Bricks

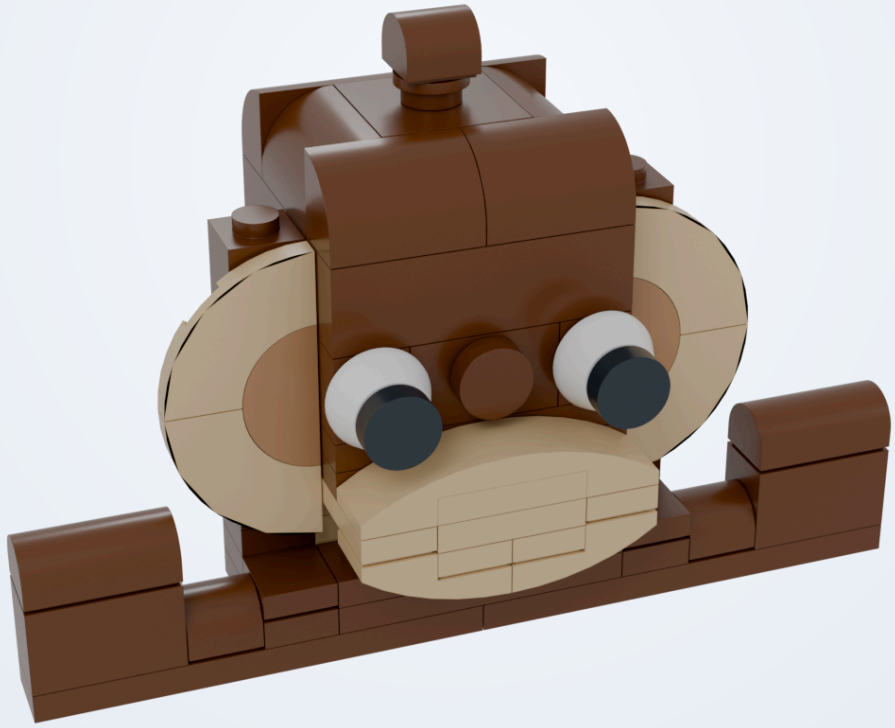

A LEGO® BRICK MODEL OF

Onkey

A little monkey head on two long arms, with googly eyes and a jaw that drops, in 79 pieces.

Designed by theroldangrace

79 pieces · 22 steps · 3 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Onkey and related names belong to their owners.
Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by theroldangrace (https://www.instagram.com/p/DedZYEepfkj/). These steps were worked out from it here; they are not the designer's own instructions.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 188 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated; the mechanism was swept through its whole range. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 9.6 × 4.2 cm and 6.4 cm tall, about 52 g (estimated).

Make the two arms first and lay them side by side: the head is built on their inner ends. Inside the lower head go the jaw's hinge (two plates with a handle, and a plate with a clip on each) and the tan plate the upper lip stands on; the jaw and the lip go on next, then the ears (they stand on the arms), the face and its eyes, and the rounded top with its tuft.

You will need

- The 79 pieces in 6 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.
- The jaw hangs on two clips. Push the chin down gently and it opens a little; push it back up and the mouth is shut. It stays wherever you leave it.
- Most of the face's bricks have a stud on their front or side. Check each step's picture for which way the studs point.

The 6 colours

- Reddish Brown: 51
- Tan: 21
- Medium Nougat: 2
- White: 2
- Black: 2
- Light Bluish Gray: 1

How to read the steps

Parts and step number

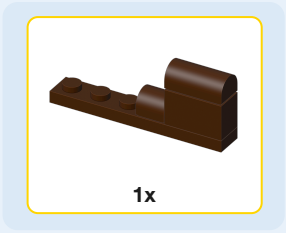

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

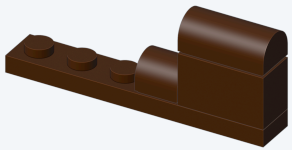

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

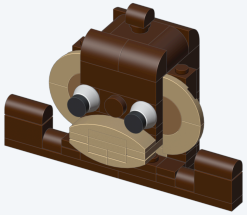

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

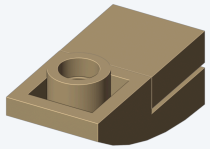

The model is built in 3 sections. Each is finished before it is used.

