Bricks

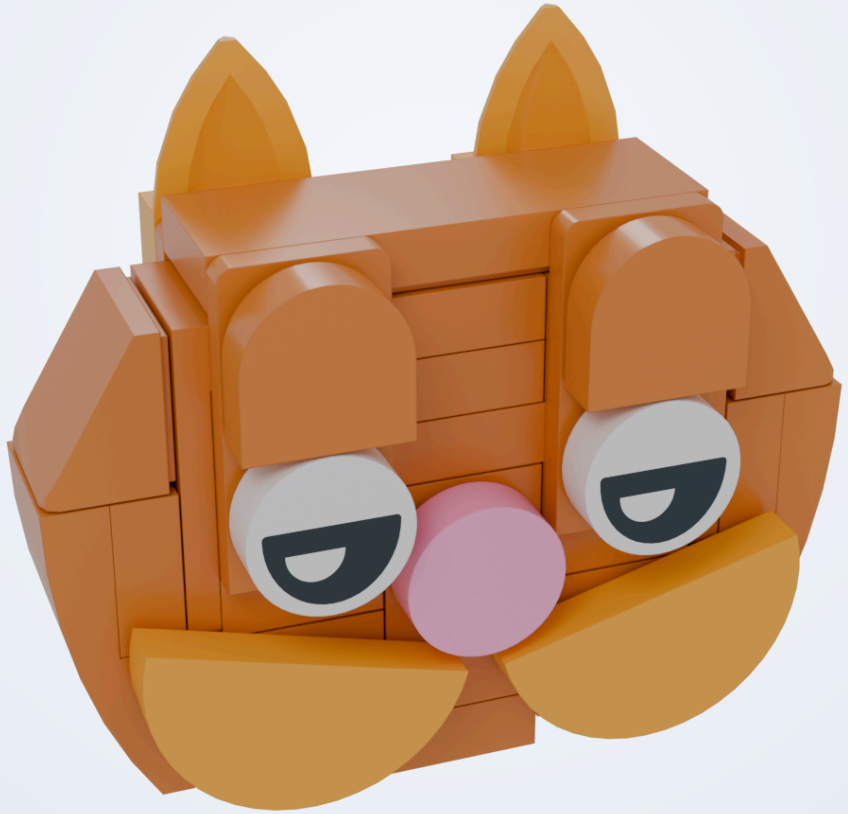

A LEGO® BRICK MODEL OF

Garfield

Garfield, half asleep as ever, in 32 pieces. A design by zeldar.

Designed by zeldar

32 pieces · 19 steps · 3 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Garfield and related names belong to their owners.
Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by zeldar (https://brickit.app/ideas/4938967d-9f27-44fc-b41a-ef581aeff4b8). These steps follow the designer's own instructions, redrawn here.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 33 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 4.0 × 1.9 cm and 3.6 cm tall, about 10 g (estimated).

Start with a one-stud column and a 1 x 3 plate across it: the face's brackets hang under its ends and their studs carry the eyelids and eyes. Brackets on top turn studs out to the sides for the jowls and temples, the ears hang on studs at the back, and the face goes on last: eyelids, the pink nose, the eyes, and the cheeks.

You will need

- The 32 pieces in 4 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- Each jowl is a curved slope with a 1 x 1 brick on its lower hole, the brick's side stud to the front. Put them together first, then press the pair onto the side: the curved slope's upper hole on the plate's stud, the brick tucked under the face bracket.
- Each cheek sits on one stud, so it turns. Turn it until its inner end dips under the nose, as in the pictures.
- The ears are Bright Light Orange: LEGO never made that piece in Orange.

