Bricks

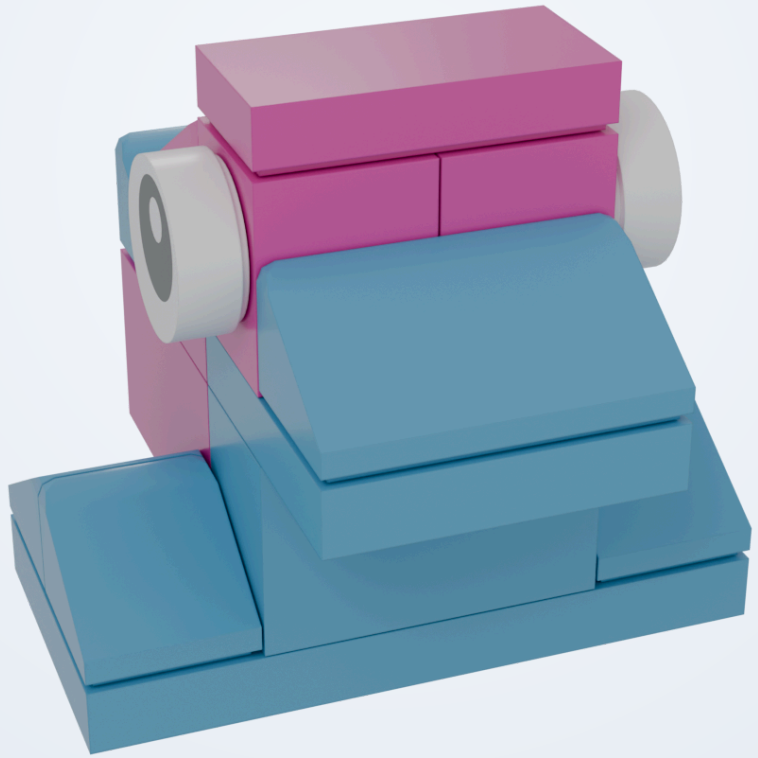

A LEGO® BRICK MODEL OF

Porygon

A tiny pink and blue Porygon with a beak, a tail and two round eyes, in 19 pieces.

Designed by QSKSw

19 pieces · 11 steps · 1 sections

Not produced, sponsored or endorsed by the LEGO Group. LEGO® is a trademark of the LEGO Group. Porygon and related names belong to their owners. Made with brickkit · 2026-11-05

Before you start

An unofficial fan-made manual

This booklet is not a LEGO product. It was generated from the model file by a computer program and checked part by part.

The model was designed by QSKSw (https://rebrickable.com/mocs/MOC-31400/). These steps were worked out from it here; they are not the designer's own instructions.

Not physically build-tested

The model and these steps were checked on a computer only: every part/colour is a real LEGO element, all 26 connections between parts were matched in 3D, no two parts overlap, every part can be pushed into place in its step, and the model's balance was estimated. Not tested: how firmly parts hold, part tolerances and how it copes with handling. Take your time and support the model while you work.

The finished model

About 3.2 × 3.2 cm and 2.9 cm tall, about 9 g (estimated).

Porygon, small enough to sit on a fingertip: start with the blue plate and the two bricks of its body, give it its feet, then build up through the chest to the tail, the head and the beak. The tile on top and the two eyes go on last.

You will need

- The 19 pieces in 3 colours listed at the back, with their LEGO element IDs and BrickLink numbers.
- A brick separator for pieces that sit too deep for a finger.

Tips

- Sort the pieces by colour before you start.
- Build the sections in order: each sub-assembly is finished before it is used.
- New pieces in a step have a yellow outline; earlier pieces are drawn paler.

The 3 colours

- Dark Azure: 9
- Dark Pink: 8
- White: 2

How to read the steps

Parts and step number

7

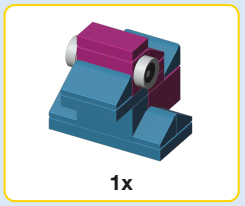

2x

The parts for the step and how many of each, then the step number. The parts of a step are drawn at one scale, so a longer one looks longer; a tile or a long plate also has its size in studs under it.

New parts

The parts added in a step have a yellow outline and are drawn in full colour; the parts from earlier steps are drawn paler.

