Bricks

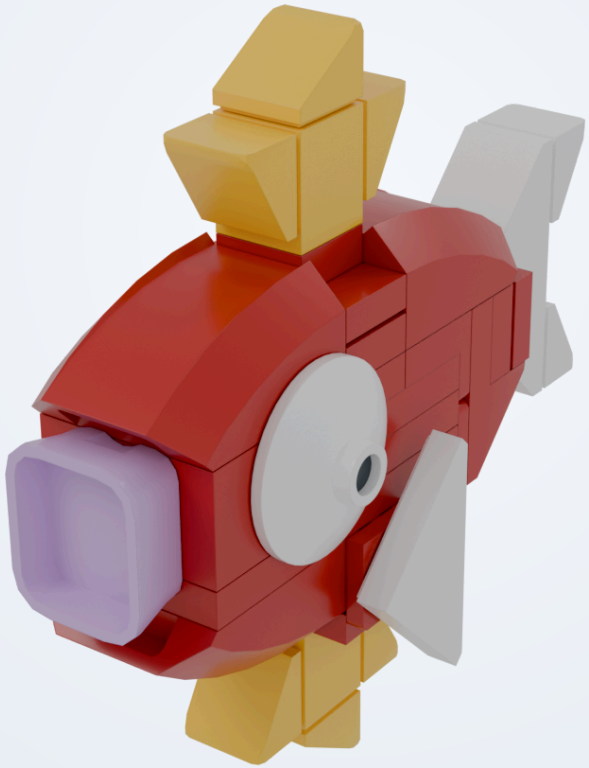

A LEGO® BRICK MODEL OF

Magikarp

A red fish with round eyes, an open mouth and yellow fins, in 43 pieces.

Designed by Redverse

43 pieces · 19 steps · 4 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Magikarp and related names belong to their owners. Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by Redverse (https://rebrickable.com/mocs/MOC-182443/). These steps were worked out from it here; they are not the designer's own instructions.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 64 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 2.6 × 6.5 cm and 6.4 cm tall.

This Magikarp is built sideways. Two plates and a bracket make the top of its core; a 2 x 4 plate with a second bracket goes underneath upside down, and two slopes pressed over the brackets' side studs lock the halves together. An axle through the middle carries both eyes. The tail goes on the slopes, the fin brackets and belly go on from underneath, and the head is a brick with a hole, upside down at the front. Last come the eyes and side fins, the mouth, three curved bricks that round the body off, and the two yellow fins. It balances on its belly fin, so lay it on its side or hold it to show it.

You will need

- The 43 pieces in 6 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

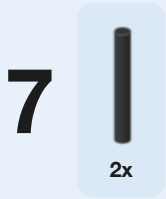

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 6 colours

- Red: 24
- Yellow: 8
- White: 7
- Blue: 2
- Black: 1
- Lavender: 1

How to read the steps

Parts and step number

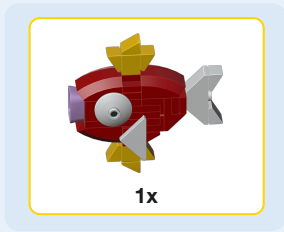

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

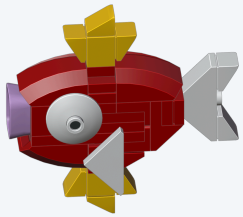

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

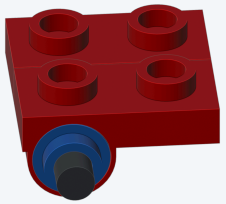

The model is built in 4 sections. Each is finished before it is used.