The 4 colours

- Orange: 25
- Bright Light Orange: 4
- White: 2
- Bright Pink: 1

How to read the steps

Parts and step number

7

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

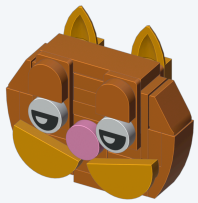

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

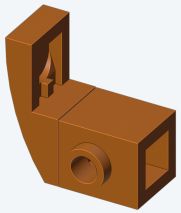

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

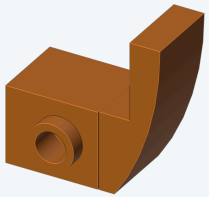

The model is built in 3 sections. Each is finished before it is used.

1. Garfield
steps 1–10, 13–19

2. The left jowl
step 11

3. The right jowl
step 12

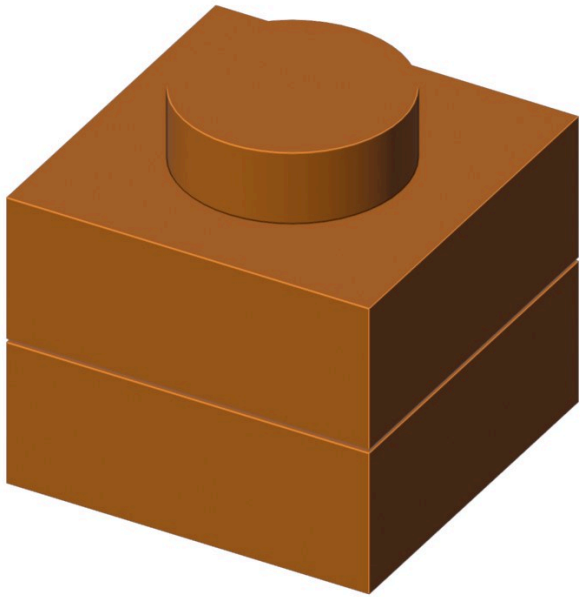