Sub-assemblies

1x

A yellow-framed picture means: put in the sub-assembly you built in its own section. "Build 4x" means you need four of them.

Sections

Each section starts with its name at the top of the page. Sections are built in the order they appear.

Seen from below

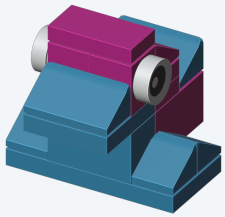

When a step adds parts underneath, the picture shows the model from below. A small label says so (and "seen from behind" likewise). A piece the picture cannot show gets a small picture beside it, ringed in yellow, from the side it can be seen from: where it clicks in.

Insert direction

Some parts slide in sideways (axles through bearings, gears onto axles). The picture shows where they end up; push them in along their axle.

Build overview

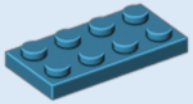

The model is built in 1 sections. Each is finished before it is used.

1. Porygon
steps 1–11

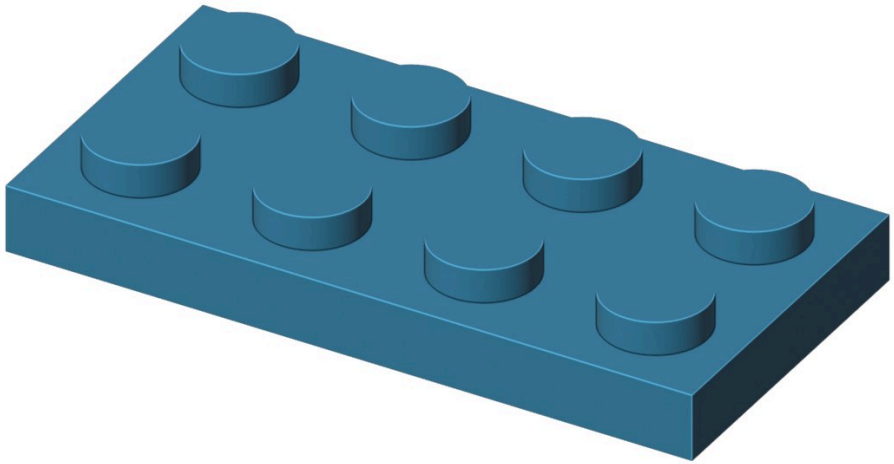

PORYGON

1

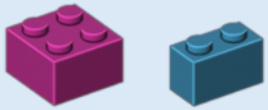

1x
2 × 4

The base: a 2 x 4 plate, its long side across

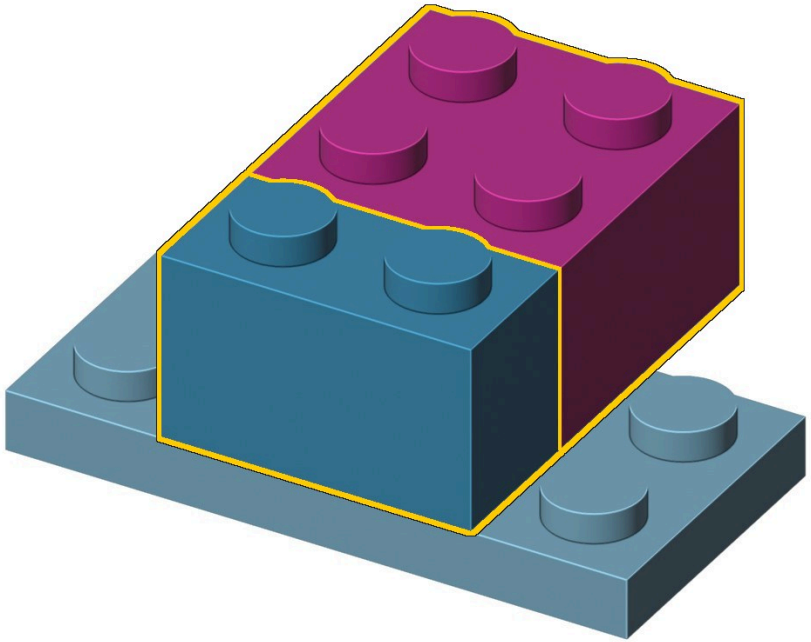

2

1x **1x**

The body: a blue 1 x 2 brick in front, a pink 2 x 2 brick behind, hanging over the back

