Bricks

A LEGO® BRICK MODEL OF

Jake the Dog

Finn's shorter, rounder best friend.

143 pieces · 39 steps · 7 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Jake the Dog and related names belong to their owners. Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 360 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 13.5 × 8.1 cm and 13.1 cm tall, about 132 g (estimated).

Build the rounded body, then the two short legs and bent arms. Add the outlined white eyes, drooping muzzle, black nose and small ears, then connect the limbs on their hidden pins.

You will need

- The 143 pieces in 3 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 3 colours

- Yellow: 131
- White: 2
- Black: 10

How to read the steps

Parts and step number

7

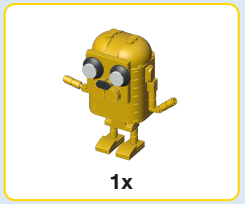

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

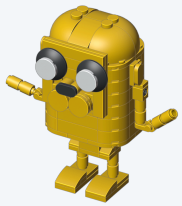

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

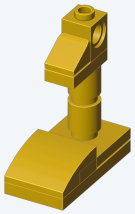

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

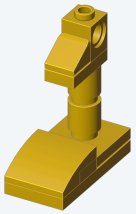

The model is built in 7 sections. Each is finished before it is used.

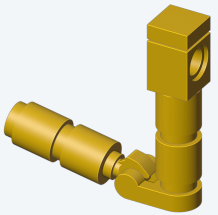

1. Jake the Dog
steps 1–23, 27, 31, 35, 39

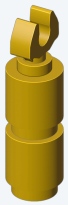

2. Right leg
steps 24–26

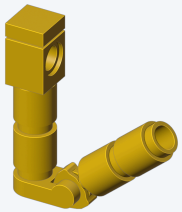

3. Left leg
steps 28–30

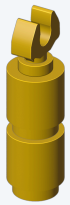

4. Right arm
steps 32, 34

5. Right forearm
step 33

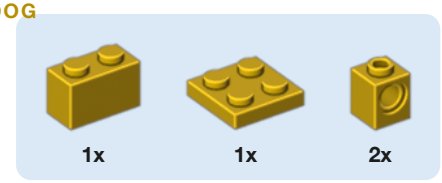

6. Left arm
steps 36, 38

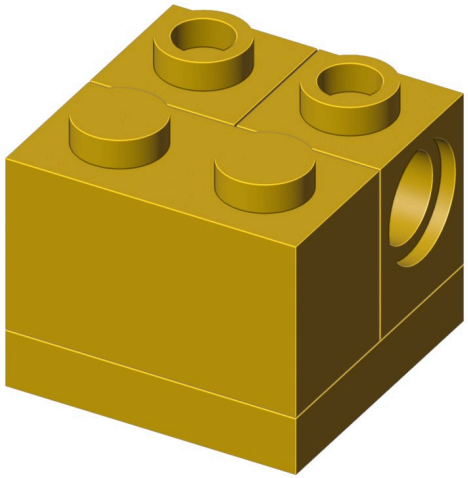

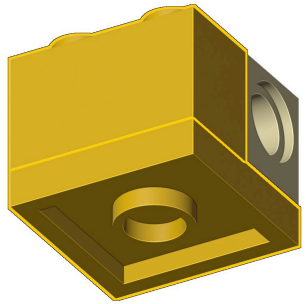

7. Left forearm
step 37

1

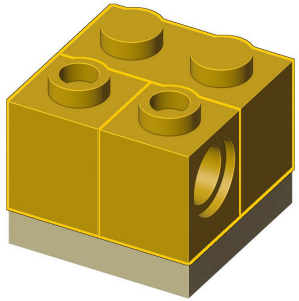

The hidden hips: a plate, two Technic bricks and a brick in front

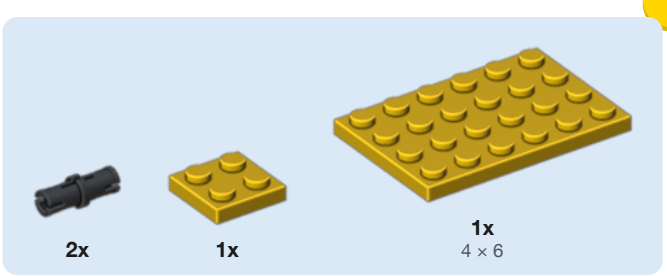

From below: the outlined pieces click in here.

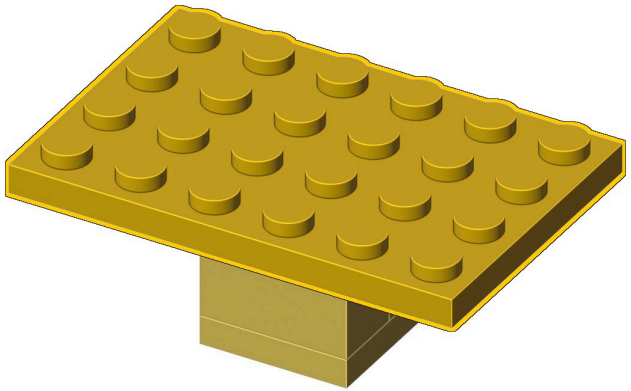

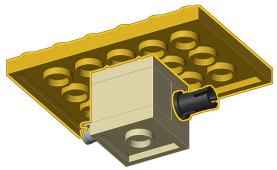

From behind: the outlined pieces.