GARFIELD

1

2x

Two 1 x 1 plates, one on the other

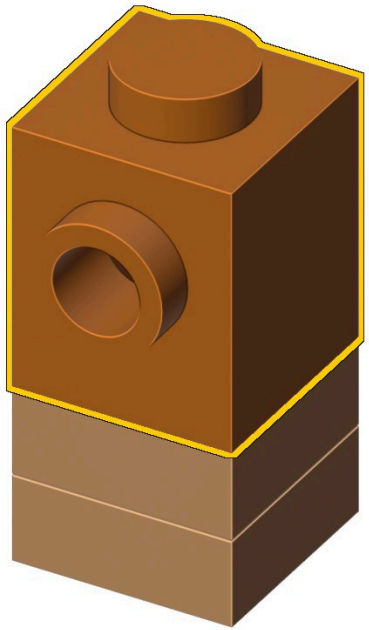

2

1x

A 1 x 1 brick with a stud on its side, the stud to the front

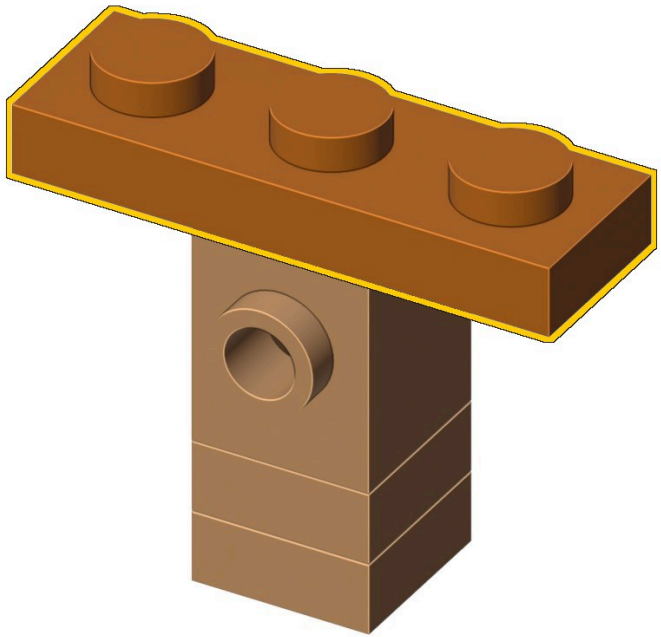

3

1x
1 × 3

A 1 x 3 plate across it

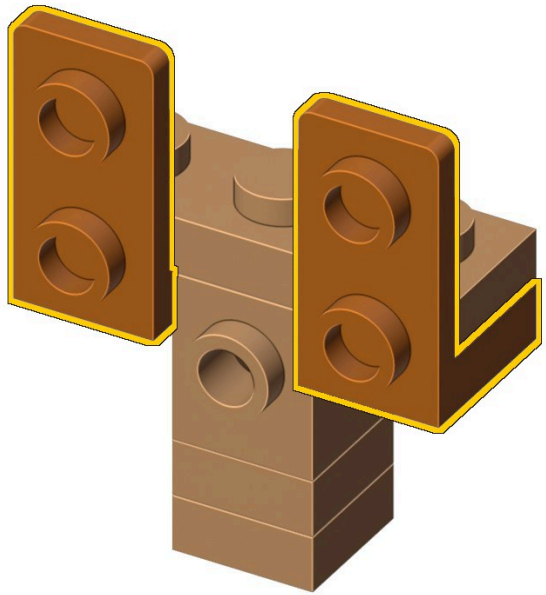

4

2x

Under each end of the 1 x 3 a bracket, its plate standing up in front, studs to the front

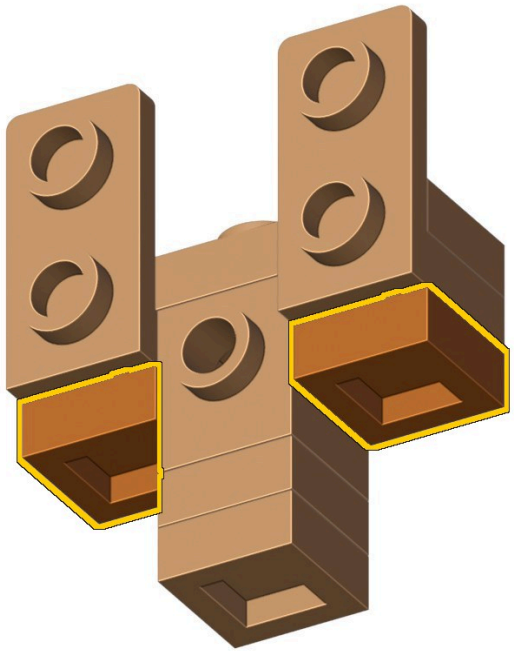

5

2x

seen from below

A 1 x 1 plate under each bracket

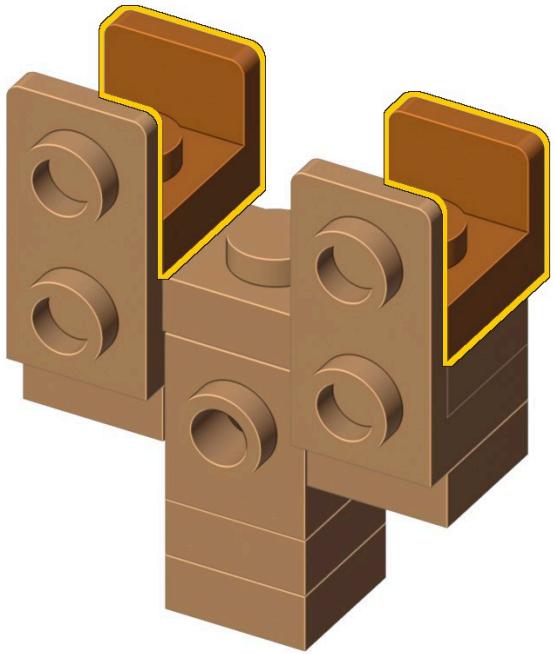

6

2x

On each end of the 1 x 3 a small bracket, its plate at the back, stud to the back

