Bricks

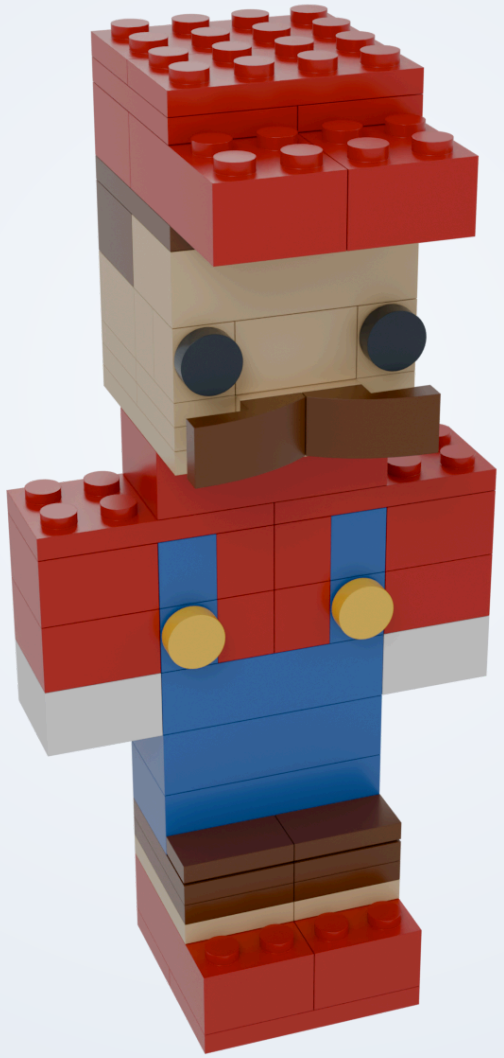

A LEGO® BRICK MODEL OF

Mario

Red cap, moustache, blue overalls and two yellow buttons, in 62 pieces.

Designed by JellsaTheBobJeffCreator

62 pieces · 15 steps · 2 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Mario and related names belong to their owners.
Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by JellsaTheBobJeffCreator (https://rebrickable.com/mocs/MOC-249307/). These steps were worked out from it here; they are not the designer's own instructions.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 278 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 6.4 × 4.8 cm and 13.3 cm tall, about 83 g (estimated).

He goes together from the ground up: the stand, the shoes, three bricks of legs, the chest with its two buttons. Make the two arms and hang them from the shoulders, then build the head a layer at a time: chin, moustache, eyes, hair and cap.

You will need

- The 62 pieces in 7 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The arms hang from the plates at their tops. Press the brick across the shoulders down firmly: it is what holds them on.
- His head is deeper than his feet and he stands at the back of the stand, so a push from the front tips him. Stand him somewhere he will not be knocked.

The 7 colours

- Red: 22
- Tan: 16
- Reddish Brown: 11
- Blue: 7
- Yellow: 2
- White: 2
- Black: 2

How to read the steps

Parts and step number

7

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

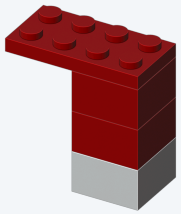

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 2 sections. Each is finished before it is used.

