Bricks

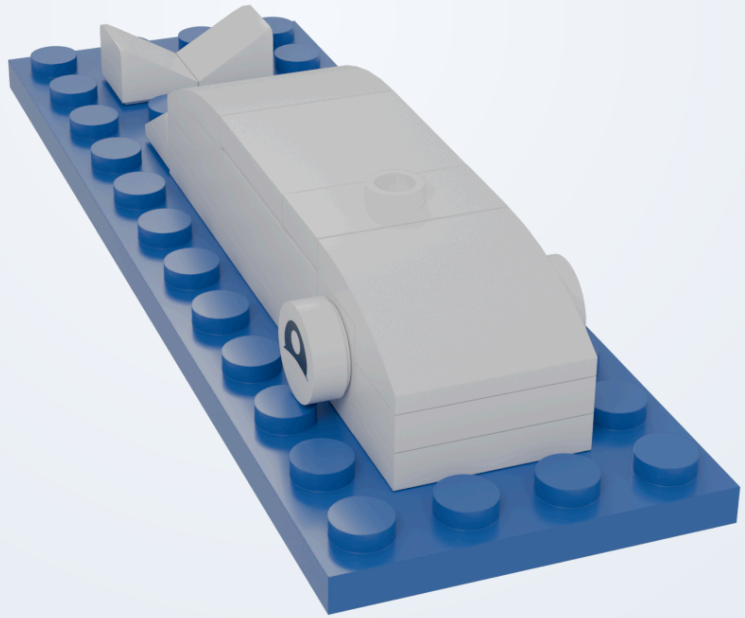

A LEGO® BRICK MODEL OF

Moby Dick

The white whale surfacing in a blue sea, in 17 pieces.
A design by d.e.n.n.i.s.

Designed by d.e.n.n.i.s

17 pieces · 11 steps · 1 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Moby Dick and related names belong to their owners. Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by d.e.n.n.i.s (https://brickit.app/ideas/527f1c4e-e90c-4600-8a03-e480011a26e6). These steps follow the designer's own instructions, redrawn here.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 38 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 3.2 × 9.6 cm and 1.8 cm tall, about 17 g (estimated).

Lay the sea down long ways, then build the whale along the middle of it: a 2 x 4 brick for the body, a brick with a side stud each side of its front for the eyes, two stacked plates at each end and a little slope behind the back ones. A curved slope goes over each end, low end out, with a jumper (the blowhole) and a tile between them on top. Two cheese slopes behind the whale are its tail, coming up out of the water.

You will need

- The 17 pieces in 2 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- Each curved slope has a step under it: its high end sits a plate higher than its low end. The low end goes over the stacked plates, the high end over the bricks.
- Turn the eyes so the line of the eyelid is along the bottom and the black dome is up.

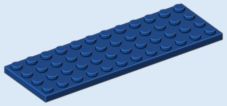

The 2 colours

- White: 16
- Blue: 1

How to read the steps

Parts and step number

7

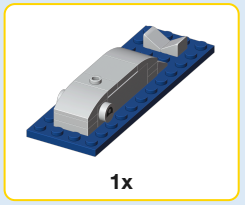

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

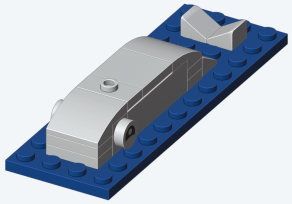

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

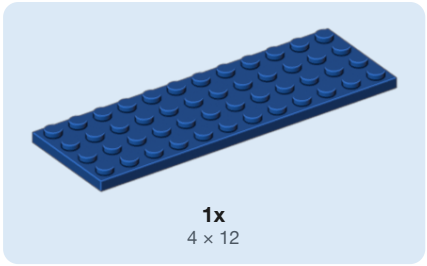

The model is built in 1 sections. Each is finished before it is used.

