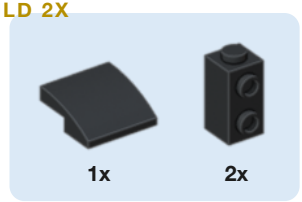

On the upper studs: the eyes, two black round tiles, and between them a dark grey cheese slope, its high edge up

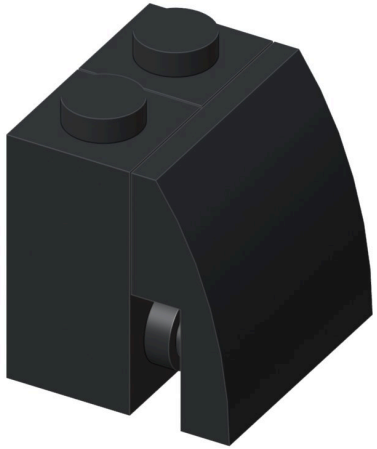

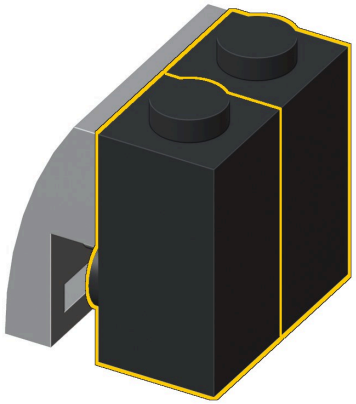

CHEEK · BUILD 2X

12

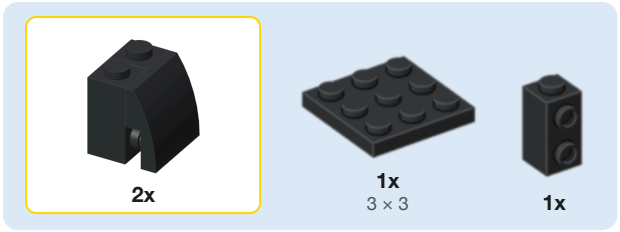

A cheek: two tall bricks side by side, studs to the same side, joined by a black curved 2 x 2 slope on their four studs, its thick end down: the flare of the helmet. Make two

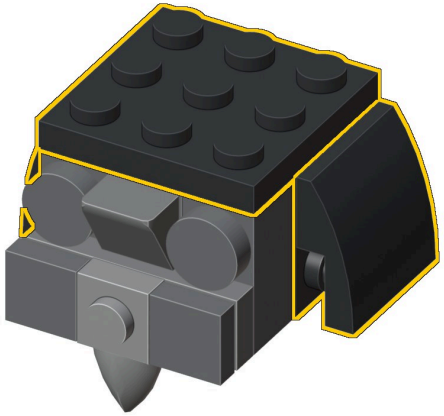

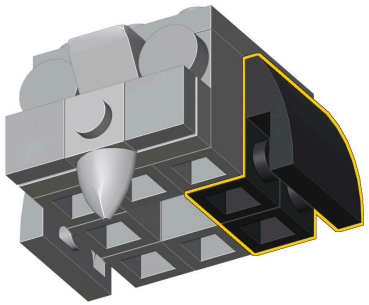

From behind: the outlined pieces.

HEAD
13

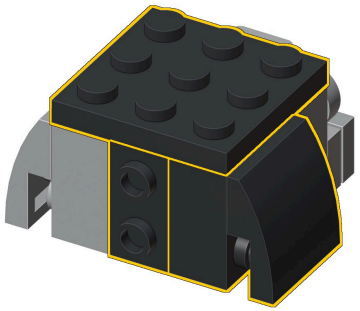

Stand a cheek each side behind the mask, flares out, and the last tall brick between them at the back, studs to the back. Press a 3 x 3 plate down on all of them

From below: the outlined piece clicks in here.

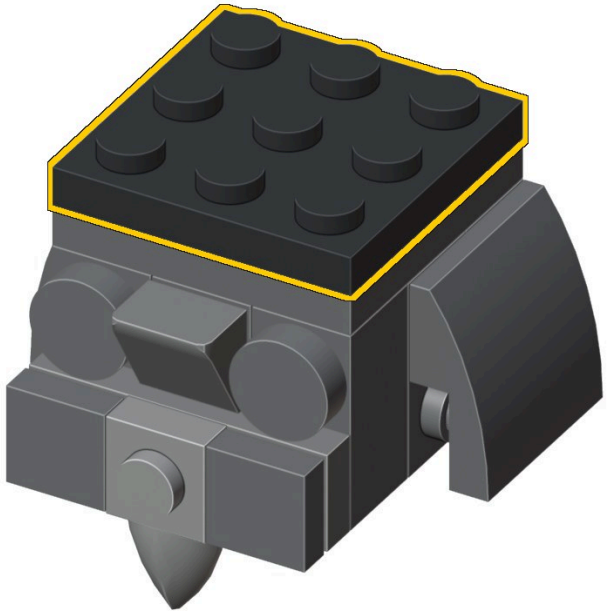

From behind: the outlined pieces.