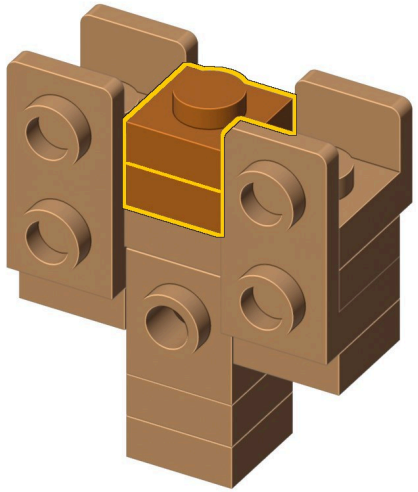

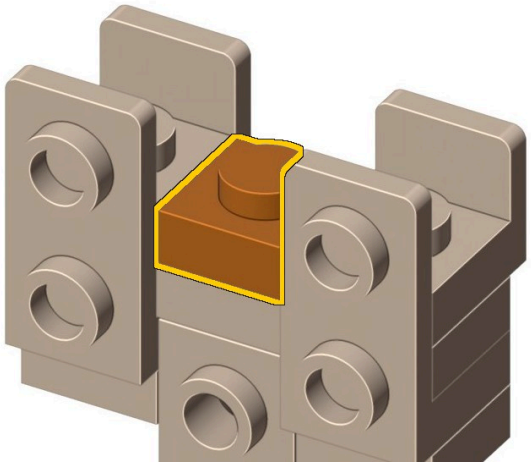

7

2x

Two 1 x 1 plates on the middle of the 1 x 3

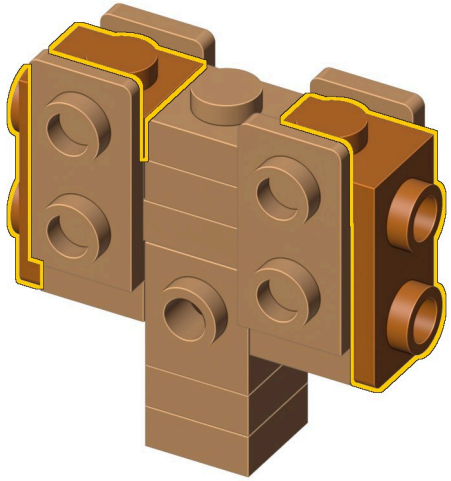

First the outlined piece: the others go on over it.

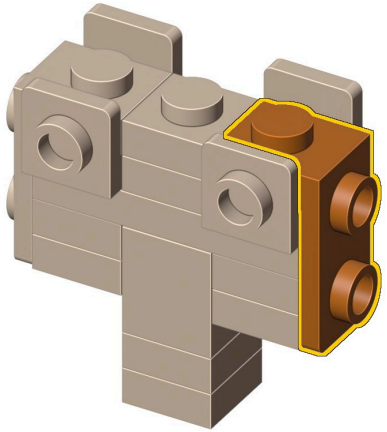

8

2x

On each small bracket a bracket whose plate hangs down the side, studs out

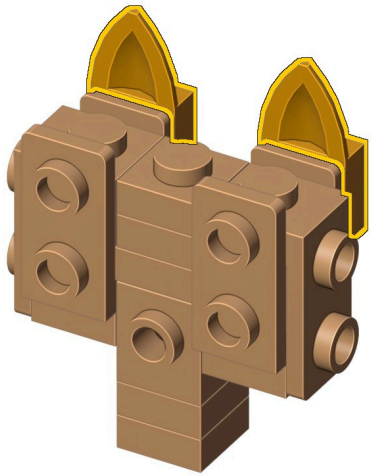

From behind: the outlined piece.