1. Moby Dick
steps 1–11

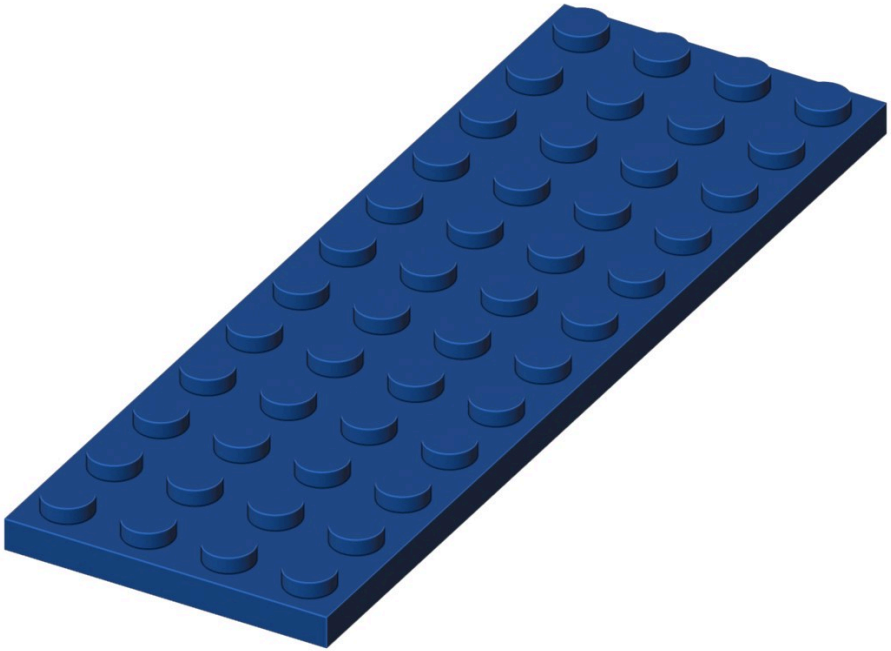

MOBY DICK

1

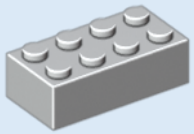

1x
4 × 12

The sea: a blue 4 x 12 plate, lying front to back

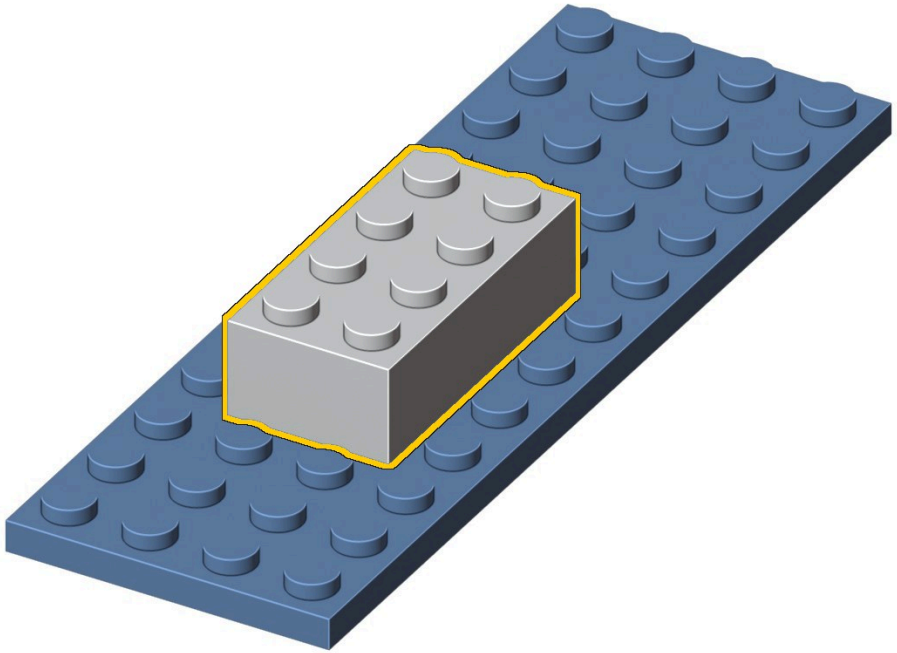

2

1x
2 × 4