2

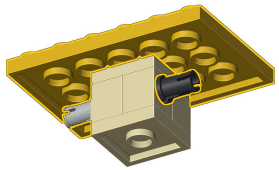

Tie the hips together and push in the two leg pins

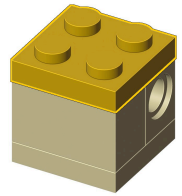

From below: the outlined pieces click in here.

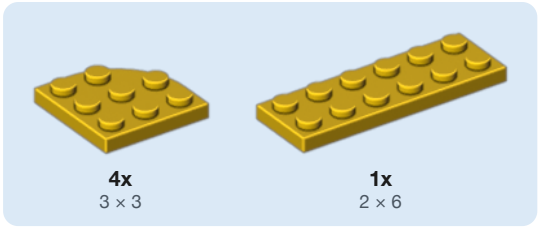

From behind and below: the outlined pieces.

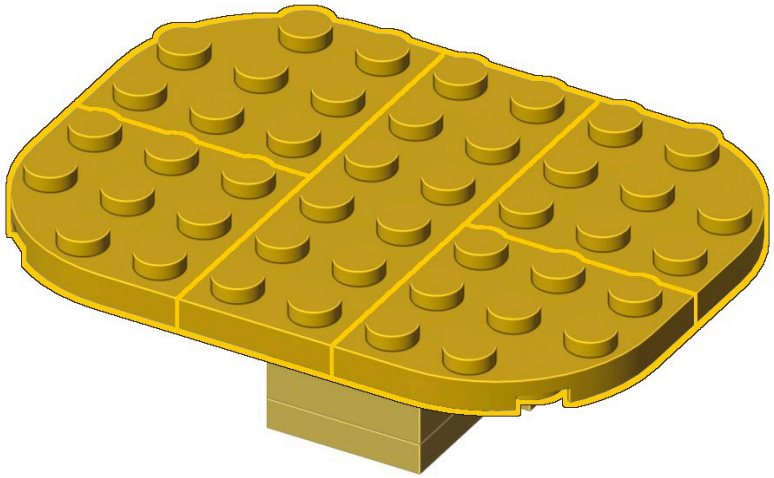

First the outlined piece: the others go on over it.