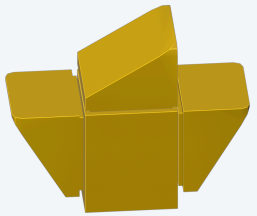

1. Magikarp
steps 1, 3, 7–16, 19

2. Belly plate
step 2

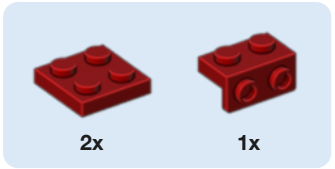

3. Eye axle
steps 4–6

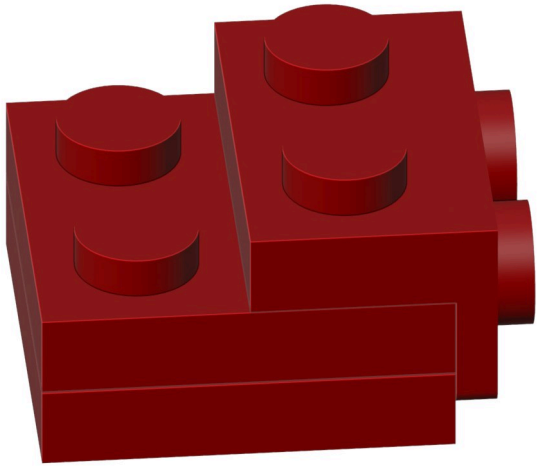

4. Fin ×2
steps 17–18

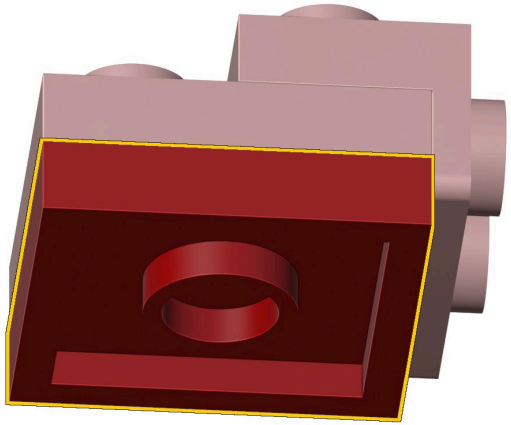

MAGIKARP

1

Two 2 x 2 plates, and a bracket on their end studs: its wall hangs down over their end

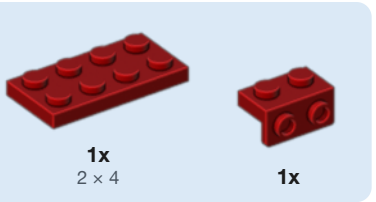

From below: the outlined piece clicks in here.

BELLY PLATE

2

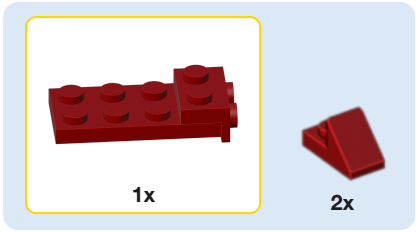

A bracket on the end studs of the 2 x 4 plate, its wall down over the plate's end

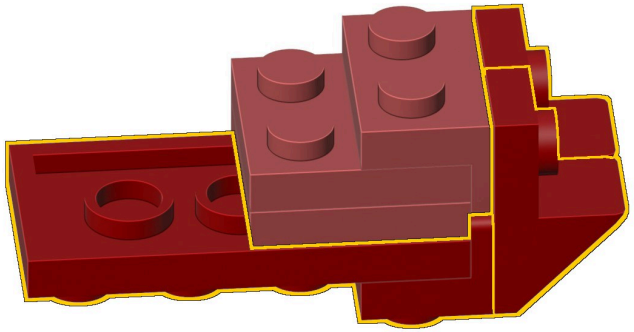

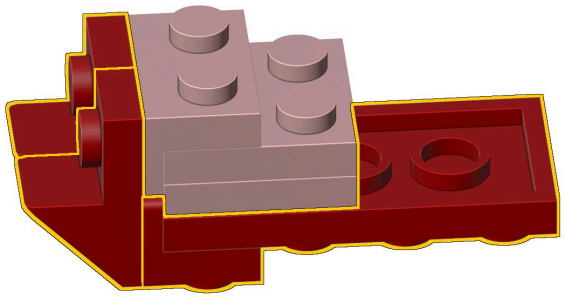

MAGIKARP

3

Turn the belly plate over and hold it under the stack, wall under wall. Lock them with two slopes: each goes on an upper and a lower side stud

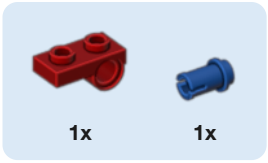

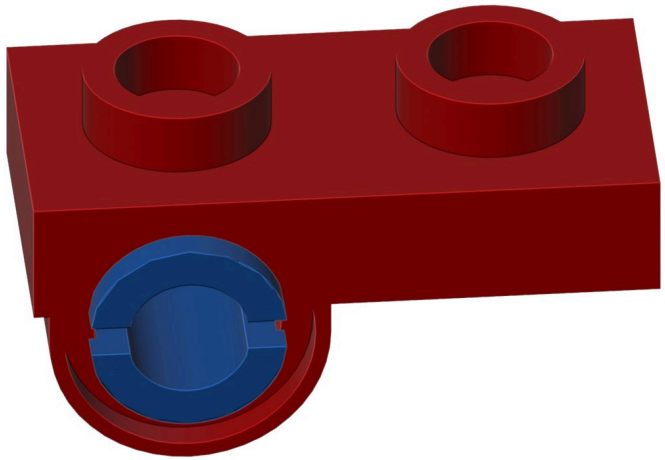

From behind: the outlined pieces.