The body: a 2 x 4 brick down the middle, a stud in from the front

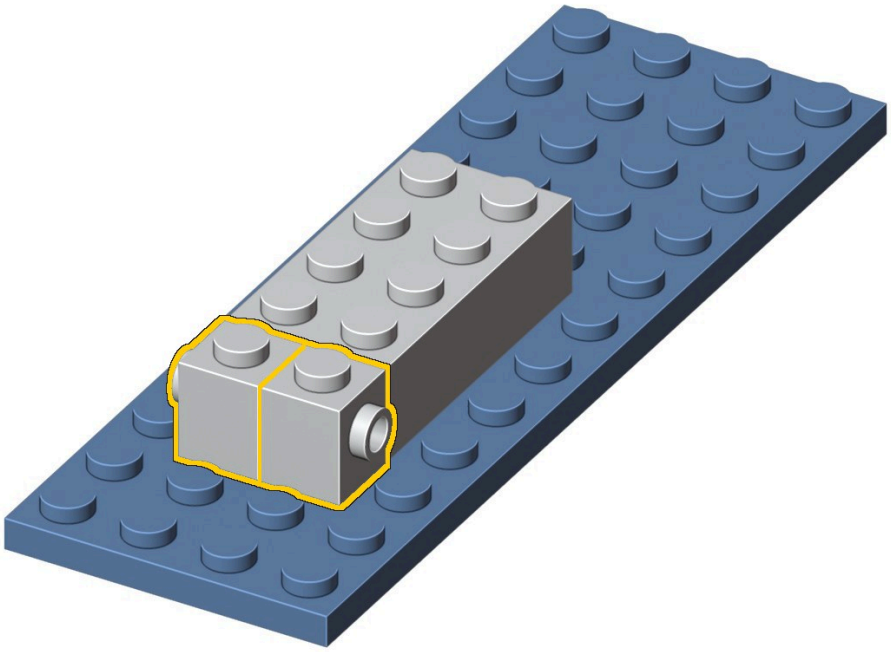

3

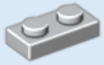

2x

In front of it a 1 x 1 brick with a stud on its side on each side, the side studs out

