Bricks

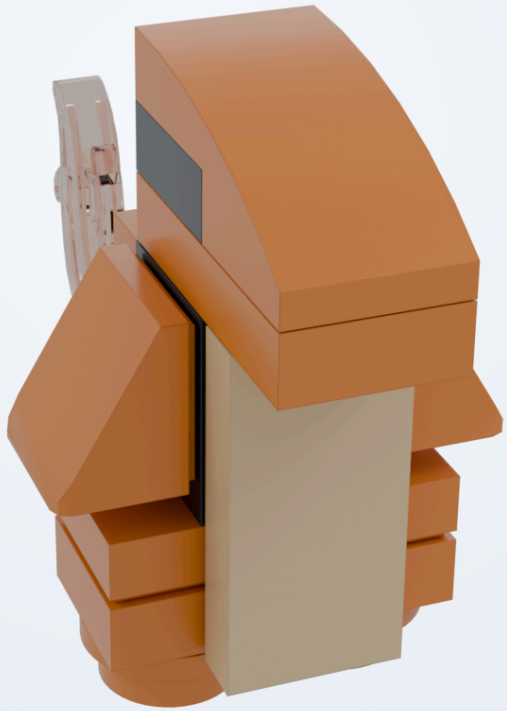

A LEGO® BRICK MODEL OF

Charmander

A tiny Charmander with a flame on its tail, in 14 pieces.

Designed by SwordBricks (RSierra)

14 pieces · 8 steps · 1 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Charmander and related names belong to their owners. Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by SwordBricks (RSierra) (https://rebrickable.com/mocs/MOC-220190/). These steps were worked out from it here; they are not the designer's own instructions.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 15 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 4.0 × 2.0 cm and 2.9 cm tall.

Charmander is small enough to stand on your palm: build up from two round feet through the legs to the black body brick, put on the tan belly and the little arms, set the tail and its flame on the back, then finish with the head: a plate, the black eye band and the curved dome.

You will need

- The 14 pieces in 4 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 4 colours

- Orange: 10
- Black: 2
- Tan: 1
- Trans-Orange: 1

How to read the steps

Parts and step number

7

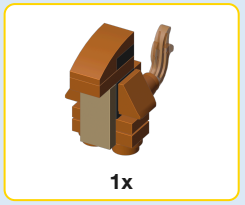

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

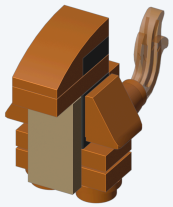

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 1 sections. Each is finished before it is used.