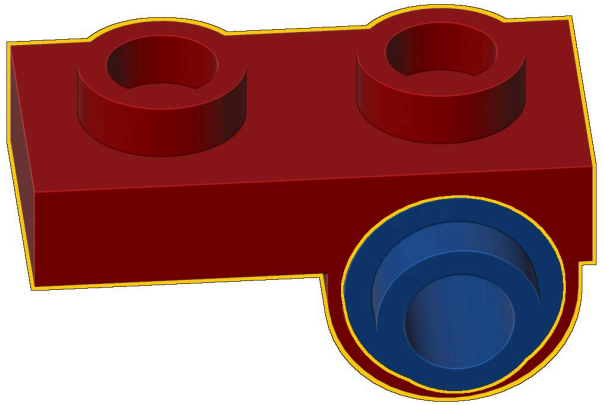

EYE AXLE

4

A blue pin in the hole under a plate, from the outside

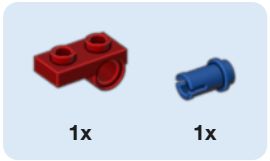

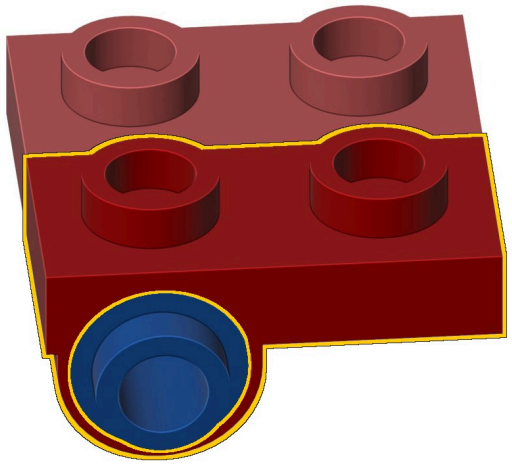

From behind: the outlined pieces.

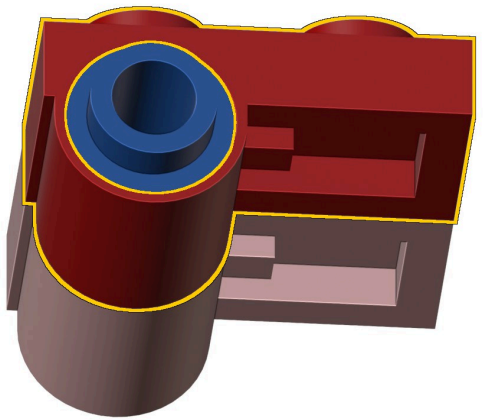

Eye axle

5

The second plate beside it, with its pin

From below: the outlined pieces click in here.