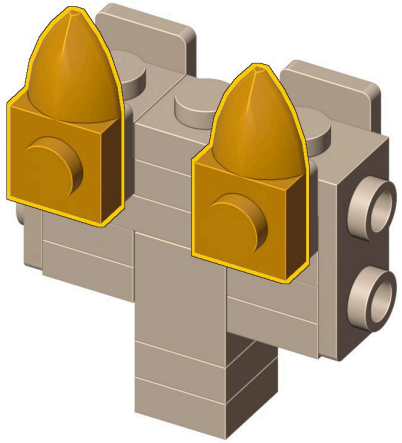

9

2x

The ears: a 1 x 1 plate with a tooth on each back stud, the tooth up

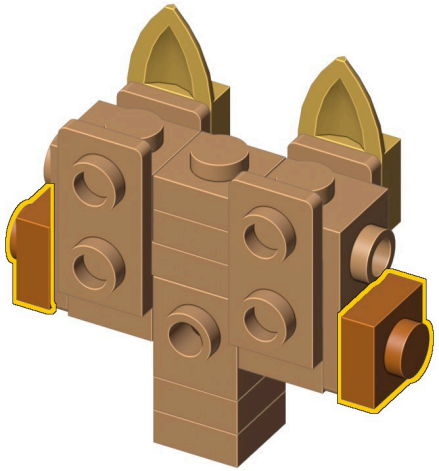

From behind: the outlined pieces.

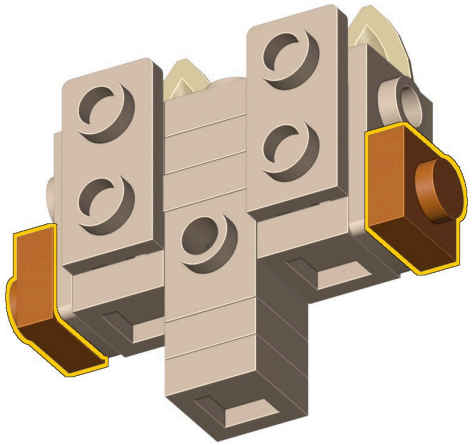

10

2x

A 1 x 1 plate on each side bracket's lower stud

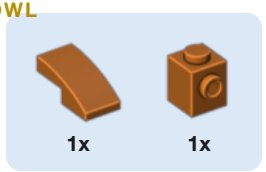

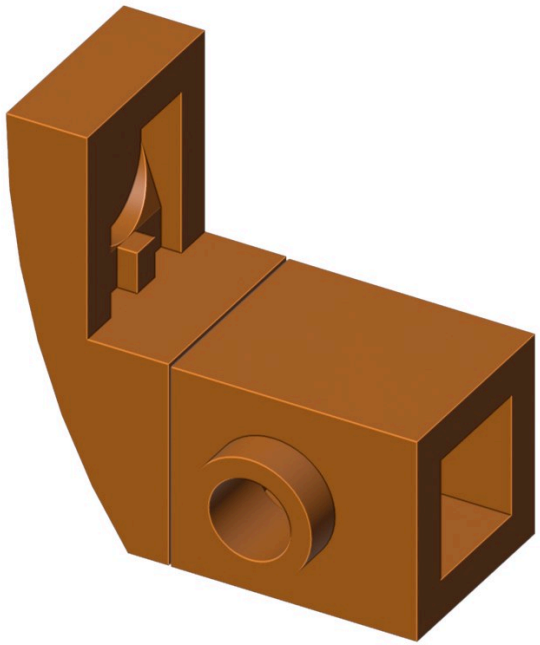

From below: the outlined pieces click in here.

THE LEFT JOWL

11

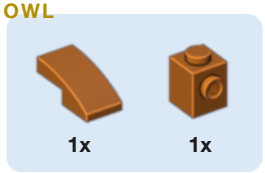

A curved slope, and a 1 x 1 brick with a side stud on its lower hole, the brick's side stud to the front