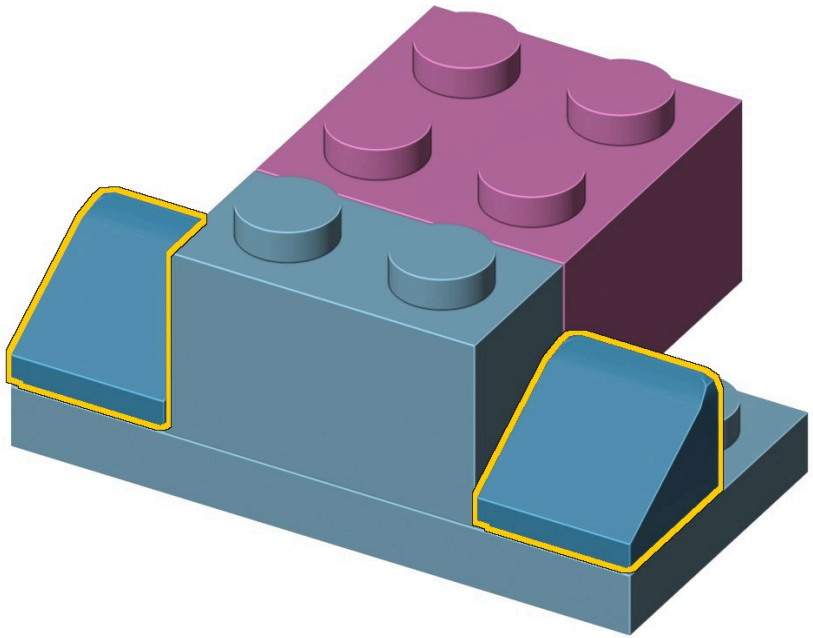

3

2x

The front of the feet: a small slope on each end, falling forward

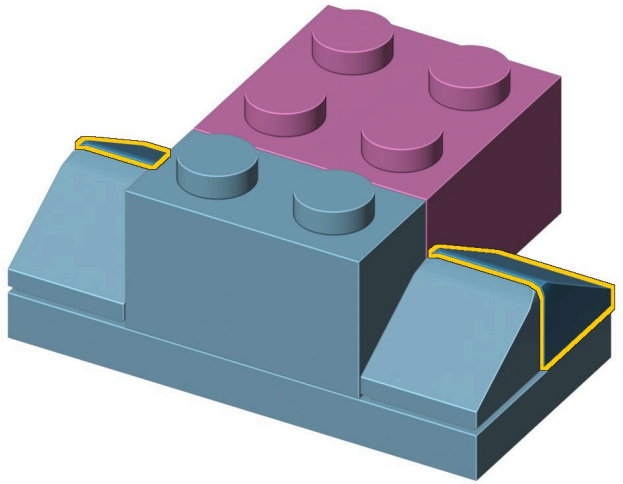

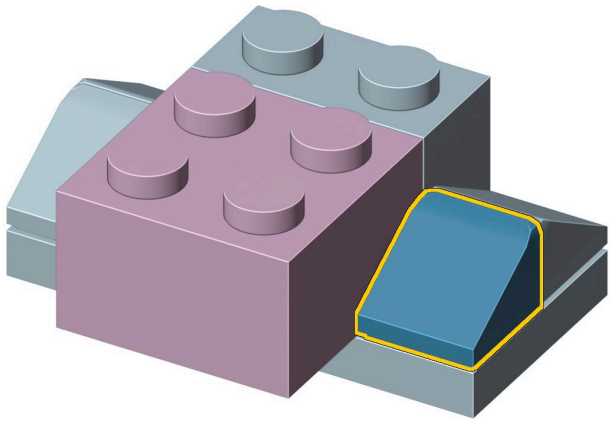

4

2x

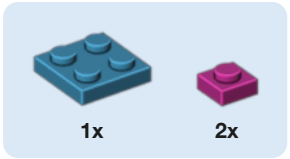