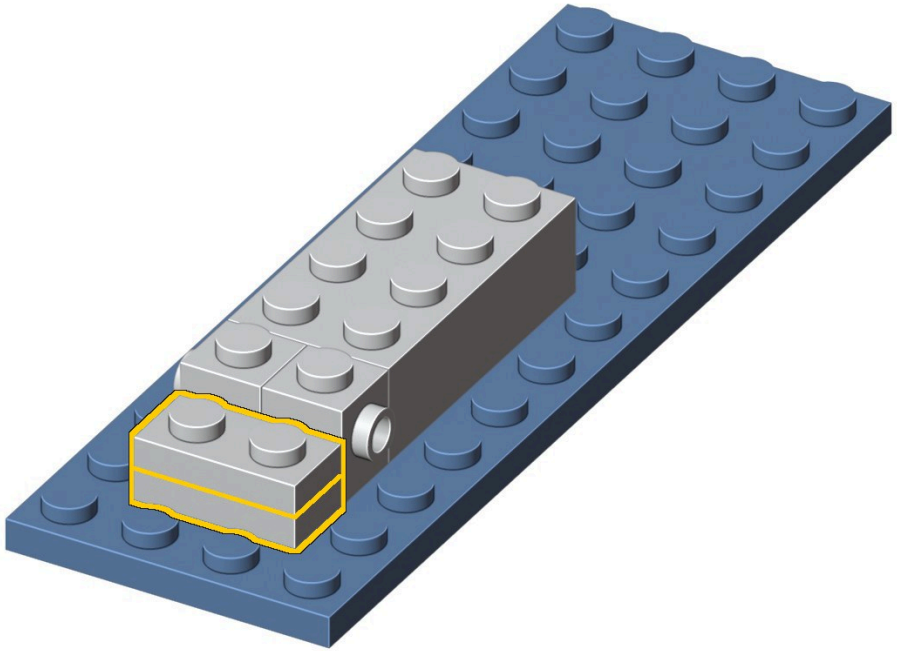

4

2x

The snout: two 1 x 2 plates, one on the other, in front of them

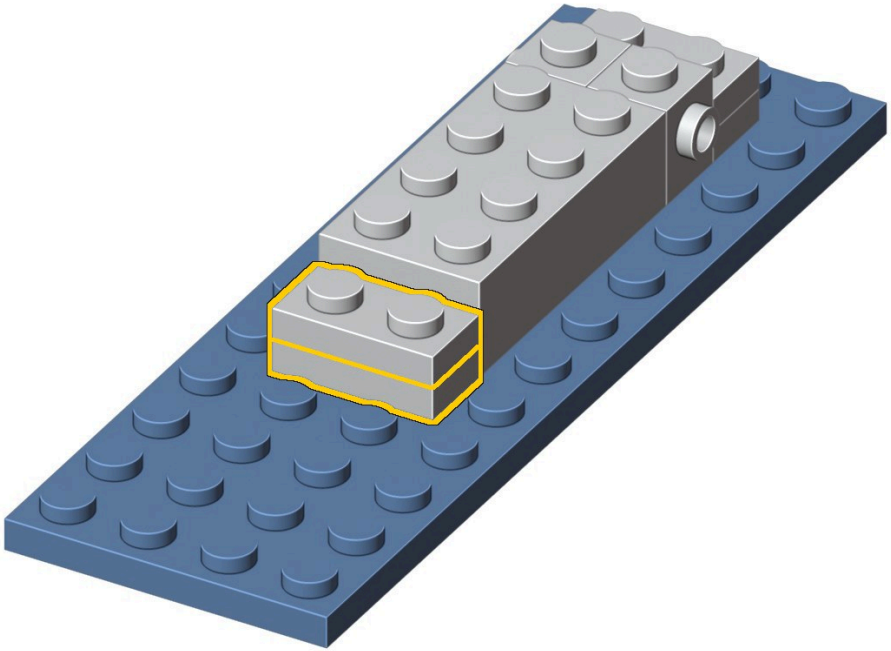

5

2x

seen from behind

Two 1 x 2 plates, one on the other, behind the body

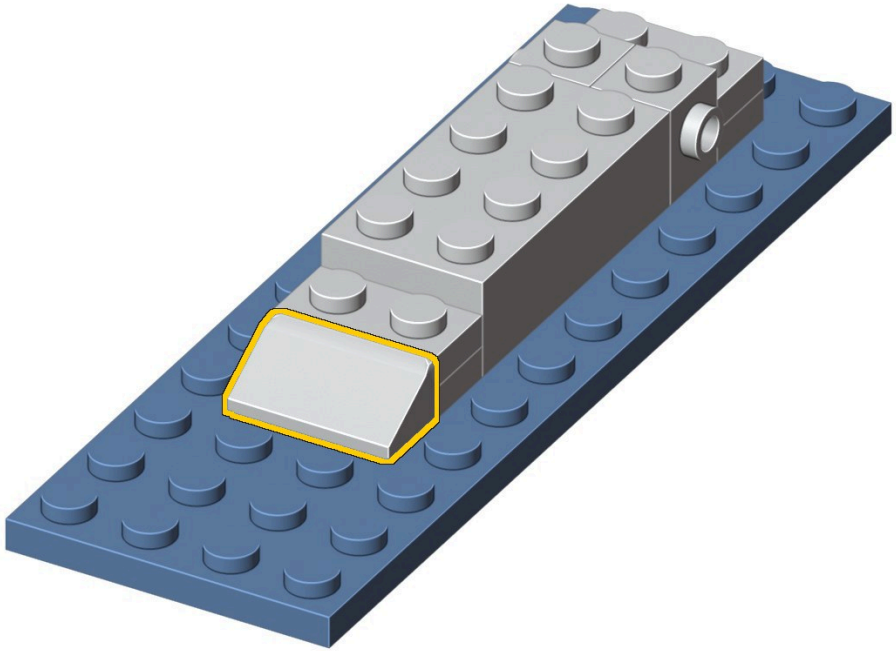

6