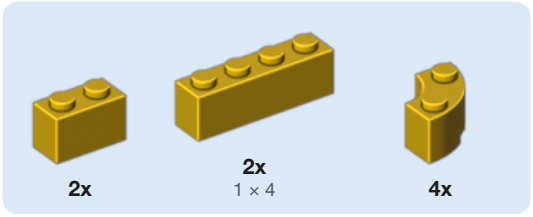

3

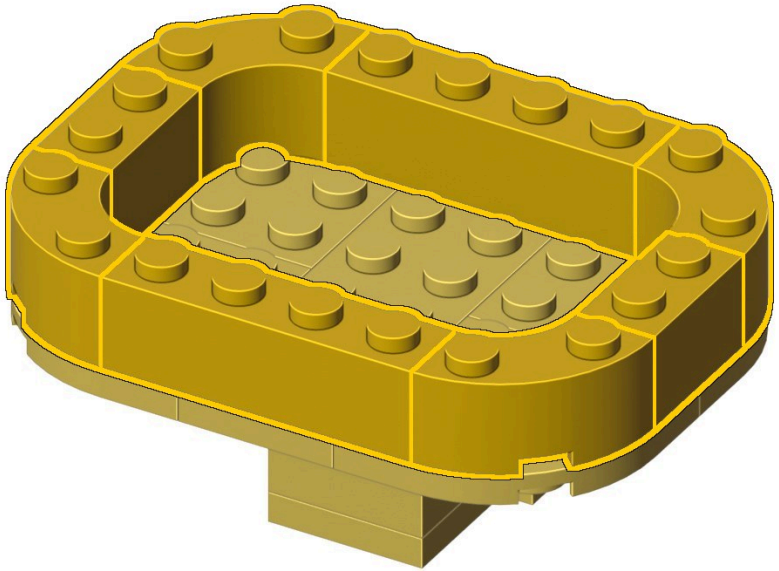

Five plates make the rounded floor of the belly

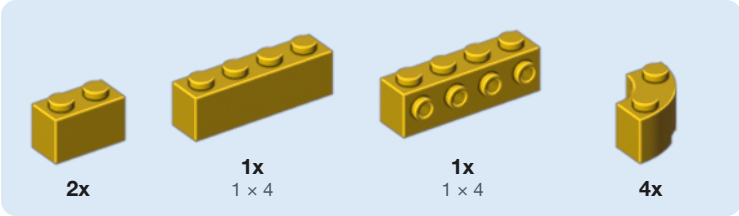

4

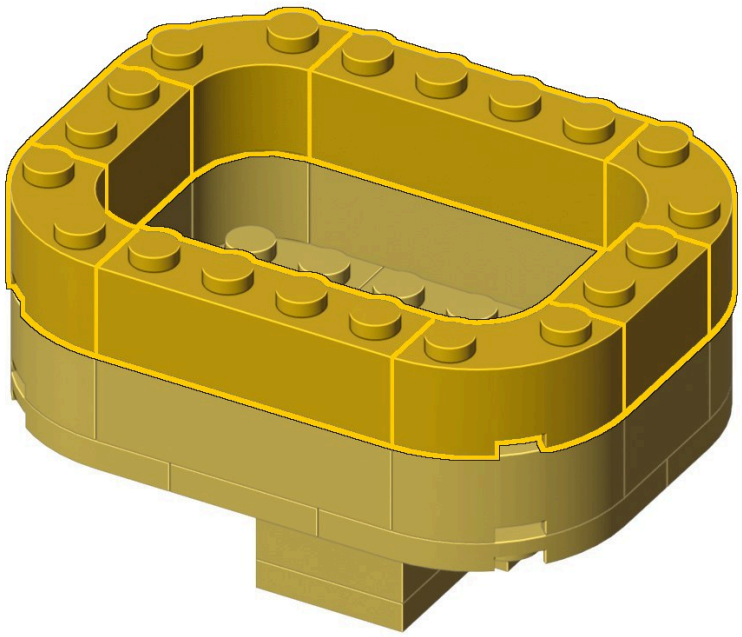

Body ring 1: rounded corners, a front and back, and two sides

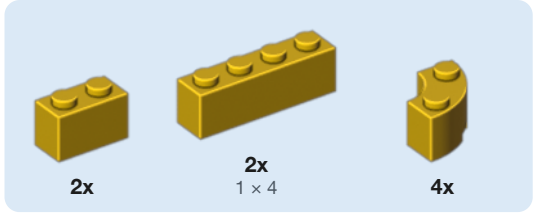

5

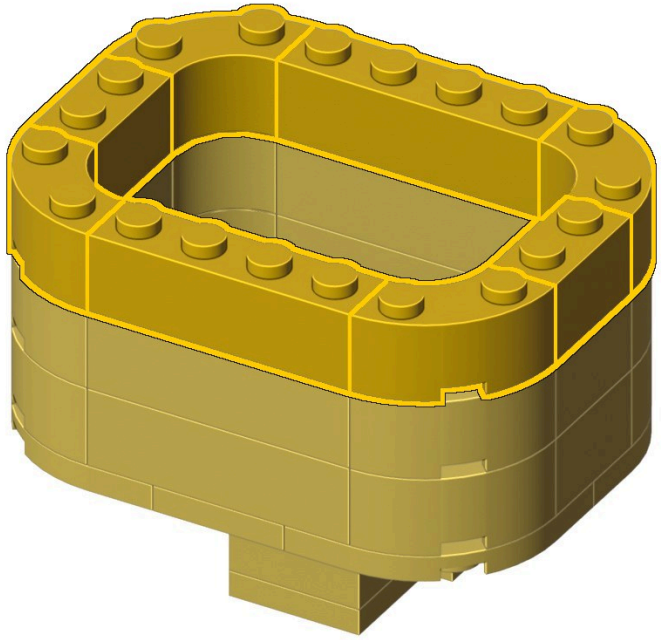

Body ring 2: rounded corners, a front and back, and two sides