1. Charmander
steps 1–8

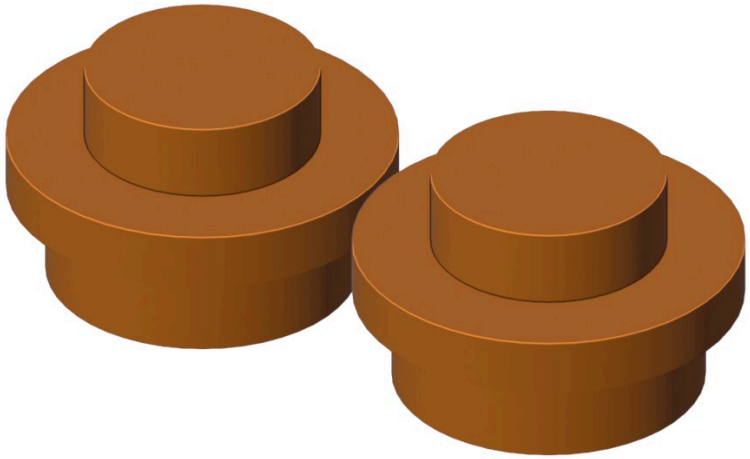

CHARMANDER

1

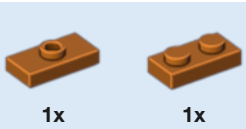

2x

The feet: two round 1 x 1 plates, side by side

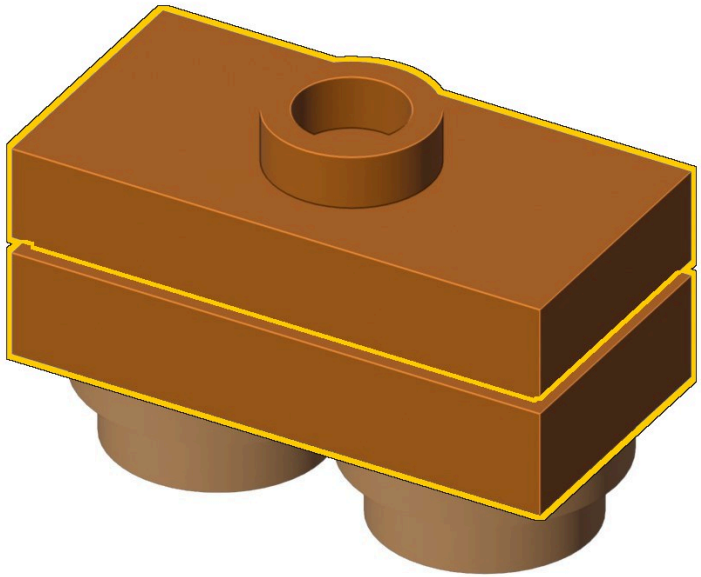

2

1x 1x

The legs: a 1 x 2 plate across both feet, then a jumper plate on top of it

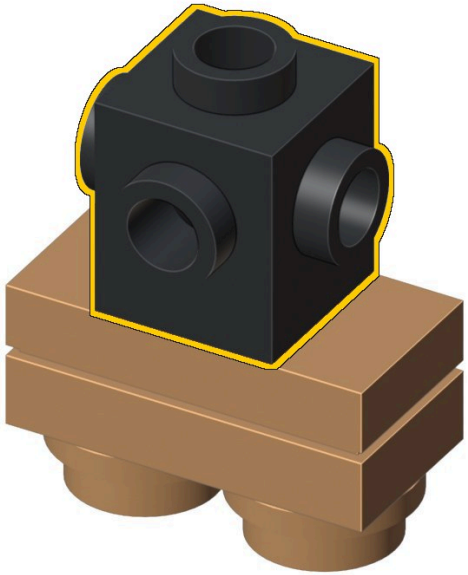

3

1x

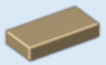

The body: a black brick with studs on all four sides, on the jumper's middle stud

4

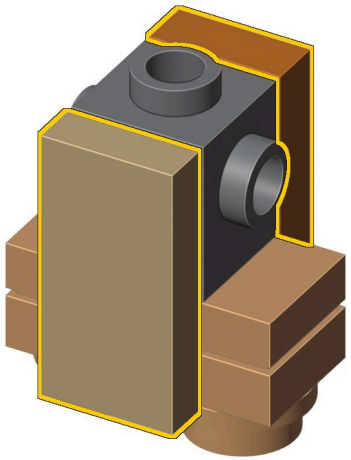

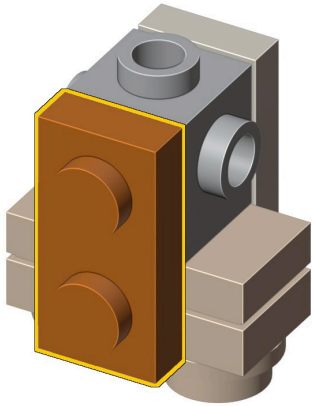

1x

1x
1 × 2

The belly and the back: a tan tile on the front stud, an orange plate standing on the back stud

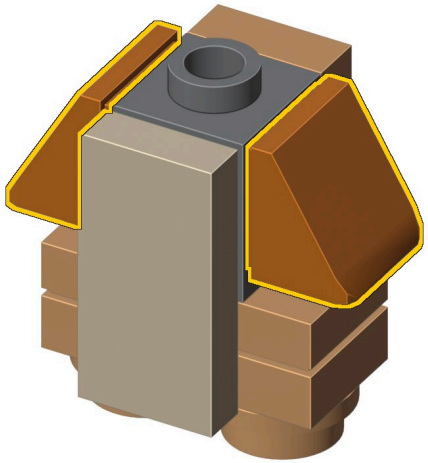

From behind: the outlined piece.

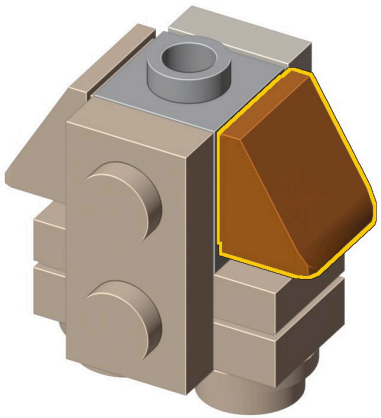

5

2x

The arms: an orange cheese slope on each side stud

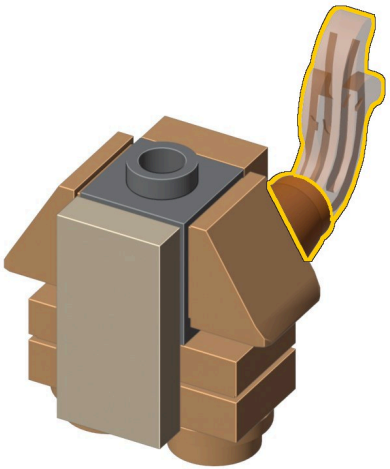

From behind: the outlined piece.

