Bricks

A LEGO® BRICK MODEL OF

# Nautilus Crew

Captain Nemo, Ned Land, Professor Aronnax, Conseil and a Nautilus diver on the deck of the Nautilus, in front of a salon window ringed with yellow lights.

**106** pieces · 5 minifigures · 47 steps · 7 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Nautilus Crew and related names belong to their owners. Made with brickkit · 2026-11-05

# Before you start

### An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

### Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 524 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

### The finished model

About 12.8 × 6.4 cm and 9.3 cm tall, about 139 g (estimated).

Four minifigures of the main characters of Jules Verne's 20,000 Leagues Under the Sea, dressed as in Walt Disney's 1954 film, and one of Captain Nemo's divers in a brass deep-sea helmet, on a slice of the Nautilus's deck. Each figure is built from what LEGO sells: a printed head, a torso with its arms and hands, hips with legs, headwear and something to hold. The deck is riveted iron plating in reddish brown with a dark walkway, a round hatch and a mooring bollard, and a gold-trimmed edge with a blank black nameplate. Behind the crew a bulkhead carries one of the Nautilus's salon windows: a gold round frame, clear glass and a ring of eight yellow lights.

### You will need

- The 106 pieces in 13 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

### Tips

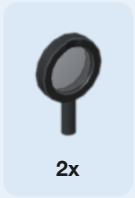

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The figures' torsos come with their arms and hands already fitted, and their hips with the legs: you never take a figure apart to build it.
- Ned Land's harpoon, Nemo's spyglass, Aronnax's magnifying glass, Conseil's bottle and the diver's speargun clip into the figures' hands. Turn the arms and heads as you like: the pictures show one way to pose them.
- The diver's brass helmet (10165c01, from the 2012 Collectible Minifigures Series 8 Diver) has no model in the LDraw library: the pictures show brickkit's approximation of it. Its suit's print isn't modelled either, so the pictures show the torso and legs plain.
- The nameplate is a plain black 2 x 4 tile: add a printed tile or a sticker with the name if you like.

### The 13 colours

- Reddish Brown: 58
- Yellow: 15
- Black: 12
- Pearl Gold: 11
- Trans-Yellow: 8
- Light Bluish Gray: 7
- Dark Bluish Gray: 5
- Medium Nougat: 5
- Dark Brown: 3
- Trans-Clear: 3
- White: 3
- Dark Blue: 3
- Flat Silver: 1

# How to read the steps

### Parts and step number

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

### New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

### Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

### Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

### Seen from below

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

### Insert direction

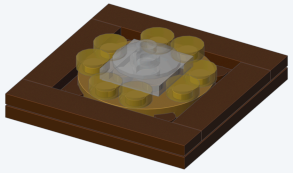

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

# Build overview

The model is built in 7 sections. Each is finished before it is used.

**1. Nautilus Crew**
steps 1–12, 17, 23, 29 … 41, 47

**2. Salon window**
steps 13–16

**3. Conseil**
steps 18–22

**4. Professor Aronnax**
steps 24–28

**5. Captain Nemo**
steps 30–34

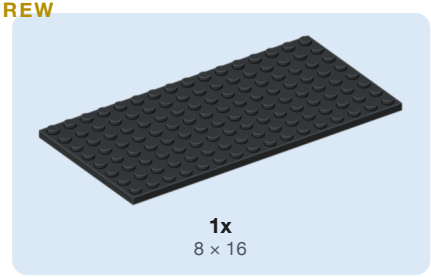

**6. Nautilus diver**
steps 36–40

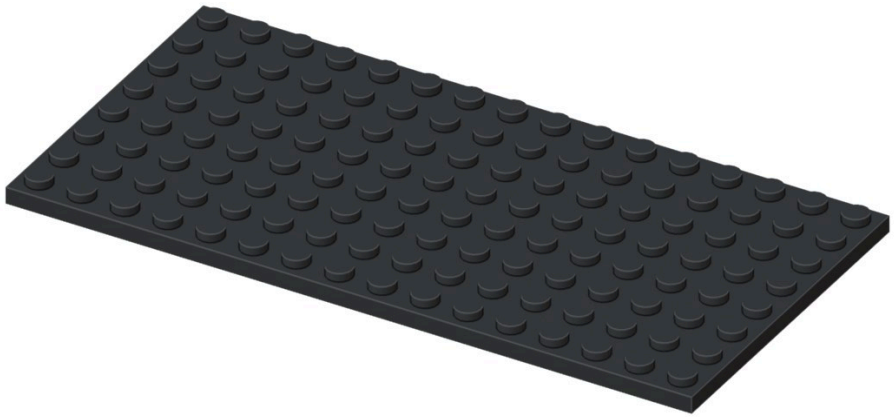

**7. Ned Land**
steps 42–46

### Real printed figures

Every head, torso and pair of legs is a real LEGO part with its print, listed by its BrickLink and Rebrickable number: no custom prints or stickers. Ned Land's striped shirt, Nemo's double-breasted captain's coat with its gold anchor and Aronnax's three-piece suit are all real LEGO torsos.

| PASS | **technique** | 0 note(s) |

### Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

### Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/nautilus_crew**