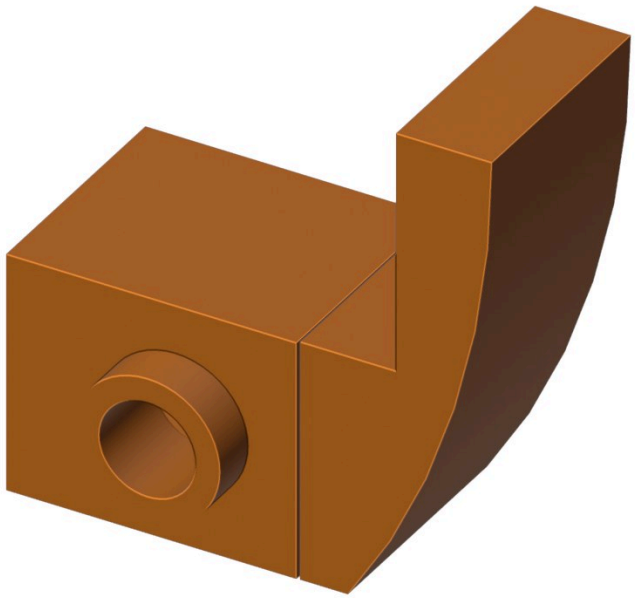

THE RIGHT JOWL

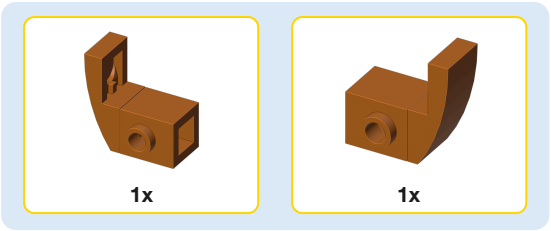

12

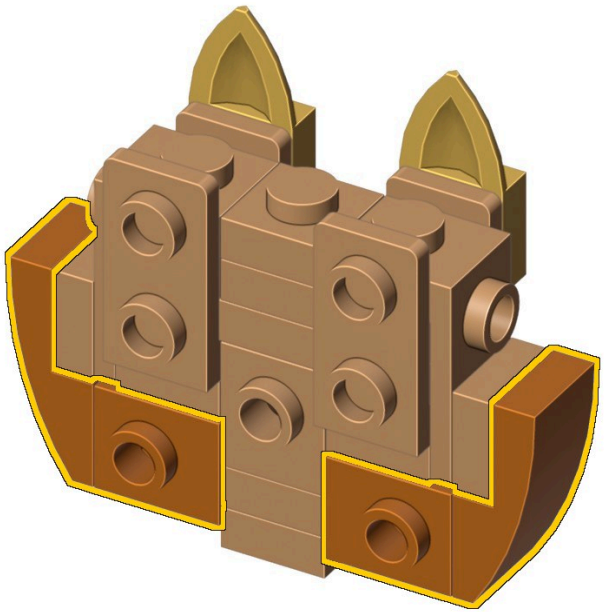

A curved slope, and a 1 x 1 brick with a side stud on its lower hole, the brick's side stud to the front

13

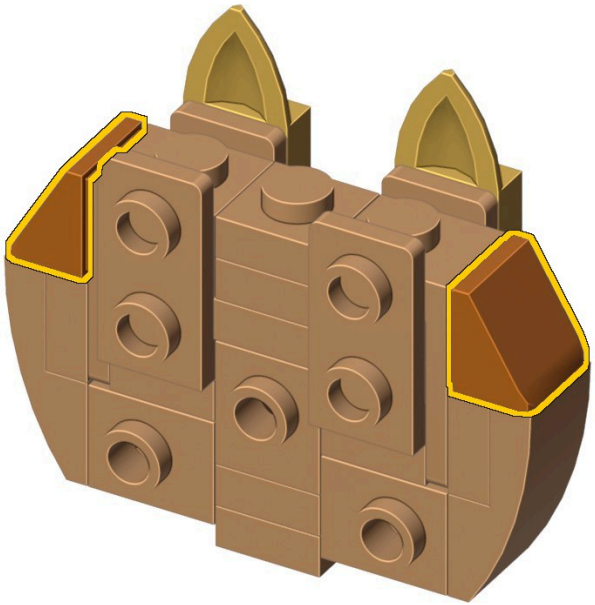

The jowls: each on the side, its upper hole on the plate's stud, the brick tucked under the face bracket's plate