14

A second 3 x 3 plate: the helmet's brim

15

4x

The dome: four curved slopes round the edge, each with its thick end at the middle of a side

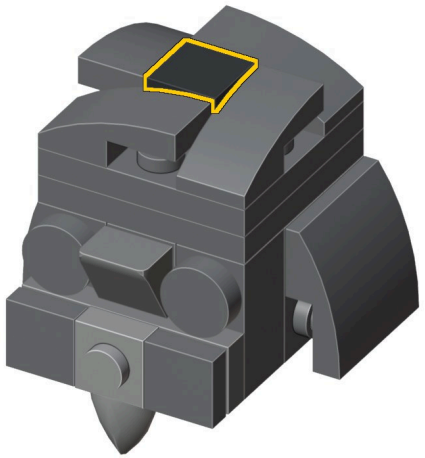

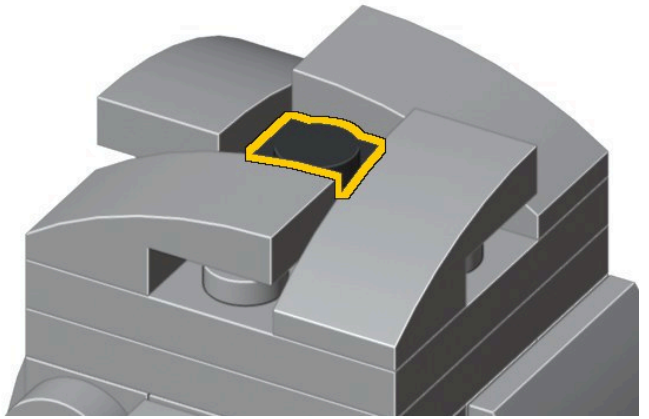

16

1x 1x

A plate and a tile in the middle of the dome

First the outlined piece: the others go on over it.

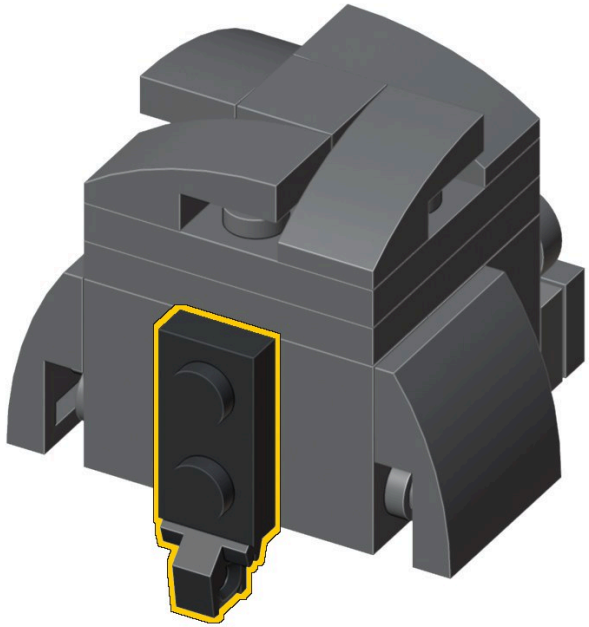

17

1x

seen from behind

The head's hinge plate, the one with a single finger: upright on the two studs at the back, finger down

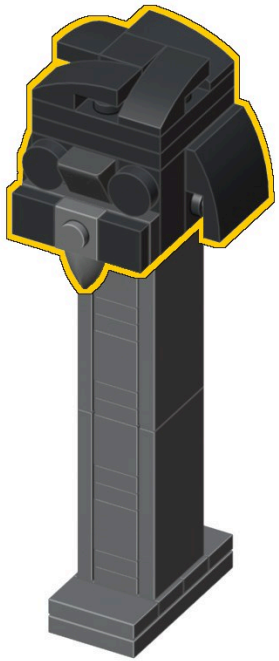

DARTH VADER PEZ

18

1x

Click the head's hinge finger between the two fingers at the back of the stem, and tip the head forward until it rests on the sweet. Tip it back: it clicks, like the real thing

About this model

Start with the foot and the stem: four rounds of two plates and two bricks, four big tiles for the smooth sides, then the hinge plate and the sweet on top. The head is built by itself: the mask on three tall bricks, a flared cheek for each side, then the brim and the dome. Its own hinge plate goes on the back last, and the head clicks onto the stem.

Checked on a computer

PASS	**real elements**	19 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	91 connections (90 stud, 1 hinge); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 53 parts
PASS	**buildability**	47 insertions tried across 3 submodel(s); 0 problem(s)
PASS	**stability**	about 30 g; centre of mass inside the base (100% margin); tips at 7.4 deg
PASS	**mechanism**	24 poses swept for 1 moving group(s); 0 gear pair(s); 0 problem(s)
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