1. Arm ×2
step 1

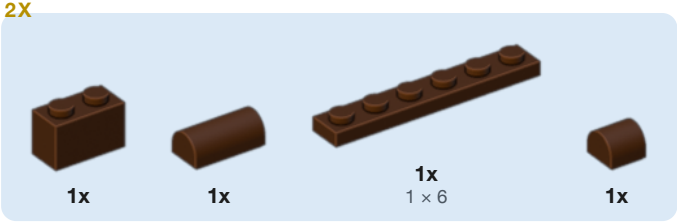

2. Onkey
steps 2–7, 9–22

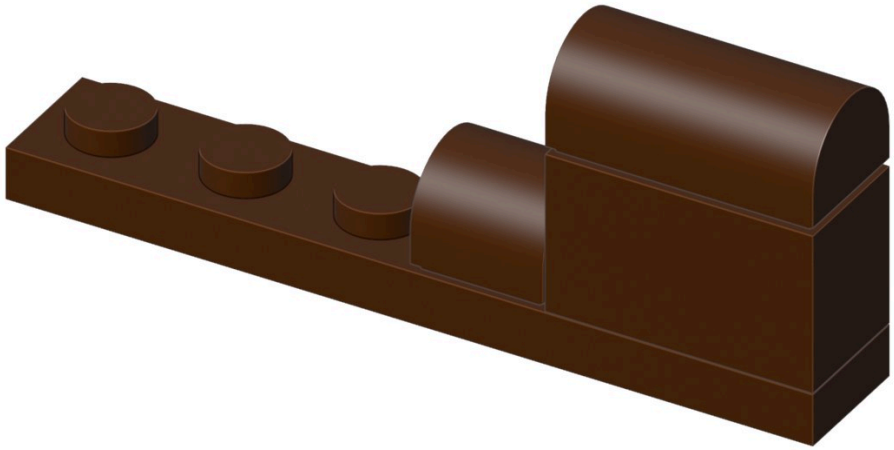

3. Half the jaw ×2
step 8

ARM · BUILD 2X

1

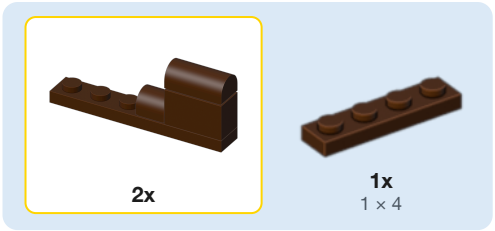

An arm: a 1 x 6 plate, a rounded 1 x 1 piece on its fourth stud, and the hand on the end: a 1 x 2 brick with a rounded top. Make two

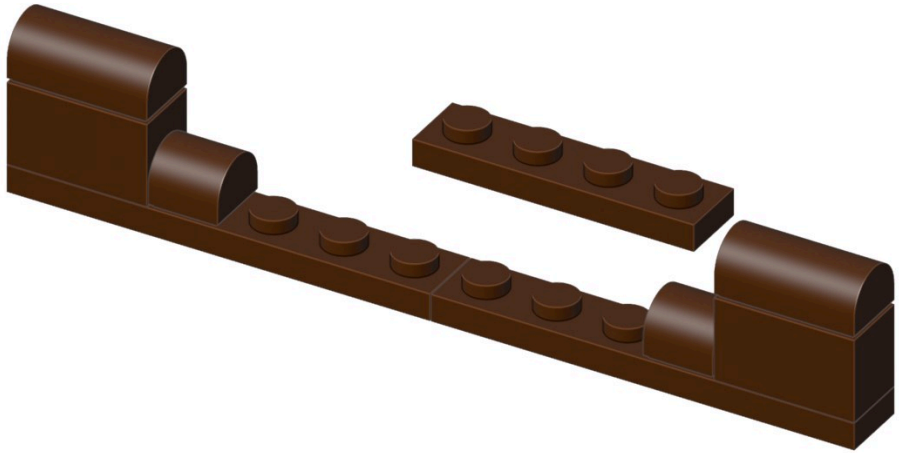

ONKEY

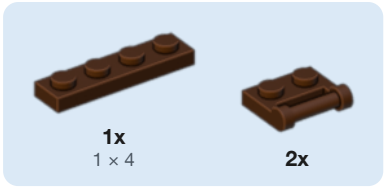

2

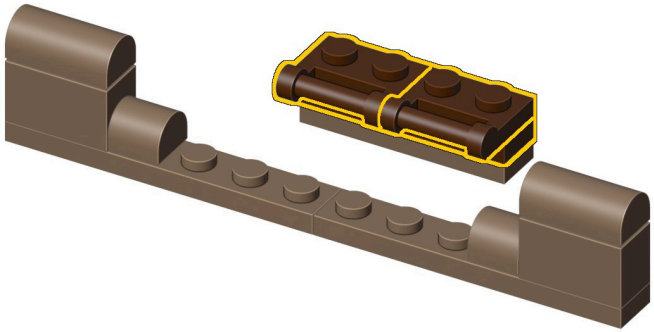

The arms, side by side under the front row, their hands out to the sides, and a 1 x 4 plate on the back row

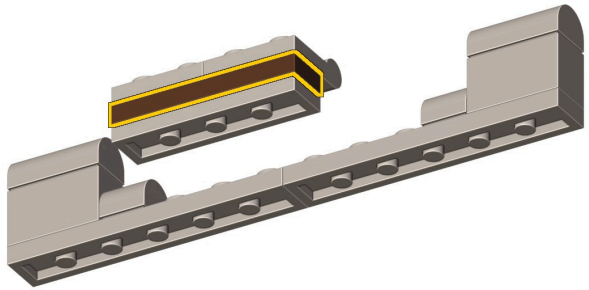

3

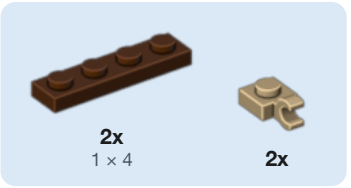

A 1 x 4 plate on the back row, and on it the jaw's hinge: two plates with a handle, handles to the front

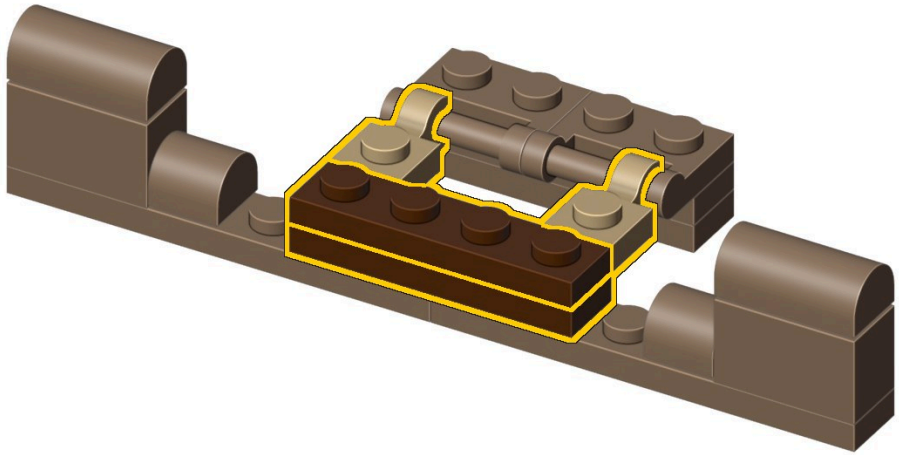

From behind and below: the outlined piece.