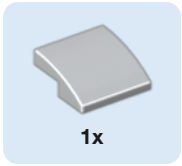

1x

seen from behind

A 1 x 2 slope behind them, sloping down to the back

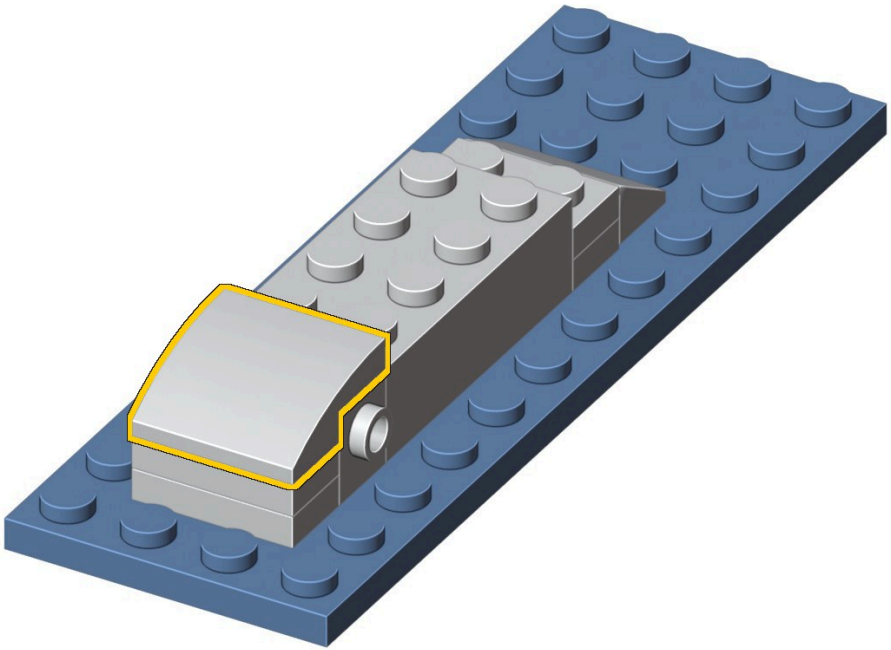

7

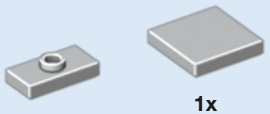

1x

The head: a curved slope over the snout and the side-stud bricks, low end to the front