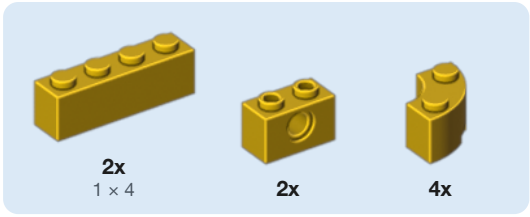

6

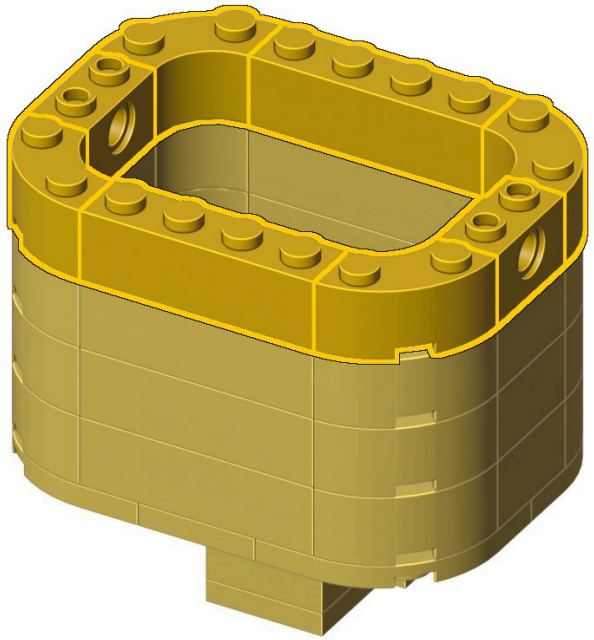

Body ring 3: rounded corners, a front and back, and two sides

7

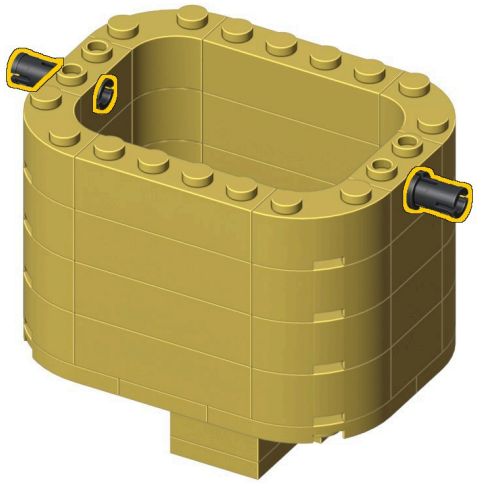

Body ring 4: rounded corners, a front and back, and two sides

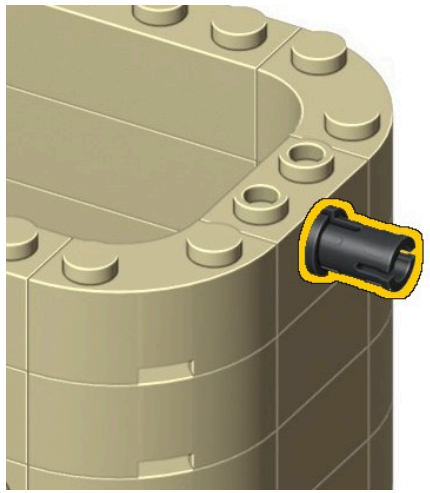

8

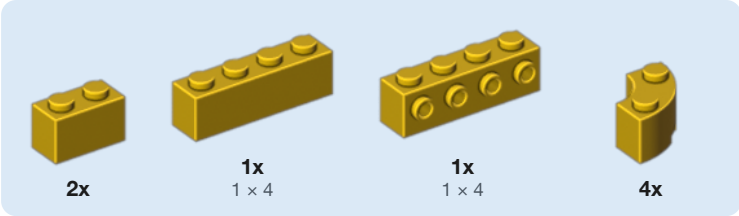

Push a black shoulder pin into each side

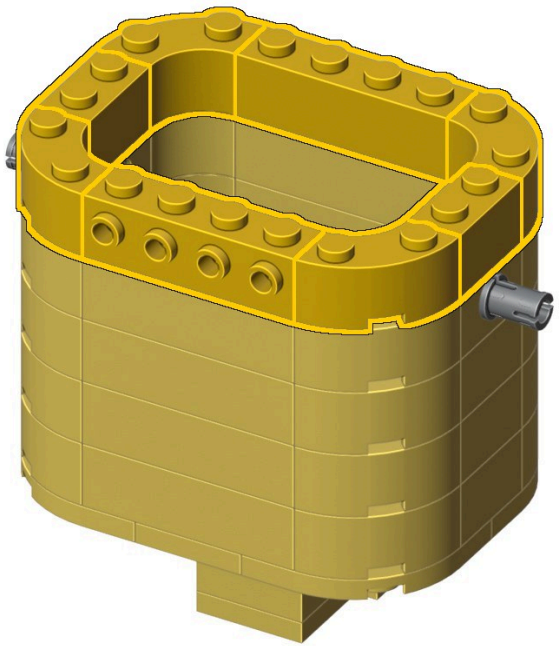

From behind: the outlined piece.