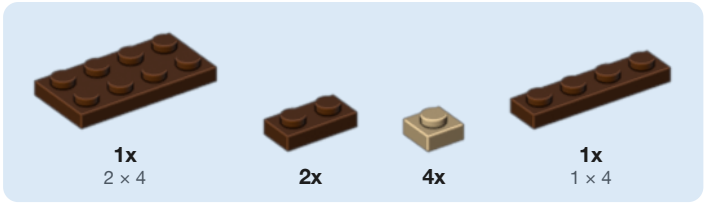

4

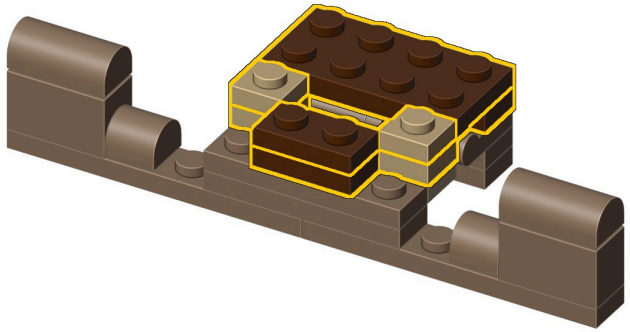

Push a plate with a clip onto each handle from the front, clip to the back: they hang on the handles. Then a 1 x 4 plate across the arms' inner ends, and another on that

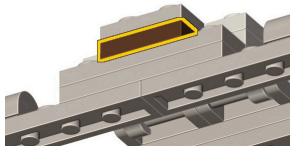

5

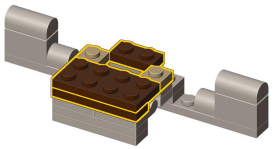

Two 1 x 1 plates on each clip plate: the jaw will stand on these. Two 1 x 2 plates in the middle at the front, a 1 x 4 plate on the handles and a 2 x 4 plate on that

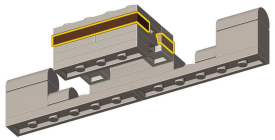

From below: the outlined piece clicks in here.

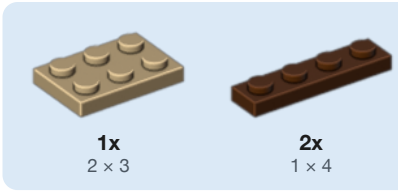

From behind: the outlined pieces.

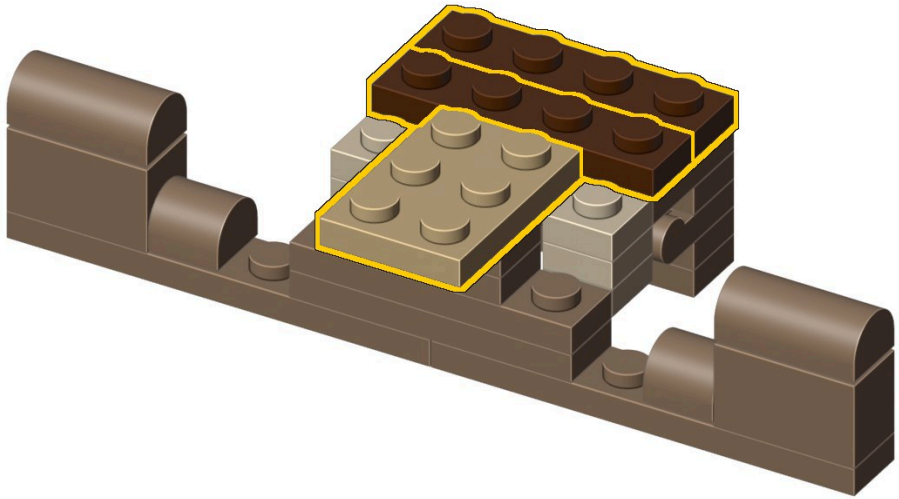

From behind and below: the outlined pieces.

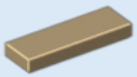

6

A tan 2 x 3 plate on the middle, sticking out a stud in front: the upper lip stands on it. Two 1 x 4 plates behind it