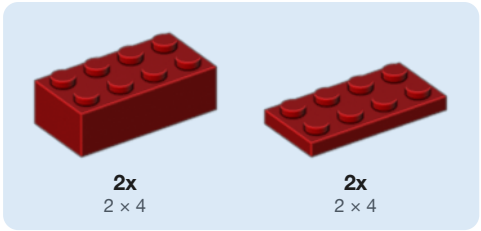

1. Mario
steps 1–6, 8–15

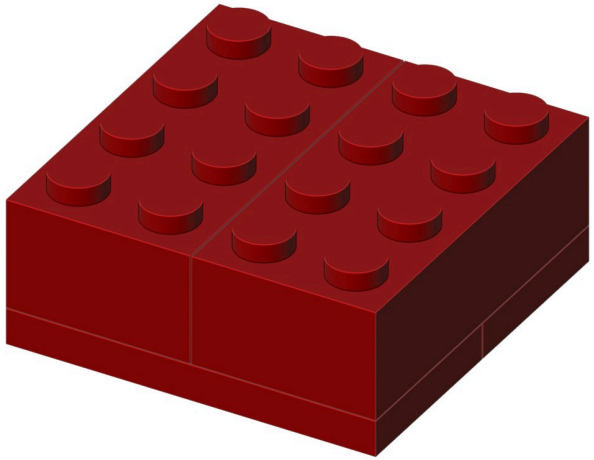

2. Arm ×2
step 7

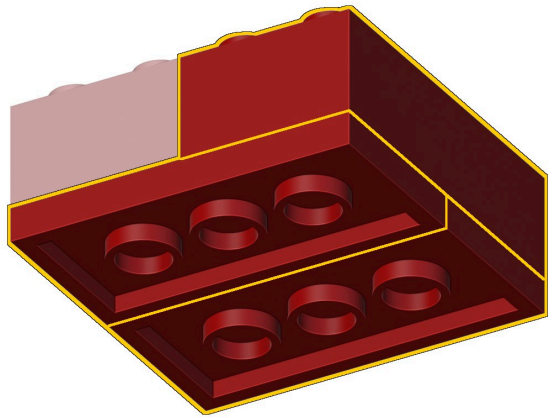

MARIO

1

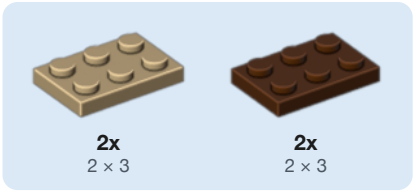

The stand: two 2 x 4 plates side by side, and two 2 x 4 bricks across them

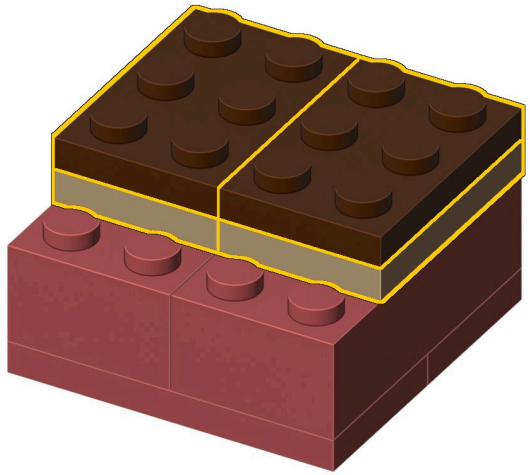

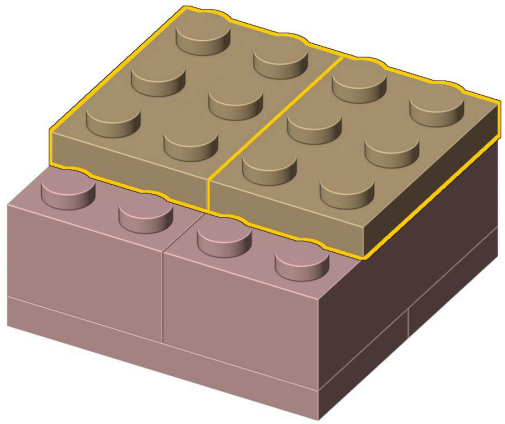

From below: the outlined pieces click in here.

2

Two 2 x 3 plates on the back three rows of studs, and on each the first plate of a shoe

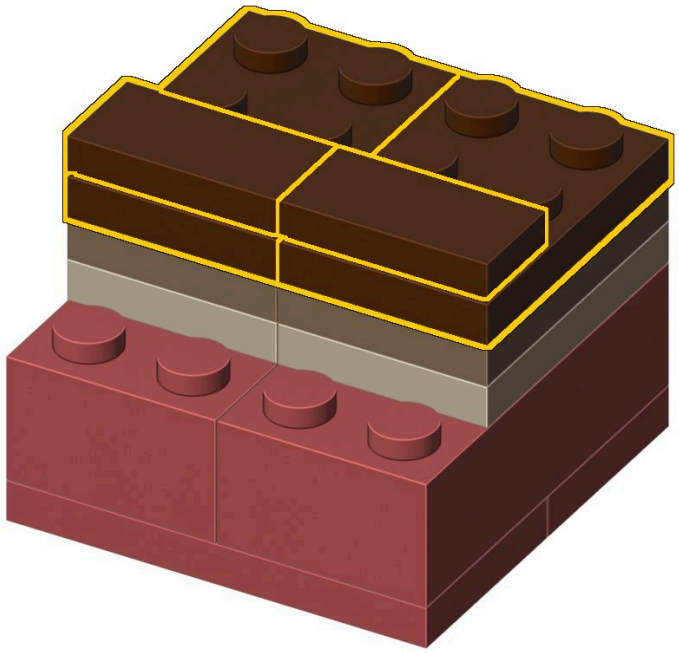

First the outlined pieces: the others go on over them.