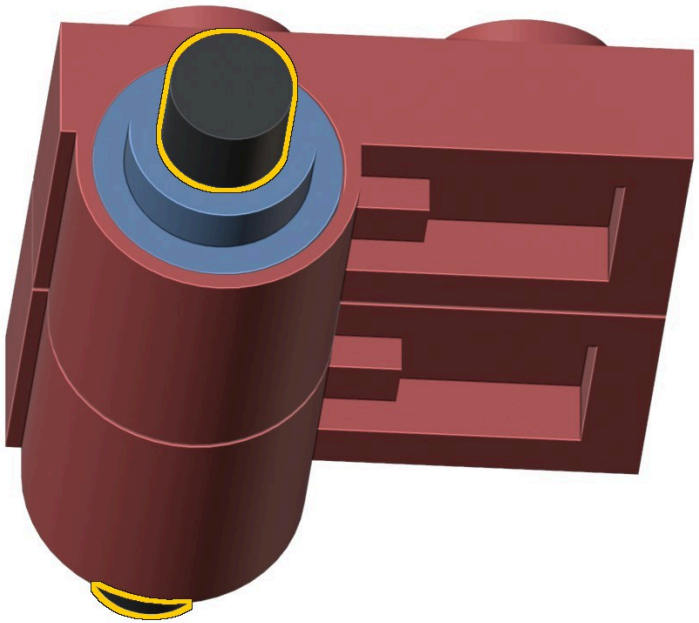

6

Eye axle

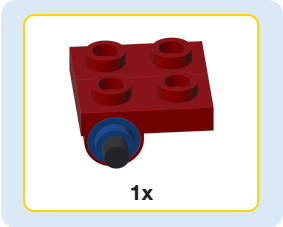

seen from below

The bar through both pins: the same length sticks out at each end

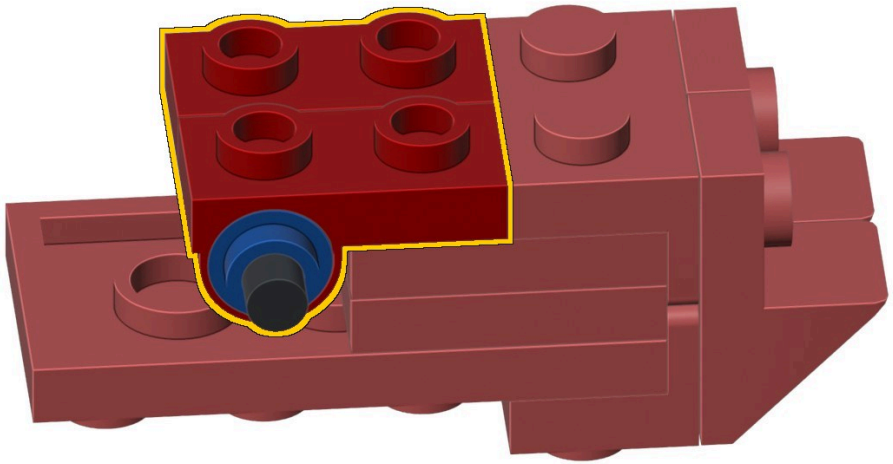

MAGIKARP

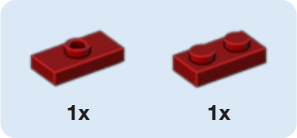

7

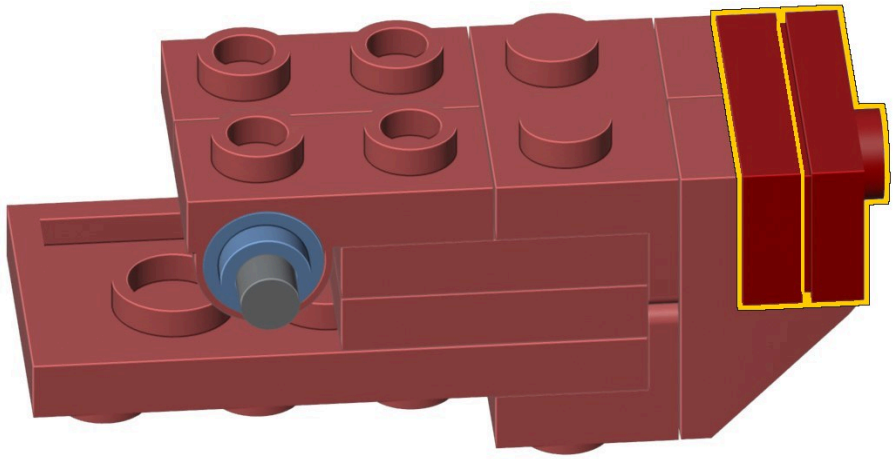

The eye axle on the two free studs, its pins over the hollow of the 2 x 4

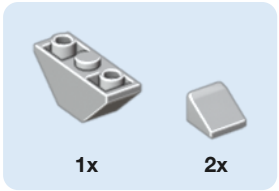

8

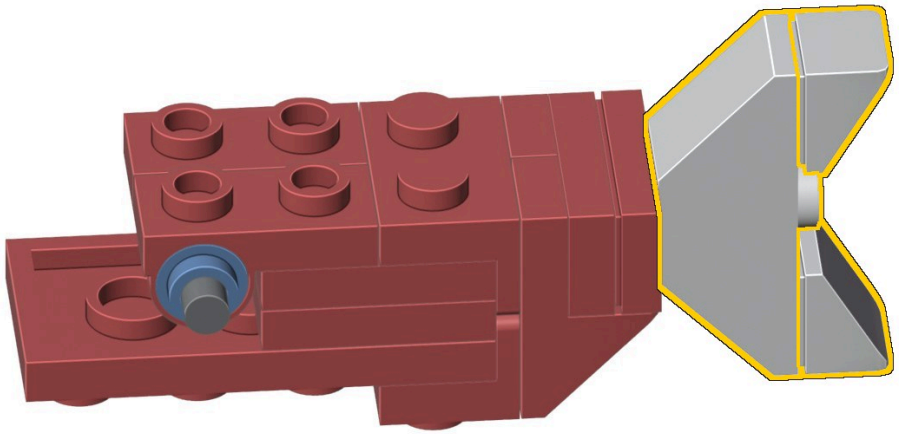

On the slopes' two studs: a plate, then a plate with one stud

9