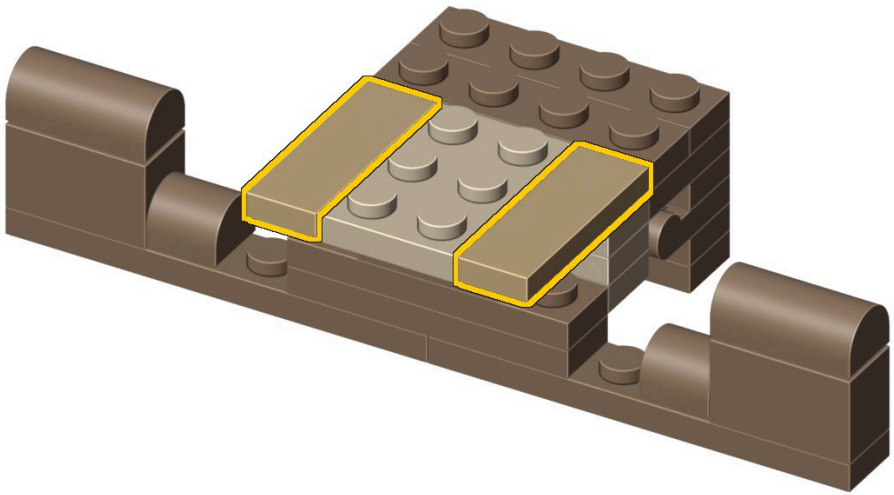

7

2x
1 × 3

A tan 1 x 3 tile on each column, sticking out in front

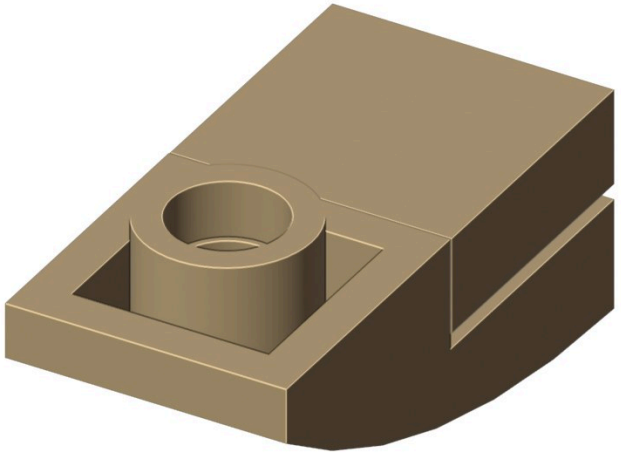

HALF THE JAW · BUILD 2X

8

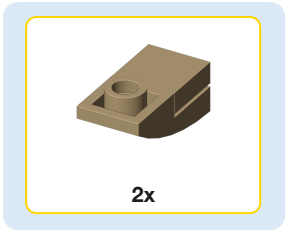

1x **1x**

Half the jaw: an inverted curved brick and a tan 1 x 1 tile on its lower stud.
Make two

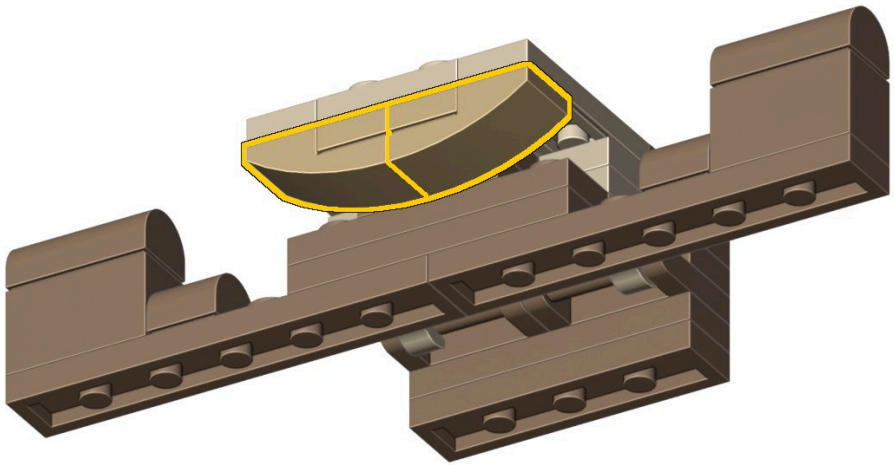

9

2x

seen from below

The jaw: push a half up under the front of each tile, thin ends out

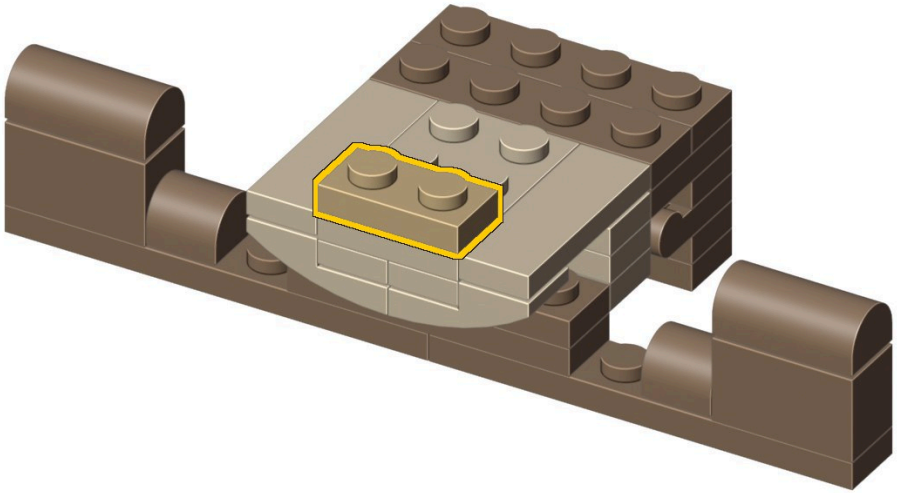

10

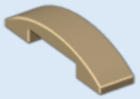

1x

A tan 1 x 2 plate on the front of the tan plate

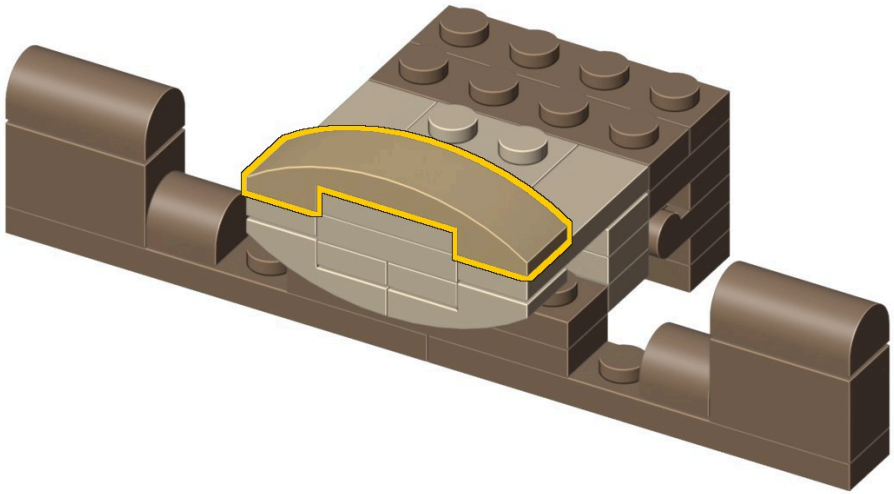

11

1x
4 × 1

The upper lip: a tan curved brick over it (the plate fits up inside it)

