Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 26 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 8.0 × 1.4 cm and 4.5 cm tall.

A bat small enough to perch on a finger: build up from its clip feet through the chin and the fangs to the head, press on the wings, then give it its angry eyes and its ears.

You will need

- The 22 pieces in 3 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 3 colours

- Black: 18
- White: 2
- Yellow: 2

How to read the steps

Parts and step number

7

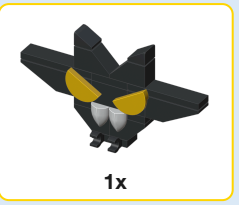

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

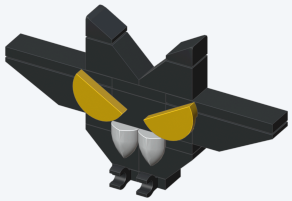

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

The model is built in 1 sections. Each is finished before it is used.

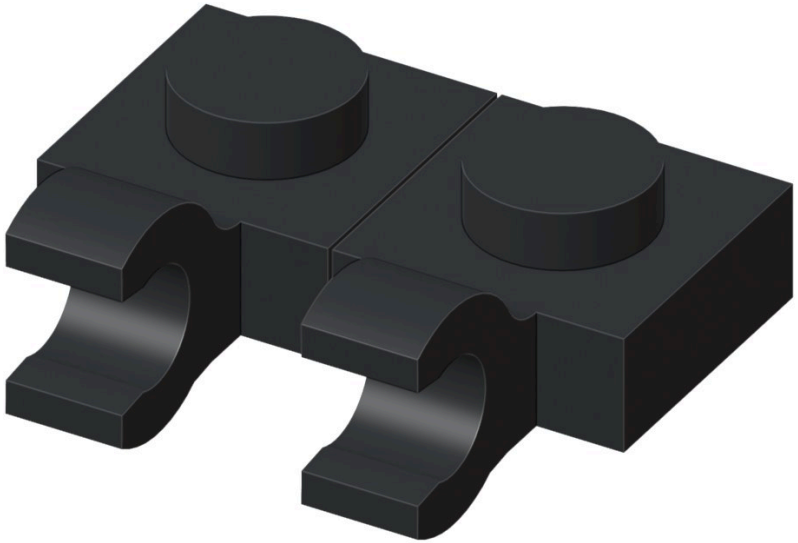

1. Bat
steps 1–8

BAT
1

2x

The feet: two clip plates, the clips forward

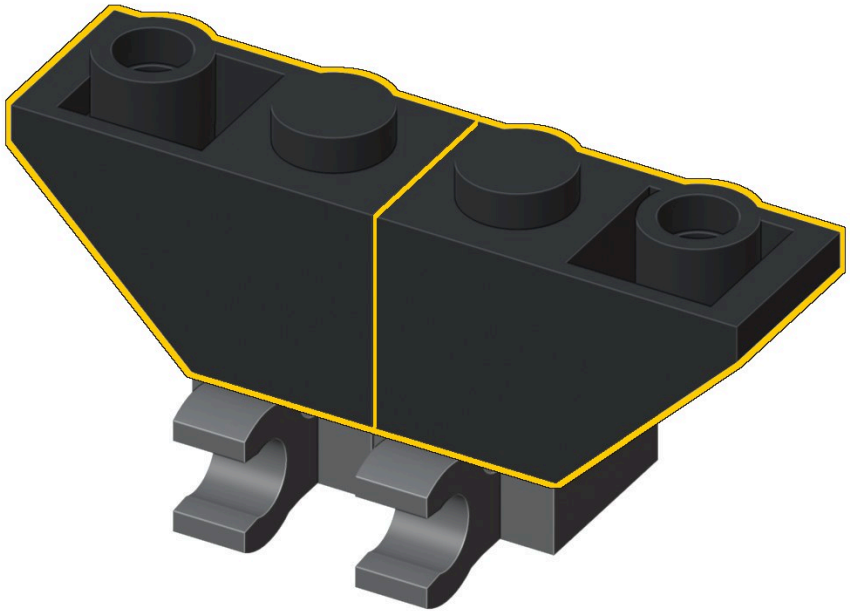

2

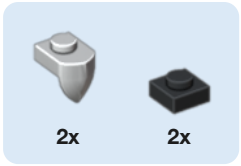

2x

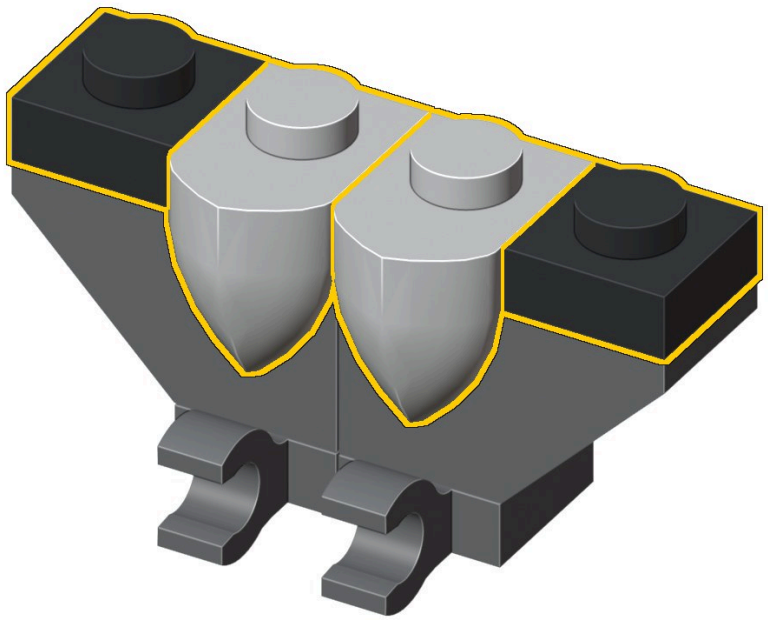

The chin: two inverted slopes, tips out

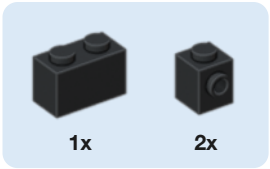

3

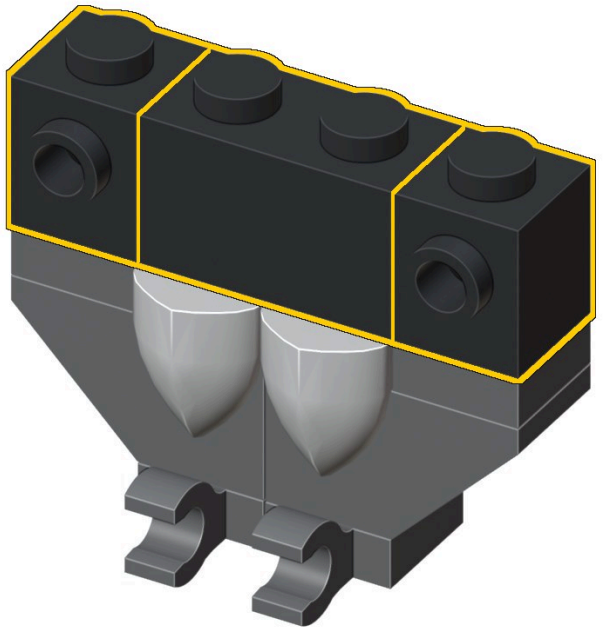

The fangs, and a plate on each side of them

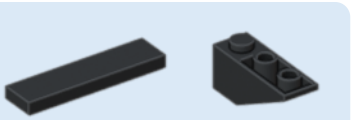

4

The head: a 1 x 2 brick between two bricks with a stud in front

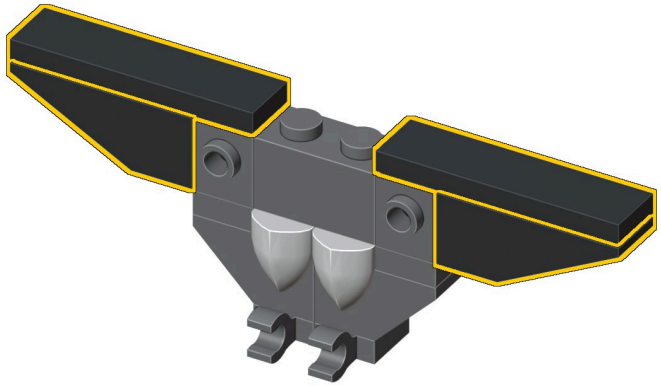

5

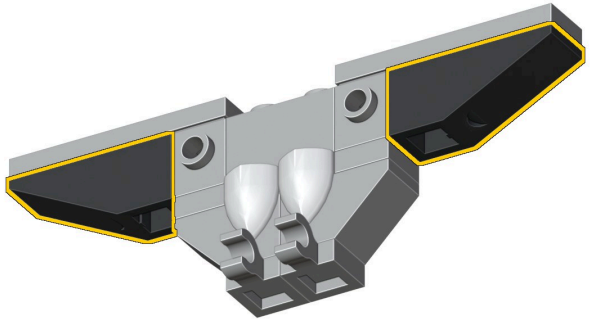

2x
1 × 4

2x

The wings: a 1 x 4 tile out from each side, an inverted slope pressed up under it