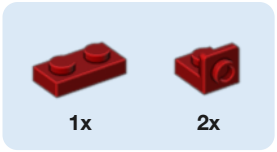

The tail on that stud, upright, and a white slope on its top and bottom studs

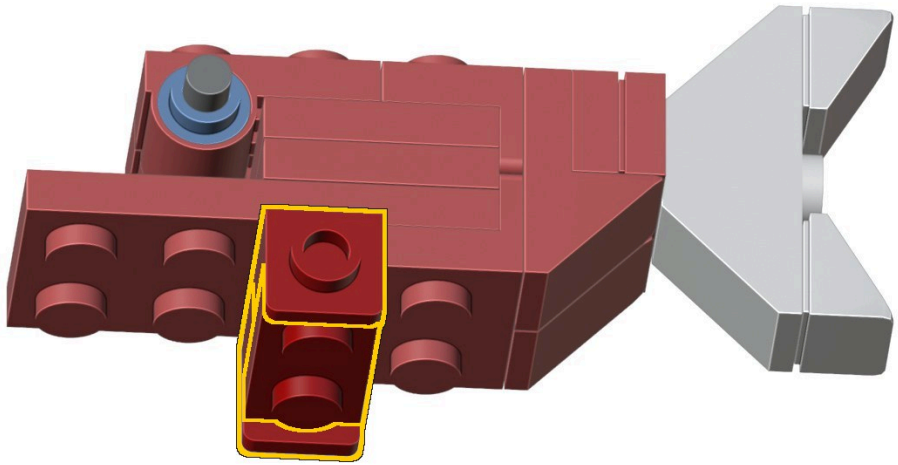

10

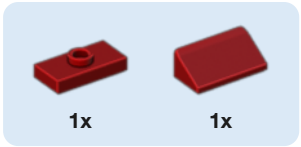

seen from below

Turn it over. A small bracket on each stud of the next row, side studs out, and a plate across the two

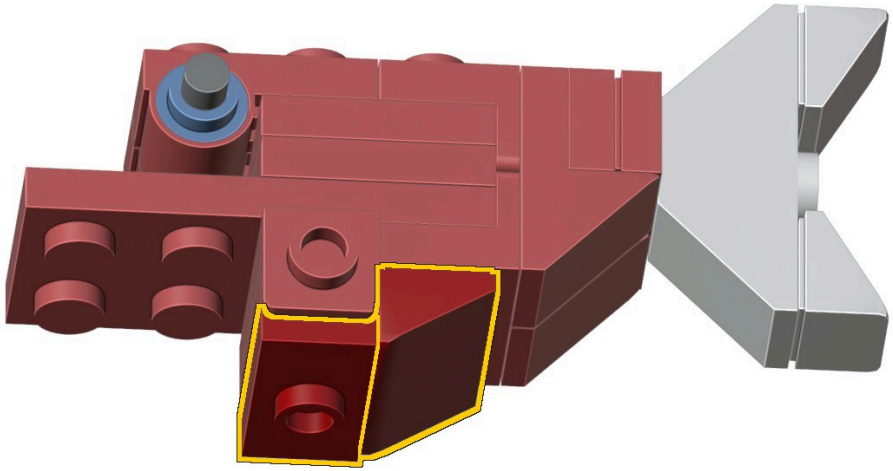

11

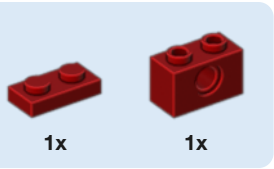

seen from below

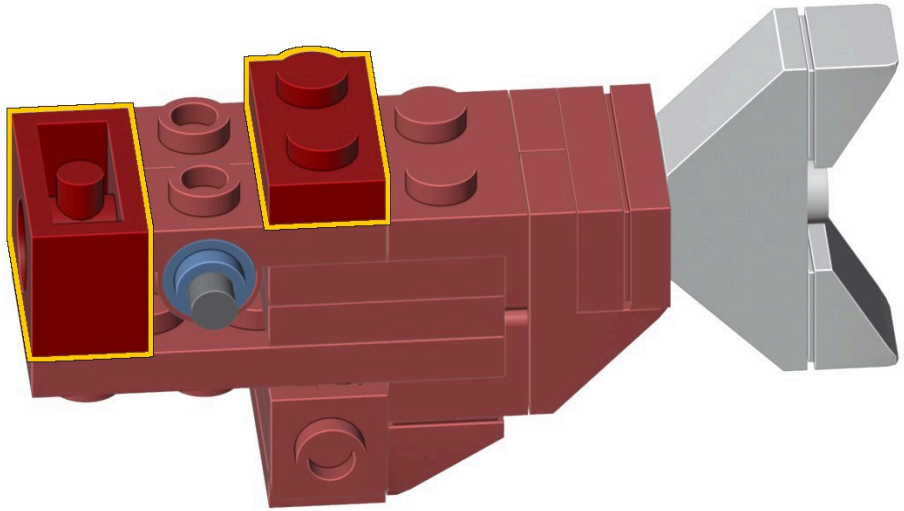

A plate with one stud on that plate, and a slope on the big bracket, falling to the tail