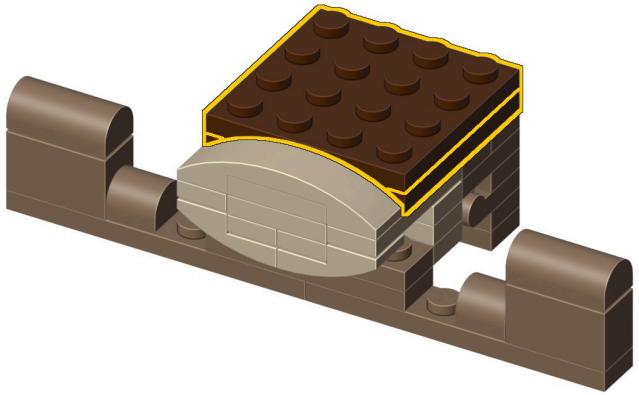

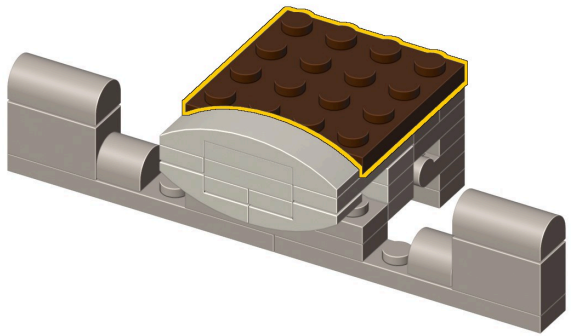

12

2x
4 × 4

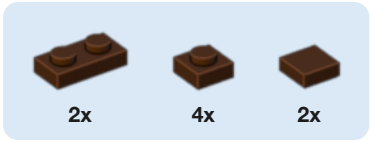

A 4 x 4 plate over the whole head, and another on it

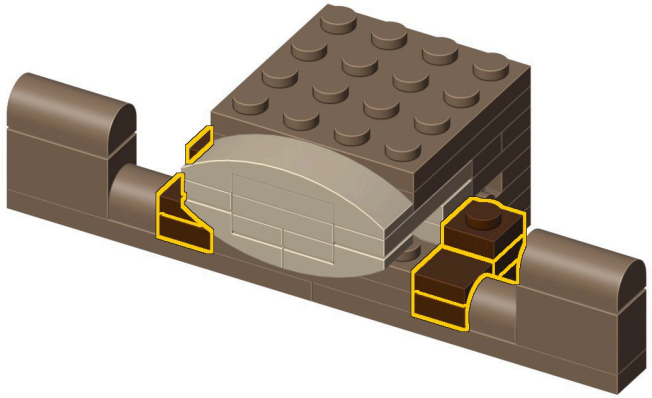

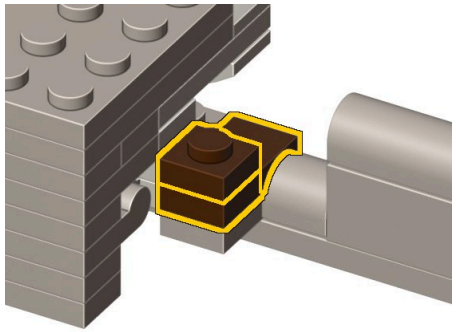

First the outlined piece: the others go on over it.

13

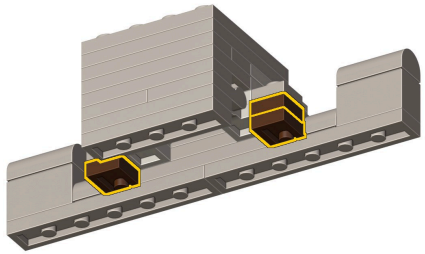

The ear posts: on each arm's free stud a 1 x 2 plate, front to back, half of it sticking out behind; a 1 x 1 tile on its front stud and two 1 x 1 plates on its back one

From behind: the outlined pieces.

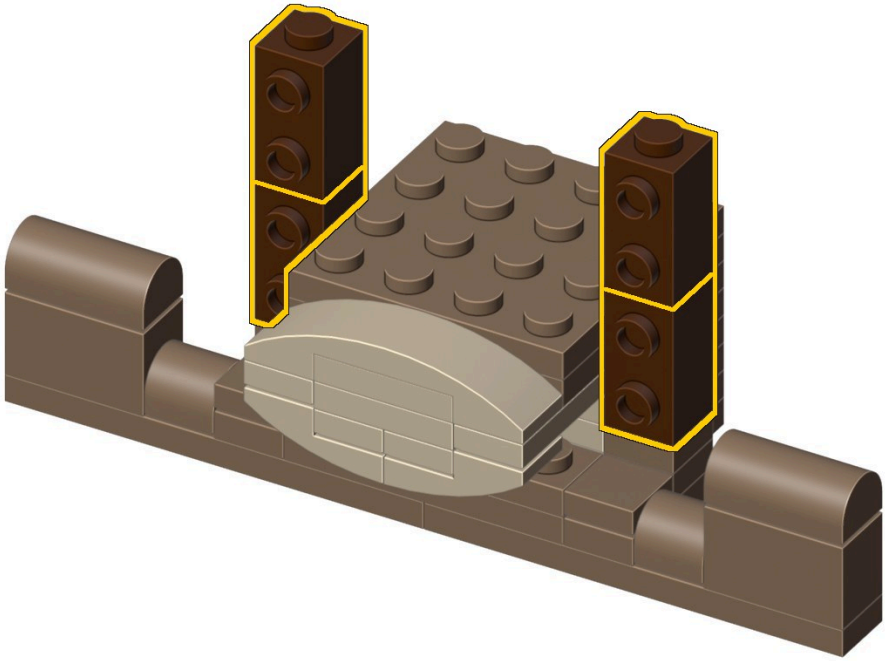

From behind and below: the outlined pieces.