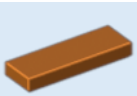

14

A cheese slope on each side bracket's upper stud

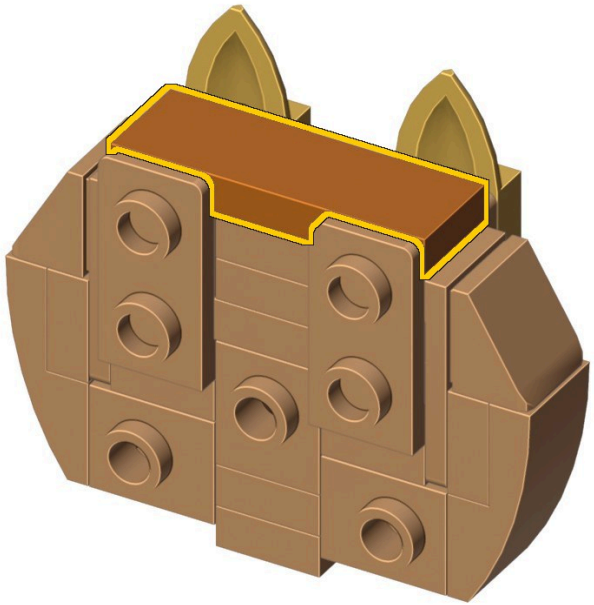

15

1x
1 × 3

A 1 x 3 tile on top

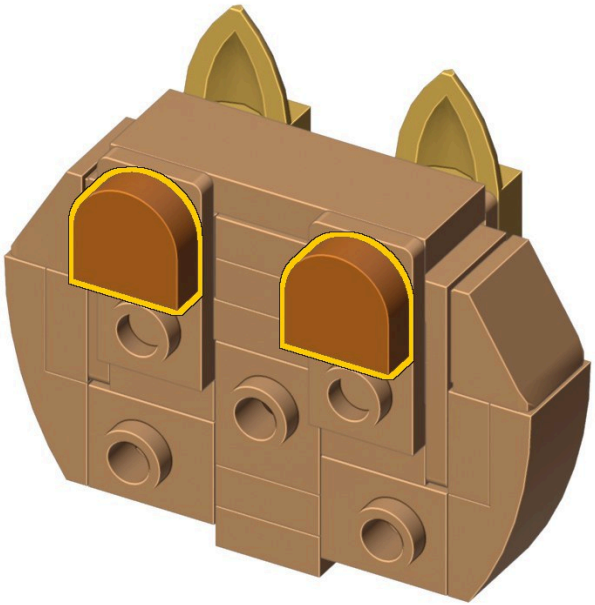

16

2x

The eyelids: a 1 x 1 tile with a round end on each upper stud, round end up

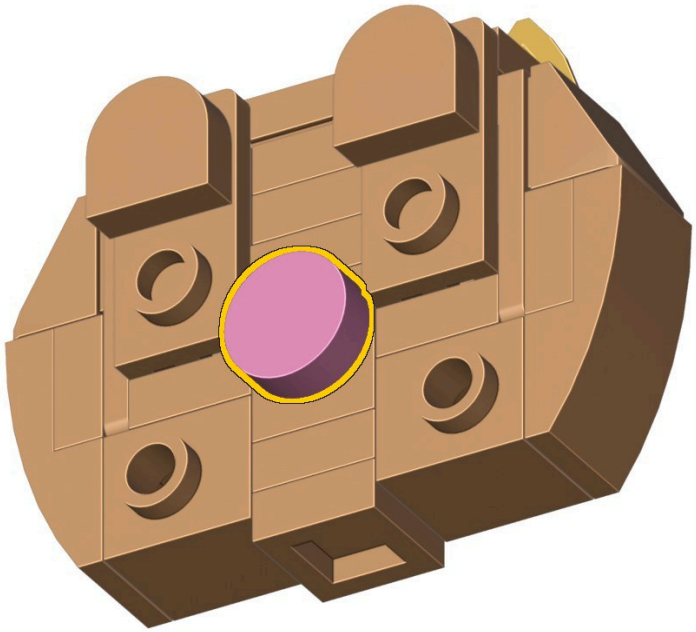

17

1x

seen from below

The nose: a pink round tile on the middle brick's stud

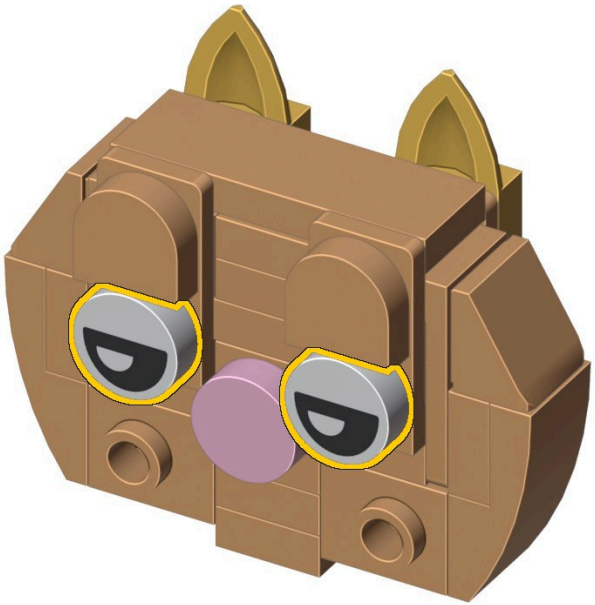

18

2x

The eyes, under the eyelids

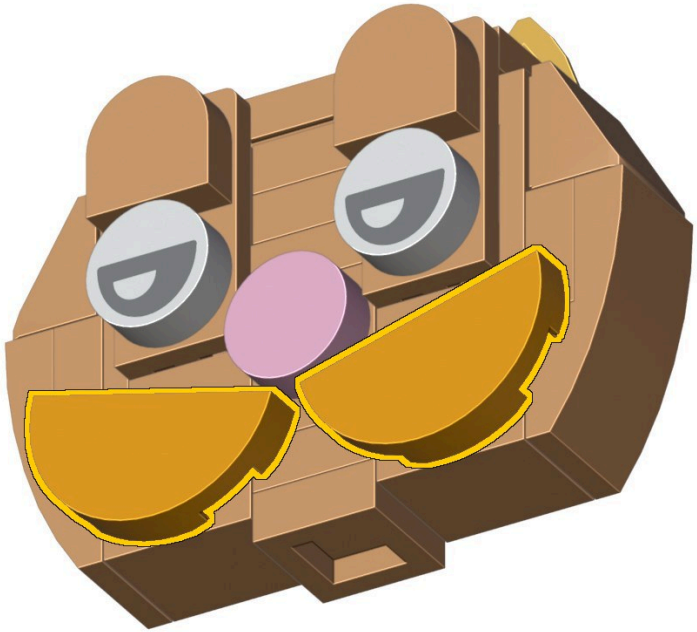

19

2x
1 × 2

seen from below

The cheeks: a half round tile on each side brick's stud, flat edge up, turned so its inner end dips under the nose

Parts inventory

About this model

Start with a one-stud column and a 1 x 3 plate across it: the face's brackets hang under its ends and their studs carry the eyelids and eyes. Brackets on top turn studs out to the sides for the jowls and temples, the ears hang on studs at the back, and the face goes on last: eyelids, the pink nose, the eyes, and the cheeks.

Checked on a computer

PASS	**real elements**	14 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	33 connections (33 stud); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 32 parts
PASS	**buildability**	31 insertions tried across 3 submodel(s); 0 problem(s)
PASS	**stability**	about 10 g; centre of mass inside the base (87% margin); tips at 12.2 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