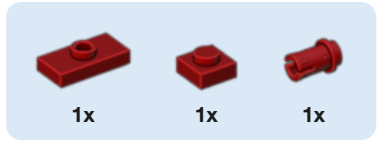

12

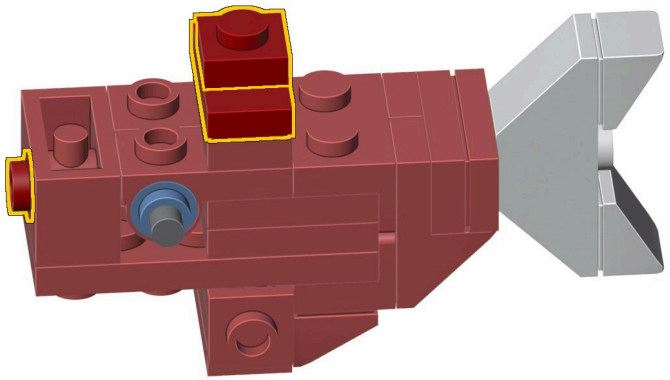

Turn it back. A plate on the axle's rear studs. The head: a brick with a hole, upside down, its studs pressed into the hollow of the 2 x 4 at the front

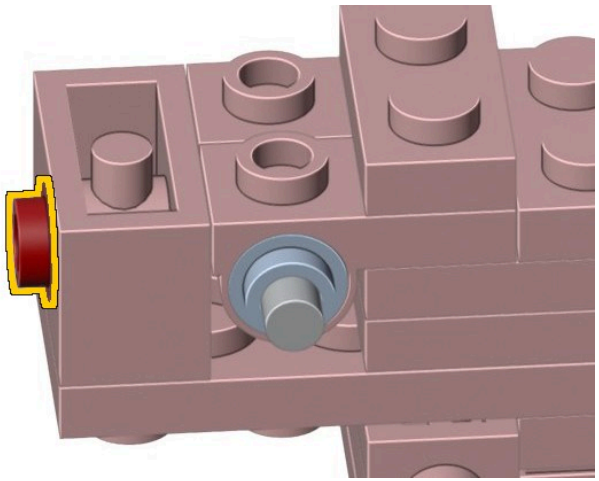

13

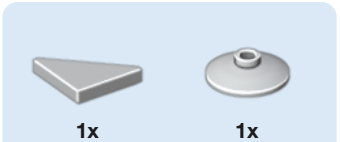

A red pin in the head's hole, and on the plate a plate with one stud and a 1 x 1 plate

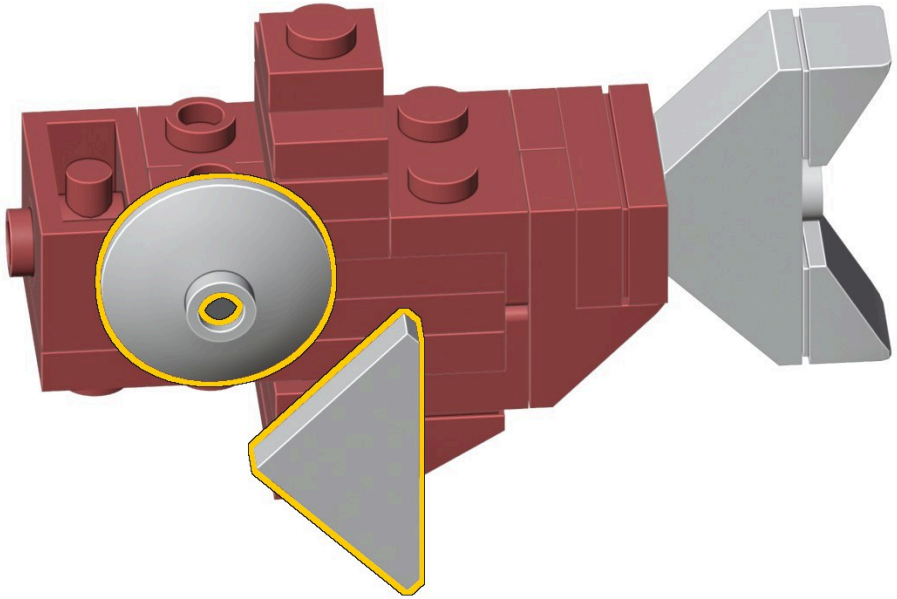

First the outlined piece: the others go on over it.