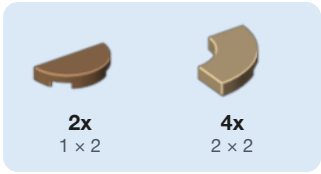

14

Two tall bricks with studs on one side on each, one on the other, studs to the front

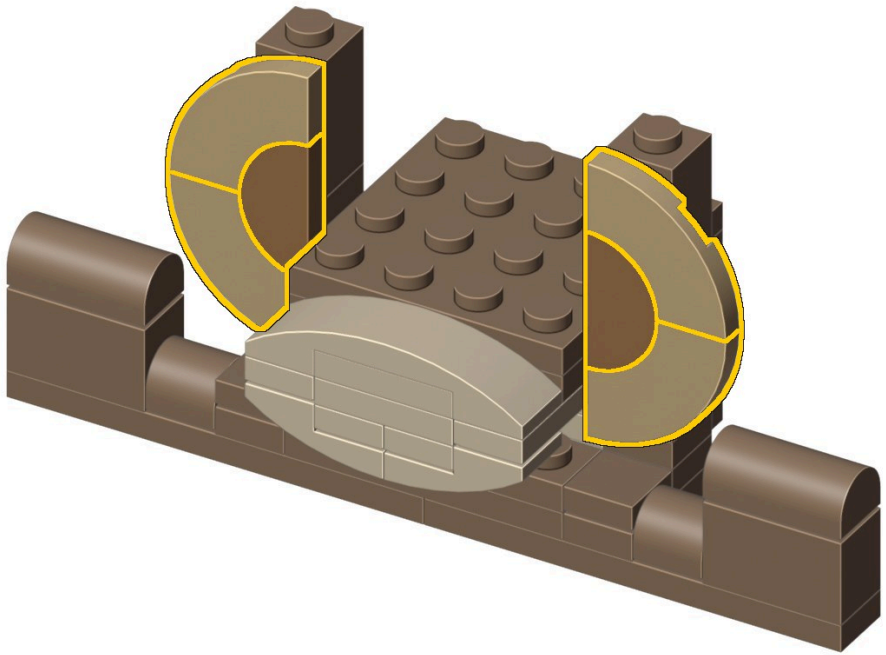

15

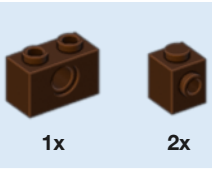

2x
1 × 2

4x
2 × 2

The ears: on each post a darker half circle, flat side in, and a tan macaroni tile above it and below it, round side out

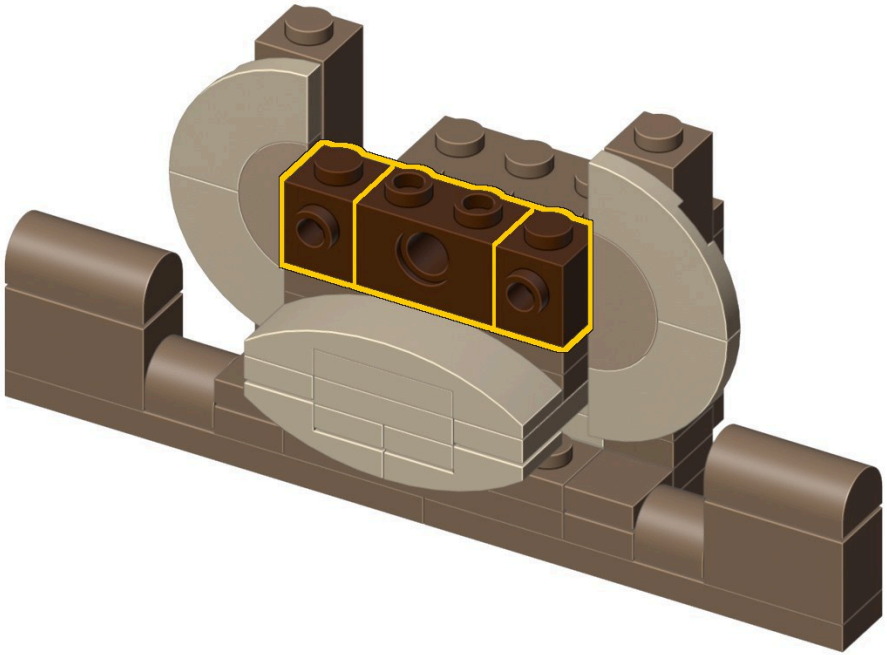

16

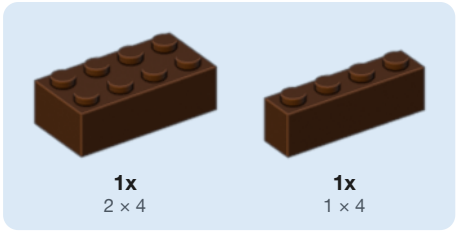

1x

2x

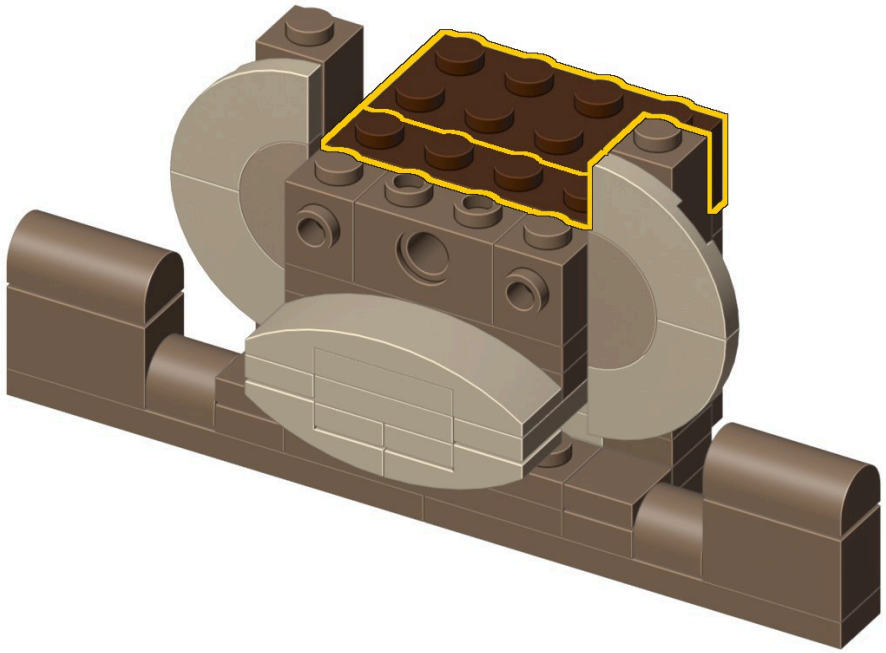

The eye row along the front: at each end a brick with a stud on its front, and between them a 1 x 2 brick with a hole