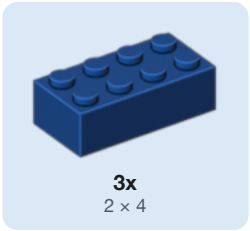

3

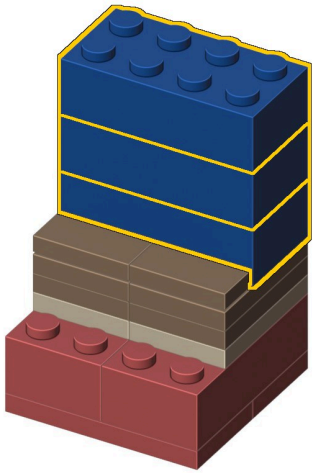

The rest of the shoes: a second plate, and a 1 x 2 tile across each toe

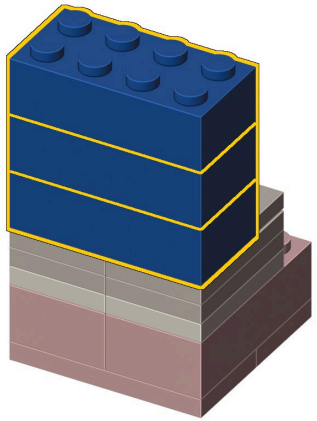

4

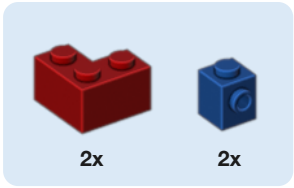

The legs: three blue 2 x 4 bricks, one on another, behind the toes

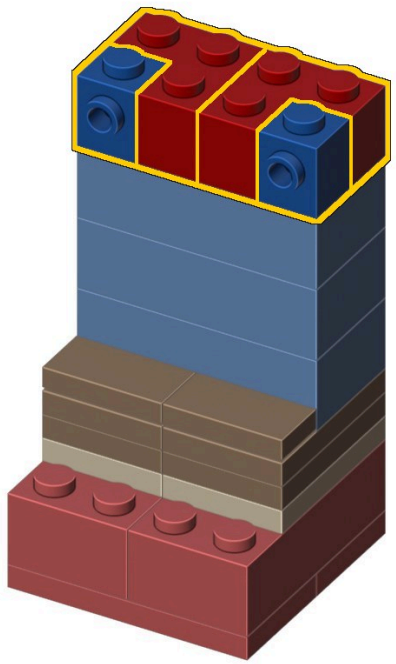

From behind: the outlined pieces.

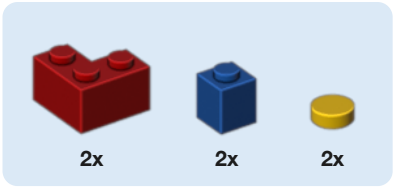

5

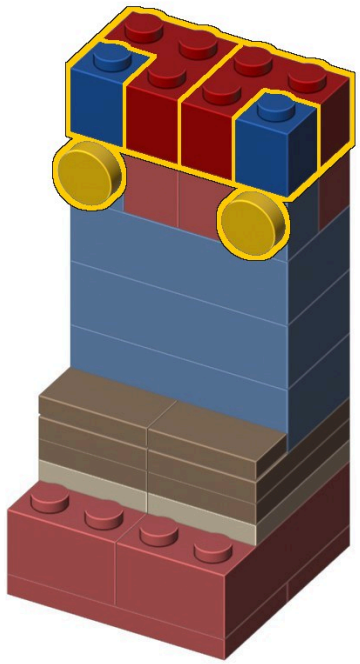

The bib and the shirt: a blue brick with a stud on its side at each front corner, studs forward, and a corner brick behind each