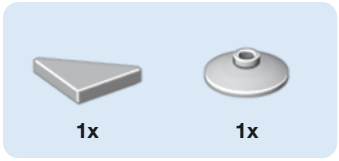

14

An eye on the axle, and a triangle on the bracket's side stud: square corner forward

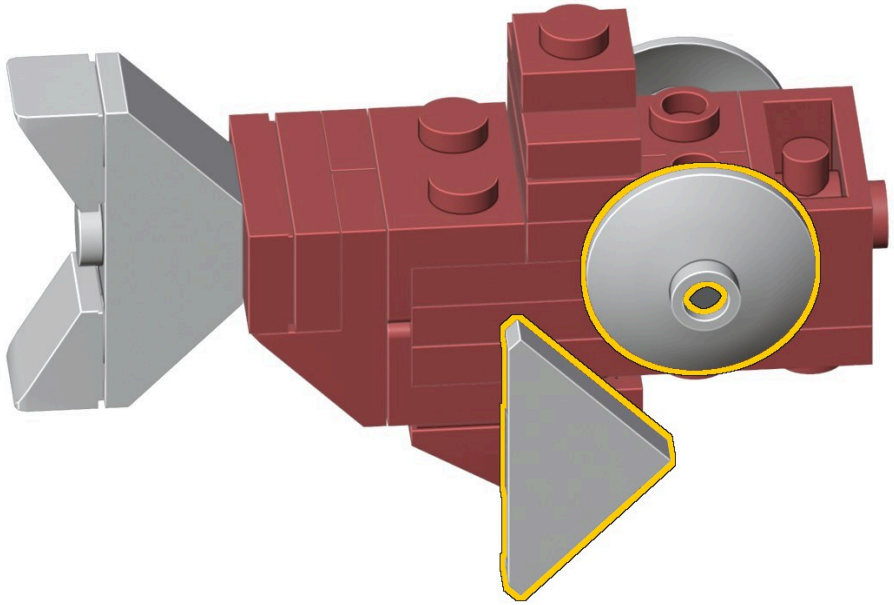

15

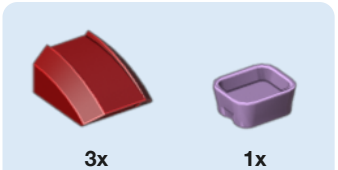

seen from behind

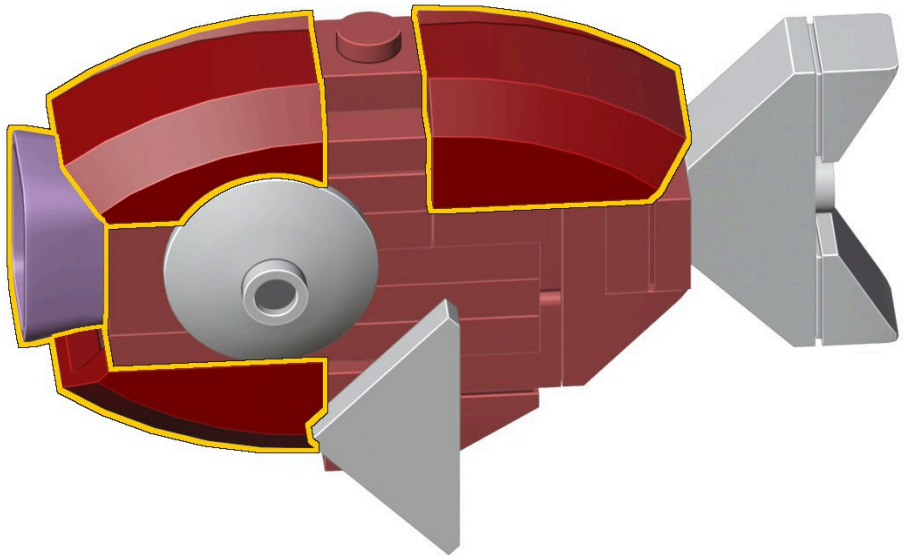

The same on the other side

16

The mouth on the red pin. Three curved bricks: behind the tower, in front of it, and upside down under the head

