Bricks

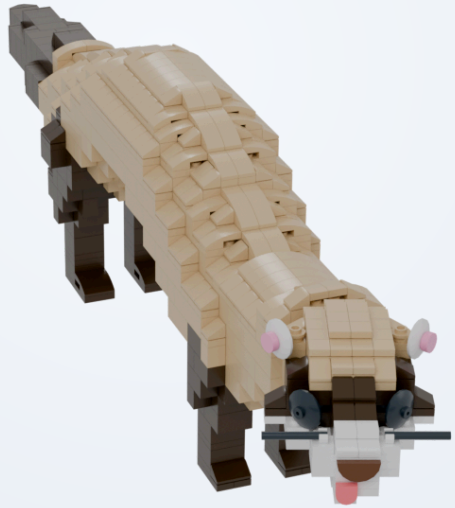

A LEGO® BRICK MODEL OF

Ferret

SABLE COLOURWAY

Life-size (51 cm nose to tail) and mid-bounce, with the arched back ferrets run with. Build it in sable, albino or cinnamon: the same pieces, different colours.

895 pieces · 189 steps · 8 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Ferret and related names belong to their owners.
Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 2273 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated; the mechanism was swept through its whole range. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 9.3 × 51.3 cm and 15.0 cm tall, about 825 g (estimated).

The body is a sculpture of bonded bricks, built in three parts: the chest with the front legs, the hips with the hind legs, and the arched back that joins them. The head sits on a turntable so the ferret can look at you, and the round tail plugs onto studs at the rump.

You will need

- The 895 pieces in 8 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

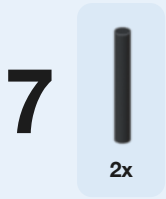

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The chest and the hips are built upside down, then turned over.
- The head turns on a 2x2 turntable: set it to look at you after the last step.

The 8 colours

- Tan: 591
- Dark Brown: 212
- Light Bluish Gray: 42
- White: 39
- Black: 7
- Bright Pink: 2
- Reddish Brown: 1
- Coral: 1

How to read the steps

Parts and step number

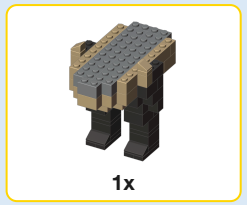

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

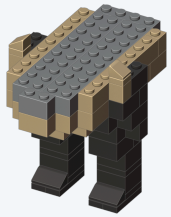

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

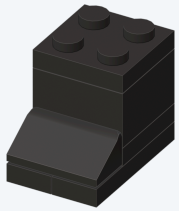

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

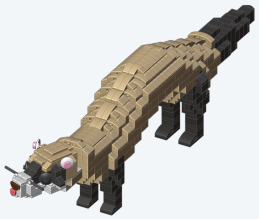

The model is built in 8 sections. Each is finished before it is used.

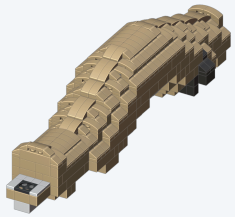

1. Chest and front legs
steps 1–17, 20–21

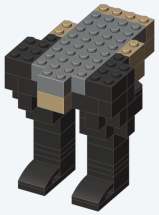

2. Front leg ×2
steps 18–19

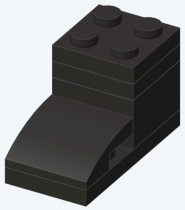

3. Ferret
steps 22, 127, 168, 189

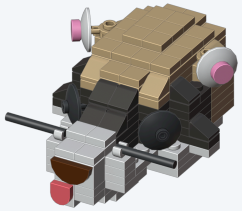

4. Arched back, neck and rump
steps 23–109

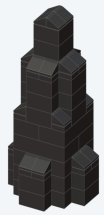

5. Hips and hind legs
steps 110–122, 125–126

6. Hind leg ×2
steps 123–124

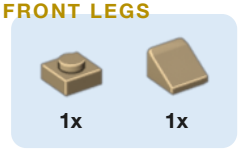

7. Head
steps 128–167

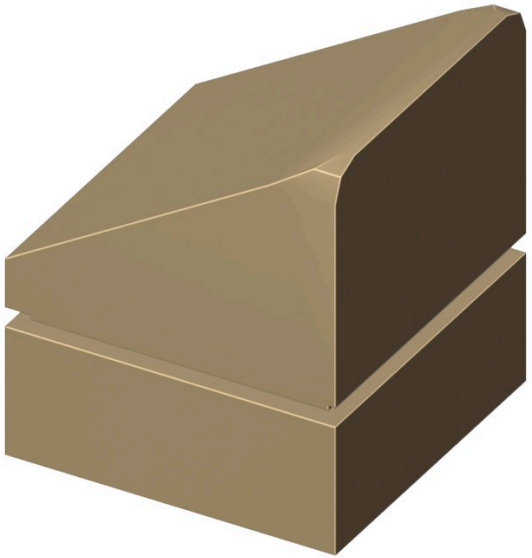

8. Tail
steps 169–188

CHEST AND FRONT LEGS

1

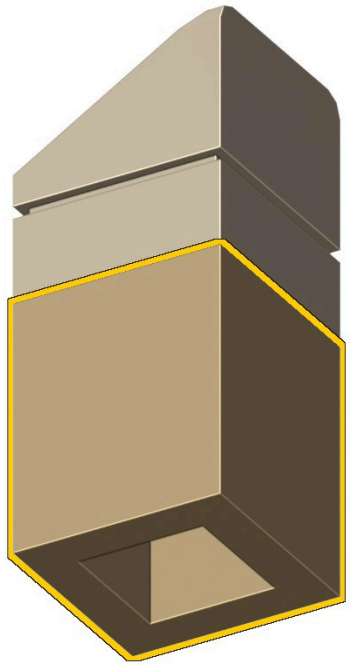

Build the chest upside down: course 1 is the top of the chest, each further course goes on underneath, down to the shoulders. Chest, course 1 of 7: curved slopes round off the edges (1/2); these parts go on the far side (the top of the chest)