6

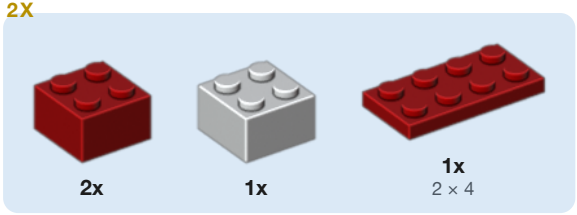

The same again with plain blue 1 x 1 bricks for the straps, then a yellow button on each stud on the front

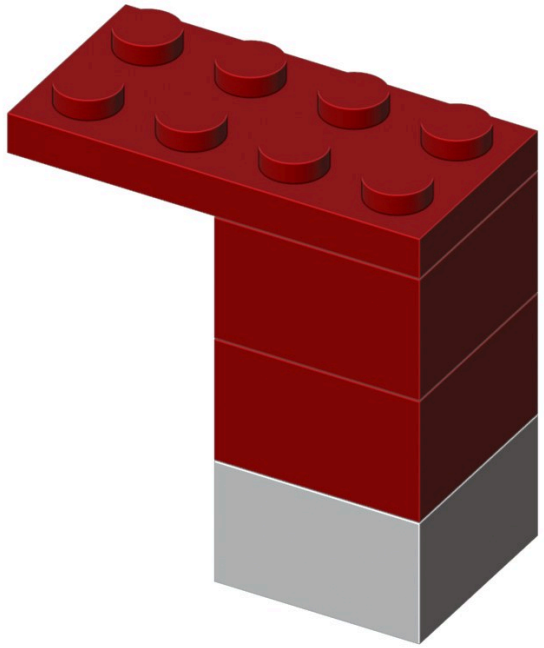

ARM · BUILD 2X

7

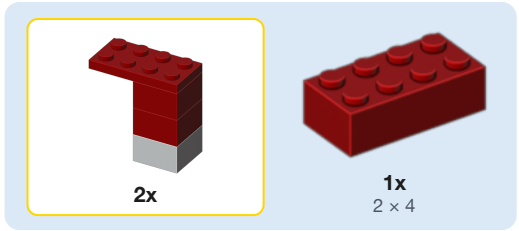

An arm: a white 2 x 2 brick for the glove, two more for the sleeve, and a 2 x 4 plate on top that sticks out to one side. Make two

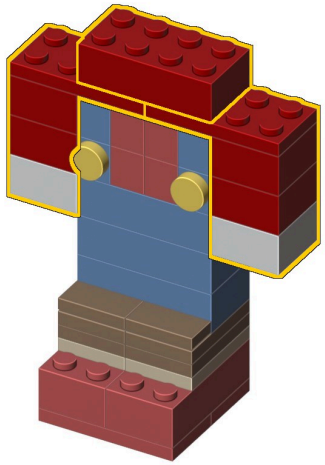

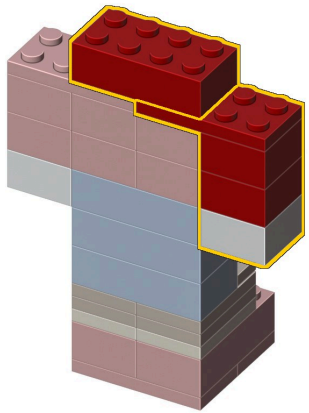

MARIO

8

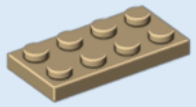

Hang an arm each side, its plate over the chest, and lock both with a 2 x 4 brick across the shoulders

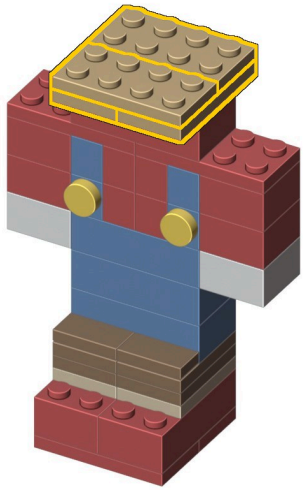

From behind: the outlined pieces.

