Build the Caldwell County Courthouse

The real one stands in the middle of the town square in Lockhart, Texas. Six things to know before you build it:

- It was finished on March 19, 1894, so it is more than 130 years old.
- It is the third courthouse on this spot. The first went up in 1848, when the county began. The county is named for Mathew Caldwell, a Texas Ranger who signed the Texas Declaration of Independence.
- Its walls are cream-colored stone with red sandstone trim: the tan bricks and the dark red plates in your set.
- The clock in its tower has four faces, one for each side of the square, so the whole town can see the time. Find the four clock tiles!
- Up in the tower hangs a bell that weighs 900 pounds: about as much as a horse.
- Nobody is sure who drew its plans. For years people said Alfred Giles; historians now think it was Henry Guindon. The courthouse in Goliad, Texas, was built from the same plans, so this one has a twin.

1. Find each piece in the big bucket. The picture shows what to look for.
2. Put it on its outline. Every outline gets one piece.
3. No outline left empty? You have a whole set. Start building!

This line is 5 cm long. If yours is not, print the sheet again at 100% (“actual size”), so the pieces fit their outlines.