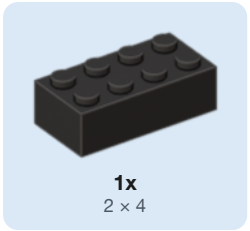

2

Chest, course 2 of 7 (1/5)

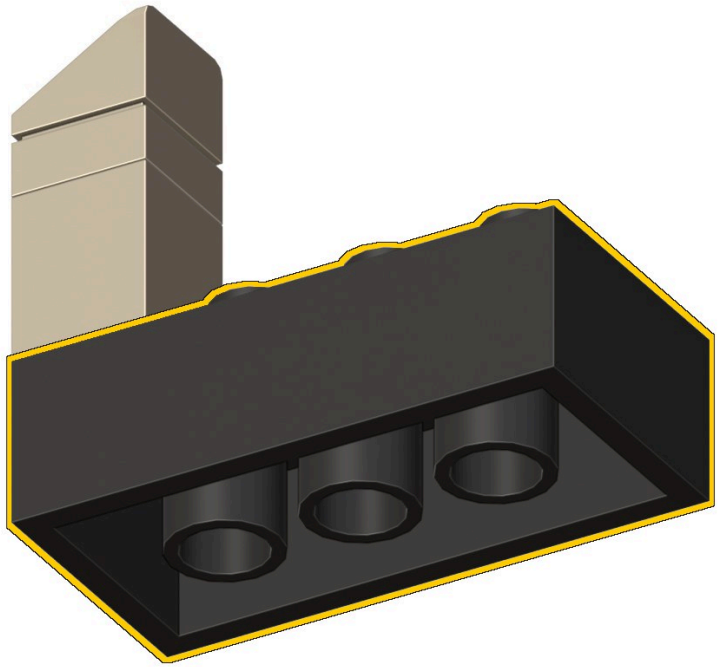

3

1x
2 × 4

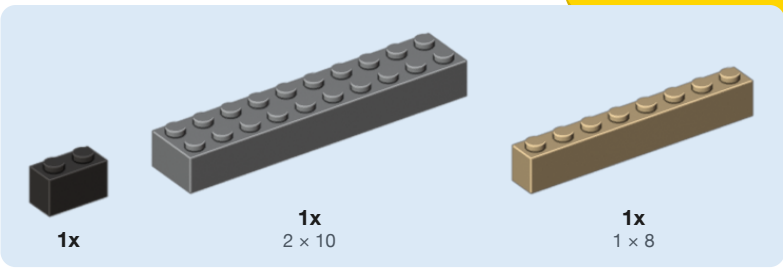

seen from below

Chest, course 3 of 7 (1/5)

