Bricks

A LEGO® BRICK MODEL OF

Taco

A happy little taco in 23 pieces.

23 pieces · 12 steps · 1 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Taco and related names belong to their owners.
Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 52 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 6.4 × 2.1 cm and 3.2 cm tall, about 19 g (estimated).

Build the standalone taco from LEGO Classic 11039 with all 12 steps on pages 34-40 of the official instructions. The finished model stands on its straight folded edge, as shown on page 41.

You will need

- The 23 pieces in 7 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- For a hands-on build, lay the taco flat while stacking the shell and filling, then stand it upright on the folded edge.
- The coral brick and the white round plates are hidden inside the finished taco but are included in the parts list and build steps.

The 7 colours

- Yellow: 6
- White: 6
- Bright Green: 4
- Red: 3
- Lime: 2
- Coral: 1
- Reddish Brown: 1

How to read the steps

Parts and step number

7

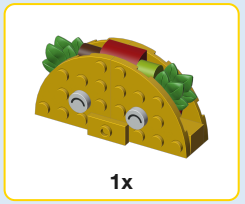

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

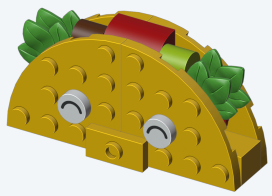

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 1 sections. Each is finished before it is used.

1. Taco
steps 1–12

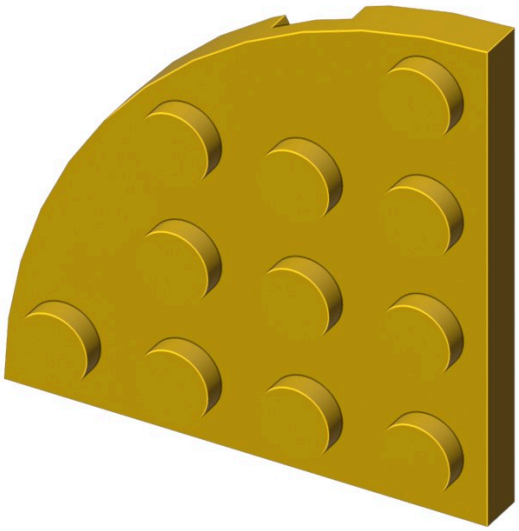

TACO

1

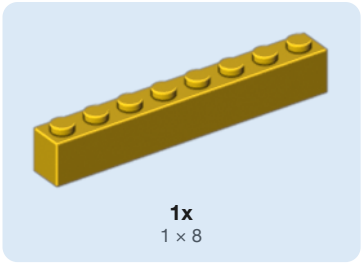

1x
4 × 4

1 · The first curved shell corner

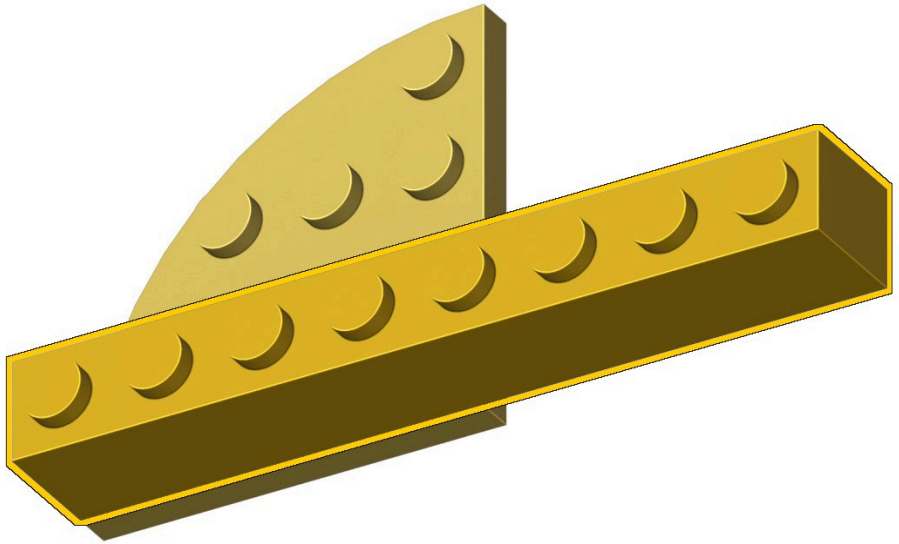

2

1x
1 × 8

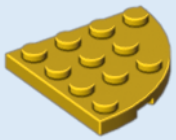

2 · The eight-stud folded edge

About this model

Build the standalone taco from LEGO Classic 11039 with all 12 steps on pages 34-40 of the official instructions. The finished model stands on its straight folded edge, as shown on page 41.

Checked on a computer

PASS	**real elements**	13 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	52 connections (52 stud); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 23 parts
PASS	**buildability**	22 insertions tried across 1 submodel(s); 0 problem(s)
PASS	**stability**	about 19 g; centre of mass inside the base (121% margin); tips at 34.0 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/taco**