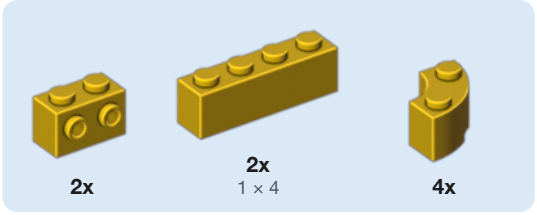

9

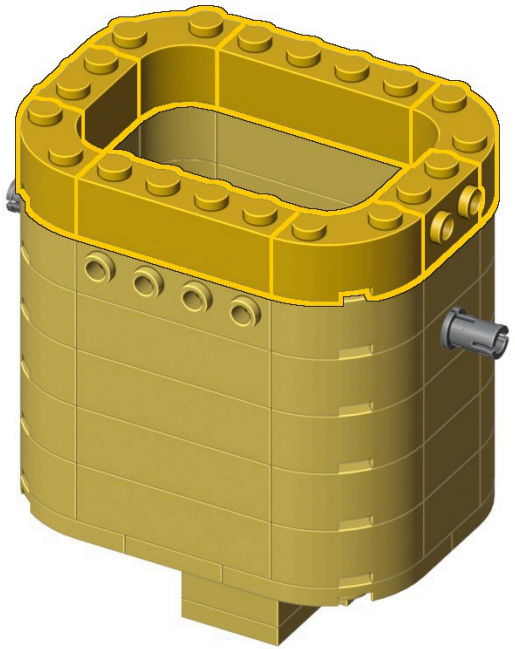

Body ring 5: rounded corners, a front and back, and two sides

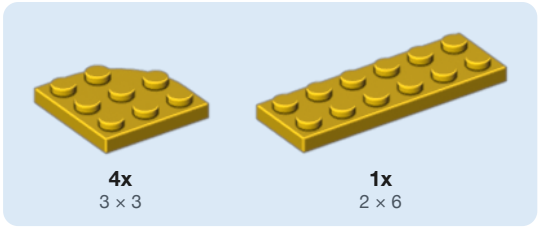

10

Body ring 6: rounded corners, a front and back, and two sides

11

4x
3 × 3

1x
2 × 6

Tie the walls together with another rounded layer of plates

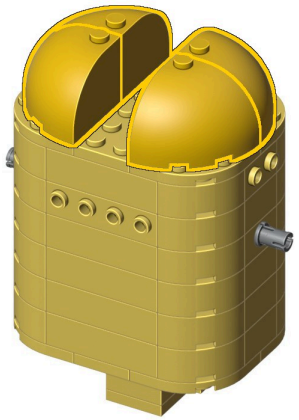

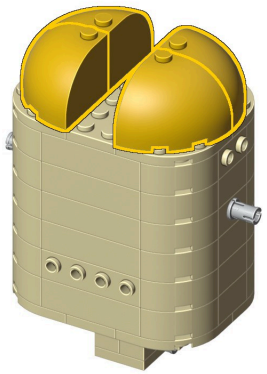

12

4x
3 × 3

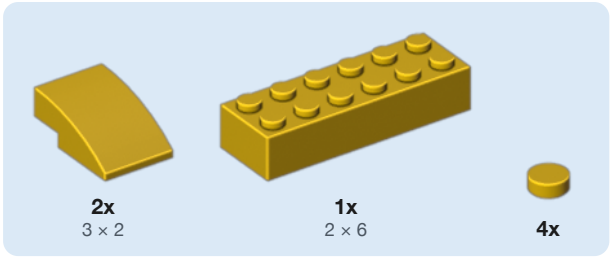

Four dome corners round the top of his head

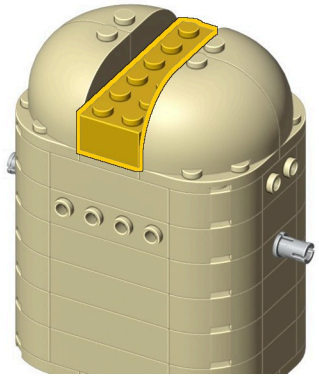

From behind: the outlined pieces.

13

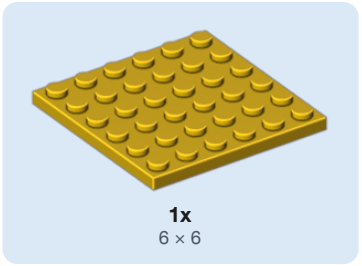

Fill the middle of the crown and smooth its exposed studs

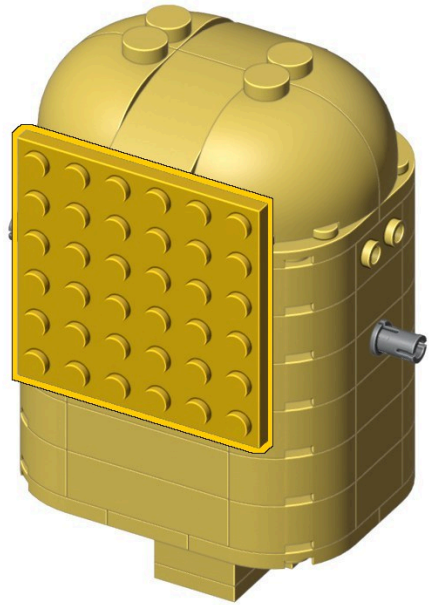

First the outlined piece: the others go on over it.