164

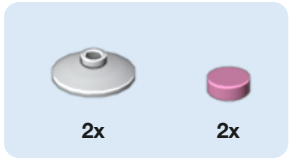

2x

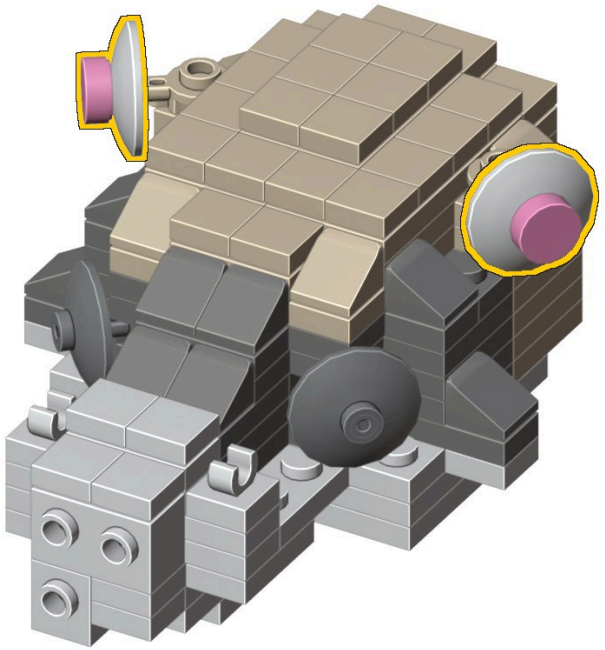

Big shiny eyes

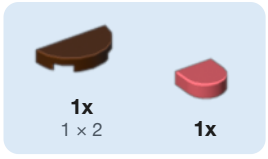

165

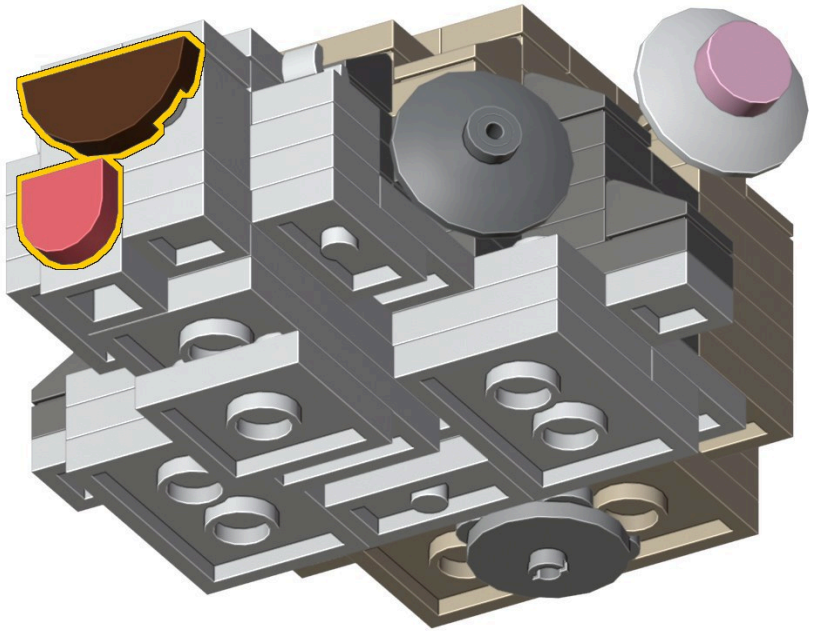

Round ears

166

The nose and the tip of the tongue

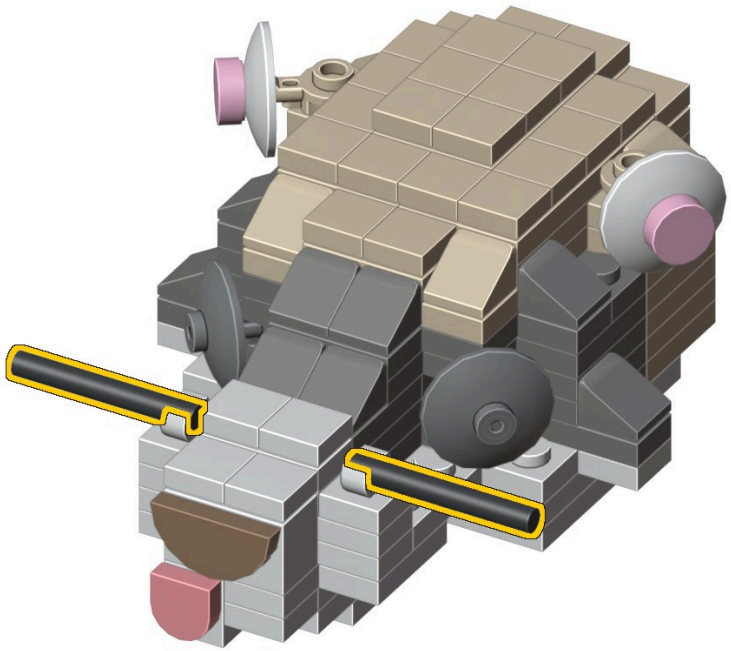

167

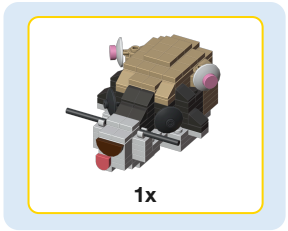

2x

Whiskers

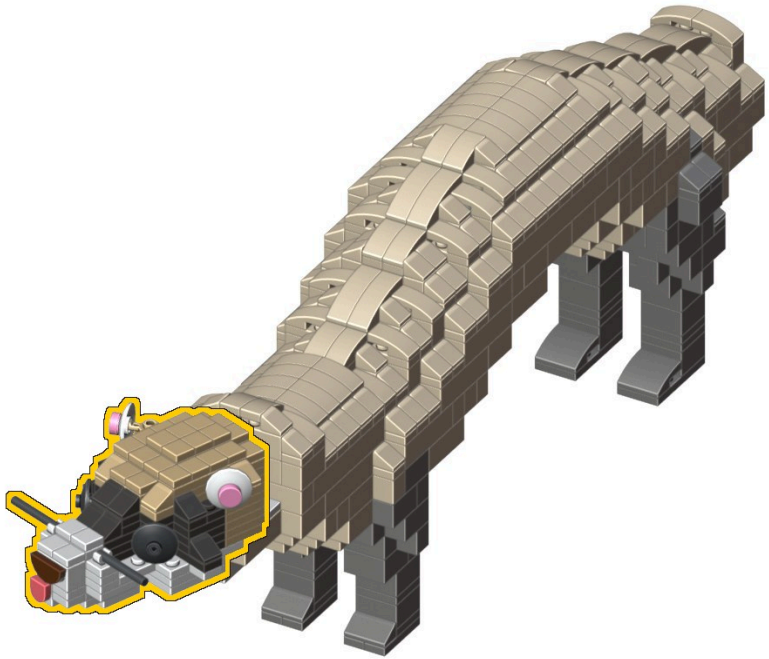

FERRET

168

1x

Set the head on the turntable in the white throat and turn it 20 degrees to look at you: it can be turned 15 degrees the other way or 30 this way

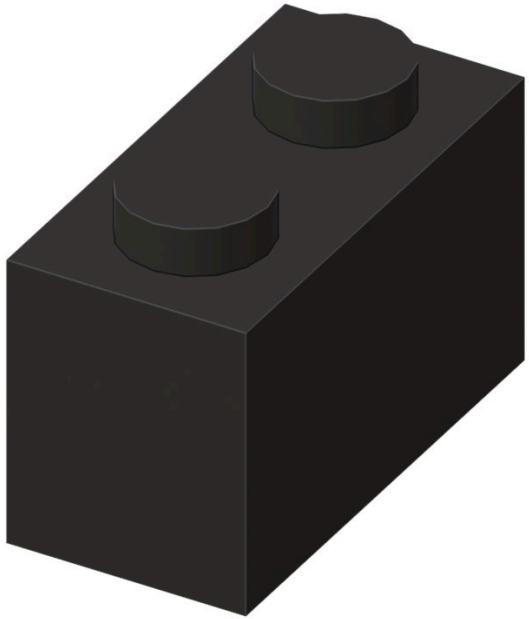

TAIL
169

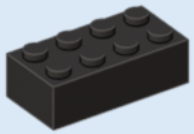

1x

Build the tail standing up, from its root to the tip. Tail, slice 1 of 12 (1/3)