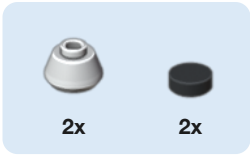

17

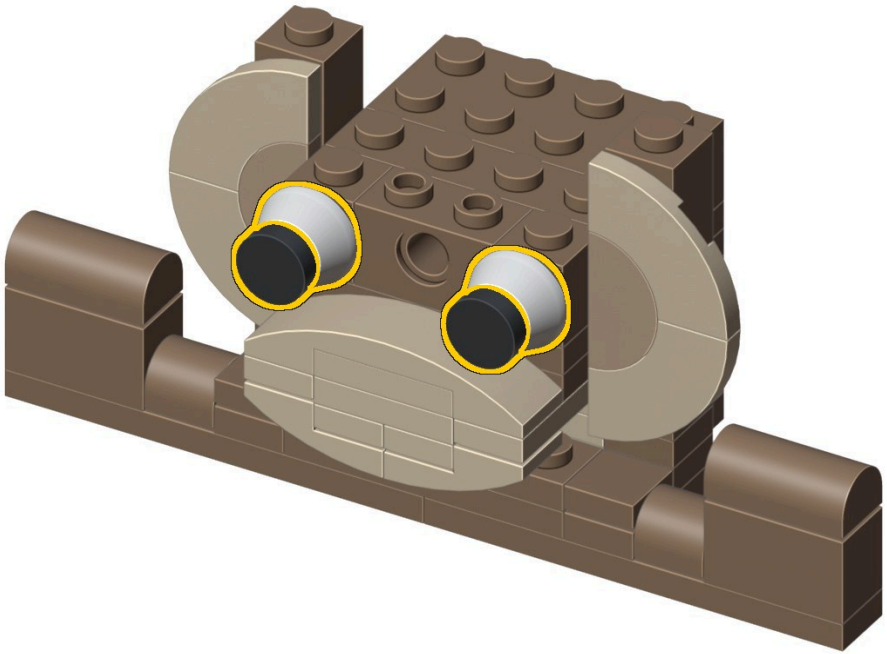

Behind them: a 1 x 4 brick, and a 2 x 4 brick on the back two rows

18

The eyes: a white cone on each end stud, and a black round tile on each cone

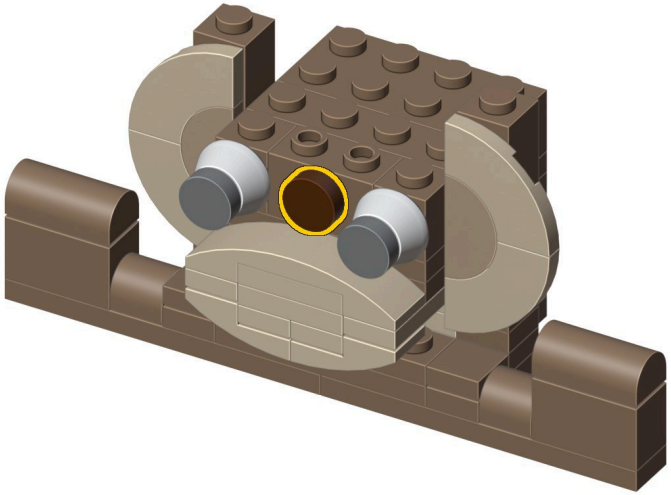

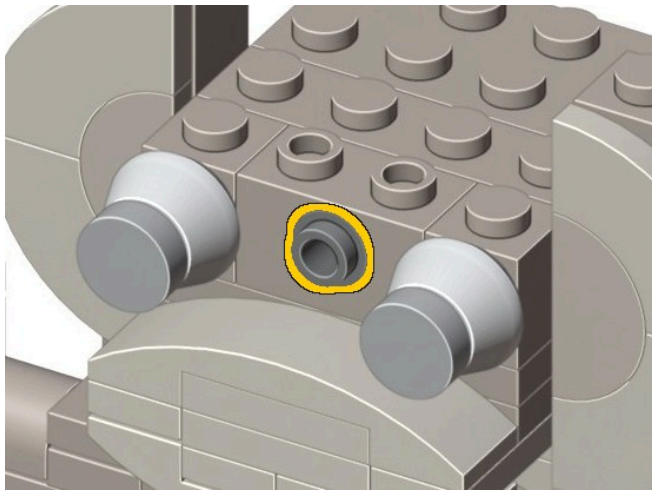

19

1x 1x

The nose: a half pin in the hole, and a round tile on its end

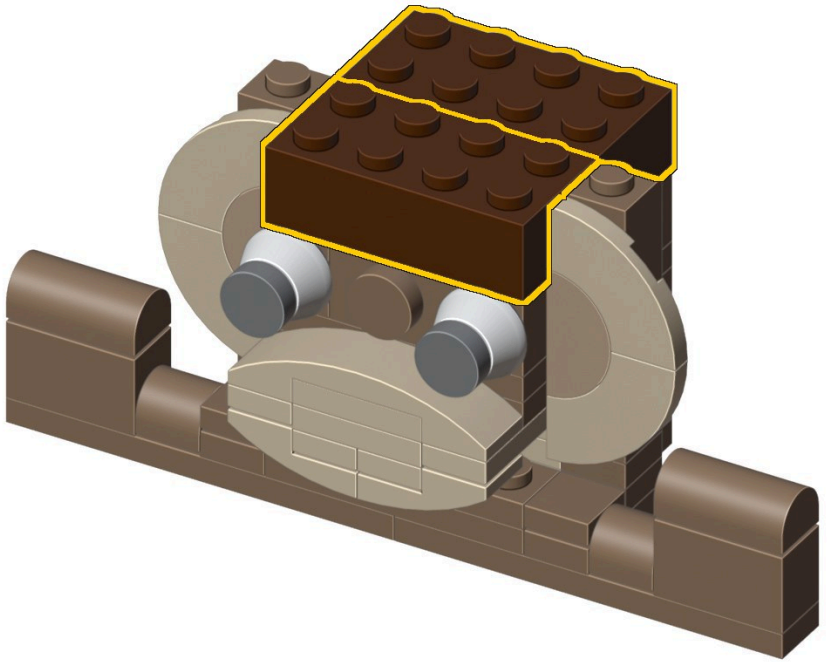

First the outlined piece: the others go on over it.

20

2x
2 × 4

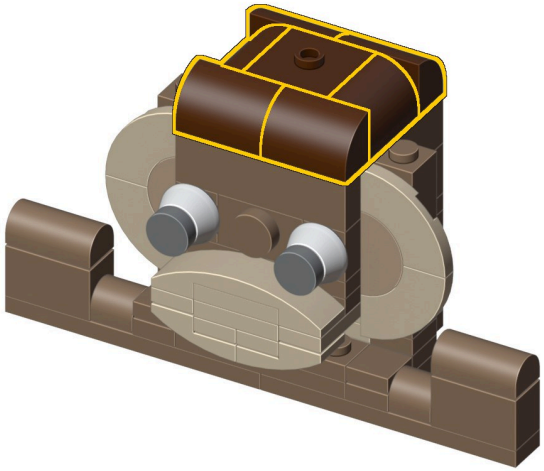

The forehead: two 2 x 4 bricks

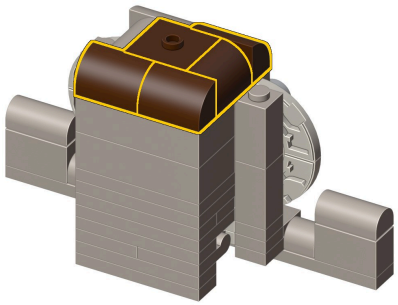

21

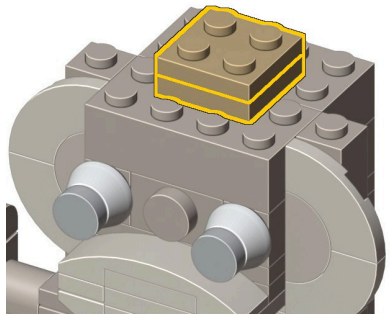

The top of the head: curved bricks round the edge, each curving down to the outside, and in the middle two tan 2 x 2 plates (out of sight) and a 2 x 2 plate with one stud

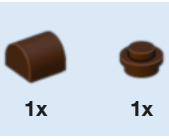

From behind: the outlined pieces.

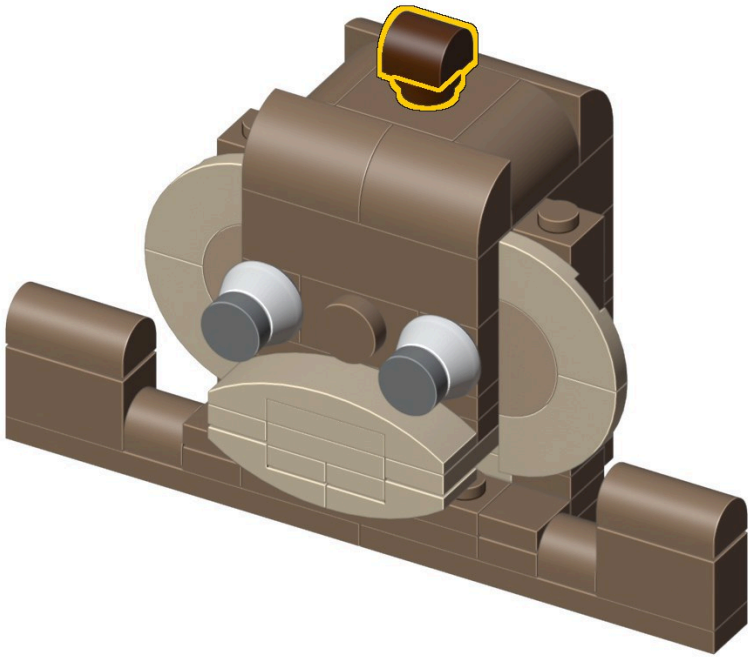

First the outlined pieces: the others go on over them.

22

The tuft: a round plate and a little rounded piece on top

About this model

Make the two arms first and lay them side by side: the head is built on their inner ends. Inside the lower head go the jaw's hinge (two plates with a handle, and a plate with a clip on each) and the tan plate the upper lip stands on; the jaw and the lip go on next, then the ears (they stand on the arms), the face and its eyes, and the rounded top with its tuft.

Checked on a computer

PASS	**real elements**	34 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	188 connections (183 stud, 3 pin, 2 clip); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 79 parts
PASS	**buildability**	72 insertions tried across 3 submodel(s); 0 problem(s)
PASS	**stability**	about 52 g; centre of mass inside the base (94% margin); tips at 26.6 deg
PASS	**mechanism**	24 poses swept for 1 moving group(s); 0 gear pair(s); 0 problem(s)
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.