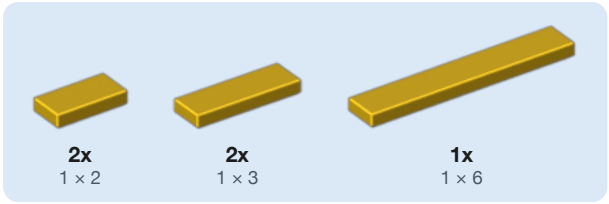

14

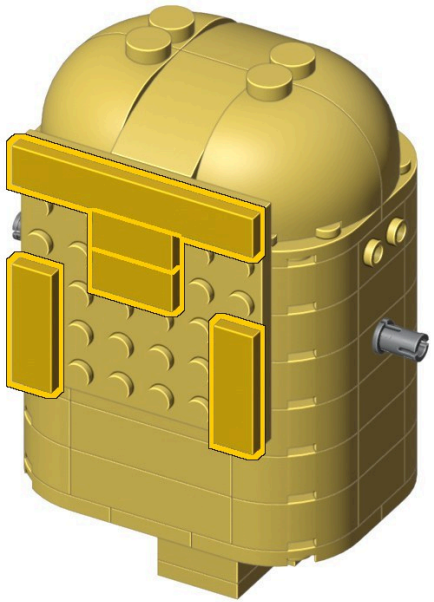

Press a six-stud face plate onto the four front studs

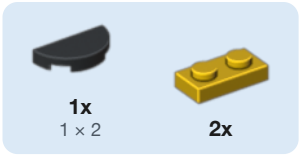

15

Smooth the forehead and cheeks with yellow tiles

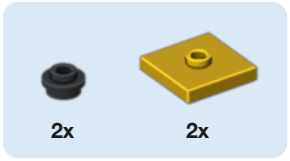

16

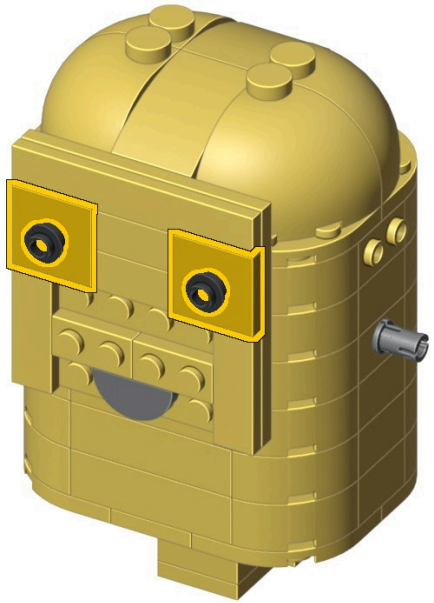

A small black smile, with a support plate for each round jowl

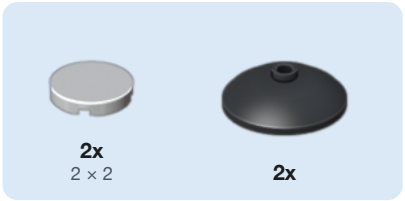

17

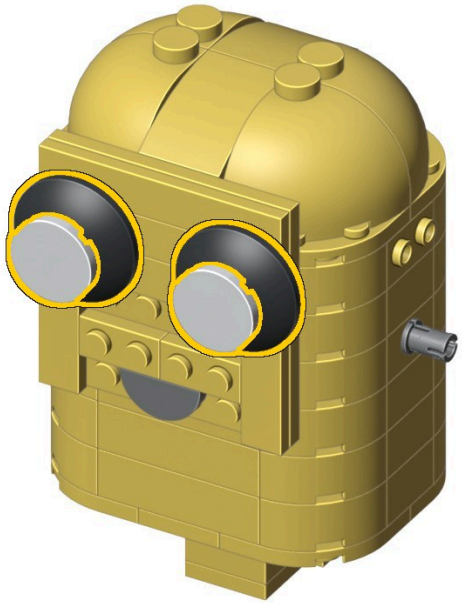

Two yellow jumpers position the eyes; black round plates lift their rims clear

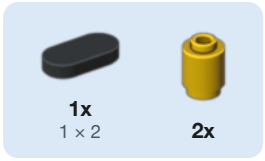

18

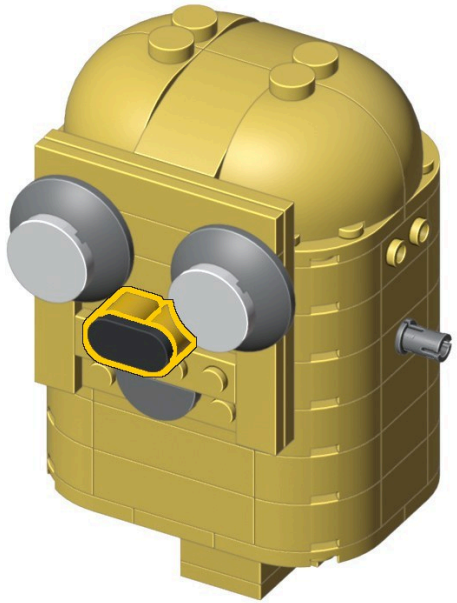

Black dishes outline the two big white eyes

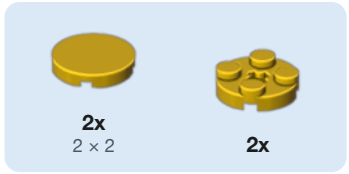

19

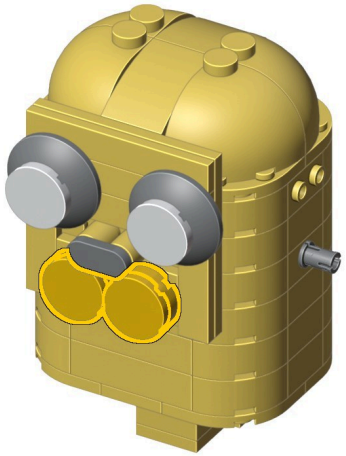

Two narrow round bricks support the oval black nose

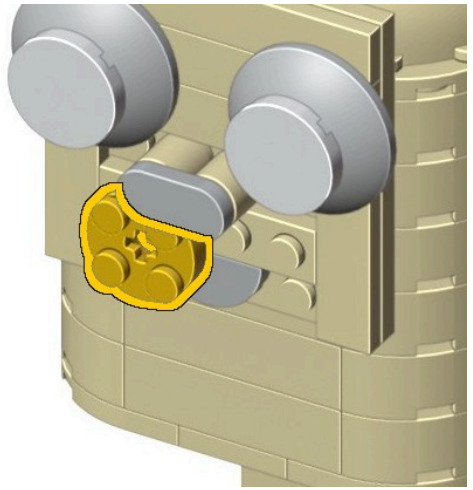

20

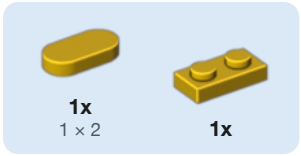

Stack a round plate and smooth round tile for each hanging jowl

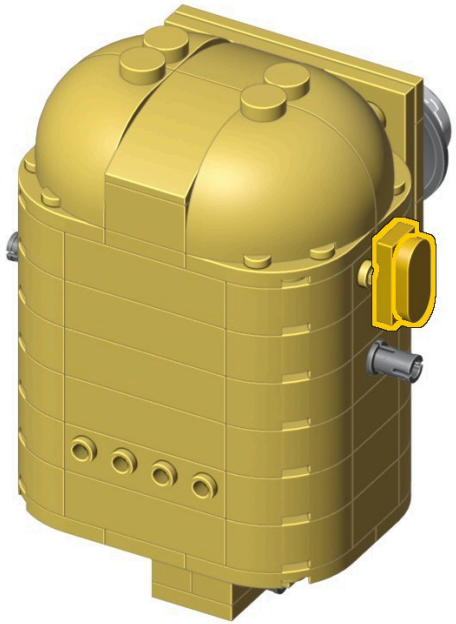

First the outlined piece: the others go on over it.