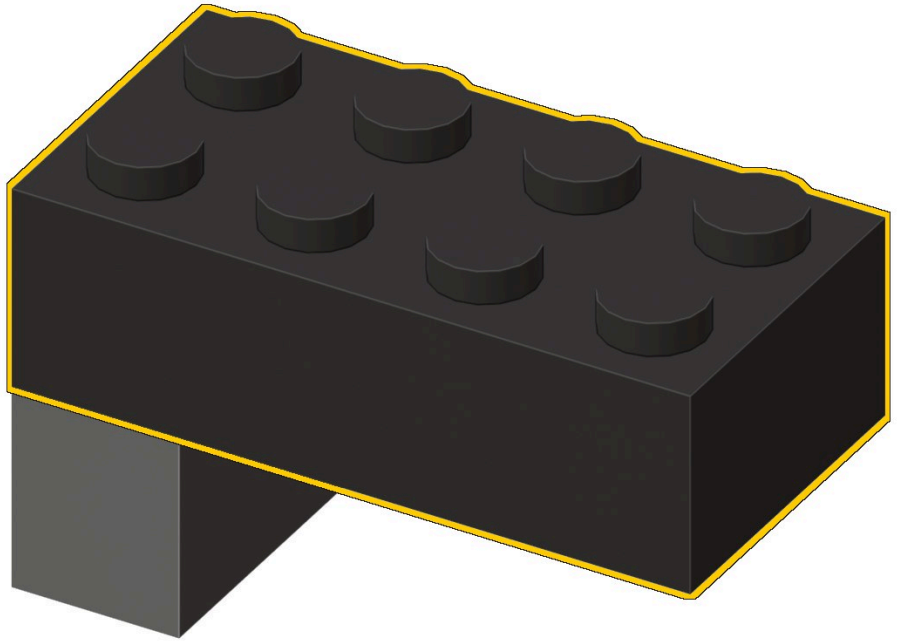

170

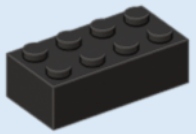

1x
2 × 4

Tail, slice 2 of 12 (1/2)

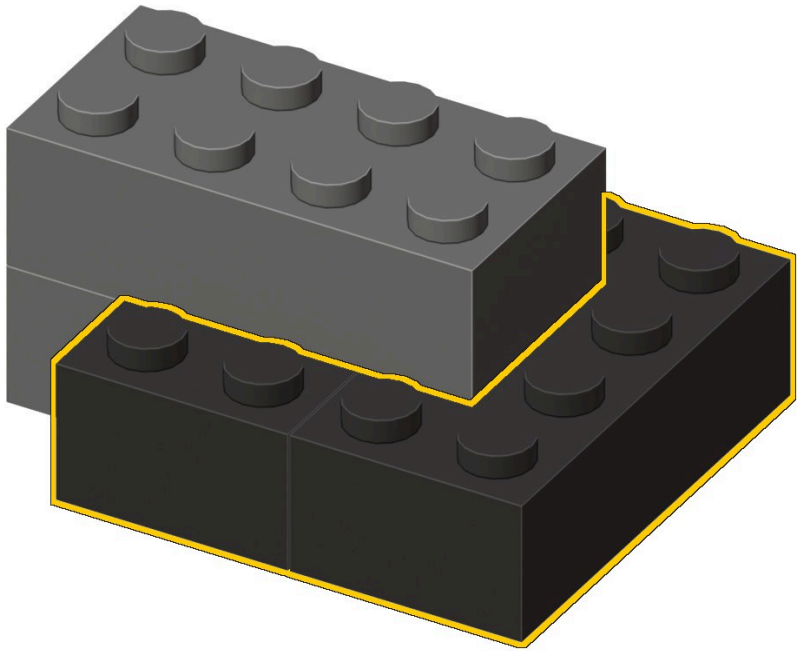

171

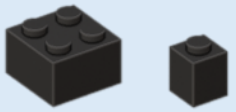

2x
2 × 4

Tail, slice 1 of 12 (2/3); these parts go on the underside of the slice above: push them up into it