The back of the feet: two more, falling backward

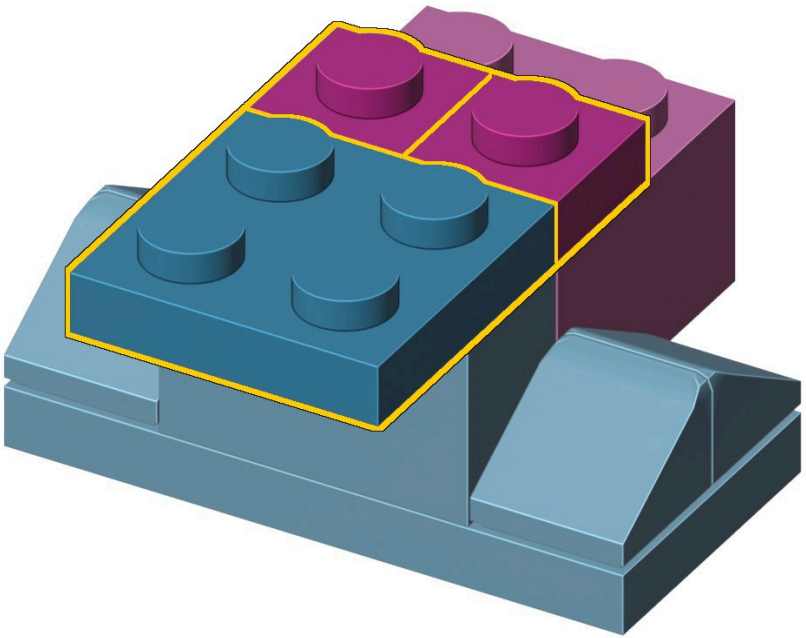

From behind: the outlined piece.

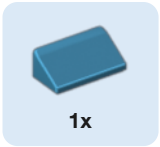

5

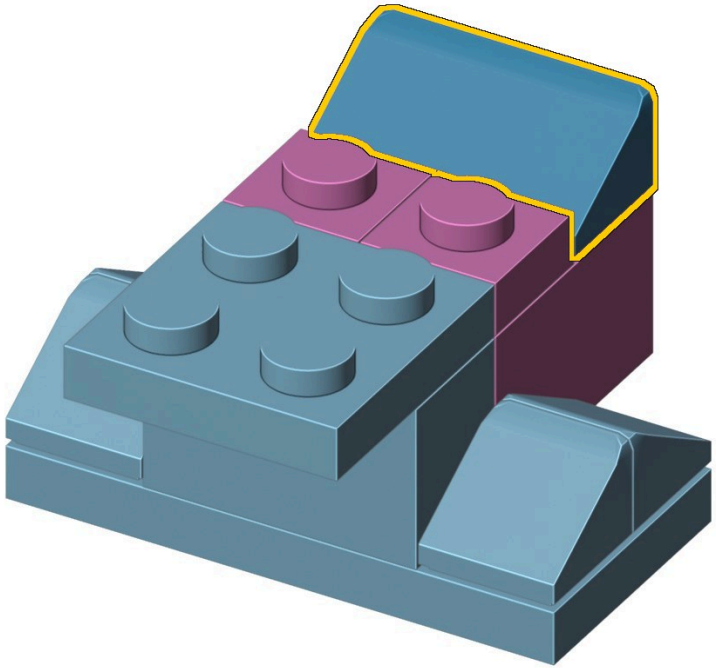

A 2 x 2 plate on the blue brick, reaching forward, and two 1 x 1 plates behind it