21

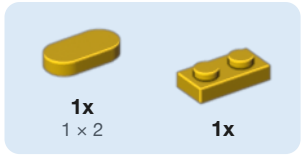

seen from behind

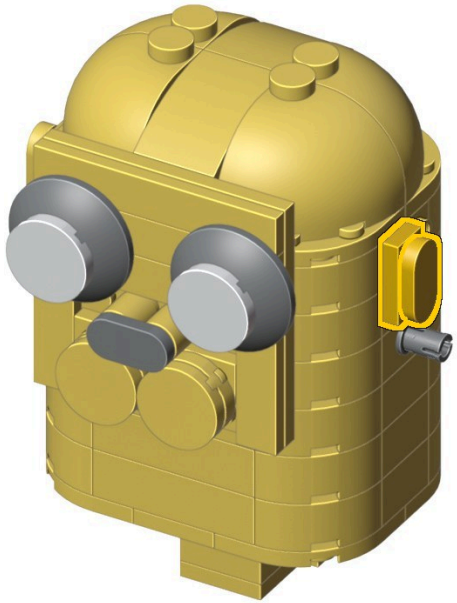

A short rounded ear on the side of the head

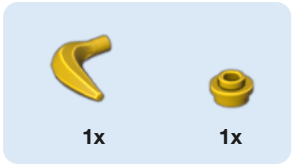

22

A short rounded ear on the side of the head

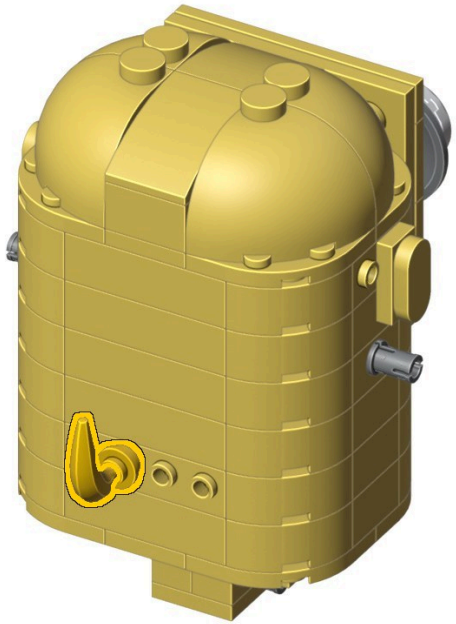

23

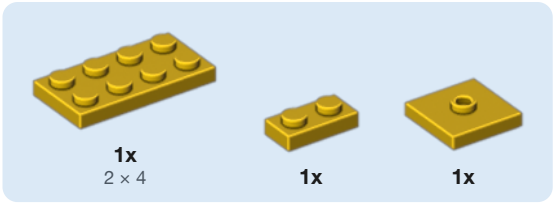

seen from behind

A small upturned tail: an open stud holding a yellow curved bar

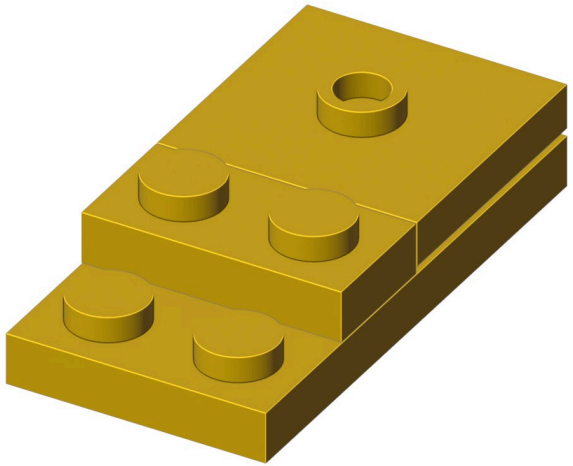

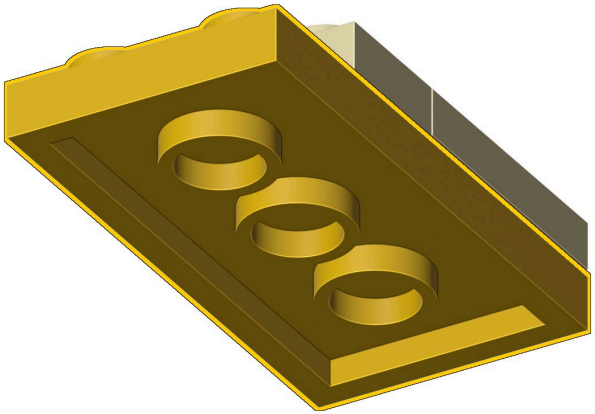

RIGHT LEG

24

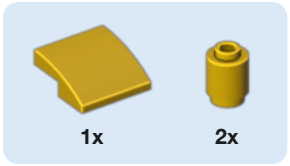

A yellow foot: the sole, a plate for the toe and a jumper for the ankle

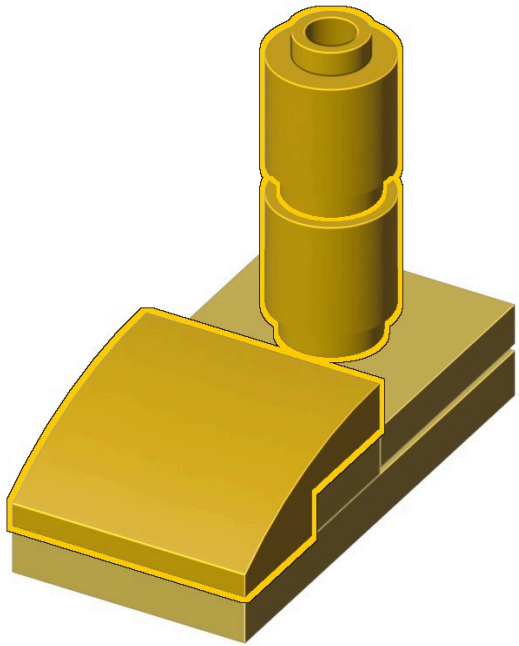

From below: the outlined piece clicks in here.

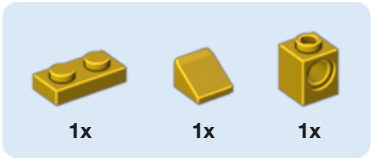

25

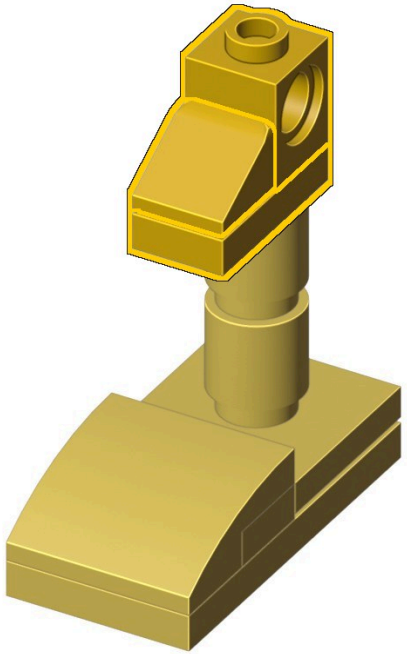

Round the toe, then stack two round bricks for the short leg

26