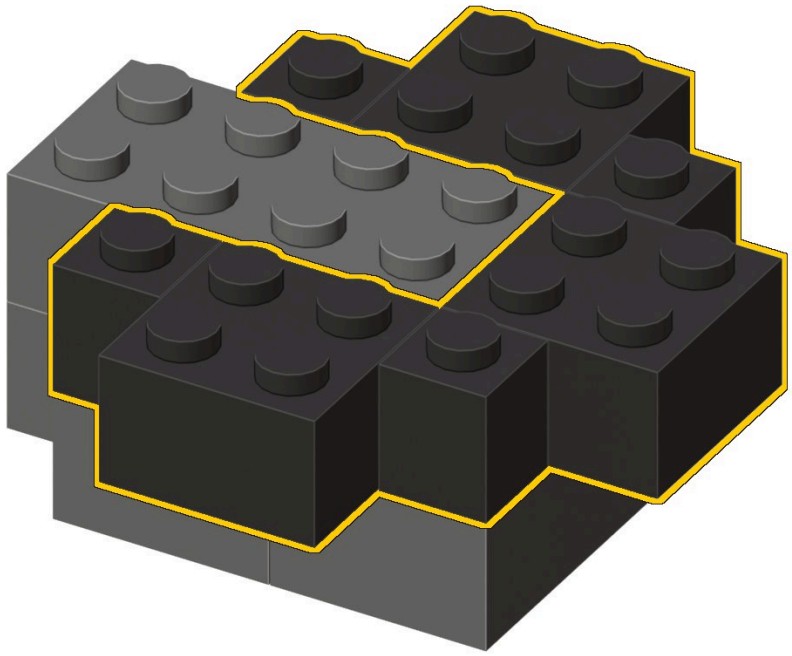

172

3x **4x**

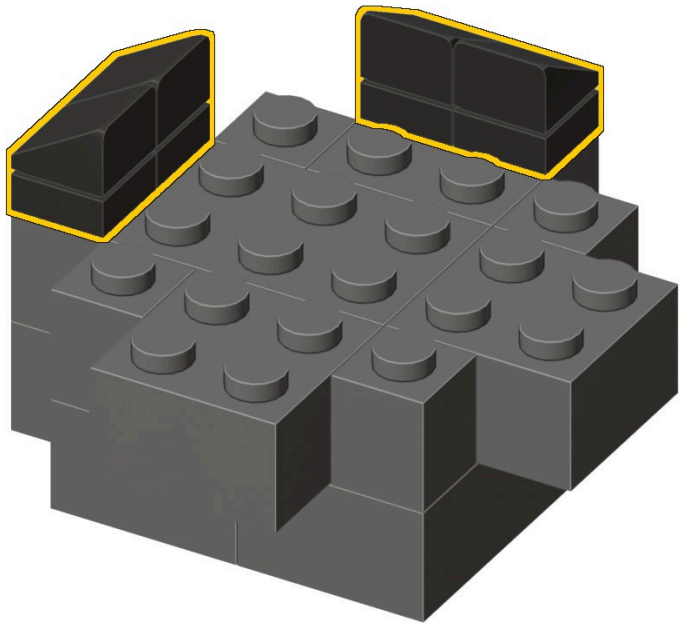

Tail, slice 2 of 12 (2/2)

173

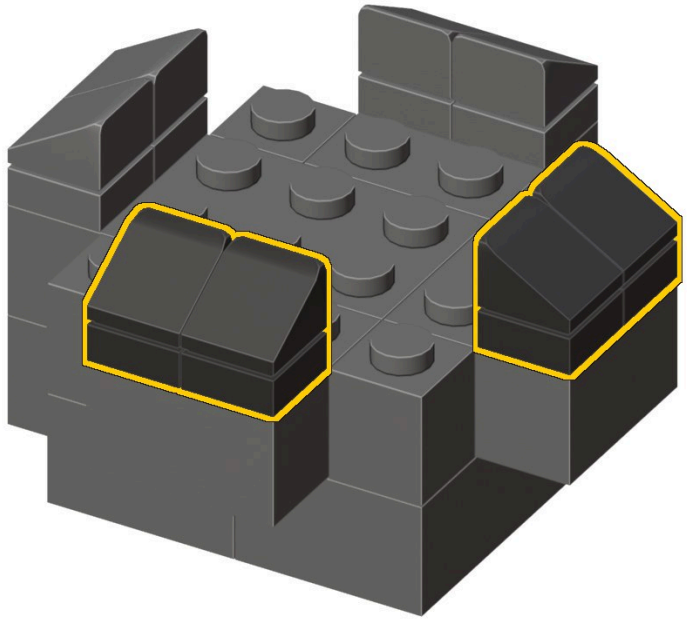

Tail, slice 3 of 12: curved slopes taper it (1/2)

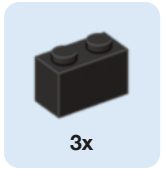

174

Tail, slice 3 of 12: curved slopes taper it (2/2)

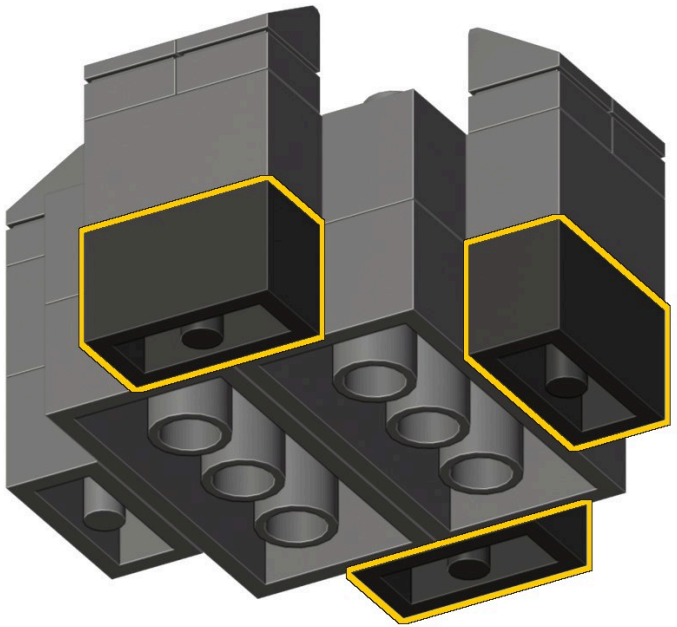

175

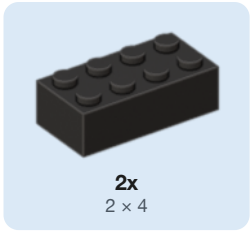

3x

seen from below

Tail, slice 1 of 12 (3/3); these parts go on the underside of the slice above: push them up into it