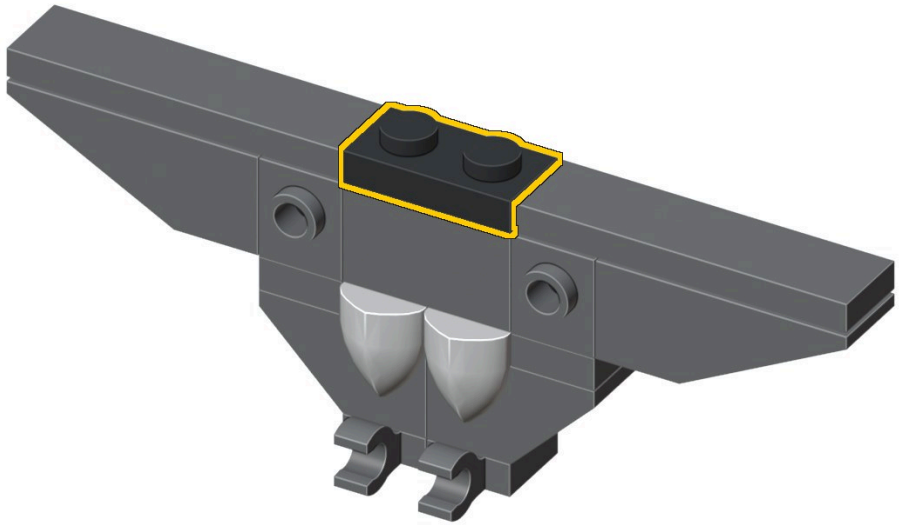

From below: the outlined pieces click in here.

6

1x

A plate on top of the head

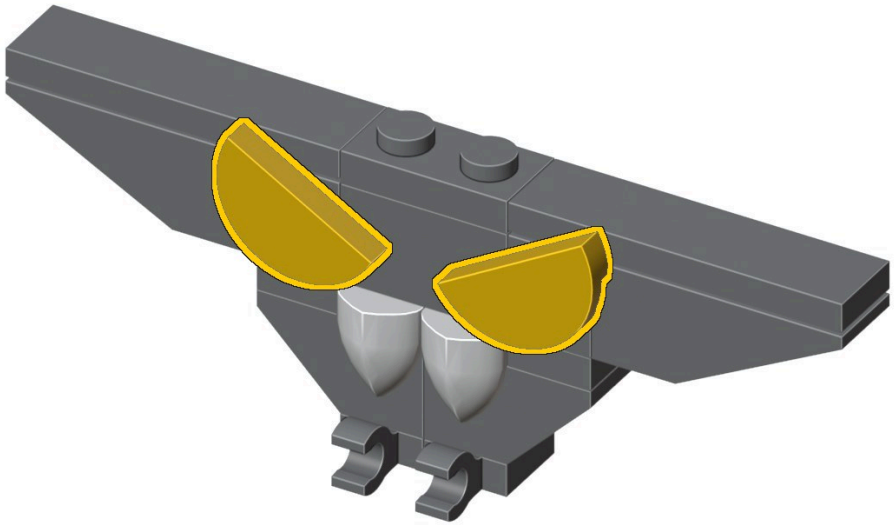

7

2x
1 × 2

Angry eyes: half-round tiles on the front studs, tipped in towards the nose

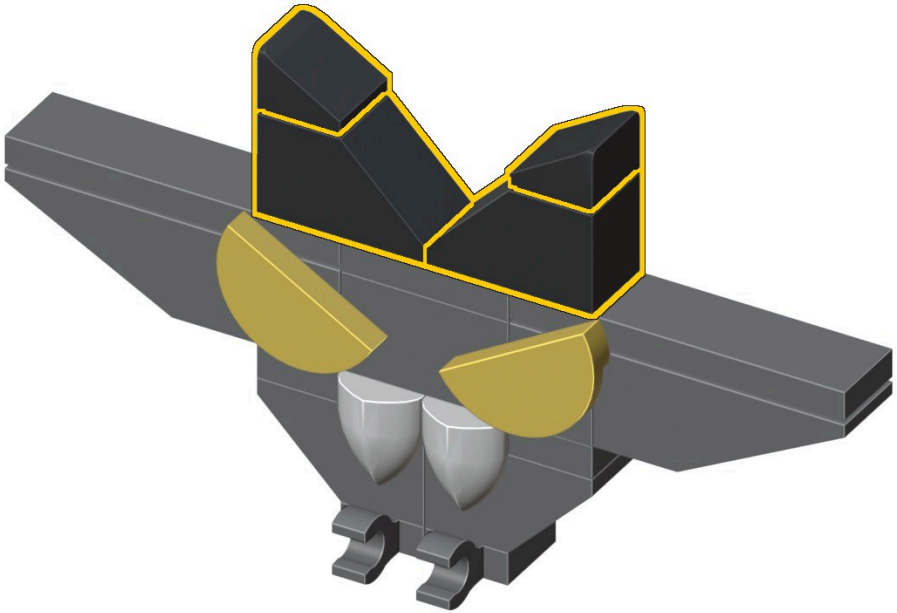

8

2x **2x**

The ears: a slope on each side of the top plate, a small slope on its stud

Parts inventory

About this model

A bat small enough to perch on a finger: build up from its clip feet through the chin and the fangs to the head, press on the wings, then give it its angry eyes and its ears.

Checked on a computer

PASS	**real elements**	12 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	26 connections (26 stud); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 22 parts
PASS	**buildability**	20 insertions tried across 1 submodel(s); 0 problem(s)
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/bat**