The hip: a plate with a Technic brick above the leg and a slope in front

JAKE THE DOG

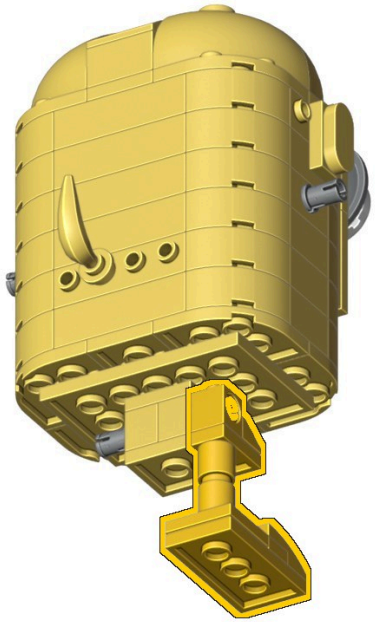

27

1x

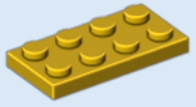

seen from behind and below

Push a short leg onto its hidden hip pin

About this model

Build the rounded body, then the two short legs and bent arms. Add the outlined white eyes, drooping muzzle, black nose and small ears, then connect the limbs on their hidden pins.

Checked on a computer

PASS	**real elements**	39 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	360 connections (339 stud, 16 pin, 3 bar, 2 clip); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 143 parts
PASS	**buildability**	144 insertions tried across 7 submodel(s); 0 problem(s)
PASS	**stability**	about 132 g; centre of mass inside the base (99% margin); tips at 11.4 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