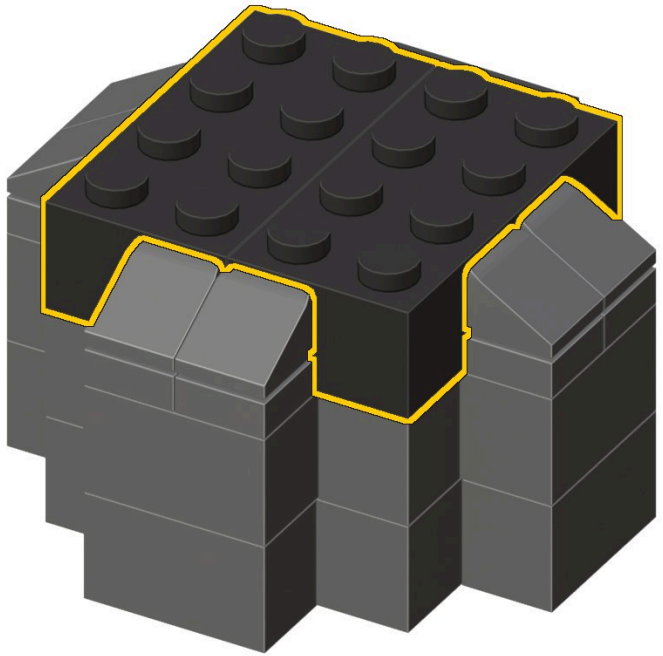

176

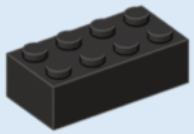

2x
2 × 4

Tail, slice 3 of 12

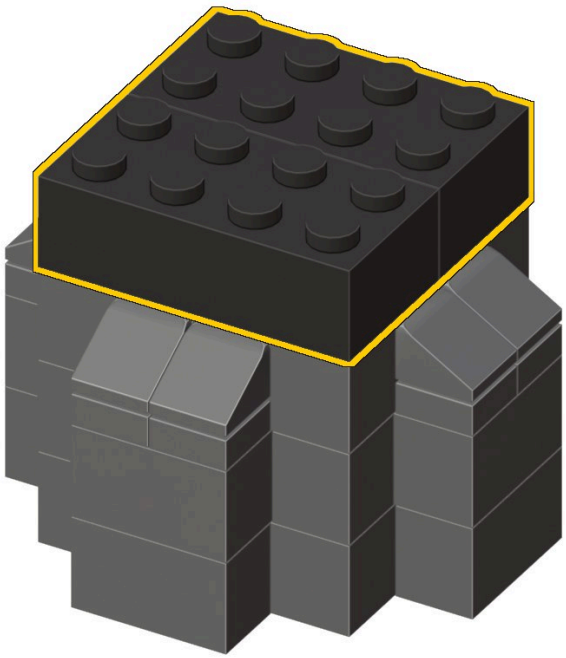

177

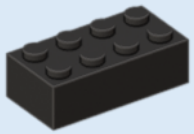

2x
2 × 4

Tail, slice 4 of 12

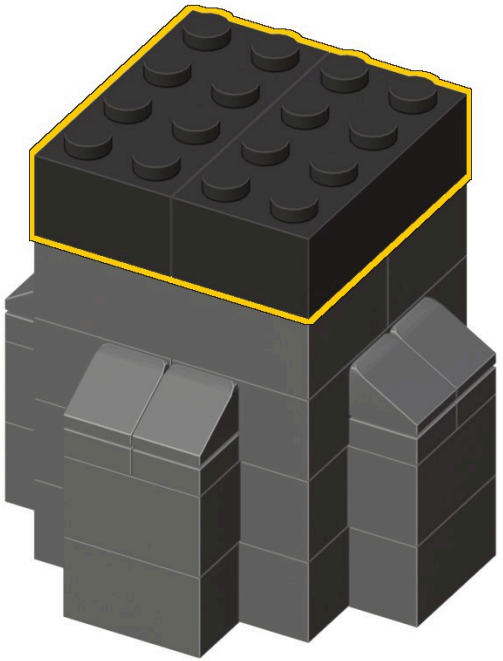

178

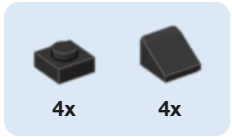

2x
2 × 4

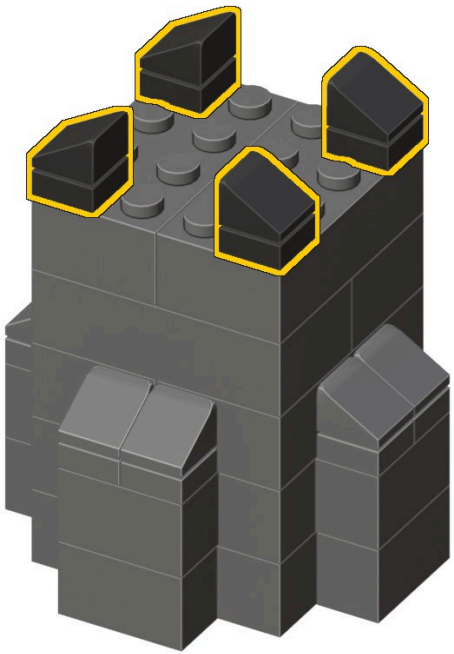

Tail, slice 5 of 12

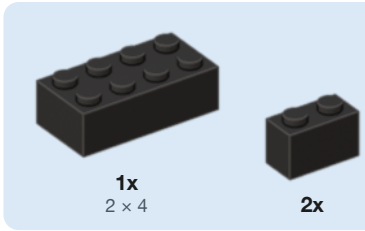

179

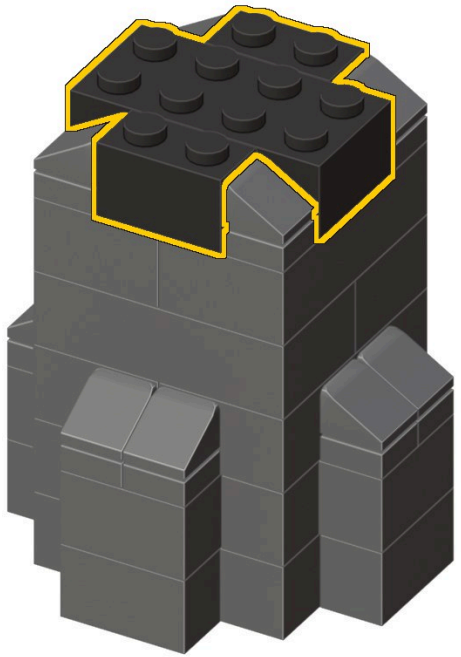

Tail, slice 6 of 12: curved slopes taper it