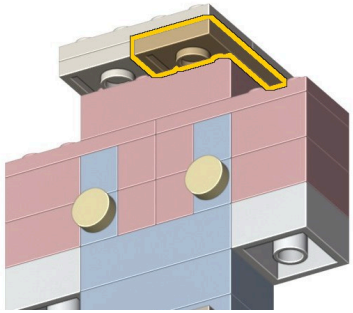

9

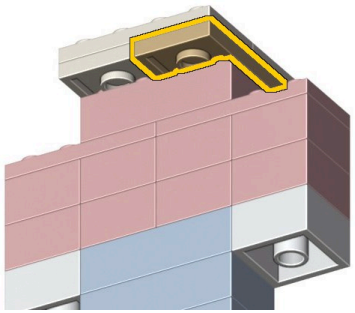

4x
2 × 4

The chin: two 2 x 4 plates front to back, then two across them

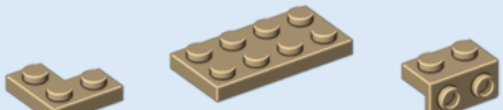

From below: the outlined piece clicks in here.

From behind and below: the outlined piece.

10

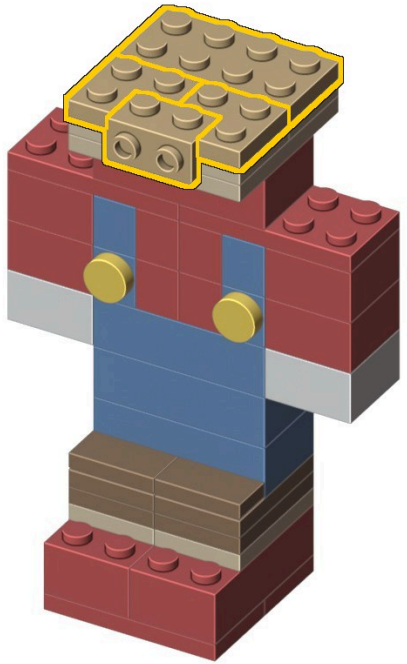

2x

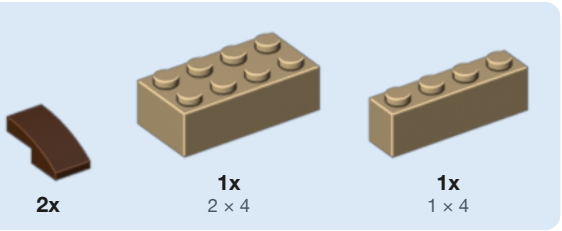

1x
2 × 4

1x

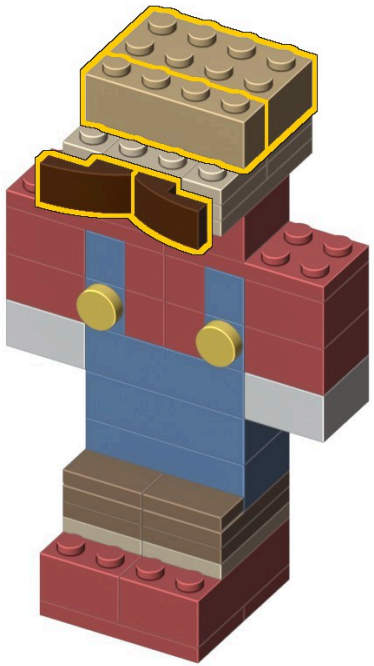

One more layer: the bracket in the middle of the front, its studs forward for the moustache, a corner plate either side of it, and a 2 x 4 plate at the back

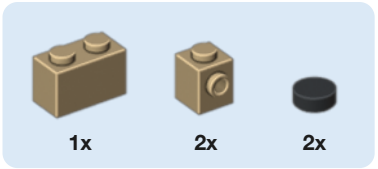

11

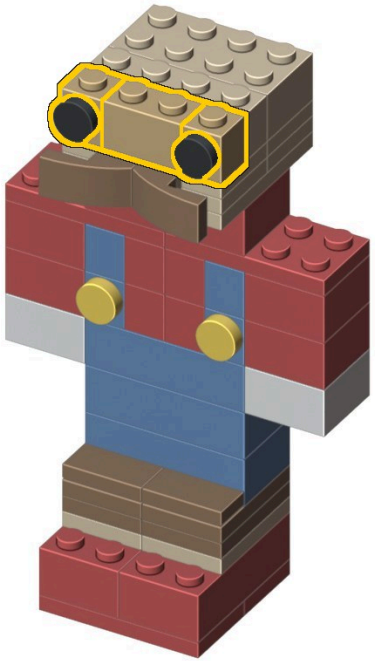

The moustache: a curved slope on each of the bracket's studs, thick ends together. Behind it a 1 x 4 brick, and a 2 x 4 brick at the back