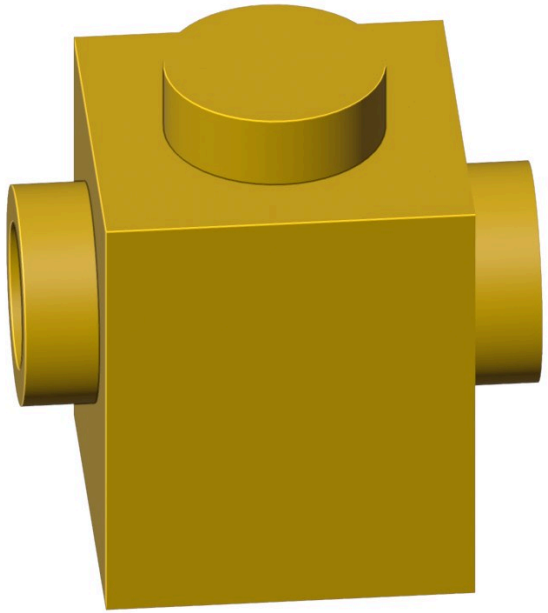

17

1x

A yellow brick with a stud on two sides

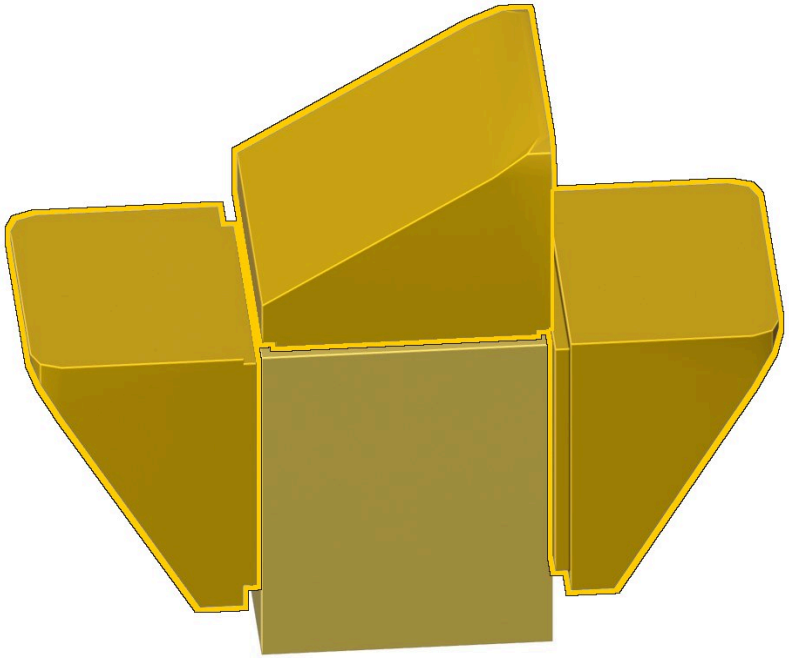

18

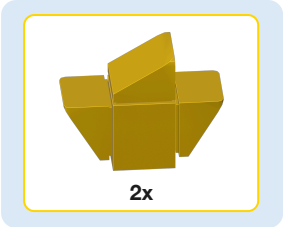

3x

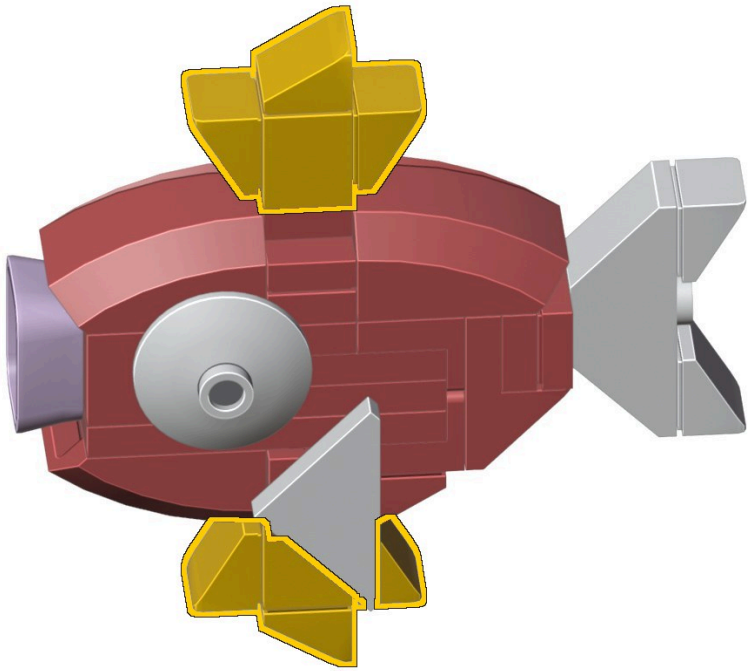

A slope on top, falling to the front, and one on each side stud, thick end up

MAGIKARP
19

The fins: one on the tower, one under the belly

About this model

This Magikarp is built sideways. Two plates and a bracket make the top of its core; a 2 x 4 plate with a second bracket goes underneath upside down, and two slopes pressed over the brackets' side studs lock the halves together. An axle through the middle carries both eyes. The tail goes on the slopes, the fin brackets and belly go on from underneath, and the head is a brick with a hole, upside down at the front. Last come the eyes and side fins, the mouth, three curved bricks that round the body off, and the two yellow fins. It balances on its belly fin, so lay it on its side or hold it to show it.

Checked on a computer

WARN	**real elements**	22 part/colour combinations: 0 not real, 1 rare
PASS	**connections**	64 connections (55 stud, 5 pin, 4 bar); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 43 parts
PASS	**buildability**	38 insertions tried across 4 submodel(s); 0 problem(s)
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