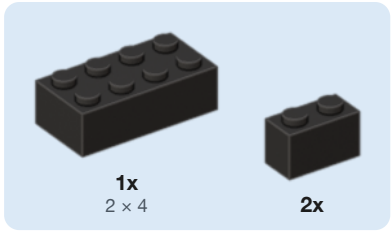

180

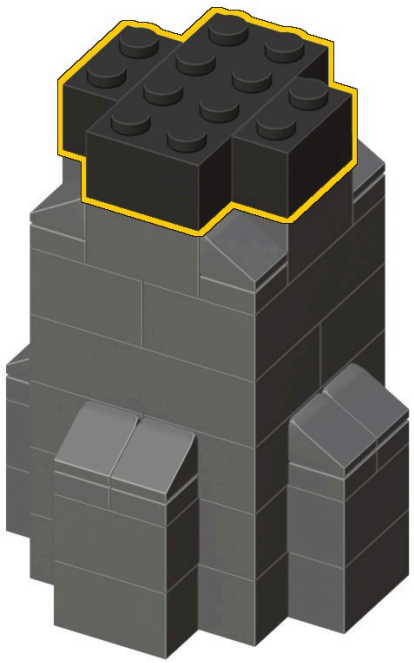

Tail, slice 6 of 12

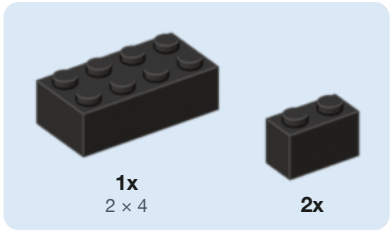

181

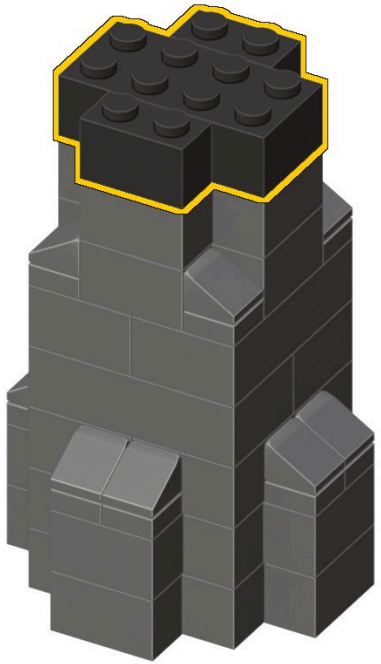

Tail, slice 7 of 12

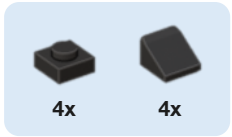

182

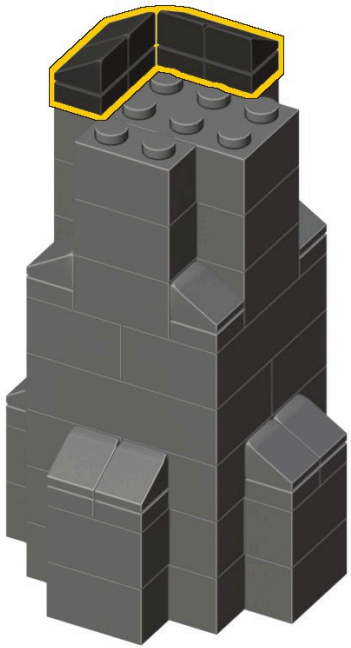

Tail, slice 8 of 12

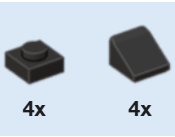

183

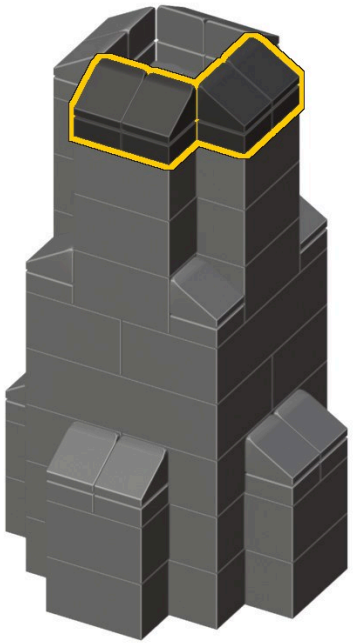

Tail, slice 9 of 12: curved slopes taper it (1/2)

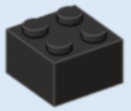

184

Tail, slice 9 of 12: curved slopes taper it (2/2)