6

The tail: a slope on the back studs, its high edge behind

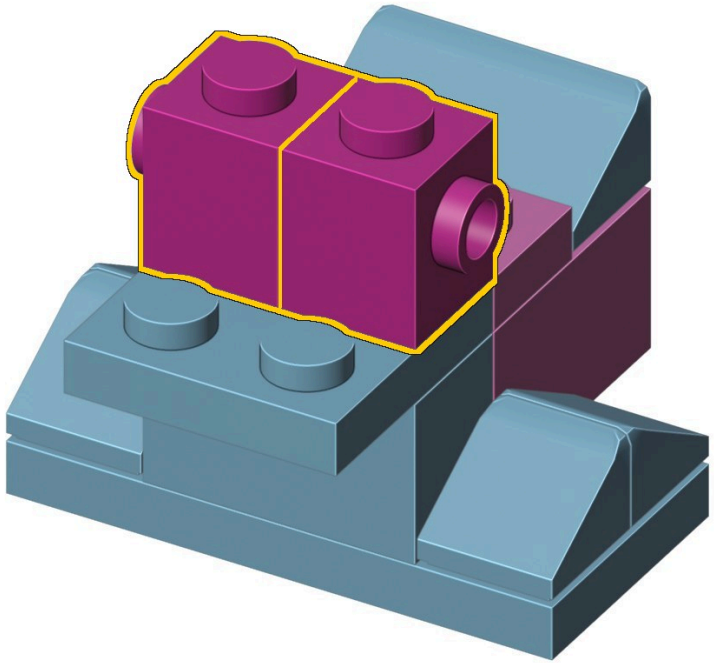

7

2x

The head: two bricks with a stud on the side, studs facing out

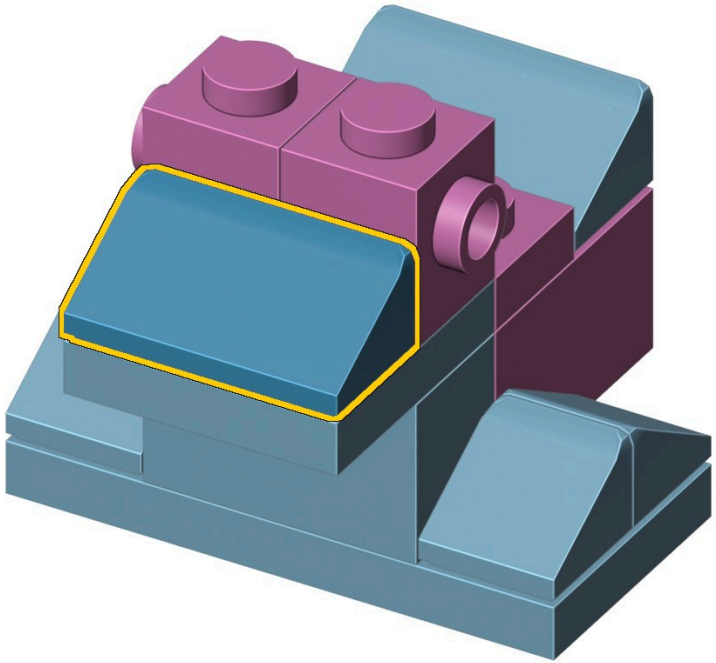

8

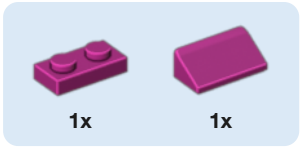

1x

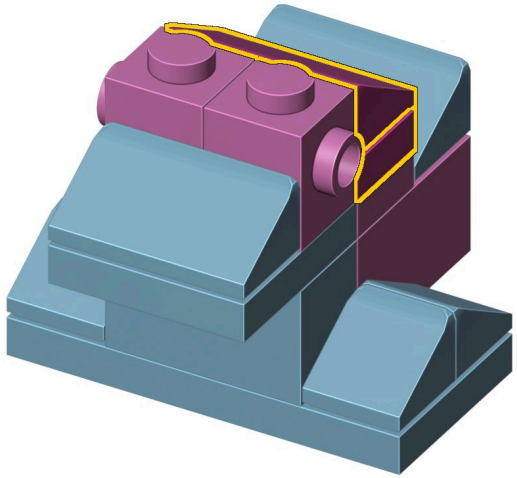

The beak: a slope in front of the head, falling forward

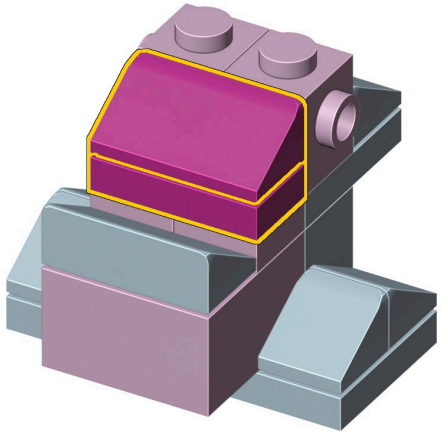

9

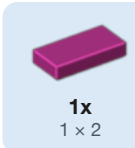

Behind the head: a 1 x 2 plate, and a slope falling backward

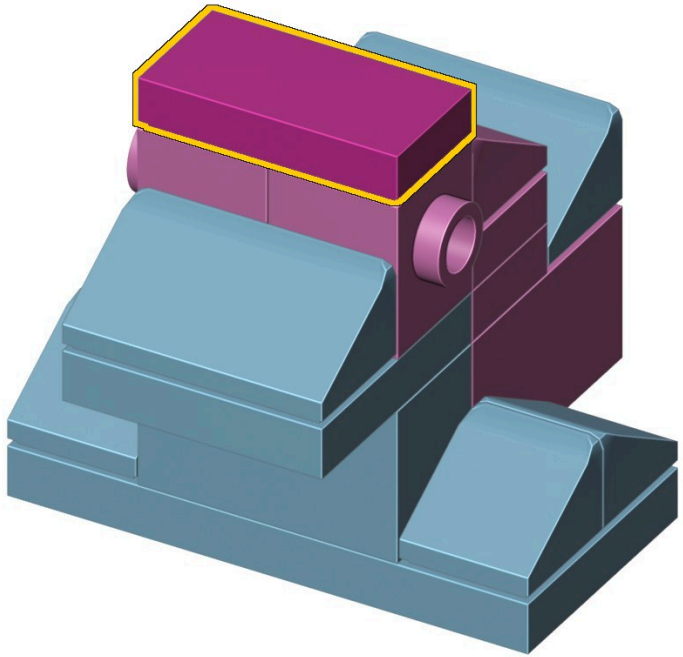

From behind: the outlined pieces.

10

A tile on top of the head

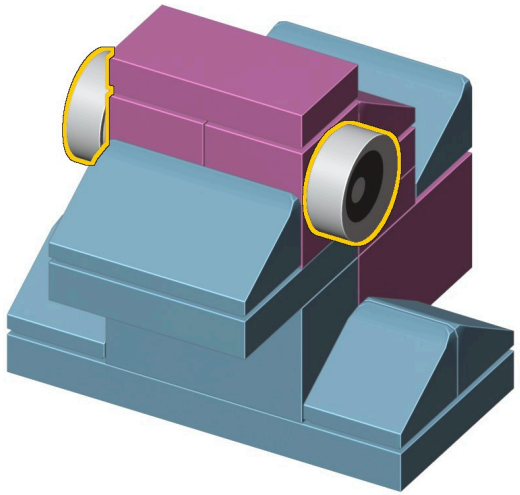

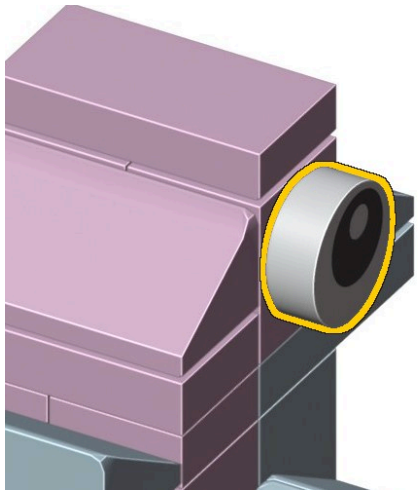

11

2x

The eyes: one on each side

From behind: the outlined piece.

Parts inventory

About this model

Porygon, small enough to sit on a fingertip: start with the blue plate and the two bricks of its body, give it its feet, then build up through the chest to the tail, the head and the beak. The tile on top and the two eyes go on last.

Checked on a computer

PASS	**real elements**	12 part/colour combinations: 0 not real, 0 rare
PASS	**connections**	26 connections (26 stud); 1 separate piece(s)
PASS	**collisions**	0 overlapping pair(s) among 19 parts
PASS	**buildability**	18 insertions tried across 1 submodel(s); 0 problem(s)
PASS	**stability**	about 9 g; centre of mass inside the base (99% margin); tips at 32.4 deg
PASS	**mechanism**	no moving parts defined
PASS	**electrics**	no electrics in this model
PASS	**technique**	0 note(s)

Not yet built with real bricks

These checks catch most mistakes a designer can make, but not all: clutch power, part tolerances, how stiff a long axle is and how the model survives handling can only be judged with real bricks. If you build it, we would love to hear how it went.

Files

3D model (LDraw, opens in BrickLink Studio, LeoCAD and LDCad), parts lists for BrickLink and LEGO Pick a Brick, and an interactive 3D viewer: **bricks.vhsgarage.com/m/porygon**