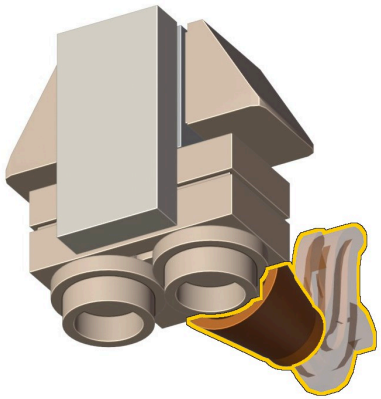

6

1x 1x

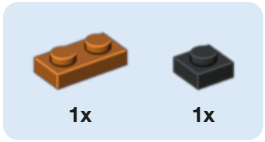

The tail: a cone on the back plate, pointing out behind, and the flame on its tip

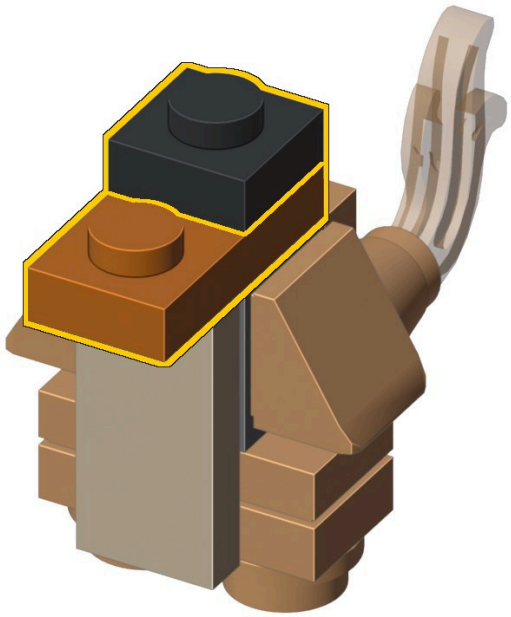

From below: the outlined pieces click in here.

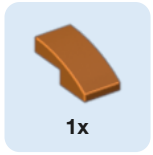

7

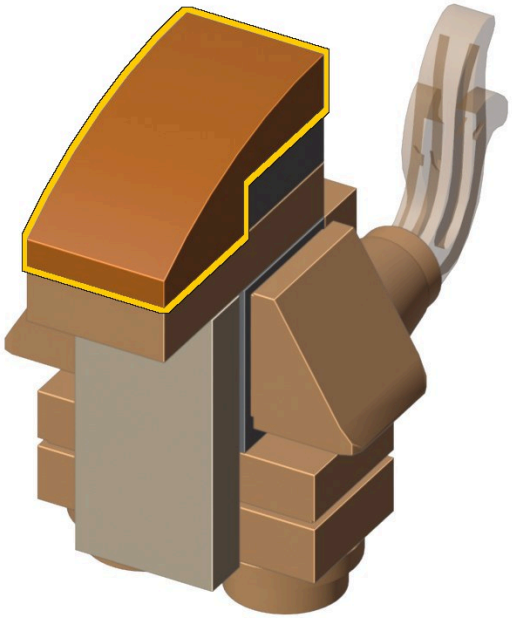

The head: a 1 x 2 plate on the body's top stud, reaching forward, and a black plate on its back stud for the eye band

8

The dome: a curved slope over both, its low end out front, its high end over the black plate

Parts inventory

14 pieces in 10 part/colour lines. Bold: the LEGO element ID (what LEGO Pick a Brick sells); below: the colour and the BrickLink part number.

About this model

Charmander is small enough to stand on your palm: build up from two round feet through the legs to the black body brick, put on the tan belly and the little arms, set the tail and its flame on the back, then finish with the head: a plate, the black eye band and the curved dome.

Checked on a computer

PASS	**real elements**	10 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	15 connections (11 stud, 2 pin, 2 axle); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 14 parts
PASS	**buildability**	12 insertions tried across 1 submodel(s); 0 problem(s)
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/charmander**