12

The eyes: a brick with a stud on its side at each end of the front row, studs forward, a 1 x 2 brick between them, and a black round tile on each stud

13

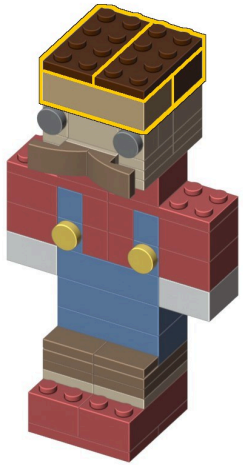

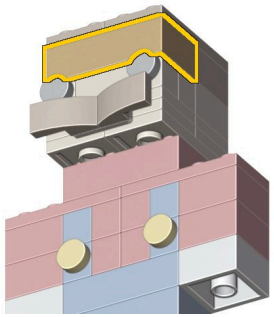

1x
2 × 4

1x
2 × 4

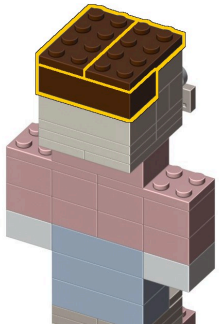

2x
2 × 4

The forehead and the hair: a tan 2 x 4 brick at the front and a brown one behind it, then two brown 2 x 4 plates front to back across both

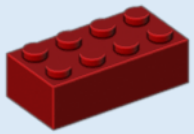

From below: the outlined piece clicks in here.

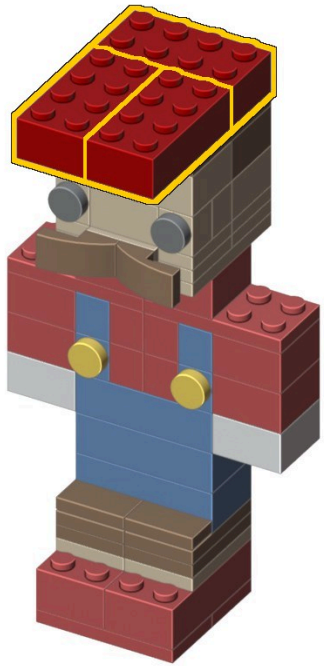

From behind: the outlined pieces.

14

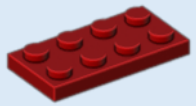

3x
2 × 4

The cap: two 2 x 4 bricks front to back, sticking out over the face for the peak, and one across the back

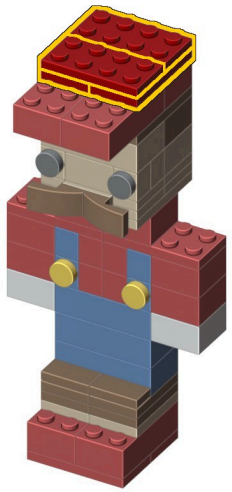

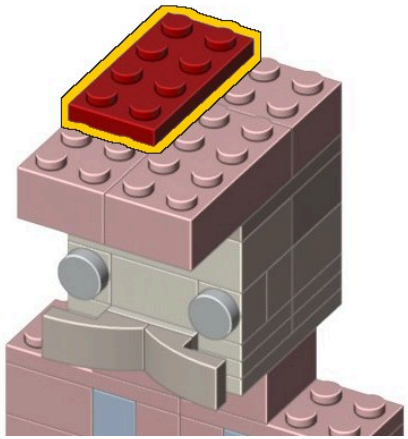

15

4x
2 × 4

The top of the cap: two 2 x 4 plates front to back, then two across them

First the outlined piece: the others go on over it.

About this model

He goes together from the ground up: the stand, the shoes, three bricks of legs, the chest with its two buttons. Make the two arms and hang them from the shoulders, then build the head a layer at a time: chin, moustache, eyes, hair and cap.

Checked on a computer

PASS	**real elements**	23 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	278 connections (278 stud); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 62 parts
PASS	**buildability**	57 insertions tried across 2 submodel(s); 0 problem(s)
PASS	**stability**	about 83 g; centre of mass inside the base (65% margin); tips at 8.2 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/mario**