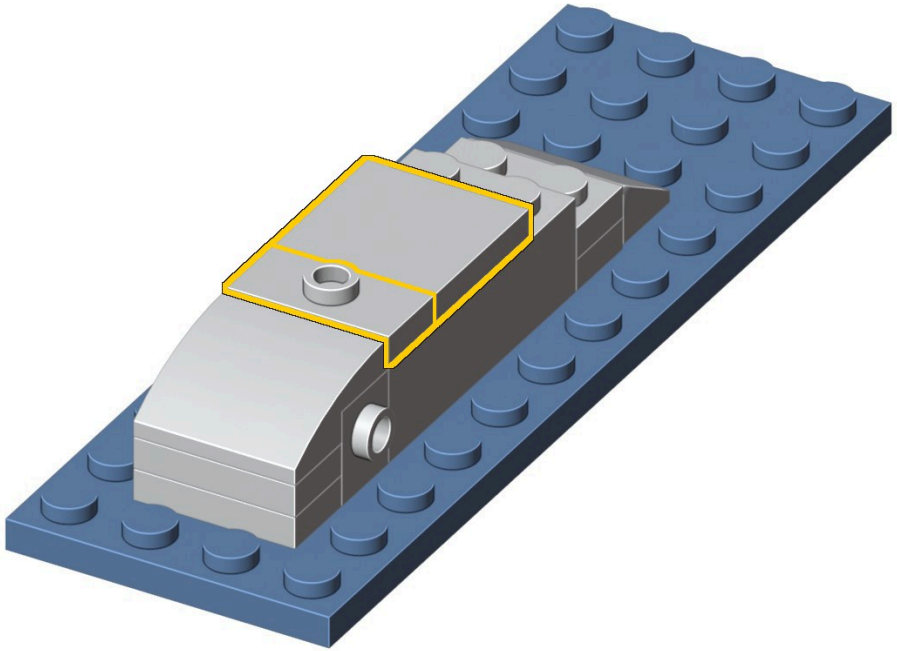

8

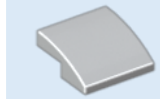

1x

1x
2 × 2

On top: a jumper (the blowhole) and a 2 x 2 tile behind it

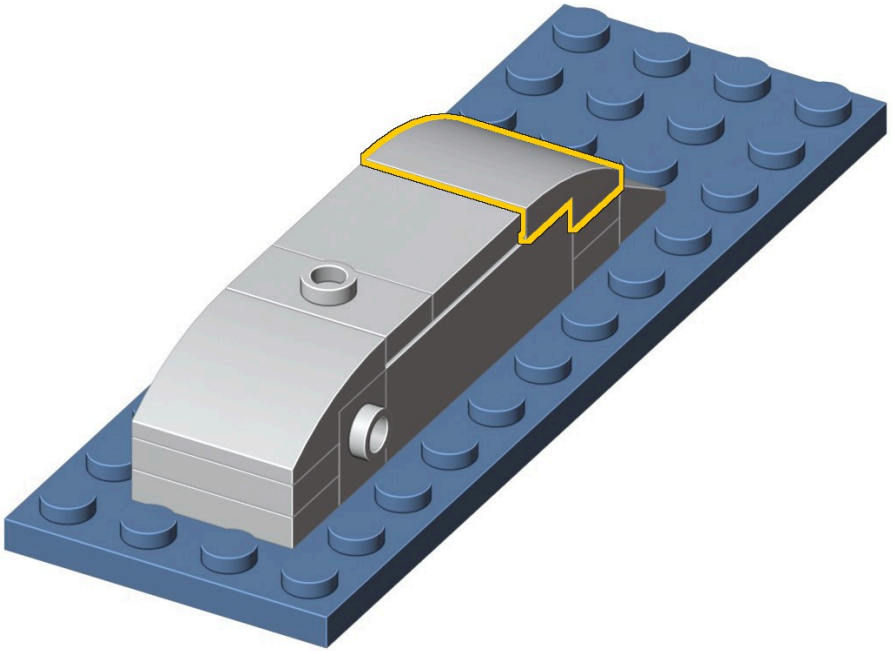

9

1x

A curved slope over the back of the body, low end to the back

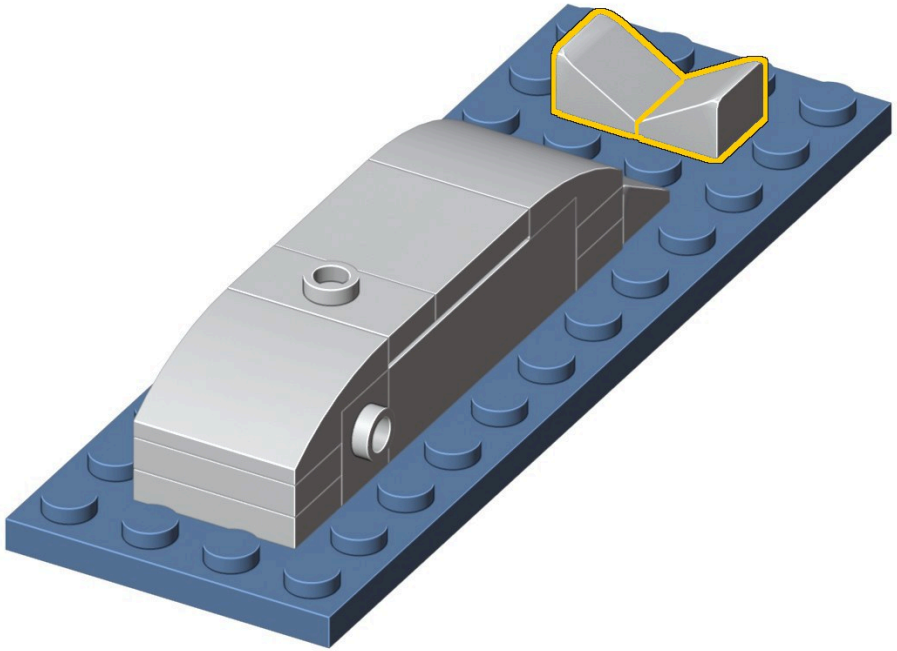

10

2x

The tail: two cheese slopes on the sea behind it, sloping towards each other

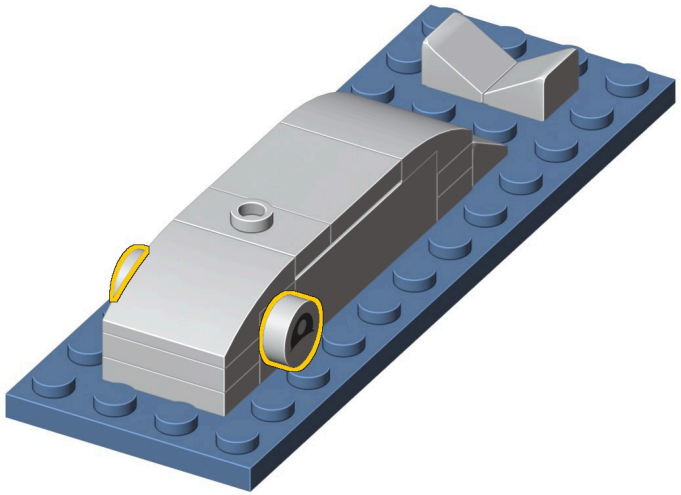

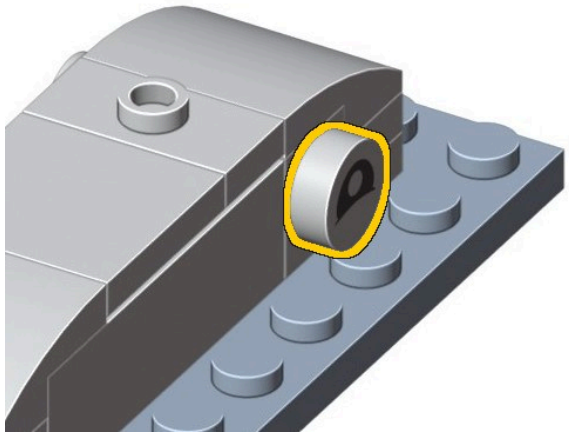

11

2x

The eyes, on the side studs

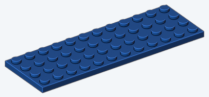

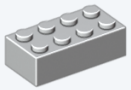

From behind: the outlined piece.

Parts inventory

17 pieces in 10 part/colour lines. Bold: the LEGO element ID (what LEGO Pick a Brick sells); below: the colour and the BrickLink part number.

About this model

Lay the sea down long ways, then build the whale along the middle of it: a 2 x 4 brick for the body, a brick with a side stud each side of its front for the eyes, two stacked plates at each end and a little slope behind the back ones. A curved slope goes over each end, low end out, with a jumper (the blowhole) and a tile between them on top. Two cheese slopes behind the whale are its tail, coming up out of the water.

Checked on a computer

PASS	**real elements**	10 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	38 connections (38 stud); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 17 parts
PASS	**buildability**	16 insertions tried across 1 submodel(s); 0 problem(s)
PASS	**stability**	about 17 g; centre of mass inside the base (100% margin); tips at 69.3 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/moby_dick**