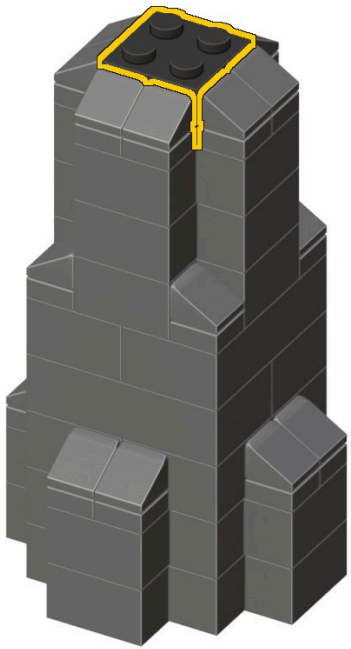

185

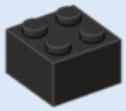

1x

Tail, slice 9 of 12

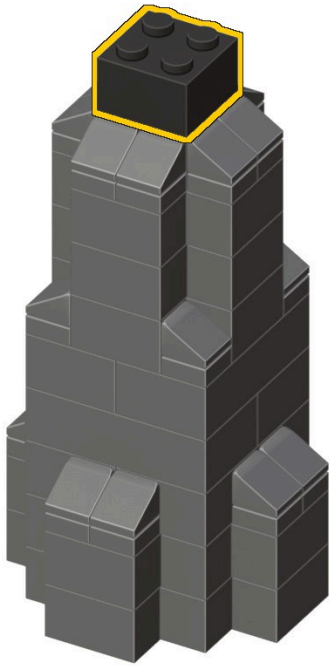

186

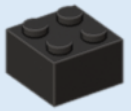

1x

Tail, slice 10 of 12

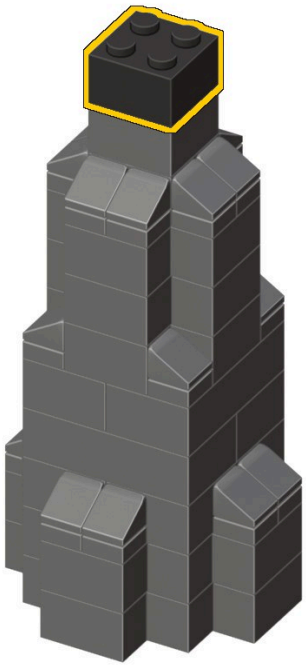

187

1x

Tail, slice 11 of 12

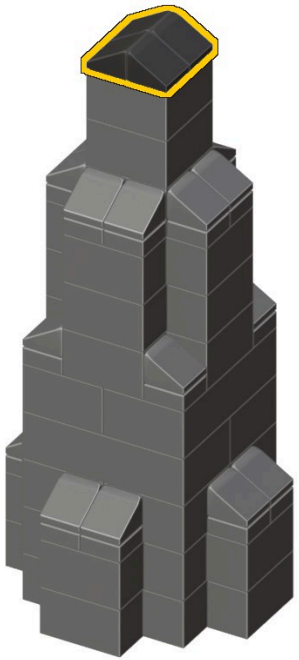

188

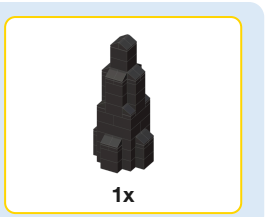

4x

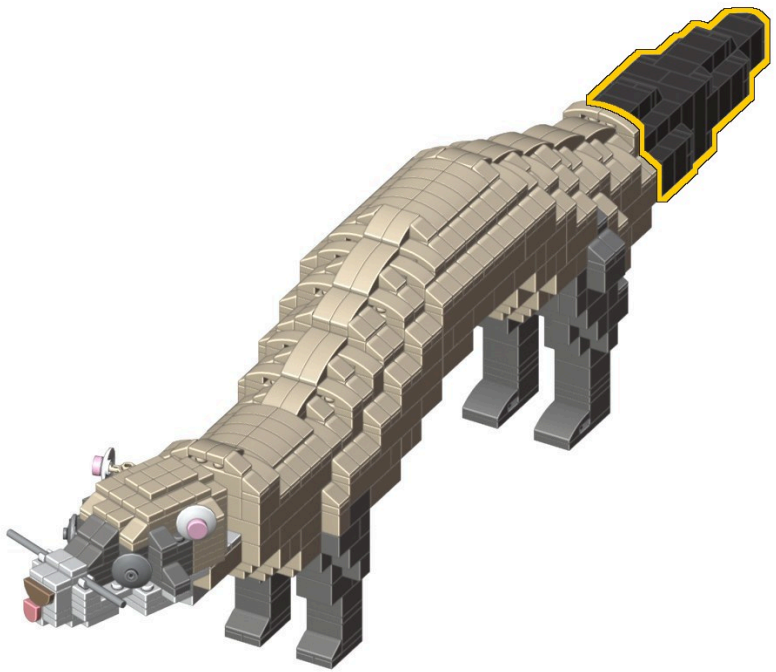

Tail, slice 12 of 12: curved slopes taper it

FERRET
189

Plug the tail onto the eight side studs at the rump

It works!

A head that turns

The head sits on a 2x2 turntable, so the ferret can look at you or away.

About this model

The body is a sculpture of bonded bricks, built in three parts: the chest with the front legs, the hips with the hind legs, and the arched back that joins them. The head sits on a turntable so the ferret can look at you, and the round tail plugs onto studs at the rump.

Checked on a computer

PASS	**real elements**	72 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	2273 connections (2266 stud, 5 bar, 2 clip); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 895 parts
PASS	**buildability**	883 insertions tried across 8 submodel(s); 0 problem(s)
PASS	**stability**	about 825 g; centre of mass inside the base (97% margin); tips at 14.1 deg
PASS	**mechanism**	24 poses swept for 1 moving group(s); 0 gear pair(s); 0 problem(s)
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/ferret**
